Offg. Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE.

NOTIFICATIONS.

ACCOUNTS, &C.

PUBLIC DEBT.

Calcutta, the 7th January, 1888.

No. 96.

RESOLUTION—By the Government of India, Department of Finance and Commerce.

In accordance with the provisions of the Indian Securities Act, XIII of 1886, the Governor General in Council is pleased to make the following rules under section 14 of the Act:—

1. Interest cages, shewing the several half-years at which interest will accrue, shall be imprinted on the reverse of each new note issued, and payment shall be recorded by the stamp of the Disbursing Office, or by a manuscript entry, over the space apportioned to the half-year concerned. If payment be made at a Presidency town, the recording entry shall shew the Presidency and the date and number of the issuing warrant, which shall be in the form of a negotiable instrument payable to the holder's order. But if payment be made at a District Treasury, the recording entry shall shew the name of the Treasury, the number borne by the payment voucher, and the date of payment; this entry shall be authenticated by the initials of the Treasury Officer, and the holder's receipt shall be taken on the face of the payment voucher. If, however, the note be of the old form, and bear no interest cage, the holder's endorsement for interest will be required on the note itself, and payments will be authenticated by the Disbursing Officer under the endorsement as heretofore.

2. Under the preceding rule, interest cages shall be imprinted, and (in the case of notes in the old form) holder's endorsements for interest shall be written only on the back of the note itself.

3. If the note be of the old form and bear no interest cage, the holder's endorsement for interest should agree letter for letter with the name in the body of the note, or in the transferring endorsement, as the case may be; the usual signature may be added below.

4. An endorsement or receipt by a native female must be attested by the signatures of at least two respectable witnesses, who must attend before the Officer in charge of the Treasury where interest is payable, and certify to the genuineness of the endorsement or receipt.

5. Notice of any private trust in an endorsement or receipt for interest is inadmissible.

6. A note blank endorsed by the holder is not receivable at any Government Treasury or at the Public Debt Offices in the Presidency towns. The holder of any such security will therefore be required to specially endorse the same before submitting it for payment of interest.

7. The holder of a note may be required to receipt the same for renewal in all or any of the following cases, that is to say :—

- (1) If the note has been enfaced for payment of interest at a Mofussil Treasury, and the holder thereof is desirous of altering the place of payment.
- (2) If only sufficient room remains on the back of the note for one further endorsement, or when any word or words is or are written upon the note across any existing endorsement or endorsements, all cross endorsements being strictly prohibited.
- (3) If the note is torn or in any way damaged or crowded with writing, or unfit, in the opinion of the officer before whom it is produced for payment of interest, for receiving endorsement.
- (4) If, in the opinion of such last-mentioned officer, the title of the person presenting the note for payment of interest is irregular or not fully proved.
- (5) If the note in question, being a counterpart note issued under the provisions of Rule 8, has ceased to be the property of a minor, or to belong to an estate in which administration is limited to interest.

In all or any of the preceding cases payment of any further interest on such note may be refused until the note is receipted for renewal and actually renewed.

8. In the case of any note which is the property of a minor or belongs to an estate in which administration is limited to interest, the Public Debt Office at Calcutta may, upon such note being deposited with them, issue to the holder of such note a counterpart thereof having the words "counterpart not negotiable" stamped across the face thereof, and further payments of interest may be recorded upon such counterpart. Whenever such note shall cease to be the property of a minor, or shall cease to belong to an estate in which administration is limited to interest, the further payment of interest in respect of the note may be refused, until the first or any subsequent counterpart (as the case may be) issued in respect of it has been receipted and renewed in the manner provided in the last preceding rule. Upon such counterpart being receipted and renewed as aforesaid, the same, together with the original note and any preceding counterpart issued in respect thereof, will be cancelled.

9. No payment of interest and no record or acknowledgment of the payment of interest and no issue of a counterpart note under the preceding rules is to be deemed or taken to be an acknowledgment of the title of the holder of any note.

10. The following fees are payable in respect of applications under sections 11 and 12 of the Act :—

For each renewed or duplicate security, 4 annas per cent. if the new note does not exceed R100, and R1 if the new note exceeds that sum.

11. A note tendered for renewal must be receipted on the reverse as follows :—

"Received in lieu hercof a renewed note in the name of _____,
with interest payable at _____"

Signature of holder."

12. If a person tendering a note for renewal applies for more than one note in lieu of the note tendered, the latter must be receipted on the reverse as follows, or as near thereto as circumstances will admit :—

"Received in lieu of the within two (or more) notes for R _____,
respectively in the name of _____, with interest payable at _____"

Signature of holder."

13. If a person tendering more than one note for renewal applies for one consolidated note in lieu of the notes tendered, the latter must be receipted as follows, or as near thereto as circumstances will admit :—

“Received in lieu of the within a new note in the name of _____ for
 R _____ by consolidation with Promissory Note or Notes
 Nos. _____ (mentioning the numbers and amounts of the other
 notes desired to be consolidated with it) with interest payable
 at _____

Signature of holder.”

14. The form of receipt mentioned in the foregoing rules must be very clearly and correctly written, and there must be no ambiguity as to the name of the payee of the new note. The holder's signature should agree letter for letter with the name in the body of the note, or in the transferring endorsement, as the case may be; the usual signature may be added below.

15. The holder of any note requiring renewal may procure a renewed note in lieu of his original security in any of the following ways; that is to say, he may present it duly receipted either in person or through a representative at—(1), Public Debt Office, Bank of Bengal, Calcutta; or (2) at a Government Treasury for transmission to that office; or (3), at the Banks of Madras and Bombay, who, as Agents of the said Bank of Bengal, may either renew such notes on their own responsibility, or may forward them to the said Public Debt Office, Bank of Bengal, for renewal. In the case of notes presented direct to the said Public Debt Office, Bank of Bengal, or transmitted to it for renewal, either through a Government Treasury or the Bank of Madras or of Bombay, the prescribed officer referred to in section 11 of the said Act shall be the Secretary, Bank of Bengal, for the time being; and in the case of notes presented for renewal at the Bank of Madras or of Bombay, and renewed by those Banks on their own responsibility, such officer shall be the Secretary of the Bank of Madras or of the Bank of Bombay, for the time being, as the case may be.

16. The officer referred to in section 12, sub-section (1), of the Act, shall be the Comptroller General for the time being.

17. The loss or destruction of a Promissory Note shall be notified, in the first instance, by letter addressed to the Bank of Bengal, Public Debt Office, Calcutta; such letter shall contain the following particulars:—

- (1) Particulars of the note according to the following form :—
 Promissory Note for R _____, No _____, of the _____ per cent.
 loan of _____
- (2) Last half-year for which interest has been paid.
- (3) To whom paid.
- (4) Name of the person in whose name the note was issued (if known).
- (5) Particulars of coupons attached (if any).
- (6) Where enfaced at present.
- (7) The circumstances attending the loss.
- (8) Whether the loss was reported to the Police.

The above letter shall be accompanied by—

- (a) The Post Office registry receipt for the letter containing the note, if the same was lost in transmission by post.
- (b) The Police report, if any can be obtained.
- (c) A letter signed by the Officer of the Treasury or Presidency Bank where interest was last paid, certifying the last payment of interest made on the note, and to whom, if interest was paid out of Calcutta.
- (d) If the applicant is not the last registered holder, all documentary evidence necessary to trace back the title to the last registered holder.
- (e) Any portions or fragment which may remain of the lost or destroyed note.

A duplicate of the letter to the Public Debt Office, Calcutta, must also be sent to the Treasury where interest is payable.

18. The loss or destruction of a Promissory Note shall be further notified by an advertisement, which the applicant for a duplicate note shall cause to be inserted in three successive issues of the *Gazette of India*, and of the Local Government Gazette of the place where the loss or destruction occurred. Such notification shall be in the form following, or as near thereto as the circumstances will admit:—

Lost or destroyed (as the case may be).

The Government Promissory Note No. _____, of the _____ per cent. loan of _____, for Rs _____, originally standing in the name of _____, and last endorsed to _____, the proprietor, by whom it was never endorsed to any other person, having been lost or destroyed, notice is hereby given that payment of the above note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, Calcutta, and that application is about to be made for the issue of a duplicate in favour of the proprietor. The public are cautioned against purchasing or otherwise dealing with the abovementioned Security.

*Name of the Advertiser—
Residence—*

19. At the expiration of six months from the date of the insertion of the last advertisement, the Comptroller General shall, if satisfied of the loss or destruction of a portion of a note, and of the justice of the claim of the applicant, and if a sufficient portion for the identification of the note so lost or destroyed shall have been produced, direct the Public Debt Office, upon the execution of such bond of indemnity as is hereinafter mentioned, to issue to the applicant a duplicate note in lieu of that so lost or destroyed as aforesaid. If, however, no portion or no sufficient portion of the note so lost or destroyed shall have been produced as aforesaid, then, at the expiration of two years from the date of the insertion of such last advertisement, the Comptroller General shall, if satisfied as aforesaid, pass an order directing the Public Debt Office, upon the execution of such bond of indemnity as is hereinafter mentioned, to pay the applicant interest in respect of the note so lost or destroyed pending the issue of a duplicate note and also directing the said Public Debt Office, at the expiration of six years from the date of the publication of the list in which the lost or destroyed security is first mentioned, if no reason to the contrary appear, to issue to the applicant (on his executing and procuring the execution by two sureties of such indemnity bond as is hereinafter mentioned, should the same be deemed necessary by the Comptroller General), a duplicate note in lieu of that so lost or destroyed as aforesaid.

20. The Comptroller General may, within six years of the date of an order passed by him under Rule 19, if he finds sufficient reason, alter or cancel such order, and may also require that the interval before the issue of a duplicate note be extended to twelve years, or such shorter period not being less than six years, as he may think fit.

21. Indemnity bonds when taken on the issue of a duplicate note or notes shall be for twice the amount of such note or notes, and when taken on the issue of orders for payment of interest shall be for twice the amount of the interest involved, that is to say, twice the aggregate amount of all back interest accrued due on the note, *plus* twice the amount of all interest to accrue due thereon, during the six years which will have to elapse before the issue of a duplicate note can be made. In simple cases such bonds may be issued by the Comptroller General at Calcutta in a printed form prescribed by Government. No fee will be chargeable if a bond does not exceed in amount Rs500; but on bonds for higher amounts a fee of Rs5 for every Rs1,000 or part of Rs1,000 will be charged, provided that no fee for any one bond so issued shall exceed in amount Rs30. If, however, the Comptroller General consider that the circumstances of the case demand that a bond shall be specially prepared by the Government Solicitor, a fee of Rs32 shall be payable to that officer.

22. The list of securities lost or destroyed, referred to in section 12 (3) of the said Act in respect of which an order is made for payment of interest pending the issue of a duplicate security, or for the issue of such duplicate

security, shall be advertised half-yearly in the *Gazette of India* in the months of January and July, or as soon afterwards as may be convenient. All securities in respect of which an order has been passed as aforesaid shall be included in the first list published next after the passing of such order, and shall continue to be advertised every half-year until the expiration of six years from the date of first publication, or from the date of the last payment of interest on the original securities, whichever is the later date. Such list shall contain the following particulars, *viz.*, the name of the loan and number of the lost note, its value, in whose name it was issued, from what date it bears interest, the name of the claimant for a duplicate, the number and date of the order passed by the Comptroller General for payment of interest or issue of a duplicate, and the date of publication of the list in which such security was first mentioned.

ORDER.—Ordered that this Resolution be communicated to the several Local Governments and Administrations, to the Comptroller and Auditor General, and to the several Accountants General and Comptrollers.

Ordered also, that the Resolution be published in the *Gazette of India* for the information of the public.

LEAVE AND APPOINTMENTS.

The 3rd January, 1888.

No. 1.—In continuation of the Notification of this Department, No. 6784, dated the 23rd December, 1887, the following provisional appointments are notified :—

With effect from the 21st November, 1887—

Mr. R. Logan, Under-Secretary to the Government of India, Department of Finance and Commerce, to be Enrolled Officer, class II ;

Mr. J. F. Finlay, Enrolled Officer, class III, to be Under-Secretary to the Government of India in the Department of Finance and Commerce ;

Mr. O. T. Barrow, Enrolled Officer, class IV, to be Enrolled Officer, class III ; and

Mr. C. J. Weir, M.C.S., to be Enrolled Officer, class IV.

The following grade reversions of Officers of the Account Department in December, 1887, are also notified :—

With effect from the 11th December, 1887, in consequence of the return from privilege leave of Mr. H. Oung—

Mr. W. H. Egerton to cease to officiate as Enrolled Officer, class V, and to revert to his substantive appointment as Enrolled Officer, class VI.

Mr. K. B. Wagle to cease to officiate as Enrolled Officer, class VI, and to revert to his substantive appointment as Probationer, class VII.

With effect from the 17th December, 1887, in consequence of the appointment of Mr. E. I. Sinkinson to officiate as Secretary to the Government of India in the Department of Finance and Commerce—

Mr. E. T. Atkinson to revert to his substantive appointment as Accountant General, class I ; and

Mr. H. F. Clogstoun to cease to officiate as Accountant General, class I, and to revert to class II.

The 6th January, 1888.

Charts of the Bay of Bengal and adjacent sea north of the equator, showing the specific gravity, temperature and currents of the sea surface. Rs. 8.

JOHN ELIOT,

Offg. Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat ; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm ; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows :—

Terms of subscription, payable annually in advance.		
For the complete Series, including postage	Without postage.	With postage.
Rs. 22 8		
For the Calcutta Series	Rs. 10 0	Rs. 12 0
„ each of the Madras, Bombay and Allahabad Series.	„ 6 0	„ 7 0
„ a part of the Calcutta Series purchased separately, inclusive of postage in India	„ ...	„ 2 0
„ a part of the Madras, Bombay and Allahabad Series purchased separately, inclusive of postage in India	„ ...	„ 1 0

Persons desiring to subscribe for, or purchase, the Report, should apply to—

Messrs. Thacker, Spink and Co., Calcutta.

„ Thacker & Co., Bombay.

„ Higginbotham & Co., Madras.

The Government Central Book Depot, Bombay.

„ The Curator of Government Books, North-Western Provinces and Oudh.

„ Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1885 should be at once remitted.

NOTICE.

PART VI.

Debates of the Legislative Council of His Excellency the Governor General.

GOVERNMENT OF INDIA.
LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR
GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING
LAWS AND REGULATIONS UNDER THE PROVISIONS OF
THE ACT OF PARLIAMENT 24 AND 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 6th January, 1888.

PRESENT :

His Excellency the Viceroy and Governor General of India, K.P., G.C.B.,
G.C.M.G., G.M.I.E., P.C., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, Bart., R.A., V.C., G.C.B., G.C.I.E.
The Hon'ble Lieutenant-General G. T. Chesney, R.E., C.B., C.S.I., C.I.E.
The Hon'ble A. R. Scoble, Q.C.
The Hon'ble Sir C. U. Aitchison, K.C.S.I., C.I.E., LL.D., D.O.L.
The Hon'ble Sir C. A. Elliott, K.C.S.I.
The Hon'ble J. Westland.
The Hon'ble Syud Ameer Hossein, C.I.E.
The Hon'ble Rájá Peári Mohan Mukerji, C.S.I.
The Hon'ble W. S. Whiteside.
The Hon'ble J. W. Quinton, C.S.I.
The Hon'ble R. Steel.
The Hon'ble F. M. Halliday.

DEBTORS BILL.

The Hon'ble MR. SCOBLE moved that the Hon'ble Sir Charles Aitchison and the Hon'ble Sir Dinsha Manekji Petit be added to the Select Committee on the Bill to amend the law relating to Imprisonment for Debt.

The Motion was put and agreed to.

INDIAN PORTS ACT, 1875, AMENDMENT BILL.

The Hon'ble MR. WESTLAND moved that the Hon'ble Mr. Halliday be substituted for Sir W. W. Hunter as a Member of the Select Committee on the Bill to amend the Indian Ports Act, 1875.

The Motion was put and agreed to.

CIVIL PROCEDURE CODE, &c., AMENDMENT BILL.

The Hon'ble MR. SCOBLE moved that the Hon'ble Mr. Evans be added to the Select Committee on the Bill to amend the Code of Civil Procedure and the Indian Limitation Act, 1877.

The Motion was put and agreed to.

INVENTIONS AND DESIGNS BILL.

The Hon'ble MR. SCOBLE also moved that the Hon'ble Sir Charles Elliott and the Hon'ble Rájá Peári Mohan Mukerji be added to the Select Committee on the Bill to consolidate and amend the law relating to the Protection of Inventions and Designs.

The Motion was put and agreed to.

INDIAN STAMP ACT, 1879, AMENDMENT BILL.

The Hon'ble MR. WESTLAND moved that the Hon'ble Mr. Steel and the Hon'ble Sir Dinsha Manekji Petit be added to the Select Committee on the Bill to amend the Indian Stamp Act, 1879.

The Motion was put and agreed to.

POLICE BILL.

The Hon'ble SIR CHARLES AITCHISON moved that the Hon'ble Sir Charles Elliott be added to the Select Committee on the Bill to amend the law relating to the Regulation of Police.

The Motion was put and agreed to.

The Council adjourned to Friday, the 20th January, 1888.

S. HARVEY JAMES,
Secretary to the Govt of India,
Legislative Department.

SUPPLEMENT TO
The Gazette of India.

No. 1.}

CALCUTTA, SATURDAY, JANUARY 7, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may be usefully or made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately in a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.
 HOME DEPARTMENT.

The following letter is published for general information :—

DISCIPLINE AND MORAL TRAINING IN INDIAN SCHOOLS AND COLLEGES.

No. ¹⁰ 382-91 (Education), dated Calcutta, the 31st December 1887.

From—A. P. MACDONNELL, Esq., Secretary to the Government of India,
 To—All Local Governments and Administrations.

The Government of India has, in the communications marginally noted, called the attention of Local Governments and Administrations to various recommendations made by the Education Commission for improvement in the system and methods of school and collegiate education. The Government of India is glad to believe that these recommendations are everywhere receiving their due share of attention, and that progress is being steadily made in the direction marked out by the Commission. Hitherto, however, attention has not been specially invited by the Government of India to those portions of the Commission's Report which deal with the subjects of discipline and moral training in schools and colleges; and as no subjects connected with education are more important in the general interests of India or in the interests of students themselves, His Excellency the Governor General in Council considers the time opportune for recommending them to the consideration of Local Governments and Administrations.

2. The question of discipline in public schools and colleges does not seem to have hitherto received any comprehensive consideration apart from the discussion of the subject by the Education Commission.

It is only within comparatively recent times that the Government has come to deal with public instruction on the present wide scale, its first efforts having been directed more towards supplying a course of literary instruction for a few students of exceptional ability than towards the wholesale dissemination of Western learning. It thus came to pass that the want of a standard of discipline in our Indian public schools and colleges was not at first felt; it became manifest only in more recent years with the ever growing demand for education according to European principles and of a purely secular character.

3. It cannot be denied that the general extension in India of education on these principles has in some measure resulted in the growth of tendencies unfavourable to discipline and favourable to irreverence in the rising generation. Such tendencies are probably inseparable from that emancipation of thought which is one of the most noticeable results of our educational system. But though inevitable under the circumstances of this country, they are nevertheless, it will be admitted, tendencies which need control and direction, so far as control and direction can be supplied by a judicious system of scholastic discipline and of such moral training as our policy of strict neutrality on religious matters enables us to apply.

4. In considering the application of such discipline and training to the facts of our Indian educational system, the first thing we have to do is to clearly define the standard of discipline at which we propose to aim. It would seem that the only standard to which it is possible to appeal in connexion with public schools and colleges in India is that recognized in the highest class of schools and colleges in England. Indigenous education furnishes no traditions which can be referred to for guidance in such matters. In the indigenous schools of early India, grotesque and ill-proportioned punishments established relations between teachers and pupils which were wanting in dignity; while in Sanskrit seminaries the question of discipline did not in practice arise owing to the sacred character of the writings that were studied, the veneration for teachers which they inculcated, and the acts of submission and reverence that were exacted in all the relations of pupil to teacher.

There is no reason to fear that the English standard of discipline will be found deterrent by its severity. English education is now established upon so firm a basis in India, and its advantages as leading to a career in life are so generally recognized, that the Government can look confidently for support in introducing reforms, which have for their object the elevation of the tone of colleges and schools and the training of the present generation of students to those habits of self-respect which find expression in submission to authority, temperate language, and deference to the judgment of those older than themselves. The English public schools and universities aim, not merely at training the faculties of men for the acquisition of knowledge, but also at producing a distinct type of character well adapted for the uses of actual life. In various ways they attempt to teach practical wisdom, and there is every reason to expect that a closer approximation to their methods of education may result in fitting the members of similar institutions in India to take a useful part in social business of all kinds. Self-reliance can only spring from self-control, and self-control can be best taught by a system which looks beyond mere knowledge, and demands from those who come under it the exercise of their powers of moral judgment and of steady co-operation towards the higher aims of the institution to which they belong.

5. In considering what are the actual measures which the occasion demands, it is desirable, in the first place, to refer to the remarks which the Education Commission make upon the subject of discipline

and moral training in schools. The following passages from their report are therefore reproduced here for facility of reference :—

Physical Training.—We have given an account of the intellectual training provided under various standards in the public primary schools of India. We have now to enquire what steps are taken to promote the physical and moral well-being of the children. In Bombay and the Central Provinces especially gymnastics and drill have been introduced as part of the school routine, and school-masters are taught gymnastic exercises as part of their training. In Bengal, the opportunity of boys being collected for central examinations is often taken to encourage athletic contests and to reward success in physical exercises. In the rest of India less systematic attention is paid to the subject We consider that a regular course of physical exercise would have specially good effect upon the minds and bodies of most Indian students. We, therefore, recommend *that physical development be promoted by the encouragement of native games, gymnastics, school drill, and other exercises suited to the circumstances of each class of school.*

Moral Training.—Much has been said in the evidence and the memorials before us regarding the importance of moral teaching. There is a widespread feeling, especially in the Punjab, that something should be done to promote the development of the science of right and wrong in the minds of scholars of all grades. Some have advocated the preparation of a moral text-book; others of a manual for the guidance of masters; whilst others, again, think that the object will be more surely gained by introducing lessons having a moral bearing into the ordinary reading-books Undoubtedly they (text books) offer one means of conveying moral teaching to pupils. But even where their importance is recognized, we doubt whether the teachers take sufficient advantage of any opportunities open to them of instilling moral principles and habits into the minds of their pupils It is, of course, impossible to secure that every teacher shall be a man of such moral character as to lend weight to his precepts. But the inspection of a school should, at any rate, include a careful enquiry whether the boys have had their attention directed to the moral significance of the lessons they have read. A simple manual for the guidance of teachers may assist them in this part of their duty; while the knowledge that some enquiry will be made by the Inspector will keep the subject before their minds. Nor should the moral value of strict and careful discipline be left out of sight. When a boy knows and keeps his proper place in the school, he will be in some degree trained to keep it in the world also. Manners afford some indication of moral training, and should on no account be regarded as beyond the teacher's care. It appears that a good deal of what is sometimes described as moral deterioration in Indian school boys is in reality a departure from the gentle and respectful manners of old times On the whole, though no general measure can secure moral training in primary schools, careful and constant attention may have some effect in promoting it. We, therefore, recommend *that all inspecting officers and teachers be directed to see that the teaching and discipline of every school are such as to exert a right influence on the manners, the conduct and the character of the children, and that for the guidance of the masters a special manual be prepared.*

Religious Teaching.—It has already been shown how large a place religious teaching occupied in the course of instruction provided in indigenous schools, both high and low. Even from the essentially secular bazar school in some parts of India religion is not excluded; while the complaint against maktabas has been that they confined their instruction to the Koran. Following a policy of strict religious neutrality, the Despatch of 1854 declared that the system of grants-in-aid should be based on an entire abstinence from interference with the religious instruction conveyed in the school-assisted. Under the application of this stringent rule, aided institutions are at liberty to convey whatever religious or moral instruction they please. But the Court of Directors declared that Government institutions were founded for the benefit of the whole population of India, and that it was therefore indispensable that the education conveyed in them should be exclusively secular Against the strict principle of excluding religious instruction from the school-course various objections were raised and discussed in the Commission. It was urged that in some parts of India no difficulty would arise, because the Government school is attended by children all of whom belong to one religious sect; that part of the policy of transferring the management of primary schools to local committees was to permit of wider and readier adaptation to local wants, which might possibly include a desire for religious teaching; and that, finally, these boards might be trusted not to do violence to religious prejudices or local feelings, or at least that the reservation of a right of appeal from a dissenting minority would secure justice to all. On the other hand, a majority of us considered that religious feeling was so inflammable in India, and sectarianism so prevalent, that it was not safe to depart from a policy which had worked well in the past. The value of religious education was admitted on all sides, but it was hoped that home-instruction and the increase of aided schools to which religious instruction may be freely given would to a large extent minimize the

recognized evil of banishing religion from Government primary schools The Commission by a large majority adopted the following recommendation, *that the existing rules as to religious teaching in Government schools be applied to all primary schools wholly maintained by municipal or local fund boards.* In dissenting from this recommendation, one member of the Commission observed that it must not be implied that the existing rules precluded religious instruction; for, on the contrary, teachers were allowed, in accordance with the Despatches just quoted, to give such instruction in the school before or after the ordinary school-hours, and several instances could be mentioned of teachers availing themselves of this permission especially in the Bombay schools for Muhammadan boys. Another member remarked that religious instruction was especially desirable in girls' schools. The mover of the recommendation, with the assent of his supporters, disclaimed any intention of desiring to alter existing practice, and the recommendation was adopted on this understanding.

Inter-school Rules.—There are other ways in which the mutual relations of schools need to be regulated with care. In towns where there are several schools—and it is only in them that competition need be considered—there is a danger of discipline being injured and the tone of education lowered by too keen a competition for pupils. The desire also that pupils commonly feel to be placed in the highest class they can get admitted to causes considerable danger of their changing their schools so often that steady progress is greatly interfered with. This danger is recognized and some provision made against it in all provinces; but the weak point of all the arrangements at present in force is that they are voluntary or semi-voluntary, and that thus a new manager or head-master who does not feel himself bound by the engagements of his predecessor may introduce confusion at any time Thus the hold of all the head-masters upon their pupils is relaxed, and discipline suffers. It would obviate these dangers if all institutions connected in any way with the Department could be brought to accept a definite set of rules The gain in teaching lessons of steadiness and perseverance to pupils and in improving discipline would be very great. Also—what we value even more—the enforcement of such rules would draw schools under all kinds of management closer together, would make their relations with the Department more intimate, and would tend powerfully to develop the feeling that all schools are working for a common end, and should have no rivalry except in promoting the interests of the entire community. We therefore recommend *that managers of schools in competition be invited by the Department to agree to rules providing, as far as the circumstances of the locality allow, (1) that, except at specified times, a pupil of one school be not admitted to another without a certificate from his previous school; (2) that any fees due to that school have been paid; and (3) that he do not obtain promotion to a higher class by changing his school.*

6. The recommendations which emerge from the preceding remarks of the Education Commission are the following:—

- (a) the introduction of the inter-school rules;
- (b) the opening of play-grounds and gymnasia;
- (c) the prohibition of religious teaching in Government and Board Schools, during school hours, qualified by the injunction that inspecting officers should see that the teaching and discipline in schools are such as to exert a right influence on the manner, conduct, and character of the pupils.

A few words of comment upon each of those recommendations seem called for here.

7. The adoption of rules defining the conditions under which pupils should be allowed to pass from one school to another is, it is understood, in accordance with the practice observed by all schools of high repute in England, and the Governor General in Council has no doubt that great good would follow the introduction in India generally of a well-devised system of rules to that end. The Government of India is aware that in Madras, Bengal, and the North-Western Provinces such a system of rules is now largely enforced, and he understands that where enforced the system is working well; but he has reason to fear that even in the Provinces named many head-masters of schools which have to compete with each other are more careful to attract pupils by indulgence than to subject them to discipline of which they do not understand the tonic value. It seems, therefore, expedient

that measures should be taken to extend the system to all schools in all Provinces aided or supported by public funds as a condition of the continuance of such aid, and to move the Senates of the Universities to use the influence at their command to procure its adoption in schools and colleges which do not receive aid from Government.

8. In regard to the provision of play-grounds and gymnasia, experience in other countries has shown that, not only are they useful in engaging the attention of boys out of school hours, but that they have a direct bearing on the formation of a manly type of character. In some Indian provinces, wherever gymnastics and field games, such as cricket, have been introduced, students have shown great aptitude for those exercises, and there is ground for hope that their recognition as part of a regular course of school training may render the pursuit of them even more popular than it is at present, and effect an improvement in the physique of the rising generation. In order to stimulate proficiency in such exercises, it seems to be well worth considering whether a system of marks and prizes for efficiency in gymnastics should not be everywhere introduced.

In regard to the provision of play-grounds, the action of the Government must of course be limited by financial considerations; but it may be reasonably hoped that in this matter private liberality will not cease to supplement the deficiencies of educational funds. The Government Gazettes bear frequent testimony to the public spirit which finds expression in founding and endowing schools. The foundation and endowment of play-grounds and gymnasia are objects no less worthy of public beneficence.

9. Finally, the recommendation that Inspecting officers should insist upon the maintenance of proper discipline in schools and of a satisfactory method of teaching presupposes the existence of a standard of discipline, which it is the object of the present communication to establish.

10. The preceding recommendations are all that the Education Commission make in connexion with discipline and moral training in schools. A slight consideration of them will shew that good so far as they go, they go but a little way towards the establishment of that standard of discipline of which we feel the want. It is manifest that as a body of rules whose operation will tend to create such a standard, they are insufficient, and need to be supplemented by other rules which, dealing with various phases of school life, will have the effect of creating a healthy tone of feeling, self-restraint, reverence for and submission to authority. Without pretending on the present occasion to prescribe such a standard of discipline, the Governor General in Council considers that the principles on which it should be based may be found in the following directions :—

- (1) the provision of efficient training schools and colleges for teachers, and the employment as teachers only of those who have given satisfaction during a course of training :
- (2) the extension of a system of teaching having a direct bearing upon personal conduct :
- (3) the repression of breaches of discipline in accordance with certain well-defined rules :
- (4) the introduction of conduct registers :
- (5) the extension of the hostel or boarding-house system to the fullest extent that the public finances or private liberality will permit :
- (6) the introduction of a system of monitors to be made responsible for the conduct of the scholars while in and as far as possible while out of school :

(7) the exclusion from school of boys who have not reached a certain class by a certain age.

11. In regard to the first of these suggestions, it is unquestionably true that a good moral tone is, in the first place, best acquired by a school boy insensibly from his family; in the second place from his teachers, and in the last place (which is indeed the consequence of the other two) from the public opinion of the school-boy world in which he moves. Over the home life of the school boy or student we can directly exercise but little appreciable influence; but the conviction that it makes entirely for good should not induce us to spare any effort or lose any opportunity of moulding his character during school hours. From this point of view, the provision of good teachers is of the greatest importance to the well-being of the country, and the signal successes which in India have attended the instruction and training imparted by many devoted and accomplished teachers, whose names it is unnecessary to mention, prove that the school can be made a no less effectual nursery of morality than of mere literary knowledge. But His Excellency in Council is afraid that in recent times the importance of the careful selection of teachers has not been always fully appreciated; and that in public schools the character of the head of the school with respect to the healthy influence which he is likely to exercise over the boys and his power of moulding their character is not, as it should be, regarded as a most essential qualification for the post. His Excellency in Council also fears that the facilities for training teachers for the various classes of schools have not received in some provinces that measure of attention which the subject so well deserves, and that grants-in-aid are sometimes given to schools managed by other than well qualified teachers. These are matters to which he would invite serious attention. No money is better spent than that allotted to the support of efficient training schools and colleges for teachers, and money is not well spent if granted to schools presided over by untrained and incompetent teachers in which discipline and moral training are relegated to a secondary place. The Governor General in Council is of opinion that in the truest interests of education the cost of providing thoroughly good training schools and colleges for teachers of English as well as of vernacular schools should be regarded as a first charge in the educational grant; and that any province which is now unprovided with institutions suitable for the effectual training of the various classes of teachers required should take measures by retrenchment, if necessary, to establish the requisite training institutions. Until training schools and colleges established in this country succeed in supplying trained native teachers in sufficient numbers and of the requisite quality, it is worth while considering whether for the position of head-masters of the more important schools it might not be desirable and consistent with native feeling to make the sphere of selection wider than it at present seems in practice to be. It might be often found desirable to engage trained head masters from England for a definite period of, say, five or seven years who would introduce and establish a tone and system of discipline which other schools might emulate.

12. Although attention should be, in the first place, given to the provision of really competent teachers, example being better than precept in forming the tone of a boy's mind, still precept should not be overlooked. In aided schools religious instruction may of course be freely given and the Governor General in Council would be sincerely glad if the number of aided schools and colleges in which religious instruction is prominently recognized were largely increased. It is in this direction that the best solution of this difficult problem can be found. Even in schools supported by the State something in the way of religious instruction can be effected out of school hours in

accordance with established principles. But in addition to this, something more should in the opinion of the Government of India be now attempted. It was one of the recommendations of the Education Commission "that an attempt be made to prepare a moral text-book based on the fundamental principles of natural religion"; and although the Government of India at the time did not seek to enforce that recommendation, the Secretary of State was of opinion that it should not be altogether ignored, and His Lordship in a recent despatch, of which a copy is forwarded herewith, desires that this matter be now seriously taken up. The Secretary of State's wishes on this point coincide with the plan which His Excellency in Council has been for some time considering and the time has now arrived for giving effect to it. It is believed that in some provinces the school books now in use contain a variety of moral lessons of a non-sectarian character, which in the hands of competent teachers might on suitable occasions be made the text of explanations and illustrations. But in other Provinces the books in use are either not of this description, or they are ill-adapted for the object in view. In all cases it is desirable to review the text-books now in use in the light of the Secretary of State's despatch and to recast them possibly with the view of introducing into them extracts from the various great writers who have dealt with the question of personal conduct in its various aspects. The influence of a text-book so compiled will be all the greater, as the invaluable quality of literary merit, which would probably be wanting in a book written for the occasion, would be secured. The establishment of select school libraries of choice books may also have a good effect in providing the boys with wholesome general literature. On this matter of the best way of giving effect to the wishes of the Secretary of State and the Government of India, I am to invite an early expression of ^{(the} your) opinion ^{(of His Excellency the Governor in Council} ^(of His Honour the Lieutenant-Governor, &c.).

13. Returning to the question of moral instruction and the recommendations of the Education Commission in regard to it, I am to observe that no duty should be performed by Inspecting officers with greater care and thoroughness than the duty of seeing that the teaching and discipline in the school is "calculated to exert a right influence on the manners, the conduct, and the character of the children." To this department of a teacher's duty special attention is now paid in the United Kingdom and to the orders in force there attention might with much advantage be paid in India. "My Lords," says an important circular* from the Council of Education addressed to Her Majesty's Inspectors of Schools, "are anxious "that you should lose no suitable opportunity of impressing upon "both managers and teachers the great responsibility which rests upon "them, over and above the intellectual teaching, in regard to the moral "training of the children committed to their charge. You will express "your special approbation of all schools where, from the knowledge "which you have gained by repeated visits, you observe that a high "moral tone is maintained; you will not fail to enlarge upon the Article "(19a.) in the Code respecting discipline, as showing the interest taken "by Parliament and by their Lordships in this all-important subject; "and where it is not satisfactorily attended to, you will not hesitate to "recommend a reduction of the grant. You will, in the spirit of the "Article, urge the managers to do all in their power to secure that the "teachers maintain a high standard of honesty, truth, and honour in "their schools, and that they not only inculcate upon the children the "general duty of consideration and respect for others, but also the "special duty of obedience to, and reverence for, their parents;

* and also to encourage such training in schools, in matters affecting "their daily life, as may help to improve and raise the character of

“their homes.” It is in this spirit and with this object that the Governor General in Council would have teachers in Indian Schools and Colleges direct their teaching, so far as may be, and it is with a view to bring about such a desirable result that I am now to commend the subject to ^(the)_(your) early and earnest attention [of the Government of ____]. This is, I am to add, a phase of the educational question to which the attention of Local Boards and Municipal Committees, who are now entrusted with responsible functions in educational matters, should be specially invited.

14. In regard to the question of punishments for breaches of school discipline, the chief object to be aimed at should be that the punishment should fall on the offender, and not, as it would appear is now frequently the case, on the offender's parents. Wherever in Indian schools moderate corporal chastisement is a recognized method of school punishment, the question presents no serious difficulty. But when the age of the student or the tone of local public feeling upon the point renders the infliction of corporal chastisement open to objection, the question is beset with more difficulties. A fine affects the unoffending parents instead of the offending pupil. It is perhaps impossible altogether to avoid fines, specially in case of the more advanced boys; but, as a general rule, fines do not seem to be an appropriate method of enforcing school discipline. Imposition of tasks, deprivation of privileges, a judicious use of the rod (when local feeling permits its use) in the case of young pupils, and finally expulsion in cases of persistent and aggravated misconduct—these seem to be the chief methods of punishment for breaches of discipline available to head masters. With these remarks the Government of India is content to leave the matter to the judgment and discretion of Local Governments.

15. But methods of school punishment are matters of very secondary importance compared with methods of bringing out and strengthening the impulses for good which predominate in youthful minds. It is here, far more than in the maintenance of discipline, by means of punishments, that a really good head master makes his influence felt. Nothing should be left untried, which tends to the development of these healthy impulses, and the result should be periodically recorded in good conduct registers. With reference to the adoption of good conduct registers, all that seems necessary to suggest is that a form of conduct register should be prescribed, extracts from which should be sent to the parents or guardians of the boy concerned at stated intervals, and it might be found convenient to exhibit in it the stage of progress attained in each branch of study. The entry regarding general conduct should be filled in by the head master, and should represent his opinion of the boy's moral character and behaviour, based upon his personal observation and the reports of his subordinates. At the year's end prizes should be allotted for good conduct of such value as to make them objects of eager competition.

In order to enable the head master to keep up his personal knowledge of all boys in the school, it is worth considering whether a practice under which each class appears periodically before the head master should not be adopted in schools where it is not already the practice.

In this connexion it may also be suggested that measures might be taken to provide that in filling up appointments in Government offices, special regard shall be paid to the entries in the conduct register. At present applicants for such appointments frequently produce certificates of character given with reference to the appointments sought. Under the system now suggested, disorderly conduct during the closing years of school career would seriously affect the candidate's prospects of obtaining official employment after leaving school, and no

doubt private employers would not be slow to follow the example set by Government in this respect.

16. The fifth suggestion, namely, the establishment of hostels or boarding houses, by which students who are strangers in large towns or cities may be saved from the pitfalls which surround them, and may be made amenable to something like home discipline, needs no recommendation here. The advantages of well-managed boarding houses, especially in the large cities and towns, must be manifest to all who consider the subject. No greater benefit could be conferred on the students attending our larger schools and colleges than the establishment of attached boarding-houses and compulsory residence therein. The provision of such houses should be earnestly recommended to the liberality of the public, and when provided, the enforcement in them of a high standard of morality and discipline should be a subject of the watchful care to the Local and Educational Authorities. It need hardly be pointed out that an ill-managed boarding-house in a large town might easily become a hot-bed of evil.

17. The appointment of selected boys from the higher class of school to be monitors for the purpose of maintaining proper discipline during, and as far as possible out of, school hours, for reporting breaches of rules, and generally for maintaining a high standard of conduct and manners is commended to careful consideration. It is believed the system has been tried with success in some Indian schools, notably in the Elphinstone High School in Bombay, so that it seems needless to enter upon the details of the scheme here. The principle of associating the leading boys of a school in its internal government is well known in England, where it has worked for many generations with remarkable success. Among its known advantages may be noticed that it tends to diffuse the influence of the masters, and especially of the head master, through a wider circle than it could otherwise reach. Through the monitorial system the personal influence of the masters is brought to bear immediately upon a limited number of more advanced students whom they can know intimately, and who, in their turn, communicate the impressions they have received to a larger number of younger boys. With the monitors, on the other hand, the trust reposed in them tends to foster a sense of responsibility, brings them to look upon the reputation and prosperity of the school as in some sense committed to their keeping, and prepares them for the larger duties of actual life. No doubt this system is not fully applicable to schools where none of the pupils are boarders; but, even in these cases, great benefits will be derived from its partial adoption; while in hostels it is probable that it would work well. Here, indeed, there might even be room for that further development of the system by which the younger boys are allotted as pupils to the elder, who are made responsible, not merely for their moral conduct, but also for their diligence in their work. This, however, would be a matter for the Educational authorities to consider.

18. The last suggestion is the removal from school of boys of a certain age. The expulsion of boys who are incorrigibly ill-conducted is, of course, a head master's imperative duty: but, incorrigible misconduct apart, experience has shown that a large proportion of moral evil and disregard for rules is traceable to the influence of youths who remain at school to a comparatively advanced age without rising beyond the lower classes, and who exercise an evil influence over the younger boys in the same class. Such youths often form a nucleus of resistance to authority: they are too old for effective punishment, while their chances of academical success are too small for them to take an active interest in the real work of the school. If on consideration it appears to

(His Excellency in Council)
His Honour
You
Madras and Bombay Presidencies
(Lower Provinces, N.W. P. & O., &c., &c.)

that such a state of things prevails in the to such an extent as to call for remedy, then I am to ask

whether advantage might not result from a rule that any boy who through want of diligence and attention to study has not risen to a certain class by the time he has attained a certain age should be required to leave the school. It may be that in India such a rule would not be acceptable to Native Society, and having regard to the advanced age at which Muhammadan boys especially come to school, it would certainly be necessary to make the rule, if adopted, an elastic one, but it is well to consider whether the adoption of even an elastic rule of this description might not be desirable in itself and agreeable to native feeling. If not agreeable to native feeling it should not be adopted.

19. The reforms sketched in the foregoing paragraphs make no pretension to originality or to exhaustiveness. Some of them are already practised in one Province, others in another; but they have, so far as the Government of India is aware, been nowhere worked up into a connected scheme or system. They are here thrown out as suggestions for consideration and development rather than as rules to be definitely adopted in their present shape. It appears, however, to the Government of India that the adoption of some such rules would have a beneficial effect upon the tone of Indian schools. From the nature of the case, any sudden improvement is not to be expected; but it might be hoped that by such improvements in system the elder boys in Indian schools will in course of time learn those lessons of obedience, moderation, and self-respect which it is the effort of all scholastic systems to impart. In any event we may hope that by merely bringing this great educational difficulty to notice, the leaders of native society will realize how closely the interests of all that is best in that society are bound up with its younger representatives. They will, doubtless, bear in mind the saying that the future of a nation depends upon its young men, and will bring all their influence to bear to support the Government in the attempt to render school education a fitter and fuller training for public duties.

20. Should this be the case, the problem of dealing with discipline in colleges will be materially simplified, as undergraduates will enter the colleges with habits formed and characters developed by the wholesome discipline of the schools, and will be naturally disposed towards order, propriety, and good behaviour.

Here positive rules, the methods appropriate for schools, are comparatively ineffective. They may serve to get rid of the wilfully vicious or obstinately idle members, but they will not do much to raise the tone of the whole collegiate body. This can only be done by distinct moral teaching, and by that moral supervision which, to use the words of the Education Commission, "all admit to be good and useful, and which all desire to see made more thorough than it is at present." In the case of colleges, even more than in the case of schools, doubts have indeed been expressed as to the possibility of introducing distinct moral teaching where there is no religious instruction, and in their Report the Education Commission point as a means of meeting the difficulty, to the establishment of aided colleges in which religious teaching can be fully recognized. It has been already clearly stated that the Governor General in Council entirely approves of the views of the Education Commission on this point and would gladly see an increase in the number of aided colleges and schools, in which religious instruction may be freely given. But His Excellency in Council is bound to say that though there is greater difficulty in introducing moral teaching of a non-sectarian character into State than into aided colleges, that difficulty does not seem to have been hitherto seriously faced by Education Departments generally, and, until failure follows an earnest effort at imparting moral instruction in colleges, the Government of India is unwilling to admit that success may not be

secured. To this subject then His Excellency in Council desires that early attention may be given and a practical attempt made to give effect to the recommendation of the Education Commission upon the subject.

21. In regard to the benefits accruing from moral supervision by Principals and Professors over students in colleges there is no room for doubt; and the problem for solution is, how such supervision may be made more effective than it now appears to be, and how the sentiments and habits of students may be best influenced for good. In this matter far more is to be expected from the example and personal qualities of the Principal and Professors than from rules; but rules in support of authority may be useful, and from this point of view the following regulations (among others) may be beneficially enforced:—

- (a) Weekly meetings should be held by the Principal and the Professors to consider questions of discipline.
- (b) The Principal should have the power of ordering the expulsion or rustication of a student, and of fining him for disorderly conduct.
- (c) Every Professor should have the power of suspending a student for a limited period of time, or of fining him without reference to the Principal.

22. In conclusion, I am to commend the whole subject to early and careful attention, for the importance of the considerations thus brought to notice cannot be exaggerated. The true interests of education are bound up with the solution of the problems now touched upon. It is sometimes observed by the opponents of our educational system that the want of reverence and the insubordination which is sometimes imputed to Indian students is merely part of a wider movement over which it would be vain to attempt to exercise any control; and that while Western civilization is sapping the framework of Indian society, it is unequal to laying the foundation stone of reconstruction. A general statement of this character cannot be accepted as any argument against the adoption of measures to remedy an acknowledged evil. The magnitude of the change in native society may well have been exaggerated; but even if it be allowed that change is taking place to the fullest extent supposed, the old order must be replaced by a new one; and there is hope that the new may be better than the old. Let it be granted that European intellectual training has cut loose the rising generation from many of the moral and social bonds of their forefathers; other forms of restraint must sooner or later take their place. Western education, if persevered in, must in time bring with it Western principles of discipline and self-control. The intellectual part of the process has made good progress; it remains to introduce the moral element which forms the most prominent factor of the European theory of education. The reforms of system indicated in the foregoing paragraphs have this object in view, although they may not be all that is required. They seek to fill the vacuum which a purely intellectual training has created, and to mitigate the evils of a one-sided development.

No. 120 (Public—Educational), dated India Office, London, the 29th September 1887.

From—Her Majesty's SECRETARY OF STATE for India,

To—His Excellency the Right Honourable the GOVERNOR GENERAL of India in Council.

My attention has recently been called to the question of providing a moral text book, of an elementary character, such as may be used in the Government schools and colleges in India.

2. Your Excellency in Council is aware that this matter was considered in 1884 by the Government of India and the Secretary of State,* in consequence of a recommendation of the Indian Education Commission that an attempt should be made to prepare such a work. This recommendation was not supported by Lord Ripon's Government, nor was it adopted by my predecessor in Council; but, in announcing his opinion, Lord Kimberley added, "it may possibly be that hereafter some book in the nature of a text book of moral rules may be written of such merit as to render its use desirable."

* See Public (Educational) Despatch to Government of India, 24th July 1884, No. 61.

3. The difficulties attending the adoption by the Government of India of an authorized manual containing lessons on moral subjects, which shall not offend the feelings of the numerous races and creeds of the peoples of India, are no doubt considerable; but I am of opinion that it is the duty of the Government to face this problem, and not to be content until a serious endeavour has been made to supply what cannot fail to be regarded as a grave defect in the educational system of India.

4. Having made inquiries in this country, I find that neither the Educational Department nor the London School Board have officially recognized any particular text book or books on the subject of moral

* Notes of Lessons on Moral Subjects by F. W. Hackwood.

† Moral Education, by Rev. P. Prescott.

Progressive Lessons in Social Science, by W. Ellis.

(Sent by book post.)

conduct. One* such manual appears, however, to be well known and extensively used in Board Schools, where as Your Lordship is aware, no denominational teaching is allowed. I forward a copy of this book, together with two others,† for your information; and, without recommending any of these as a model or implying approval of their contents in detail, I desire to suggest, for the consideration of Your Excellency in Council, the question whether a work of the same or similar character might not be prepared for use in the schools in India with such omissions, additions and alterations as the circumstances of that country require.

5. I shall await with interest the expression of the views of Your Lordship's Government on this subject, and will only add that the matter appears to me to be an important one, which should not be lost sight of until something practical has been done.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN RAJPUTANA FOR THE YEAR
1886-87.

No. 233 I., dated Fort William, December 30, 1887.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Revenue Report of Irrigation Works in Rajputana for the year 1886-87, forwarded with letter No. 2302 S., dated 28th September 1887, from the Secretary to the Agent to the Governor General and Chief Commissioner, Rajputana.

OBSERVATION.—The outlay chargeable to the Capital Account of Irrigation Works in Rajputana amounted during the year to Rs. 99,976. This increased the Capital expenditure on the three groups of tanks as follows :—

	1885-86.	1886-87.
	Rs.	Rs.
Ajmere Sub-Collectorate	8,31,071	8,78,529
Beawar „	5,99,798	6,31,668
Todgurh „	1,12,496	1,36,144
TOTAL	15,46,365	16,46,341

The Capital expenditure of the year was, however, more nominal than real, as the bulk of the charge consisted of a sum of Rs. 96,453, which, under the orders of the Government of India, was transferred from the Revenue to the Capital Account. This sum represented expenditure from Revenue which had been incurred in former years on extensions and improvements of the tanks, and which, it was considered, would be more correctly shown as a charge against Capital.

2. The effect of this large transfer has been to cause the Revenue statement submitted with the Report of the Local Administration to shew abnormal results for the year under review; the net revenue shown in this return being Rs. 1,91,442, or 11·63 per cent. on the total Capital outlay to end of the year. If, however, the results of the operations of the year, exclusive of all adjustment, are dealt with, the results are as follows :—

TANKS IN	Capital to end of year, including indirect charges.	Gross Revenue.	Working Expenses.	Net Revenue.	Percentage of net Revenue on Capital at end of year.
	Rs.	Rs.	Rs.	Rs.	
Ajmere Sub-Collectorate	8,78,529	56,360	15,058	41,302	4·7
Beawar „	6,31,668	43,501	12,333	31,168	4·9
Todgurh „	1,36,144	23,780	5,066	18,714	13·7
	16,46,341	1,23,641	32,457	91,184	5·5

These results are satisfactory.

3. The area which is affected by the operations of these tanks is divided into various sub-heads according as it lies in the bed of the tanks or below them,

and according as it is actually irrigated from, or only protected by, the tanks. The total area benefited was slightly smaller in the year under review than in the previous year; the figures being 30,305 acres and 34,737, respectively.

4. The assessments of the year, however, show a decrease which is small in proportion to the decrease in area; the figures being Rs. 1,14,973 in 1886-87 and Rs. 1,21,193 in 1885-86. This is explained as due to a considerable increase in the assessment of certain tanks in the Ajmere Collectorate, caused by modifications in the method of assessment. The realizations of revenue were most satisfactory, a balance of Rs. 74 only being outstanding at the end of the year.

5. The working expenses amounted to Rs. 82,457, or about Rs. 1.07 per acre benefited; the corresponding figure for the previous year was Rs. 1.02 per acre.

6. The total estimated value of the crops irrigated during the year was Rs. 4,43,834, as compared by Rs. 5,71,811 in 1885-86.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Agent, Governor General, and Chief Commissioner, Rajputana, for information and guidance.

Also that a copy of the Resolution and of the Report be forwarded to the Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab, in the Public Works Department, for information.

Also that a copy of the Resolution and of the Report be forwarded to the Revenue and Agricultural Department, and to the Department of Finance and Commerce, for information.

Also that the Resolution with the statement of general financial results compiled by the Examiner of Public Works Accounts, be published in the Supplement to the *Gazette of India*.

Ordered further, that a copy of this Resolution and of the Report be forwarded to Her Majesty's Secretary of State for India for information.

R. HOME, *Colonel, R.E.*,

(a) The amounts adjusted from "Revenue" on account of outlay in former years on extensions and improvements and surveys, have been treated as the estimated cost under their respective Sub-Collectorates.
 (b) and (c) include Rs. 8,373 and Rs. 290, respectively, on account of collection and share of District Revenue Establishment charges in the Civil Department.

MOUNT ABU,

WILLIAM GOODENOUGH BAYLY.

GOVERNMENT OF INDIA.
REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending 28th Dec. 1887.

As was the case last week the principal meteorological feature has been the general steadiness of the various elements. A large area of high readings, with its apex over the Punjab, has existed over the greater part of Northern India. From this area pressure has decreased, slowly over the more central parts of the country and quickly over the Peninsula, and reached its lowest point in the neighbourhood of Ceylon. This distribution, with slight variations in the relations between the high and low pressure areas, produced by local oscillations alternately in the north and in the south, has been constant throughout the week, the greatest range being on the 25th when the difference between the north and south amounted to 0·43". South-easterly winds have at times appeared at some stations in the north-west, but as a rule the wind circulation has been normal, north-westerly winds prevailing down the Gangetic plain, northerly winds over Bengal, north-easterly winds over Assam and Burma, and easterly (N. E. and S. E.) winds over the Peninsula. In Ceylon from the 24th to the 26th the wind was blowing strongly.

The rainfall of the week has nearly all fallen in the south. On every day of the week except the 24th, rain generally in small amounts fell at several of the stations in the Carnatic and at some in Malabar. On the 22nd slight snow fell at Murree, and a few drops of rain at Peshawar; on the 23rd slight showers occurred at Ajmere, Sialkote and Rawalpindi, and a snow storm at Murree, and on the 24th a hail storm was reported from Murree. It would appear then from these returns that the winter rains have commenced in the north-west, though up to the present the showers have been very slight and the rainfall since the 1st of November is deficient over the whole of Northern India.

The concluding table gives the total rainfall of the past week according to Provinces—

DIVISIONS	Number of Stations.	TOTAL RAINFALL.
Burma
Bengal and Assam
North-Western Provinces and Oudh
Punjab	3	0·17
Hill stations	1	0·87
Ceylon	2	2·95
Malabar Coast	4	5·24
Bombay	2	0·13
Berars and Central Provinces	9	2·98
Guzerat and Central India	1	0·01
Sind—Rajputana	1	0·01
Madras	10	17·76

W. L. DALLAS,
for Meteorological Reporter to the Govt. of India.

Simla, 31st December 1887.

GOVERNMENT OF INDIA.
REVENUE AND AGRICULTURAL DEPARTMENT.

WEEKLY REPORT ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS.

Madras.—*For week ending 31st December 1887.*—Rainfall up to date generally sufficient, except in parts of Madura and Salem. Agricultural operations progressing as usual. Crops slightly damaged here and there by rain, disease or insects. Pasture sufficient except in parts of Anantapur and Tinnevely. No material fluctuations in prices. General prospects favourable.

Bombay.—*For week ending 4th January 1888.*—More or less rain in most districts of the Presidency Proper and in Karachi. Standing crops injured by rain or cloudy weather in parts of Kaira, Surat, Nasik, Ahmednagar, Belgaum, Dharwar and Thana. Cotton crop in Wadwhan damaged to the extent of from 2 to 3 annas. Exotic cotton in Dharwar and *jowari*, linseed and cotton in Sholapur suffering from blight, and *jowari* and wheat in Bijapur from blight and adverse winds; standing crops otherwise good in the Presidency Proper and in Sind. Harvesting of early crops continues in Karachi, Hyderabad, Nasik, Poona, Sholapur, Belgaum and Dharwar, and sowing of late crops in Shikarpur, Hyderabad, Upper Sind Frontier and Ratnagiri. Probable outturn of opium crop in Baroda 16 annas in the rupee. Wheat prospects in Wadwhan improved. Agricultural stock in good condition.

Bengal.—*For week ending 3rd January 1888.*—Weather cloudy for the last few days, but no rain. Harvesting of winter rice is nearly over in some districts. The outturn of this crop is good in most parts of the Lower Provinces, but is below the average in Chota Nagpore and parts of the Burdwan, Patna and Orissa Divisions and in the Sonthal Pergunnahs district. *Rabi* and poppy crops are generally doing well, but rain is wanted in Behar and Chota Nagpore, and the prospects of *rabi* in Gya, Hazareebagh and Lohardugga are not favourable. Transplanting of spring rice is going on in Orissa and in Eastern Bengal. Sugarcane is being cut and pressed in some districts.

N.-W. Provinces and Oudh.—*For week ending 4th January 1888.*—The weather continues cold and fine. Slight rain fell in Jhansi and some northern districts, but more rain is generally needed. Irrigation is going on and the *rabi* crops are as yet in good condition. Sugarcane is being pressed. Poppy sowings are doing well. Supplies are reported generally sufficient, but prices are very high in many districts, especially in Moradabad and Jhansi where the dearth of food-grains is being much felt. The condition of cattle continues good.

Punjab.—*For week ending 4th January 1888.*—Some rain in a few of the south-east districts. Prices are still rising though stationary in some districts. *Rabi* sowings being completed. *Kharif* outturn below average. *Rabi* prospects good, but rain is urgently wanted throughout the province. No damage done to crops. Stock cattle are healthy. Scarcity of fodder in many districts. Poppy sowings completed.

Central Provinces.—*For week ending 4th January 1888.*—Reports received from Nagpur and Sambalpur only. Weather cloudy and rainy and is injurious to minor winter crops and linseed, but good for wheat.

Burma.—*For week ending 31st December 1887.*—The rice harvest is well forward. The weather has been most favourable for reaping and threshing. The condition of agricultural stock is good. In Lower Burma the estimate of the paddy crop remains as before, except in Shwegyin district where on the total cultivated area of 100,000 acres, the estimate is reduced from 15 annas to 13 annas. In Upper Burma the crop estimates remain as before. In Lower Burma the price of paddy fell in Thongwa and Tharrawaddy as the new paddy came into the market and rose in Thayetmyo and Shwegyin, probably owing to unfavourable crop reports in those districts. In Upper Burma the price of paddy has fallen in Yamethen; elsewhere there is no change.

Assam.—*For week ending 4th January 1888.*—Weather cold and dry. Foggy in the Assam Valley. No rain. Reaping of winter rice nearly finished, outturn good. Prospects of standing crops good, except mustard which is suffering from want of rain. Pressing of sugarcane progressing. No crops on the ground in Hill districts. Tea season over.

Mysore and Coorg.—*For week ending 4th January 1888.*—Rainfall slight and general. Standing crops in good condition, except in parts of the Bangalore, Tumkur and Kadur districts where they are slightly damaged by insects. Sowing operations continue in parts of two districts and harvesting of crops is nearly over throughout the State. Outturn of crops 8 to 12 annas in the rupee in Bangalore district, 12 annas in Chittal-droog district and elsewhere fair. Condition of stock cattle good.

In Coorg there was slight rain during the week. Standing crops in good condition. Rice being harvested. Prices stationary.

Berar and Hyderabad.—*For week ending 4th January 1888.*—There has been slight rain in Berar during the week. Weather cold and cloudy. Picking of cotton and cutting of *jowari* continue, outturn of which is expected to be 12 annas. Young *rabi* crops in good condition.

Agricultural prospects in Hyderabad continue good. No rain.

Central India.—*For week ending 4th January 1888.*—Rain has fallen slightly throughout the Agency. Except in Baghelkhand, rainfall sufficient. Agricultural operations completed in Gwalior, Goona and Bhopawur, elsewhere in progress. State of standing crops, agricultural stock, pasturage, and fodder, good. Prospects and probable outturn of crops fair, except in Western Malwa where it is below the average. Prices of food-grains steady in Gwalior, elsewhere rising or high. Condition of opium crops fair.

Rajputana.—*For week ending 4th January 1888.*—Rainfall general but slight. Agricultural operations satisfactory. Standing crops in good condition. Harvests average. Agricultural stock good generally. Pasturage or fodder pretty sufficient. Prices steady but high in some States.

E. C. BUCK,

Secretary to the Government of India.

FORESTS.

The 9th January, 1888.

No. 15 F.—Mr. P. J. Carter, Deputy Conservator of Forests of the 2nd grade in the Andamans, is granted furlough for one year, under Section 50 of the Civil Leave Code, together with the usual subsidiary leave, with effect from the date on which he may avail himself of it.

The 13th January, 1888.

No. 58 F.—ERRATUM.—In the Notification of this Department, No. 1196 F., dated the 22nd ultimo, notifying certain arrangements consequent on the return from privilege leave of Mr. Popert, Conservator of Forests, Pegu Circle, Burma, for "with effect from the 21st November, 1887, and until further orders," read "with effect from the 17th November, 1887, and until further orders."

No. 63 F.—In supersession of the Notification of this Department, No. 1214 F., dated the 23rd ultimo, it is hereby notified that, consequent on the grant of one year's furlough to Mr. W. R. J. Brereton, Deputy Conservator of Forests, 1st grade, North-Western Provinces and Oudh, with effect from the 6th November, 1887, Mr. A. E. Wild, Deputy Conservator, 2nd grade, Punjab, officiated in the 1st grade from the 6th to the 16th November, 1887, reverting to his substantive appointment on the 17th idem; that Mr J. C. McDonell, Deputy Conservator, 2nd grade, Punjab, officiated in the 1st grade from the 17th to the 25th November, 1887, being confirmed in that grade on the 26th idem, *vice* Lieutenant-Colonel Stenhouse (*vide* Notification No. 1212 F., dated the 23rd ultimo); and that Mr. Wild has been re-appointed to officiate in the 1st grade of Deputy Conservators from the 26th November, 1887, and until further orders.

E. C. BUCK,

Secretary to the Government of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.

Fort William, the 11th January, 1888.

No. 50-G.—With reference to Foreign Department Notification, No. 1048-G., dated the 10th June, 1887, Mr. C. Votter, Acting Consul for Germany at Rangoon, has resumed charge of his office.

The 12th January, 1888.

No. 61-G.—Mr. L. W. King, C.S., Officiating Political Agent of the 3rd Class, is posted as First Assistant to the Governor-General's Agent in Central India, with effect from the date of joining.

No. 63-G.—With reference to Foreign Department Notification, No. 732-G., dated the 28th April, 1887, the Governor-General in Council is pleased to recognize the appointment of Mr. L. Ward as Acting Consular Agent for Italy at Bassein, *vice* Mr. A. Wingate, and during the absence of Mr. H. Williams.

No. 66-G.—With reference to the Notifications of the Government of India in the Foreign Department, Nos. 286-I. and 287-I., dated the 23rd January, 1884, the Governor-General in Council is pleased to appoint Lieutenant W. C. R. Stratton to be the Magistrate of Abu, with effect from the 2nd January, 1888, *vice* Captain M. J. Meade.

No. 73-E.—Munshi Khub Chand, Sharishtadar in the office of the Political Agent of Thal Chotiali, is appointed to be Munsif of Sibi, substantive *pro tempore*, *vice* Lala Udho Dass, and with effect from the 4th February, 1887.

This cancels that portion of the Foreign Department's Notification No. 1373-E., dated the 4th July, 1887, which appointed Munshi Khub Chand to officiate as Munsif of Sibi.

The 13th January, 1888.

No. 85-E.—In supersession of the Notification of the Government of India in the Foreign Department, No. 679-F., dated the 28th April, 1885, the following revised rules,* for observ-

* *Note.*—Copies of these rules can be obtained from the Resident in Kashmir.

ance by all Europeans, Americans and Australians, who are now, or may be, hereafter, in the territory of His Highness the Maharaja of Jammu and Kashmir, which have been drawn up with the consent of His Highness the Maharaja, and have received the sanction of the Governor-General in Council, are published for information:—

I. (1) Military or civil officers of the British Government may at any time, and without passes, visit and reside in the territories of His Highness the Maharaja of Jammu and Kashmir, subject to such limit† in number as the Government of India, with the concurrence of His Highness the Maharaja, may prescribe, and subject also, in the case of military officers, to the military regulations or orders for the time being in force.

(2) Other Europeans, Americans or Australians, wishing to visit or reside in the said territories, require passes, which may be granted (in the Form A annexed) by the Resident in Kashmir.

II. Information as to the usual routes for entering and leaving Kashmir may be obtained from the Resident. The route *via* Jammu and Banihal is private, and may not be used except with the special permission of His Highness the Maharaja obtained through the Resident.

III. Persons subject to these rules are not allowed to travel from Kashmir to Simla (or *vice versa*) across the hills, or to the plains (or *vice*

versa) *via* Kishtwar, Bhadarwar and Chamba, except with the special permission of His Highness the Maharaja obtained through the Resident.

IV. No requests should be preferred to the ordinary officials of His Highness the Maharaja, except in real emergencies. An officer of the Darbar is appointed by His Highness the Maharaja to attend to the wants of the European community at Srinagar, and application may be made to him for assistance in petty matters. All payments must be made at the rates demanded, which, if deemed exorbitant, can be reported to the Resident in Kashmir.

V. Complaints should be preferred, with statements of the circumstances, to the Resident in Kashmir.

VI. No present may be accepted from His Highness the Maharaja or his officers.

VII. Persons subject to these rules who may be desirous of paying their respects to His Highness the Maharaja can be introduced by the Resident on suitable occasions; and all arrangements for official visits to Jammu or Srinagar should be made through the Resident.

VIII. The customs and regulations of His Highness the Maharaja's country should be carefully observed by persons subject to these rules and by their servants.

IX. When attending evening entertainments given by His Highness the Maharaja, military officers should wear, subject to the military regulations or orders for the time being in force, either uniform or evening dress; and other visitors or residents should wear evening dress.

X. The Resident may from time to time, with the concurrence of His Highness the Maharaja, prescribe limits of travel beyond which no one will be allowed to go unless supplied with a special pass obtained from the Resident.

XI. Rules may from time to time be made by the Resident, with the concurrence of His Highness the Maharaja, regarding the routes for entering, leaving, and travelling in Kashmir, the rates to be paid for coolies, transport, supplies and other minor matters.

XII. The Resident in Kashmir is authorised to require any person subject to these rules, who breaks any of them, to leave the territories of His Highness the Maharaja of Jammu and Kashmir. If any such requisition on the part of the Resident is not at once complied with, the matter will be reported by him for the orders of the Governor-General in Council.

A

Pass No. of 188 .

of is permitted to travel } in the ter-
or reside }

ritories of His Highness the Maharaja of Jammu and Kashmir from the to the 31st December, 188 , subject to the conditions noted on the back of this pass.

This pass may be cancelled or withdrawn at any time, and it requires renewal at the end of the period for which it is current.

(Sd.)

Resident in Kashmir.

CONDITIONS.

I agree to conform to the rules prescribed by the Government of India for observance by Europeans, Americans and Australians in the territories of His Highness the Maharaja of Jammu and Kashmir. I will return this pass to the office of the Resident in Kashmir at the end of the period for which it is current.

(Sd.)

No. 171-I.—Whereas His Highness the Maharaja of Dhar (Dhar being a Native State within the meaning of the Native Coinage Act, 1876) has asked the Government of India to have copper coins of the denominations current in British India made under the said Act at the mints of the Government of India for the Dhar State, to the aggregate nominal value of (Rs. 22,756-2) twenty-two thousand seven hundred and fifty-six rupees and two annas, such being the amount estimated as requisite for circulation in the said State: And whereas the said coins have been made, and are identical in weight with the coins of the Government of India of the same metal, and the devices upon their obverse and reverse, which differ from the devices on coins now made or issued by the said State, have been approved by the Governor-General in Council, and upon each of such coins its value in money of the Government of India is inscribed in the English language: And whereas the said Maharaja has undertaken, for himself and his successors, to take back at its nominal value all coins so made which may accumulate in British treasuries: And whereas the said Maharaja has undertaken for himself and his successors to abstain during a term of thirty years from the date of this notification from coining in his own mint any copper coins, and has also undertaken for himself and his successors that no coins resembling coins for the time being a legal tender in British India, shall, after the expiration of the said term of thirty years, be struck under the authority of himself or his successors, or with his or their permission, at any place within or without his or their jurisdiction: And whereas the said Maharaja has formally declared that a tender of payment of money if made in the copper coins of the Government of India shall, in the territories subject to His Highness, be a legal tender in cases in which payment made in such coins would, under the law for the time being in force, be a legal tender in British India: And whereas the said Maharaja has agreed, for himself and his successors, that the law and rules for the time being in force respecting the cutting and breaking of coin of the Government of India reduced in weight by reasonable wearing or otherwise, or counterfeit, or called in by proclamation, shall apply to the coins made for the said State under the said Act, and that the said State will defray the cost of cutting and breaking them: And whereas the said Maharaja has also agreed for himself and his successors not to issue the said coins below their nominal value, and not to allow any discount or other advantage to any person in order to bring them into circulation: And whereas the said Maharaja has also agreed for himself and his successors that, if at any time the Government of India calls in its coinage of copper of any or of all denominations, His Highness or his successors will, if so requested by the Government of India, call in, at his or their own expense, all or any denominations of the said copper coins coined for him:—

The Governor-General in Council in consideration of the premises, and in exercise of the power conferred on him by Section 3 of the Native Coinage Act, IX of 1876, is pleased to

declare that a tender of payment of money if made in the said copper coins made under the said Act for the said State of Dhar, shall, subject to the provisions of Section 14 of the Indian Coinage Act, XXIII of 1870, be a legal tender in British India.

No. 175-I.—The Governor-General in Council is pleased to extend Bombay Act No. III of 1887 (the Bombay Boiler Inspection Act, 1887) to the Hyderabad Assigned Districts, subject to the following modifications, namely:—

- (1) In section 1, paragraph 2, *omit* the words from "in the city" in the first line to "shall deem fit" at the end of the paragraph.
- (2) *Omit* sections 2, 30, and 33
- (3) For the words "the Governor in Council" and "Government" wherever those words occur in the Act *read* "the Resident at Hyderabad," and for the word "Collector" wherever it occurs *read* "Deputy Commissioner."
- (4) In section 7, *omit* the words from "if such boiler" in paragraph 1, line 6, to "the owner shall" in line 2, paragraph 3.
- (5) In section 11, *omit* the words from "within four days" to "of Bombay and"—and for the words "its receipt, if the boiler be situated elsewhere," *substitute* the words "the receipt of the same."
- (6) In section 15, for the words "any Presidency Magistrate in the City of Bombay, or by the Collector elsewhere" and "Presidency Magistrate or Collector," *substitute* the words "the Deputy Commissioner" and "Deputy Commissioner" respectively.
- (7) In section 18, for the words "a Secretary to Government" at the end of the paragraph, *substitute* the words "the Secretary for Berar to the Resident."
- (8) In section 19, paragraph 1, the word "other" shall be omitted.
- (9) In section 28, *omit* the words from "in the city" to "elsewhere."
- (10) In the concluding paragraph of section 31, for the words "Bombay Government Gazette," *substitute* the words "Residency Orders."

W. J. CUNINGHAM,

Offg. Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE.

NOTIFICATIONS.

LEAVE AND APPOINTMENTS.

Calcutta, the 12th January, 1888.

No. 173.—Mr. W. Donald, Deputy Accountant General, Madras, having been granted privilege leave for 2 months and 16 days, made over charge of his office on the afternoon of the 28th December, 1887, and availed himself of the leave from the 5th January, 1888.

Mr. H. A. Sim, M.C.S., having been appointed to officiate as Deputy Accountant General, Madras, *vice* Mr. W. Donald, received charge of the said appointment on the forenoon of the 5th January, 1888.

The 13th January, 1888.

No. 189.—The services of Surgeon F. C. Reeves are placed at the disposal of the Home Department, with effect from the date on which he may be relieved, by Surgeon-Major H. P. Yeld, of the appointment of Officiating Deputy Assay Master, Calcutta Mint.

CODES.

The 11th January, 1888.

No. 161.

CIVIL PENSION CODE.

*Page 104.**Section 18.**Rule 78.*

Insert the following as an "Exception" to this rule :—

"Exception.—The pensions of army pensioners who enlist into the Burma Military Police are held in abeyance during the time such pensioners continue to serve in that force.

The gratuities granted to discharged soldiers enlisting into the Burma Military Police need not be refunded."

SEPARATE REVENUE.

STAMPS.

NON-JUDICIAL.

EXEMPTIONS AND REDUCTIONS, &c.

The 6th January, 1888.

No. 93.—Whereas under the terms of Notification in the Department of Finance and Commerce, No. 3646, dated the 13th November, 1880, the Municipality of Rangoon has paid into the Government Treasury the sum of ₹11,500 as composition for the stamp-duty chargeable on a sum of ₹23,00,000 which the said Municipality was authorised to borrow on the issue of the under-mentioned debentures dated the 20th July, 1887 :—

NOTIFICATION.

Bangalore, the 7th January, 1888.

No. 4.—The following list of Court holidays, for the Civil and Military Station of Bangalore for the year 1888, having been approved by the Officiating Resident in Mysore, is hereby published for general information,

These days shall accordingly be observed as close holidays by the Civil Courts in the Civil and Military Station of Bangalore :—

List of Holidays.

January 1st to 3rd (both Christmas holidays, days inclusive.)

January 13th and 14th . . . Pongal.
February 15th . . . Ash Wednesday.
February 17th . . . His Highness the Maharajah's birthday.
March 13th . . . Gentu, New Year's Day.
March 29th to April 1st Easter holidays.
(both days inclusive.)

May 24th . . . Empress' birthday.
August 20th . . . Sravani.
September 8th . . . Gauri.
September 17th . . . Last day of Moharam.
October 5th . . . Mahalaya Amavasye.
October 6th . . . Commencement of Dasara.
November 3rd . . . Dipavali.
December 24th to 31st Christmas holidays.
(both days inclusive.)

All Sundays in the year.

NOTE.—The Civil Courts in the Civil and Military Station will be closed from the 4th April to the 15th May (both days inclusive) on account of the annual recess, but urgent work will be disposed of during the vacation on such days as the Judges may fix and notify to the public.

Ganesa and Vijaya Dasami Festivals are omitted as they fall on Sunday. Other holidays can be granted by the head of an office, to special classes of Hindus, if they can be allowed without hindrance to work generally, and provided there are no arrears. The last Saturday in the month may be allowed generally if the state of work permits, but not otherwise.

DONALD ROBERTSON,

Assistant to the Resident.

Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the
Governor-General in Council, appear in monthly parts, pub-
lished as soon as possible after the first of each month, at Cal-
cutta, Madras, Bombay, and Allahabad, and comprise four
series,—one for the Calcutta High Court, a second for the
Madras High Court, a third for the Bombay High Court, and
a fourth for the Allahabad High Court. The cases heard by
the Privy Council on appeal from each High Court are
reported in the series for that High Court. Cases heard by
the Privy Council on appeal from Provinces in India not sub-
ject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the
copies for subscribers registered by Messrs. Thacker, Spink
& Co. are distributed by that firm; and the Madras, Bombay
and Allahabad Series are distributed direct from Madras,
Bombay, and Allahabad, respectively.

In supersession of previous advertisements, on and from the 1st
January, 1885, the terms of subscription and sale will be as
follows :—

Terms of subscription, payable annually in advance.

SUPPLEMENT TO
The Gazette of India.

No. 2.} CALCUTTA, SATURDAY, JANUARY 14, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

**RETURN OF ACCIDENTS ON INDIAN RAILWAYS FOR THE SECOND QUARTER
OF 1887.**

No. 1531 R. T., dated Fort William, December 30, 1887.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Public Works Department Resolution No. 1213 R. T., dated 24th November 1886.

” ” ” ” No. 1106 R. T., dated 19th September 1887.

Read also—

Director General of Railways' No. 1161 T., dated 26th November 1887.

Abstract Returns of Accidents to trains, &c., on the open lines of Railway in India for the quarter ending 30th June 1887.

OBSERVATIONS.—As compared with the corresponding quarter of the previous year, the number of accidents to trains, rolling-stock, permanent-way, &c., shows an increase of 97, or 10·74 per cent., against an increase of 950·5 miles, or 7·65 per cent. in the mean mileage open, and of 434,147 *

* Excludes mileage run on the Jorhat State Railway.

miles, or 3·34 per cent. in the train mileage. The following are the Railways on which the more important fluctuations occurred :—

RAILWAY.	ACCIDENTS.				TRAIN MILEAGE.	
	Increase.	Decrease.	Percentage of increase.	Percentage of decrease.	Percentage of increase.	Percentage of decrease.
Rajputana-Malwa	50	...	31·65	...	13·86
Southern Mahratta	33	...	97·06	...	215·16	...
Jorhat	26	...	185·71
Great Indian Peninsula	11	...	16·18	...	11·19	...
Oudh and Rohilkhand	19	...	32·20	...	15·25
Dibru-Sadiya	18	...	300·00	...	11·27	...
His Highness the Nizam's	17	...	283·33	...	16·82	...

2. The decrease on the Rajputana-Malwa Railway occurred chiefly under "Goods trains, or parts of goods trains, engines, &c., leaving the rails" and "Trains running over cattle on the line," the numbers recorded under these heads being 1 against 11 and 65 against 93 respectively.

3. Of the increase of 33 accidents on the Southern Mahratta Railway, 19 were under "Trains running over cattle on the line" and 4 under "Flooding of portions of permanent-way." There were also 4 cases of "Fire in trains" against *nil* in the corresponding quarter of the previous year.

4. On the Jorhat Railway the number of "Goods trains, or parts of goods trains, engines, &c., leaving the rails" increased from 1 to 15 and that of accidents classified as "Other accidents" from 1 to 6.

5. On the Great Indian Peninsula Railway there was an increase of 9 accidents under "Trains running over cattle on the line" and of 8 under "Fires in trains."

6. On the Oudh and Rohilkhand Railway there is no appreciable variation under any head except that of cattle accidents, which shew a decrease of 8 in number.

7. The increases on the Dibru-Sadiya and His Highness the Nizam's Railway are mainly due to 12 accidents having been recorded under "Failure of couplings" on the former line, and 10 under "Trains running over cattle on the line" on the latter, against *nil* in the corresponding quarter of 1886.

8. The total number of accidents on the North-Western Railway increased from 147 to 157, or by 10 only; but it is noticed that while the number of cattle accidents increased from 23 to 52, and that of failures of machinery, springs, &c., of engines, from 8 to 25, there was a decrease of 13 under "Bursting of tubes, &c., of engines" and 31 under "Fire in trains."

9. The casualties resulting from accidents to trains, &c., were, among passengers and others, 7 injured against 3 killed and 20 injured, and among servants, 2 killed and 14 injured against 2 killed and 16 injured. Of the total casualties, 1 servant was killed and 2 seriously injured by a collision which took place at Khanewal, on the North-Western Railway, on the 21st June 1887, between a down goods train and a light engine and a brake-van, owing to the carelessness of the Driver of the former in not observing the signals, which, it is said, were against him; and 4 passengers and 1 servant slightly injured on the Lucknow-Sitapur-Sihramau Railway on the 30th April 1887, in consequence of a part (consisting of 13 coaching vehicles and 1 rail truck) of a down mixed train having been blown off the line by a violent storm, while proceeding from

Sitapur to Lucknow. The damage done to rolling-stock by the former accident was estimated at Rs. 10,000.

10. The following table exhibits the number of accidents under the different classes, and the number of persons killed and injured thereby :—

CLASS.	Number of accidents.	NUMBER OF PASSENGERS AND OTHERS.		NUMBER OF SERVANTS.		TOTAL.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Collisions between passenger trains and goods or mineral trains, engines, and vehicles standing foul of the line .	18	2	...	2
Collisions between goods trains or parts of goods trains	22	1	3	1	3
Collisions between light engines . . .	1
Passenger trains or parts of passenger trains leaving the rails	26	...	1	1
Goods trains or parts of goods trains, engines, &c., leaving the rails . . .	87	3	...	3
Trains or engines travelling in the wrong direction through points	11	1	...	1
Trains running into stations or sidings at too high a speed	1
Trains running over cattle on the line .	488
Trains running over obstructions on the line	19	...	1	...	1	...	2
Trains running through gates at level-crossings	19
The bursting of tubes, &c., of engines .	17
The failure of machinery, springs, &c.—							
Of engines	60
Of tyres	3
Of wheels	1
Of axles	16	1	...	1
Of couplings	36	1	...	1	...
Broken rails	3
The flooding of portions of permanent-way	18
Slips in cuttings or embankments . .	2
Fire in trains	66
Fire at stations, or involving injury to bridges or viaducts	15	1	...	1
Other accidents	71	...	5	...	2	...	7
TOTAL .	1,000	...	7	2	14	2	21

11. The number of cases of "Passenger trains, or parts of passenger trains, leaving the rails," increased from 15 to 26, but there is nothing to call for special notice under this head with regard to any particular Railway.

12. The cattle accidents numbered 488, of which 73 occurred on the Eastern Bengal State Railway System, 65 on the Rajputana-Malwa Railway, 52 on the North-Western Railway, and 44 on the Southern Mahratta Railway. As compared with the corresponding previous quarter, the total number shows an increase of 63 accidents. There was, as already pointed out, an increase of 29 on the North-Western Railway and of 19 on the Southern Mahratta Railway, and a decrease of 28 on the Rajputana-Malwa Railway.

13. The number of "Failures of machinery, springs, &c., of engines" rose from 41 to 60, due chiefly to the number of cases on the North-Western Railway having increased more than threefold, *viz.*, from 8 to 25. On the Eastern Bengal State Railway System and the Jorhat Railway there were respectively 9 and 11 accidents of this description.

14. Of the 36 cases of "Failures of couplings," 11 occurred on the Rajputana-Malwa Railway and 12 on the Dibru-Sadiya Railway. On the North-Western Railway, only one accident is recorded under this head against 12 during the corresponding previous quarter.

15. The number of cases of "Fire in trains" fell from 92 to 66, of which 21 were on the North-Western Railway, 18 on the Great Indian Peninsula Railway, and 11 on the Madras Railway.

16. Under the head "Other accidents" the number is 71 against 47, the largest number, *viz.*, 18, being returned by the Bombay, Baroda and Central India Railway.

17. The casualties to passengers from causes other than accidents to trains, &c., were:—

CAUSES OF ACCIDENTS.	Killed.	Injured.
From falling between carriages and platforms	2
Falling on to the platform, ballast, &c., when getting into or out of trains	4
Whilst crossing the line at stations	1	3
Falling out of carriages during the travelling of trains	7	17
Other accidents	1	12
TOTAL	9	38

18. The accidents to servants in the employ of Railways or of contractors whilst performing duties connected directly with the transit of passengers

and goods, from causes other than accidents to trains, &c., were as follows:—

CAUSES OF ACCIDENTS.	Killed.	Injured.
During shunting operations	8	15
Falling off engines, vans, wagons, &c.	8	8
Coming in contact with over-bridges, &c., during the travelling of trains	1
Getting on or off trains, engines, &c.	12
Whilst loading, unloading, or sheeting	5	20
Whilst working at cranes or capstans	1	...
Whilst working on the permanent-way or in sidings	2	7
Whilst walking along the line on the way home or to work	1	2
Whilst walking, crossing, or standing on the line	13	8
Whilst passing between vehicles	1	1
Whilst attending to the machinery of engines, cleaning them, &c.	1
Falling or being caught between vehicles and platforms	2
Falling off ladders, scaffolds, platforms, &c.	1	5
By falling of lamps, wagon doors, timber, weights, &c.	2
Whilst coupling or uncoupling wagons	3	8
Miscellaneous	4	29
TOTAL	47	121

19. Of other persons killed and injured by running trains, &c., 7 were killed and 4 injured whilst passing over the line at level-crossings, 43 were killed and 10 injured whilst trespassing on the line; 6 committed suicide, 1 was injured in attempting to commit suicide; and 1 was killed and 4 injured from miscellaneous causes.

20. The following table shows the total number of persons killed and injured from causes connected with the working of trains, as compared with the corresponding quarter of 1886:—

	2ND QUARTER, 1886.		2ND QUARTER, 1887.	
	Killed.	Injured.	Killed.	Injured.
<i>Passengers.</i>				
From causes beyond their own control	3	21	...	9
From misconduct or want of caution	6	28	9	35
<i>Servants.</i>				
From causes beyond their own control	2	14	9	19
From misconduct or want of caution	38	119	40	116
<i>Others.</i>				
Whilst passing at level-crossings	3	7	5
Trespassers, including suicides	44	14	49	11
Other persons	11	3	1	4
TOTAL	104	202	115	199
TOTAL OPEN MILEAGE	12,427½		13,378	
TOTAL TRAIN MILEAGE	13,017,485		15,447,599	

21. In addition to the above, 12 persons are reported to have been killed and 54 injured in yards, workshops, &c., and 126 persons to have met death in carriages and at stations from causes unconnected with the working of trains.

RESOLUTION.—The Government of India is pleased to notice the decrease in the number of accidents on the Rajputana-Malwa Railway, but requests that the attention of the officers concerned may be invited to the increased number of “Failures of machinery and springs, &c., of engines” on the North-Western Railway; to the increase in the number of accidents on the Jorhat State Railway, due to “Goods trains or parts of goods trains, engines, &c., leaving the rails,” and to the increase in the number of accidents on the Dibru-Sadiya Railway due to the “Failure of couplings.”

ORDER.—Ordered, that this Resolution, with the Abstract Returns, be communicated to the Local Governments, Administrations, and Officers noted in the margin for information.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Assam, and Burma.
The Resident at Hyderabad.
The Agents to the Governor General for Rajputana, Central India, and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow, and Central Division.

Ordered also, that copies be forwarded for the information of Her Majesty's Government.

Ordered further, that this Resolution, with the Abstract Returns, be published in the Supplement to the *Gazette of India*.

Telegraph.

ADMINISTRATION REPORT OF THE INDO-EUROPEAN TELEGRAPH DEPARTMENT FOR THE YEAR 1886-87.

No. 971,—dated Fort William, the 10th January 1888.

RESOLUTION.—By the Government of India, Public Works Department.

Read—

Letter from the Director-in-Chief, Indo-European Telegraph Department, No. 429, dated 30th September 1887, and its enclosure, the Report for 1886-87.

In July 1886 a reduction in the tariff was introduced; the receipts were, however, higher than had been anticipated. The receipts of the previous year, which had been unusually increased owing to the large number of telegrams passing to and from the Afghan Boundary Commission, amounted to £101,928; those for the year under review were £100,380.

2. The working expenses of the year were £86,552, and the net revenue was £13,827. In the previous year, the Department worked at a loss of £60,079, and in 1884-85 at a profit of £30,502. These fluctuations in the net revenue are mainly due to exceptional causes. Thus, in 1884-85 there was a large write-back from maintenance on account of stores erroneously charged to it in a previous year, and in the next year heavy expenditure was incurred in renewing one of the Jask-Bushire cables.

3. The working expenses of the last three years have been as follows :—

YEAR.	REPAIRS.		Cable Steamer.	Miscellaneous.	Establishment.	Tools and Plant.	Total.
	Ordinary.	Extra-ordinary.					
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1884-85 . . .	1,09,918	...	1,16,711	—1,34,304	5,10,311	29,270	6,31,906
1885-86 . . .	1,28,024	7,63,693	1,32,686	19,765	5,29,243	46,663	16,20,074
1886-87 . . .	1,75,888	778	1,09,944	14,487	5,30,488	33,944	8,65,529

The charges for establishment and ordinary repairs are still very high and are increasing. The resolution of the Government of India on the previous report noticed that the increases in these charges were not clearly explained, and the same remark is applicable in the present case. Future Administration Reports should contain full explanations on this important point.

4. The traffic transmitted during the year was smaller both in number of messages and of words than in the previous one, which was however exceptional on account both of messages diverted from other routes and also of the telegraphic correspondence with the Afghan Boundary Commission.

5. The working of the Indo-European route during the year 1886-87 was very good. There was no total interruption at all in the Gulf Section between Bushire and Karachi. The total interruptions between Bushire and Teheran were only $2\frac{1}{2}$ days in the aggregate, the longest interruption being for 1 day 14

hours and 22 minutes in January 1887. On the Indo-European Company's Section, between Teheran and London, the gross total interruptions were for 4 days 17 hours and 11 minutes, the longest individual interruption being 2 days 18 hours and 45 minutes in December 1886. These facts compare favourably with similar ones of previous years. The Turkish route was totally interrupted during the year for 108 days, 4 hours and 47 minutes, individual interruptions being of 26 and 31 days' duration.

6. The speed of working on the Teheran route between England and Calcutta averaged 1 hour and 31 minutes during the year under review. This is a great improvement on the preceding year, when the time was 3 hours 42 minutes : that year, however, was an exceptional one. The time of transmission in the two previous years was 1 hour 58 minutes and 1 hour 34 minutes respectively. The speed on the Turkish and Suez routes was 13 hours 23 minutes and 2 hours 31 minutes respectively in 1886-87.

7. The proportion of errors detected in telegrams was rather higher during the year under review than in the previous one. There was however a marked decrease in the number of complaints.

8. The amount of traffic transferred between the Eastern Telegraph Company's lines and those of the Teheran route was exceptionally small, owing to the freedom of both systems from serious interruptions.

9. On the 1st July 1886 the tariff between India and the United Kingdom was reduced from francs 5.60 to francs 5 a word, or from 4 shillings and 7 pence to 4 shillings as levied in the United Kingdom. The continued fall in exchange has however prevented the Indian public from deriving any appreciable advantage from the reduction.

10. On the 1st February 1887, Colonel Sir J. U. Bateman-Champain, R.E., K.C.M.G., died at San Remo. His death deprived the Government of India of an officer whose practical good sense, sound judgment and unfailing tact, combined with a thorough knowledge of the whole system of international telegraphy, had often proved of great value to the interests of India. For sixteen years this officer was the Director-in-Chief of the Indo-European Telegraph Department.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Director-in-Chief, Indo-European Telegraph Department, for information and guidance.

Also that copies of the Report and Resolution be forwarded to the Department of Finance and Commerce, the Military (Marine), Home and Revenue and Agricultural Departments for information.

Also to the Government of Bombay and the Director General of Telegraphs in India for information.

Ordered further, that the Report and the Resolution be forwarded to the Secretary of State for the information of Her Majesty's Government, and published in the *Gazette of India*.

R. C. B. PEMBERTON, *Colonel, R.E.,*
Secretary to the Govt. of India.

No. 429, dated 30th September 1887.

From—COLONEL R. M. SMITH, R.E., Director-in-Chief, Indo-European Govt. Tel. Dept.,
To—The Secretary to the Government of India, PUBLIC WORKS DEPARTMENT.

I have the honour to submit my Administration Report on this Department for the year ending 31st March 1887.

2. Owing to my absence in Persia and the Persian Gulf, I have been unable to prepare the report in time to reach you by the 1st October.

ADMINISTRATION REPORT, 1886-87.

I have the honour to forward, for the information of the Government of India, the following account of the administration of this Department during the year 1886-87. I have classed my observations in the same order and under the same general heads as those in last year's statement.

CAPITAL.

1. In the Administration Report for 1885-86 the total capital expenditure to 31st March 1886 was shown at £1,129,975-15-5.

Capital.

This amount contains several variable accounts for stores, advances, and other items in suspense, and was, chiefly on the balance of these accounts, reduced by £5,559-8-2 during 1886-87, so that at the end of the year it stood at £1,124,376-6-6. See Appendix A.

REVENUE.

2. The receipts for 1886-87 were rather higher than anticipated. Notwithstanding the reduction in the tariff between

Increase of receipts.

Europe and India which took effect from July, they reached the sum of £100,380-11-4, or nearly equalled the revenue of the preceding year, which, owing to exceptional causes and a higher tariff, was unusually high.

Appendix B.

3. Besides the receipts brought to account, the Department transmitted news messages for the information of the Political officers of the value of R48,435, and the cable steamer performed work for other Departments to the estimated value of R10,237.

4. The ordinary expenditure debited against the Department was £86,553, or rather more than that for 1885-86. The difference between the receipts and expenditure, £13,827-13-8, represents a profit of about 1½ on the year's working.

5. The increase of £837 in the ordinary expenditure is arrived at as under :—

	Increase.	Decrease.
	£	£
Repairs	4,786	...
Establishment	539	...
Tools and Plant	1,272
Cable Steamer	2,274
Stores	54
Advertising and Agencies	72
Royalty, Brown and Allan Relay	200	...
Chief direction	414
Instruments for Turkish Government	542
Stationery	60
TOTAL	5,525	4,688
Net increase in 1886-87	837	

LINES, MAINTENANCE, AND REPAIRS.

6. The works in connection with the proposed change of line near Cyrus' Tomb, referred to at the end of paragraph 7 of last year's Report, have had to be postponed in consequence of poles of a wrong pattern being sent out from England. It is hoped, however, that the change may be carried out this autumn.

7. The new road between Teheran and Koom is still in a very bad state, none of the bridges having yet been rebuilt. The largest of them all, over a river about 16 miles from Koom, which had stood the previous winters, was partially destroyed by a heavy flood in the spring of 1887.

8. There was a slight increase in the cases of wilful damage in Persia; 22 cases having occurred in 1886-87 against 14 in 1885-86. All sums due from Persia on this account were recovered.

Persian Gulf. Length of various sections.

9. The total length of our cables is as follows:—

							Knots.
Fao Bushire,	Gutta Percha	152.04
Bushire Jashk,	"	519.055
Jashk Gwadur,	"	267.36
Gwadur Manora,	"	271.94
Manora Karachi,	"	17.97
TOTAL							1,228.86
Bushire Jashk, India Rubber							501.54
TOTAL							1,730.40

10. The maintenance and repairs of the cables in the Persian Gulf are detailed in Mr. Possman's Report which is attached. From this it will be seen that 26 faults occurred during the year, of which 23 were repaired during that period and the remaining 3 shortly afterwards.

11. The total expenditure of cable during the year amounted to 213½ knots, of which 99.1 knots were used in renewing that length in the Bushire Fao cable, thus making that section trustworthy which it had not been for some years. Of the remaining cable expended, 17.67 knots were used in Karachi Harbour for the Military Department to connect the batteries with Karachi.

12. The section of the new cable which was laid in 1885 on a 17 fathom shoal was removed into deeper water.

13. On the Mekran Coast land line 253 new creosoted pine posts were erected in the Gwadur division, and the whole of the fluid insulators were closely inspected, and those requiring it were replenished with fresh fluid. In the Jashk Division the iron standards were inspected and repaired, and strengthened where necessary.

14. Mr. Harrison made a survey of the country between the Dasht and Bahoo rivers, which is annually flooded under the line and rendered impassable, excepting on foot for about 50 miles. In the course of the survey a route was found which affords good camping places and offers an easy access to the line at all times for inspection.

15. In the cable factory at Manora 89.5 knots of cable were manufactured, 87.73 knots repaired and retaped, and 71.93 knots stripped preparatory to the serviceable parts of the core being remade into cable. In the small instrument workshop the number

of orders executed during the year were 74 for this department, and for the Indian and other departments 53. The value of the latter work was R904.

INTERRUPTIONS.

16. The working of the Indo-European route *via* Teheran was remarkably good throughout 1886-87. The total interruptions were few and of very short duration, the aggregate amounting to only 7 days, 4 hours, 34 minutes (against 34 days in 1885-86). Of this aggregate, 4 days, 17 hours, 11 minutes occurred on the Company's section between London and Teheran, and the balance of 2 days, 11 hours, 23 minutes on the Departmental section between Teheran and Bushire. There was no total interruption whatever in the Gulf section between Bushire and Karachi.

Total interruptions on departmental lines.

Appendix C.

17. The Turkish route was totally interrupted 108 days, 4 hours, 47 minutes (as compared with 128 days in 1885-86). About 94½ days are debitable against the Fao-Bushire cable section, the delay in repairing being due to the circumstance of the steamer being in dock at the time of the chief interruption.

Interruptions on Turkish route.

18. For the interruptions *via* Turkey, the Department had to pay under the common purse agreement to the Eastern Company £112-6-6, and to the Indo-European Company £41-11-1.

Effect of interruptions on common purse.

19. There were no other variations in the division of the common purse receipts for total interruptions in 1886-87.

20. By a partial interruption is meant an interruption of one or more wires on a circuit which has still an available line or lines left for communication. The partial interruptions in 1886-87 amounted to 253 days, as compared with 200½ days in the preceding year.

Partial interruptions.

TRAFFIC.

21. The Regulations and Tariffs of the London Convention were in force during the first three months of the year, when they were superseded by the revision of Berlin, which came into operation on 1st July. The chief alteration in the Regulations was the exclusion of rectifying messages from the international accounts. The necessity for this exclusion was so great that this modification had, by agreement with India, been adopted *via* Teheran and Suez towards the end of the previous year, or a few months before the new rule became conventionally applicable. The principal modification in tariffs was a reduction on the extra-European lines, bringing the tariff between Europe and India down to Fcs. 5 *via* Teheran or Suez, and Fcs. 4.50 *via* Turkey. Reduced rates for press messages generally, between England on one side and India and Australia on the other, were also brought into operation from 1st July.

International Regulations in force.

Modification in Tariffs.

Analysis of paid Traffic.

22. The paid messages and words carried by the Department were—

	1886-87.		1885-86.	
	Messages.	Words.	For comparison.	
			Messages.	Words.
Government	2,916	118,552	3,943	247,351
Commercial and private	86,462	1,124,074	109,442	1,333,030
Press at reduced rates	1,355	121,566	191	91,621

23. It has been already explained that the previous year 1885-86 was exceptional. Its traffic contained diverted messages and a large correspondence to and from the Afghan Commission.

24. The average length of messages classed as commercial or private, which constitute the backbone of our traffic, was 13 words. This average is a valuable index of the progress, or otherwise, of Code making. As the average has fluctuated between 12 and 13 for some years, it looks as if the art of condensation by Code has reached its highest practical development for the present.

25. The average speed of transmission by each of the three routes from England to Calcutta, according to the *Government Gazette*, was, *viâ*.—

	Teheran.		Turkey.		Suez.	
	H.	M.	H.	M.	H.	M.
In 1885-86 it was	1	31	13	23	2	31
	3	42	13	52	3	36

26. Compared with the previous year there was, therefore, a very great improvement in the speed from England to Calcutta *viâ* Teheran ; but during five months of the previous year allowance must be made for considerable pressure of extra traffic on the Teheran route, eliminating the effect of which would reduce the average to within two hours, but even so, the improvement in 1886-87 was great.

27. The Traffic Manager, Karachi, whose office it now is to receive for check all the messages transmitted by the Department, reports that he was only able to check half the messages carried in 1886, and that the proportion of error detected as having been made between Teheran and Karachi was $\frac{2}{3}$ of a word per 100 words, as compared with $\frac{1}{3}$ a word per 100 words in 1885.

28. In the previous Report it was mentioned that the rectifying messages for that year were more numerous than usual. They were, however, hardly less numerous last year in comparison with the volume of traffic.

The numbers were :—

	1886-87.	1885-86.
Rectifying messages	1,709	1,938
Public complaints by letter	65	122

29. The number of public complaints by letter within a given year is not so good a test of working as rectifying messages, because (1) the rectifying messages have to a great extent corrected the errors ; (2) comparatively few sufferers take the trouble to complain by letter.

30. Owing to the good working of the main routes, and their exceptional freedom from serious interruption, the amount of transferred traffic during 1886-87 was very small, amounting in London to 754 messages from the Eastern to the Indo-European Company, and 368 from the latter to the former. In the previous year the traffic transferred in London was about 10 times greater in volume.

31. An arrangement was made under which, when a partial interruption occurs between Karachi and Teheran, reducing the means of communication on either section to a single wire, the outward ordinary traffic to India on the single line at 2-30 P.M., Greenwich time, gives way to the homeward traffic to Europe. This arrangement secures the arrival of the Indian traffic in England during office hours, and as any ordinary outward traffic on the Teheran-Karachi line at 2-30 Greenwich time could not be delivered in India before 8 P.M. Indian time, no harm, so far, appears to have been done to traffic for India. The arrangement does not affect Government messages.

82. A useful arrangement was also made in the Persian Gulf, by which messages from Muscat, Bunder Abbas, and Lingah are received from the public by the Post Masters of those places and forwarded by mail to the nearest Telegraph Office. And a special arrangement was made by the parties to the Common Purse in favour of press messages at reduced rates, permitting them, after a delay of 24 hours, to take turn on the main routes with ordinary traffic.

83. The growth of the net receipts of the Common Purse, which had been in rather an increased ratio in 1885-86, owing chiefly to messages exchanged with the temporary frontier mission in Afghanistan, and to news messages from Burma, sustained, as was anticipated, a check in 1886-87, principally in consequence of the reduction in tariff between Europe and India, which, as previously mentioned, was lowered from 1st July by nearly 13 per cent.

84. The following table exhibits the growth and fluctuation of the Common Purse from the time the Department joined it:—

Table A.

YEAR.	First year's actual net receipts and hypothetical increase of 5 per cent. per annum.	Actual net receipts of Common Purse.	Actual increase per cent. per annum on first year's working.	Average increase per cent. per annum.	Fluctuation of each year compared with preceding year.
	£	£			
1878-79	427,180	427,180
1879-80	448,539	480,309	12·437	12·437	...
1880-81	470,966	523,616	10·713	11·25	9·02
1881-82	494,514	515,104	6·437	8·74	1·62
1882-83	519,240	545,043	6·281	7·70	5·81
1883-84	545,202	544,004	4·953	6·73	0·19
1884-85	572,462	556,444	4·504	6·55	2·29

1884-85	157,019	195,974	8·950	9·38	11·91
1885-86	164,870	194,750	7·528	8·86	0·62
1886-87	173,113	193,393	6·464	8·35	0·70

DIVISION OF TRAFFIC.
The Standard division of Receipts—

	ON INDIAN TRAFFIC		ON TRANS-INDIAN TRAFFIC	
	BEING		BEING	
	Via Suez.	Via Indo-European route.	Via Suez.	Via Indo-European route.
	60·39%	39·61%	80·53%	19·47%

The percentages of traffic actually carried have been—

1878-79	71·31%	28·69%	95·26%	4·74%
1879-80	67·91%	32·09%	94·10%	5·90%
1880-81	69·01%	30·99%	92·50%	7·50%
1881-82	64·63%	35·37%	81·26%	18·74%
1882-83	43·34%	51·66%	59·26%	40·74%
1883-84	55·96%	44·04%	83·52%	16·48%
1884-85	53·02%	46·98%	84·44%	15·56%
1885-86	52·14%	47·86%	75·91%	24·09%
1886-87	55·46%	44·54%	85·32%	14·68%

36. The above table shows that the traffic actually carried by each of the parties to the Common Purse in 1886-87 approached more nearly the standard division than in the preceding year, and the following table exhibits the yearly amounts paid into and drawn from the Common Purse by the Department, the results of nine years working being that the Department has paid in altogether £684,949 and drawn out £680,839 :—

YEAR.	Credited to Purse.	Drawn from Purse.
	£	£
1878-79	42,309	62,264
1879-80	52,458	68,877
1880-81	57,235	76,122
1881-82	67,108	74,528
1882-83	110,728	84,861
1883-84	81,408	76,547
1884-85	85,376	76,610
1885-86	107,317	85,824
1886-87	80,980	75,206
	684,949	680,839

37. Extracting from the Common Purse traffic the percentage carried by the Department, the following figures will show its sub-division between the Teheran and Turkish routes :—

Carried by Department, Indian and Trans-Indian combined.	1886-87.	
	Sub-division.	
	Via Teheran.	Via Turkey.
14.84 per cent.	14.45 per cent.	0.39 per cent.
	In 1885-86 it was—	
17.92 per cent.	17.47 per cent.	0.45 per cent.

38. Or, dealing with the traffic carried by the Department considered by itself, without reference to the Common Purse, its division in 1886-87 was :—*via* Teheran 95.47 per cent., *via* Turkey 4.53 per cent.

39. The checking of these accounts had not been carried out at the date of last year's Report, as explained therein (paragraph 62). A portion of the Eastern Company's accounts for each month of the year was thoroughly examined, but no error was found.

40. The Indo-European Company's detailed accounts for May 1885 were checked thoroughly, only a few minor errors were discovered, the result of which, so far as this Department is concerned, was an excess credit of two shillings.

41. The usual test was applied to the Eastern Company's accounts, *i.e.*, an arbitrary selection of a portion for each month was thoroughly examined, with the usual satisfactory result, no errors being discovered.

42. The Indo-European Company's accounts for July (the first month under the Berlin Convention) were selected for examination and checked throughout, the net result being 14s. 9d. due to this Department.

43. The settlements with India were effected at the market values of the monthly franc balances. The average rate for the year was 17.34d. per rupee. For the first quarter of the year the ratio between francs and sterling was 25.05, and during the remainder of the year 25.21.

44. The local collections of the Persian section were adjusted at the rate : 1 franc = 26 shahis, and credited to the Government of India at 255 krans = 100 rupees.

45. The settlements with Turkey and the Companies were at 25 francs per £.

INSPECTIONS.

46. Towards the end of March I started from London on a tour of inspection of the Persian and Persian Gulf lines, which lasted till August 17th. Instead of repeating what I have already reported, I beg to refer to my inspection report, a copy of which I submitted to Government with my letter No. 423 of 15th September 1887.

47. In the Persian Gulf section Mr. Finch inspected all the offices and the Ormara-Gwadur section of the land line.

Mr. Finch's tour.

ESTABLISHMENTS.

48. In January 1887 the Director-in-Chief, the late Colonel Sir J. U. Bateman Champain, R.E., K.C.M.G., was most reluctantly forced by very serious illness to seek relief in the south of Europe. He left London for Cannes on the 11th of January, Colonel R. Murdoch Smith, R.E., being appointed Acting Director-in-Chief during his absence. Finding no benefit from his residence at Cannes, Sir J. U. Bateman Champain went to San Remo, where he died on the 1st of February, from which date Colonel Smith was placed in charge of the Department as Director-in-Chief.

49. Sir Henry C. Mance, C.I.E., Engineer and Electrician of the Persian Gulf section, retired on a pension and was succeeded by Mr. J. Possman, Superintendent. Mr. Superintendent Betts of the Persian Gulf section also retired. In the same section one cable clerk resigned, and two died in the course of the year.

DEPARTMENTAL STEAMER.

50. A tabular statement attached to this Report shows the work done by the steamer during the year. She made 8 trips and steamed about 15,000 miles. Appendix E.

STORES.

51. The principal items of expenditure during the year were as follows :—

	R
Purchase of stores in India	13,697
London stores, including freight and landing charges	70,992
Stores from other Departments	4,310
TOTAL	88,999

52. Among the London stores are included 350 Simmen's iron supports, originally sent out for the Persian section, but transferred to the Gulf, as they were not of the pattern required.

53. The issues of stores were as follows :—

	R
Repairs to cable	97,105
Repairs to Mekran land line	18,132
Issues to Offices	13,413

54. The value of the manufacture outturn was R78,516, out of which R77,090 was for cable manufacture and R53 for instruments.

GENERAL.

55. It is hardly possible to exaggerate the loss which the Department has sustained in the lamented death of Sir John Bateman Champain. Associated as he was with the late Colonel Patrick Stewart from the beginning in the project for connecting England with India by telegraph, the very existence of the Indo-European system is in a great measure due to his initiative, while to his constant forethought, tact, and judgment are chiefly due its gradual development from a state of almost hopeless difficulty and confusion into one of order and efficiency. It would be out of place in this report to enter into details regarding his eminent services, but I trust I may be permitted to refer to the short sketch of his career which I have the honour to enclose.

56. The Persian Government have shown a most friendly spirit in allowing us to retain the superintendence and working of the Teheran-Meshed line. Nothing could more clearly illustrate the change in their feelings from distrust to confidence which the 24 years' work of our telegraph staff in Persia has effected. Further striking illustrations of the same friendly spirit were shown during my recent visit to Persia, notably in the prolongation till A.D. 1905 of our two telegraph Conventions, one of which was about to expire.

57. Having assumed charge of the Department only a short time before the close of the year under review, I must refer to the enclosed returns for evidence of the continued efficiency of the Department and of the careful discharge of their duties by its individual officers.

The 31st August 1887.

R. M. SMITH, Colonel, R.E.,

Director-in-Chief.

A. BRASHER,

Director of Traffic.

APPENDIX E.

INDO-EUROPEAN TELEGRAPH DEPARTMENT.

PERSIAN GULF SECTION.

Statement of work done by Her Majesty's I. G. T. S. "Partick Stewart" during the year 1886-87.

DATE.				Particulars.
From		To		
April	1, 1886	May	14, 1886	In Bombay Dock undergoing repairs, &c.
May	15, "	"	16, "	Hauled out of dock, coaled ship, received stores, &c., for Karachi.
"	17, "	"	20, "	Left for Karachi, having in tow Bushire Residency steam launch, arriving 20th.
"	21, "	"	28, "	Lying at moorings in Karachi harbour, preparing ship for sea, taking in coal, cables, &c.
"	29, "	June	1, "	Left Karachi, calling at Ormara, Gwadar and Charbur.
June	2, "	"	3, "	Repaired fault in Gwadar-Jask Section off Ras Maidan and arrived at Jask.
"	4, "	"	6, "	On passage to Bushire, arrived morning of 6th and left at night for position of fault.
"	7, "	"	8, "	Repaired two faults, one 50' west of Reshire and the other 41' west of Bushire, called at night at Reshire to land the Acting Engineer, and left for Fão.
"	9, "	"	11, "	Arrived at Fão afternoon and Mahmra at night, transhipped stores to <i>Comet</i> and left, calling at Fão and arrived and anchored off Reshire.
"	12, "	"	16, "	Left at night for position of fault off Great Tumb and repaired fault in india-rubber, Jask-Bushire Section, and left for Kœe Mubarak.
"	17, "	"	17, "	Picked up old gutta-percha cable off Kœe Mubarak, and spoke H. M. S. <i>Kingfisher</i> , who reported fault in india-rubber, proceeded and anchored off Jask.
"	18, "	"	22, "	Left for position of 2nd fault in india-rubber off Great Tumb, after its repair left for fault in the Bushire-Fão Section, which was reported when repairing the india-rubber, after repairing it anchored in Bushire inner roads, coaled and provisioned ship.
"	23, "	"	26, "	Left for Jask, picked up some old gutta-percha and arrived at Jask.
"	27, "	"	29, "	At Jask fresh south-east gale blowing. Left for position of fault in Gwadar-Jask Section, 53' from Jask, and after repairing it left for Charbar.
"	30, "	July	2, "	Called at Charbar, Gwadar, and Ormara, arriving at Karachi on 2nd.
July	3, "	"	15, "	Lying at moorings in Karachi harbour, overhauling engines, boilers, preparing ship for sea, taking in cable for completing renewal of Bushire and Fão Section.
"	15, "	"	31, "	Left Karachi for Persian Gulf via Jask, picked up old cable and renewed Bushire-Fão Section, and anchored off Reshire, awaiting the arrival by mail of the Chief Officer.
August	1, "	August	4, "	Left Bushire and repaired fault in the india-rubber, Bushire-Jask Section, off Great Tumb Island and arrived at Jask.
"	5, "	"	7, "	Left Jask calling at Charbar, Gwadar, arriving Karachi 7th.
"	8, "	"	25, "	Laying at moorings in Karachi harbour, preparing ship for sea, taking out and receiving cable, coaling ship, &c.
"	26, "	September	19, "	Left Karachi and repaired two faults in the india-rubber, Jask-Bushire Section, and one in the new gutta-percha, Jask-Bushire Section, also endeavoured to repair the gutta-percha, Karachi-Gwadar Section, but failed, swell being too heavy, picked up a few miles of old cable off the Quoina, called at Bushire, Jask, Charbar, Gwadar, Ormara, arriving at Karachi 19th.

Statement of work done by Her Majesty's I. G. T. S. "Patrick Stewart" during the year 1886-87—continued.

DATE.		Particulars.
From	To	
September 20, 1886 .	October 1, 1886 .	Lying at moorings in Karachi harbour, taking in cable, coal, stores, &c., and preparing ship for sea.
October 2, " .	" 12, " .	Left Karachi and finally repaired fault in the gutta-percha, Karachi-Gwadur Section, arrived and discharged stores at Gwadur and left for Ormara, arriving Karachi 12th, also towed a bugalow from Karachi with telegraph stores, and cast off opposite Charbar.
" 13, " .	" 29, " .	Lying at moorings in Karachi harbour, taking in cable, preparing ship for sea, and overhauling engines, &c.
" 30, " .	November 13, " .	Left Karachi, conveying Colonel Reynolds and party to Gwadur, called at Ras Kutchery, Ormara, Gwadur, and Jask, and repaired india-rubber, Jask-Bushire Section, south of Bushire about 90', the repair to this section was much delayed owing to a continuance of strong north-west winds, and arrived at Bushire.
November 14, " .	" 15, " .	At Bushire delayed by north-west winds.
" 16, " .	" 26, " .	Left Bushire, repaired a fault in the Bushire-Fao Section, about 77' from Bushire (this fault developed after leaving Karachi), picked up part of the old Bushire-Fao cable and arrived at Bushire, coaled ship, provisioned, &c., and left for Gwadur <i>via</i> Lingah, Jask, and Charbar.
" 27, " .	" 30, " .	Arrived Gwadur, embarked Colonel Reynolds' escort, &c., and left for Ormara, arriving Karachi 30th.
December 1, " .	December 5, " .	Lying at moorings in Karachi harbour, overhauling engines, taking out cables, &c.
" 6, " .	" 14, " .	Left Karachi, called at Ormara and Gwadur, and repaired a fault in the Gwadur-Jask Section and returned to Karachi.
" 15, " .	January 5, 1887 .	Lying at moorings in Karachi harbour, overhauling engines, boilers, &c.
January 6, 1887 .	" 26, " .	Left Karachi, calling Gwadur, Jask and Bushire, and repaired two faults in india-rubber, Jask-Bushire Section, and one fault in the gutta-percha, Gwadur-Jask Section, and returned to Karachi, calling Jask and Charbar.
" 27, " .	" 29, " .	Lying at moorings in Karachi harbour, coaling ship, removing cable, telegraph stores, &c.
" 30, " .	February 2, " .	Left for Bombay, arriving there on the 2nd.
February 3, " .	" 7, " .	Lying at moorings in Bombay harbour.
" 8, " .	" 25, " .	In dock, undergoing repairs to engines, cleaning vessel's bottom, &c.
" 26, " .	" 26, " .	Hauled out of dock, took short trip round the harbour to try engines, &c., and coaled ship, &c.
" 27, " .	March 3, " .	Received stores, passengers, &c., and left for Karachi with torpedo boat <i>Miner</i> in tow, arriving 3rd.
March 4, " .	" 12, " .	In Karachi harbour, discharging Government stores, coaling ship, taking in cables, stores, &c., for telegraph stations.
" 13, " .	" 18, " .	Left Karachi, called Ormara, Gwadur, Charbar, and repaired fault in Gwadur-Jask Section, 50' east from Jask, and cabled at Jask.
" 19, " .	" 22, " .	Repaired a fault in the india-rubber, Jask-Bushire Section, 85' from Jask, and called at Lingah for mails, &c.
" 23, " .	" 29, " .	Repaired 2nd fault in india-rubber, Jask-Bushire Section, 110' from Bushire, removed new gutta-percha off 17 fathoms patch, fixed position of same and examined old gutta-percha, about 118' from Bushire.
" 30, " .	" 31, " .	Arrived at Bushire and employed picking up old cable.

KARACHI;
23rd July 1887.

B. FINCH,
Director, Persian Gulf Telegraph.

APPENDIX F
INDO-EUROPEAN TELEGRAPH DEPARTMENT.
PERSIAN GULF SECTION.

Administration Report of the Engineer and Electrician, 1886-87.

The lengths of the various sections on the 31st March 1887 were as follows :—

	Knots.
Fão-Bushire, gutta-percha	= 152·04
Bushire-Jask, gutta-percha, new	= 519·55
Bushire-Jask, india-rubber	= 501·54
Jask-Gwador, gutta-percha	= 267·36
Gwador-Manora, gutta-percha	= 271·94
Karachi-Manora, (3) gutta-percha	= 17·97
TOTAL	1730·40

The total length having been increased 1·41 knots in the various repairs.

ELECTRICAL CONDITION OF THE CABLE.

Appendix A.

The insulation of the Fão-Bushire, the Bushire-Jask, new gutta-percha, and the Jask-Gwador cables is low on account of a minute fault in each of these sections, which I have not as yet been able to localise.

The insulation of the india-rubber cable has been much improved by the cutting out of the various faults, and by the removal of a length of 13 miles of very bad cable near Bushire.

FAULTS AND INTERRUPTIONS.

Appendix B.

The faults during the past year amounted to 26, of which 23 had been repaired before the 1st April last, whilst 3 (of which 2 are partial ones and one a total break) were still awaiting repair on that date. One of these partial faults is in the Fão-Bushire Section, and has such a high resistance as to prevent accurate localisation, the other one was in the new Bushire-Jask gutta-percha cable, and could not be repaired before, as I first wished to restore communication on the india-rubber cable; this latter as well as a total break in the Jask-Gwador cable have now been cut out, and all our cables are in good working order.

One circuit between Karachi and Bushire was available throughout the year, while a second line was available for over seven months.

REPAIRS.

To execute the repairs the cable ship *Patrick Stewart* made eight trips in the last official year, during which she steamed 15,000 miles. The engineering staff were absent from Karachi on repairing duty 167 days. Of the 197 miles of cable disturbed in the various repairs at sea and the partial renewal of the Fão-Bushire cable, 33 per cent. had to be left on the ground as too weak to bear lifting; 40 per cent. was found too weak to be re-laid and has been stripped for the core, with the exception of that part brought back from our last repairing trip, which will be stripped shortly, 23 per cent. was found in sufficiently good order for relaying after repair, and 4 per cent. was in short lengths, and has been sold for fencing purposes.

EXPENDITURE OF CABLE AND CABLE IN STOCK.

Appendix C.

The total expenditure of cable during the year amounted to 213·471 knots. True to our policy of renewing large lengths of our cable where it was known to be in very bad order, I inserted 99·1 knots of good cable in the Fão-Bushire Section in July last year, since which renewal not a single total interruption has taken place in this section.

Of the cable expended, 17·697 knots were used in laying a cable for the Military Department to connect the batteries at Manora with the Cantonment of Karachi, and in renewing our harbour cables. This leaves 96·674 knots expended in 22 repairs at sea or 4·403 knots per repair—a satisfactory result when we consider that two of the repairs were really renewals of very bad lengths of cable of 13 and 28 knots, respectively.

The cable in stock on the 1st instant amounted to 80·882 knots.

SUMMARY OF THE HISTORY OF THE CABLES DURING 1886-87.

FAO-BUSHIRE SECTION.

This section developed five total breaks between the 1st April and the 8th July last owing to corrosion of guards, when it was decided to at once proceed with the renewal of the

remaining bad length of cable from the 53rd mile, from Fão up to the Bushire cable-house—a distance of 99 miles. This very necessary work was completed on the 27th July last, since which time no total interruption has taken place, except one of 17 hours during the removal of the sixth fault, a partial one, due to the core being pierced in two places as with a knife, while the guards showed no sign of injury. A seventh defect has not up to the present been cut out owing to its high and variable resistance, preventing the localisation of its position. It does not, however, in any way interfere with the working.

This section was interrupted for 94 days, of which 60 are due to the repairing vessel being in dock in Bombay.

BUSHIRE-JASK INDIA-RUBBER CABLE.

Ten faults occurred in this section during the past year, of which one was caused by a chafe, seven by corrosion of the iron guards, and two by broken joints, the ends of which pierced the dielectric and caused partial earth faults. At nearly every point where I cut this cable, it was found in very bad order, the guards having in many places quite disappeared, bare core being exposed. One of the faults was due to a fish bite in a piece of this exposed core. I renewed a length of 13 knots near Bushire, where I found it exceptionally bad. From the appearance of this cable at different spots along its course, I apprehend that it will give us a great deal of trouble in the near future, and the sooner it is renewed the better.

This section was interrupted 132 days in the last official year, of which 59 days are due to the ship being in dock.

BUSHIRE-JASK NEW GUTTA-PERCHA CABLE.

No less than three partial faults developed in this section during the year. One was cut out on the 3rd September, while two remained at the close of the year, of which one was removed on the 4th instant. The third defect could not up to the present be accurately localised. The faults were found to be due to defects in the manufacture of the core, some foreign substance being embedded in the percha, leaving only a thin layer of the latter to insulate the conductor which layer was pierced by the action of the current.

The cable was laid on a 17 fathom shoal, 2 miles in extent, during submersion and (the surrounding soundings being 42 to 45 fathoms) it was not thought safe to leave it there. I therefore took it off the bank on the 29th March last, and placed it in deep water, so that any danger of a chafe by the action of the waves is now avoided.

This section was only interrupted for 7½ hours during the repair of one fault.

JASK-GWADUR SECTION.

Five faults were cut out of this section, of which two were due to the core being pierced by a chafed iron wire, and the other three to corrosion of the guards and consequent breaking of core in spans across declivities. A sixth fault was not repaired on the 1st instant, as its position could not be accurately localised, and I trusted that on my return from the last trip up the Gulf, the tests would more accurately indicate at which point the cable was interrupted.

This hope was, however, not fulfilled, as both ends of the break were partly sealed by the gutta-percha, and I have repaired the break on the 9th instant.

The interruptions on this section amounted to 60 days.

GWADUR-MANORA SECTION.

One fault only occurred on this section, due to a fish bite in bare core. The repair of this fault had to be interrupted for 19 days, owing to the very bad state of the cable and the heavy monsoon swell prevailing.

On attempting the repair when the sea had calmed down, I found the cable so bad for a distance of 28 miles, that I could get no end to splice on to in the whole of this length, and had to pick up the shore end, 5 miles from Gwadar, before I succeeded in restoring communication. In this repair I was only able to pick up 8 miles of cable, all the rest being too weak to be lifted. However, the result has been that no fault has since occurred in this section, and I have doubtless cut out the worst part of the line.

The interruption on this section only amounted to 23 days, including the 19 days during which repairing operations had to be suspended.

BUSHIRE-JASK OLD GUTTA-PERCHA CABLE.

Since this cable was abandoned in November 1885, I have recovered 121·78 knots, of which quantity 87·53 knots were found to be fit for re-laying after repair.

Most of the latter cable was comparatively new, having been inserted in various repairs since 1881.

Of the remainder, about 200 miles in one continuous length had not developed any fault till April 1886, when a break occurred about 60 miles inside this piece. I lately lifted the cable near this break and examined it for some distance, but found several more faults. As the iron guards were also found much decayed, I have recommended that it should be taken up as early as possible, so that the core can be re-made into cable at our Manora factory.

During the next year the *Patrick Stewart* will fill up with old cable from this section at every trip, so that I trust all that can be recovered will have been obtained by the close of this year.

HARBOUR CABLES.

Appendix D.

No total interruptions occurred on any of these cables during the year, but their insulation became very low. The iron guards were also completely decayed in several sections.

A new cable was laid from Manora to camp for the Military Department, to connect the batteries at Manora with Karachi by telegraph. I took this opportunity to renew our faulty cables, and they are now all in perfect order. The insulation is not high owing to many joints in the core, but the guards are new, and these cables will not give trouble for years.

CABLE-HOUSES AND LAND-LINES TO OFFICES.

All cable-houses and land-lines thence to the various offices have been inspected from time to time, and were found in perfect order.

The Director has ordered the Bushire cable land-lines to be strengthened by a double line of posts being bolted together, as was done at Jask two years ago.

The cable-boxes between Karachi and Manora have all been repaired, and are in good order.

MECHANICAL CONDITION OF THE CABLES.

A large length of the Fão-Bushire section having been renewed in July last with partly good old retaped and partly new cable, is in excellent mechanical condition, and will not likely be interrupted for some years.

The same may be said of the Bushire-Jask gutta-percha cable, which was only laid in November 1885: three manufacturing faults have been cut out of the core of this cable, and one is in course of development; these faults do not interrupt the working in any way, and I do not anticipate many more of them, as the cable has now been under electrification for a sufficient time to show up most defects of this kind.

The india-rubber cable from Bushire to Jask is now nearly 18 years old, and is in a very weak condition all along its course, the iron guards being much decayed.

The Jask-Gwadar and Gwadar-Manora cables have now been submerged over 23 years; but owing to the more favourable nature of the soil on which they rest, are in much better condition than the india-rubber section. I anticipate that these two sections will last for many years yet when the known weak lengths are renewed.

MANORA CABLE FACTORY.

The factory boiler has not shown any defect since we used only fresh water, and it is now in excellent working order.

A new boiler has been received from England, and has been put up in the boiler-shed. It has been tried with most satisfactory results, and there is now no chance of any stoppage of work should the old boiler become defective.

Some of the wire bobbins of the cable machine having become weak, Mr. Hughes, the Engine Foreman, is engaged in making new ones to replace them.

The following summary of work done during last year in the factory shows a better result even than that achieved in the year 1885-86:—

	Knots.
Cable manufactured	89.50
Cable repaired and retaped.	87.73
Cable stripped for the core.	71.46
Short pieces of cable repaired and prepared for sale for fencing purposes	7.99

Total cable passed through the factory 257.18 knots, besides which 17.39 knots short pieces of core were stripped for the sake of the copper.

My best thanks are due to the European Foremen for their hearty co-operation in the work at the factory and at sea during repairs, which enabled me to show such excellent results

The total disbursements at Manora have been slightly in excess of those of the previous year. This is due to the following causes:—

31 knots more cable were repaired and retaped than in the year 1885-86.

21 knots less were stripped than in the previous year; but as the ship made two more trips, it became necessary to employ much extra labour while she was absent from Manora, so as to empty the tanks for the reception of cable brought back from the repairs.

The Second Foreman, Mr. Moore, was absent on leave till the 12th October last, & Mr. Rowley having been sent out from England to act for him. As Mr. Foreman Brown expressed his intention of going on leave in March, the Director-in-Chief sanctioned Mr. Rowley being retained on the temporary establishment during the interval, as his pay (about Rs. 1,000) would come to little more than the passage home and out, and as it might be difficult to find another good man to take Mr. Brown's place.

WORKING AND ESTING.

Various improvements have been introduced in the translation arrangements at Jask station in the year under review, by which loss of current by leakage has been almost completely eliminated and working speed accelerated. Great credit is due to Mr. Pierce, the Assistant Superintendent in charge at Jask, for the great attention he devoted to this important part of his duties, and by which he was enabled to offer the suggestions which led to the improvements.

The average distance between the assumed and actual position of faults amounted to 0.43 of a knot.

CONCLUDING REMARKS.

As foreshadowed in my last report, we have made extensive renewals during the past year. The Fao-Bushire Section has been made safe for years by the insertion of 99 knots of cable. The india-rubber cable had 13 knots and the Gwador-Karachi Section 28 knots of new cable inserted in continuous lengths, bringing up our renewals to 140 knots.

True to the renewal policy, I took up all the very bad cable I came across during the various repairs and inserted good cable instead.

During the next year I expect that renewals to the extent of 150 knots will be made, and by continuing on these lines I doubt not that our interruptions will in two or three years become so infrequent, that one or two trips of the cable ship per annum will suffice to keep communication open.

In conclusion, I cannot but again express my high appreciation of the services of my Electrical Assistant, Mr. Andrews, one of the most zealous and able officers of this department.

J. POSSMANN,
Engineer and Electrician,
Persian Gulf Telegraphs.

APPENDIX A.

Statement showing Insulation of the Persian Gulf Cables during March 1887.

SECTIONS.	Length in knots.	INSULATION IN MEGOHMS PER KNOT.

APPENDIX D.

Statement showing the Repairs and Renewals of Harbour Cables during the official year 1886-87.

Number of Repair.	DATE OF		Number of Cable.	Locality of fault.	Cause of fault.	REMARKS.
	Development of fault.	Completion of repair.				
1	May 3rd, 1886	1, 2, 3	Three cables laid between box 5 and 6, necessitated by the construction of a jetty over the old course of our cables; 1.28 knots expended.
2	February 28th, 1887	4	One cable connecting the Camp Office with the batteries at Manora laid for the Military Department. Length 7.838 knots.
3	Ditto ditto	5	One cable connecting the Harbour Board Office with the Port Office at Manora by telephone laid for the Harbour Board. Length 4.273 knots.
4	January 10th, 1886	January 31st, 1887	1, 2, 3	Between Box 4 and 5	Decay of guards	Three cables laid from Box No. 2 to Box 5, replacing the old ones, which were in bad condition; 4.306 knots expended.
5	April 5th, 1886	March 1st, 1887	1	Office to Box 1	Core perished	Six lengths of core laid from Karachi Office to Box 2; 0.89 knots expended.

- A. Indian lines between Karachi and Calcutta interrupted 9 hours, 4th May.

B. During total interruption of land-lines in England from 28th to 29th December, the Indo-European Company forwarded messages by Railway to and from London and Lowestoft.

C. The Eastern Company did the same between London and Exeter.

D. Interruptions, Persian Section and Indo-European Company's line.
- A. Suez route interrupted 3rd to 27th. Total traffic via Teheran.

B. Imperfect working on Suez route caused pressure of traffic via Teheran.

M. C. BRACKENBURY, Major, R. E.,

Under-Secretary.

FORT WILLIAM,

The 11th January, 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending 4th Jan. 1888.

During the period under review the weather has been less settled and fine than was the case during the previous week. There has been comparatively little disturbance in the main features of the pressure distribution, the barometer having been steadily highest over North-Western and lowest over South-Western India, but local disturbances have appeared in different parts of India and occasioned unsettled weather in their neighbourhood. On the 29th the barometer was falling, except in the South where a slight rise was in progress. A feeble barometric depression was shown off the Kattywar Coast, occasioning slight rain over Guzerat and at Mount Abu. At the same time the excessive fall over the Punjab and Rajputana apparently indicated that an ordinary cold-weather disturbance was forming over North-Western India. In the South rain was falling at the majority of stations. The chart of the 30th showed a somewhat complicated distribution of pressure. The highest readings were still reported from the Punjab, but three distinct depressions were shown—one lay between Sirsa and Jeypore, the second between Surat and Indore, and the third between Karwar and Mangalore. All three depressions occasioned rain and unsettled weather in their neighbourhoods, and slight rain was also falling at Wellington and Madura. In the course of the day the depression between Sirsa and Jeypore advanced north-north-eastward towards the hills, and a snow-storm occurred at all the hill stations from Ranikhet to Simla, and rain at several of the plains stations. By the next morning, the 31st, this storm had disappeared, and the sky cleared over the whole of Upper India. The chart of this day (December 31st) showed a slight depression over Khandeish, and also that the disturbance on the west coast had travelled northward towards Ratnagiri. Rain was falling at several stations in Bombay and the Central Provinces. On January 1st a slight change was shown, the area of highest pressure having deserted the Punjab and been transferred to the North-Western Provinces.

The rainfall had also generally ceased except in the South. On the 2nd the weather again became unsettled on the west coast, and rain fell at several stations in Bombay and in the Central Provinces. A rapid fall of temperature occurred on this day in the North-West and Central Provinces. On the 3rd a brisk barometric fall was reported from Karwar and Ratnagiri, and a slight cyclonic circulation of the winds was shown on the west coast. This was accompanied by general, though slight, rain in Bombay. Rain also fell in the Central Provinces. On the 4th the barometric fall and depression, which on the previous day was reported from Karwar and Ratnagiri, were shown near Bombay, and strong cyclonic winds were experienced on the west coast. Rain was also falling at many of the western and central stations. Goa received $2\frac{3}{4}$ inches, and Ratnagiri, Bombay and Nagpur about 1 inch. In Southern India no rain was reported after the 1st.

As compared with the monthly averages the mean pressure of the week was above the normal over nearly the whole country, but was below it at several stations on the west coast. Temperature was above the monthly mean in Burma, at the hill stations in Ceylon, and in the Carnatic, but below it elsewhere. The greatest deficiency was in the Punjab, where the night readings were very low.

The concluding table gives the rainfall of the week according to the different Provinces. The heaviest rainfall was in Bombay, but the Central Pro-

vinces had more than their average. In Burma, Bengal, and Assam there was no rain during the week.

DIVISIONS	Number of Stations.	TOTAL RAINFALL.
Burma
Bengal and Assam
North-Western Provinces and Oudh	3	0.76

Madras	5	2.91

W. L. DALLAS,

for Meteorological Reporter to the Govt. of India.

Simla, 7th January 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

WEEKLY REPORT ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS.

Madras.—*For week ending 7th January 1888.*—Rainfall up to date generally sufficient, except in parts of Madura and Salem. Agricultural operations progressing as usual. Crops slightly damaged here and there by rain, disease or insects. Pasture generally sufficient. No material fluctuation in prices. General prospects favourable.

Bombay.—*For week ending 11th January 1888.*—Rain in most districts of the Presidency Proper; beneficial to late crops in Khandesh and Sholapur, but tobacco in Panch Mahals, early *jowari* in Sholapur and standing crops in general, in parts of Broach, Surat, Baroda, Kathiawar, Nasik and Konkan, and in several districts of the Deccan and Southern Mahratta Country damaged by rain, cloudy weather, or mists. Certain crops also damaged by blight in parts of Sholapur and Dharwar; by blight and insects in parts of Nasik, and by adverse winds in parts of Bijapur. Harvesting of early crops in progress in Khandesh, Nasik, Belgaum, Dharwar and Hyderabad, and sowing of late crops in Shikarpur and the Upper Sind Frontier in progress. Probable outturn of cotton in Wadwhan from 8 to 11 annas and of opium in Baroda 22 annas. Agricultural stock good, except in one taluka of Nasik and a few talukas of Hyderabad. Grass in Thana and Ratnagiri damaged by untimely rain. Fodder scarce in two talukas of Nasik. Prices of food-grains have risen in Sholapur and Nasik.

Bengal.—*For week ending the 10th January 1888.*—Showers fell in Chota Nagpore, Behar and in parts of Northern and Western Bengal, but East Bengal, Central Bengal, and Orissa had no rain. The winter rice harvest is almost finished with good outturn in most districts, but in Chota Nagpore and in parts of the Burdwan, Patna, Bhagulpore and Orissa Divisions the outturn is below the average. The *rabi* and poppy crops generally promise well, and in Chota Nagpore have been much benefited by the showers of the week, but rain is wanted in Behar and the Rajshahye Division. Spring rice is being transplanted in Orissa and East Bengal. Sugarcane is being cut. Price of rice has not changed in the last fortnight; it is cheaper in the eastern districts than at this time last year, but dearer in almost all the other districts.

N.-W. P. and Oudh.—*For week ending 11th January 1888.*—The weather is cold and bright. The prospects of the *rabi* crops are still favourable, but the want of rain is much felt in all districts. In a few places *arhar* and gram have been injured slightly by frost. The poppy crop continues in fair condition. Supplies are sufficient, but prices of food grains are still high. The condition of cattle is satisfactory.

Punjab.—*For week ending 11th January 1888.*—No rain in the Province except a light fall at Kasur, district Lahore. Prices still tend to rise, though stationary in some districts. This is due to the absence of winter rains. *Rabi* sowings completed. *Rabi* prospects are generally good, but rain is urgently wanted throughout the Province, and few districts report that the crops are beginning to suffer. The *thal* of Dera Ismail Khan is suffering severely from continued drought. Slight damage done to crops by hard frosts in Sialkot. Stock cattle are generally healthy, except in Mooltan. Scarcity of fodder in some districts. Poppy sowings completed.

Central Provinces.—*For week ending 11th January 1888.*—Weather cloudy and rainy at beginning of week; now clear. Rain beneficial to wheat and other winter crops, but linseed has sustained some damage. Cloudy weather has damaged crops in Raipur, and a small outturn is expected. Fodder getting scanty in Raipur. Cattle in fair condition.

Burma.—*For week ending 7th January 1888.*—No rain has fallen anywhere. Reaping of wet-weather paddy is completed in the Lower Burma districts of Prome, Henzada, Moulmein and Tavoy; elsewhere in both Lower and Upper Burma the rice harvest is well forward. The condition of agricultural stock is good, except in Thonegwa. In both Upper and Lower Burma the estimates of probable outturn of harvest remain as before, except in the Amherst district where the crop estimate has risen from 12 to 14 annas. Price of paddy has risen in Henzada by ₹4, and in Myingyan by ₹10, per 100 baskets. Price of paddy has fallen in Pegu by ₹5; in Thonegwa by ₹9, in Thayetmyo by ₹5, in Shwegyin by ₹5, and in Mandalay by ₹10 per 100 baskets. Price of rice has fallen considerably in Pyinmana, owing probably to new crop having come into the market.

Assam.—*For week ending 11th January 1888.*—Weather seasonable. No rain except a little in Goalpara. Reaping of winter rice nearly completed. Outturn estimated at 12 annas in Sylhet and a full crop elsewhere. Prospects of mustard poor for want of rain. Crushing of sugarcane going on. Land being broken up in hill districts.

Mysore and Coorg.—*For week ending 11th January 1888.*—Slight rain reported in two districts of Mysore. Standing crops in good condition. Gathering of areca nut and ploughing operations for sowing of wheat, rice, and sugarcane in the Tumkur district progressing. Outturn of crops generally favourable. Condition of stock cattle good.

Coffee-picking in active progress in Coorg. Weather favourable. No rain.

Berar and Hyderabad.—*For week ending 11th January 1888.*—Some rain in Berar during the week, which has spoiled the cotton remaining to be picked. Cutting and stacking of *jowari* nearly completed. Outturn of *kharif* crops will, it is feared, be affected by the untimely rain. *Rabi* crops also have been damaged by this rain and also by insects.

Slight rain in Hyderabad during the week. Agricultural prospects continue good.

Central India.—*For week ending 11th January 1888.*—Slight rain in Bhopal, Baghelkhand and Bhopawur, sufficient throughout the Agency except in Baghelkhand. Agricultural operations in progress in Bundelkhand, Baghelkhand, Western Malwa and Neemuch, elsewhere completed. Standing crops generally good. Prospects and probable outturn of crops generally good, but below average in Western Malwa and Goona. Linseed and gram slightly damaged in Bhopawur, but standing crops in other parts good. Condition of agricultural stock good, except in Goona. Pasturage and fodder and opium fairly good throughout Central India. Prices rising and high throughout the Agency.

Rajputana.—*For week ending 11th January 1888.*—Agricultural operations satisfactory. Standing crops in good condition. Harvests fair but below average. Agricultural stock fair generally. Pasturage or fodder scarcely sufficient. Prices steady.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Summary for December 1887.

The average barometric distribution in December is similar in most respects to that of November, and consists briefly of an area of high readings overlying North-Western India, from which pressure decreases and reaches a relatively low level over the south of the Bay and along the south-west coast. About the close of the month it is usual for the high-pressure area in North-West to show signs of instability, and it may sometimes altogether disappear and be replaced by a depression which has either formed in or advanced over the Punjab. Such a change in the pressure distribution is accompanied by a cyclonic circulation of the winds over a large part of India, and by very unsettled weather, but ordinarily the winds during this month exhibit an anticyclonic circulation, the weather is fine, and the sky, at least in Upper India, quite clear of cloud. During the past December the barometer has been steadier and the weather finer than usual, and though at the close of the month a depression appeared in the Punjab it proved to be so slight as to exercise but little effect either on the general pressure distribution or circulation of the winds.

On December 1st a large area of high pressure extended over the greater part of North-Western and Central India, while the lowest pressures were reported from Ceylon. This distribution was accompanied by north-westerly and westerly winds down the Gangetic plain; northerly winds over Bengal and a large part of the Bay, and easterly winds (N. E. and S. E.) over the Peninsula. The weather was fine throughout nearly the whole country, and the only rainfall recorded was a slight shower at Galle. These conditions continued with but slight modifications until the 5th, when unsettled weather appeared on the Coromandel Coast, where the wind had "backed" to the north-westward and rain commenced. On the 6th a slight disturbance was shown off Negapatam and rain was falling at Rangoon, Madras and Coimbatore. In Sind also slightly deficient pressures were shown and

the wind had a cyclonic tendency. On the 7th the depression off the Carnatic coast had disappeared as a distinct disturbance, but it had left the weather in Southern India in an unsettled state, and rather heavy rain had fallen both at Negapatam and Madras. In Sind there was no change. On the 8th rain was still falling all over Southern India, the largest amount being $3\frac{1}{2}$ inches at Madras. In Sind the barometer had risen and the depression almost disappeared. From the 9th to the 14th rain continued to be reported from the south of the Peninsula and Ceylon, but in other respects conditions were fairly normal, though in the North-West the weather was on some days rather cloudy and on the 12th a few drops of rain fell at Bareilly and Roorkee. On the 15th there was no rain in any part of the Indian region, and normal cold weather conditions prevailed generally. This fine weather lasted until the 19th. On the 20th slight showers of rain fell at Murree, Peshawar and Rawalpindi, and on the 21st rain again commenced in the south of the Peninsula. On the 22nd slight snow fell at Murree and rain at Peshawar, and general rain in the south of the Peninsula and over Ceylon. The rain in North-Western India was unaccompanied by any important change in pressure which remained high over the whole of that region. On the 23rd there was again rain at some north-western stations and also over Southern India, but there was still no change in the relative distribution of pressure. On the 25th the slight precipitation which had occurred in the North-West entirely ceased, but on the Carnatic coast showers were reported, which, on the following day, extended to several southern stations. The chart of the 27th showed rain to be falling at nearly all the Madras stations as well as at some places in the Central Provinces also, and on the 28th the weather was unsettled over a large part of Central and Southern India. These unsettled conditions were apparently largely attributable to a diffused depression existing off west coast. On the 29th, notwithstanding that the barometer was falling almost everywhere, the weather, except in the south, improved, but on the 30th it again became very unsettled, and three barometric depressions, occasioning slight rain in their respective neighbourhoods, were shown on the chart. One lay between Mangalore and Karwar, a second between Surat and Indore and a third between Jeypore and Sirsa. During the 30th the disturbance which lay over the south of the Punjab apparently travelled towards the hills on a N. N. E. course, occasioning rain at Meerut, Roorkee, Delhi and Ludhiana and snow at Ranikhet, Mussooree, Chakrata, and Simla. By the evening of that day the disturbance had filled up, or disappeared. The chart of the 31st showed that the disturbance between Surat and Indore had also filled up after giving rain to Jhansi, Nowgong, Sutna, Pachmarhi, Hoshangabad, Indore, and Akola, but that the storm on the west coast had advanced northward to Ratnagiri and was giving rain and fairly strong winds to the North Konkan.

Pressure.—The variations of pressure from the mean exhibit no very large abnormals. With the exception of Hyderabad (Sind) and Galle, they are everywhere less than $0.05''$. In Assam the mean pressure of the month shows hardly any departure from the normal average, but in nearly all other parts of Northern India, as well as at the great majority of the more central stations, there is a moderate excess. In the Peninsula, on the contrary, and at the stations in Sind, Guzerat and Rajputana, there is a slight deficiency. There was hence an abnormally steep gradient for easterly winds during the past December.

Temperature.—The variations of temperature from the monthly mean have been somewhat irregular. In Eastern and Lower Bengal there has been a slight deficiency and in Assam and West Bengal a slight excess. On the plains of the North-Western Provinces and the Punjab the weather has been from 1° to 3° warmer than usual, while on the hills, on the contrary, it has been colder. In Ceylon, Malabar, and the Carnatic the mean temperature shows a deficiency of from 1° to 2° ; but in the Circars, the central parts of the country, Rajputana, Guzerat, Sind and Bombay, there is an excess of about an equal amount. In the Punjab, from 26th to the end of the month, low night temperatures were experienced. On the 26th at Rawalpindi the minimum thermometer fell to $28^{\circ}9$.

Humidity.—The air has been relatively dry, except in the south of the Peninsula.

Rain.—No rain has fallen during the month in Behar, North Bengal, Assam, Lower Bengal or Sind, and the amounts received in the other districts are, in the majority of cases, insignificant. Guzerat, however, received considerably more than its average amount, and Mysore and the Carnatic had about twice as much as usual. In Ceylon about 25 per cent. more than the normal amount fell.

The following table shows the amount of rain and the difference from the average, during the month of December, 1887, according to districts, as far as is indicated by the telegraphic reports : —

DISTRICTS.	Number of Stations.	Average rainfall in December.	Difference from the average in December 1887.
Punjab, West	7	0·69	—0·52
" East	4	0·66	—0·17

W. L. DALLAS,

Assistant Meteorological Reporter to the Govt. of India.

Simla, January 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending 11th Jan. 1888.

Both at the commencement and at the close of the week under review, the weather was in a somewhat unsettled state over a large part of India, but during the intervening time the normal distribution of pressure and circulation of the winds prevailed and the weather was everywhere fine.

On the 5th the chart showed that the disturbance, which had travelled up the west coast as far as Bombay, had either filled up or passed out to sea, and that the barometer was rising fast in Bombay. The disturbance had, however, left the weather in an unsettled state, both on the west coast and over the central parts of the country, in both of which regions moderate or slight rain had fallen. On the Coromandel Coast also some rain was reported and the barometer was giving way there. At Hazaribagh $\frac{1}{4}$ of an inch of rain had fallen. The general distribution of pressure had the normal characteristics—a large area of high readings overlying the north-west, while relatively low pressures were reported from Ceylon and the west coast. On the 6th the barometer had risen except over parts of Eastern

India. At several places in Bengal slight rain had fallen, but in Western and Central India the weather had improved, though slight showers were again reported from some stations in the Central Provinces, as well as from Sholapur, Secunderabad, Madras, Negapatam, and Wellington. The general distribution was unchanged. On the 7th rainfall had ceased both in the Central Provinces and Bengal, but continued at some of the southern stations, the fall at Galle equalling 2·4 inches. A large area of high pressure, 30·30," overlay the central parts of the country, whence readings decreased to 30·047" at Colombo. On the 8th, 9th, and 10th there was no rain, and both the pressure and the winds were fairly normal. On the 11th conditions again became unsettled. A small but well marked cyclonic storm had appeared over Lower Sind, occasioning a barometric fall of over 0·10" at Hyderabad and Jacobabad. This depression was accompanied by a distinct cyclonic circulation of the winds in its immediate neighbourhood and occasioned a tendency to cyclonic movement over the greater part of North-Western India. It gave slight rain to Quetta and Karachee. Its effects were confined to North-Western India, the pressure and winds in other parts of the country being practically unchanged.

Pressure.—Compared with the average of the whole month, the barometer was high in all parts of India except Sind. The excess was greatest in the North-Western Provinces and the Punjab. At Hyderabad the mean of the week was 0·09" and at Karachee and Jacobabad 0·05" below the monthly average. On the hills the excess was almost as great as on the plains.

Temperature.—The mean temperature of the week was above the January average in Burma, Assam, Ceylon, at Lahore, Rawalpindi and at the hill stations, both in the North-West and in the East Himalayas. Elsewhere it was below, but probably a large portion of the defect is due to the method of comparison. At Chakrata and Murree the excess exceeded 6°, at Quetta 5°, at Simla, 4° and at Darjeeling 3°. To the absence of snow on the lower hills is probably attributable this unusually mild weather both at the hill stations and at Lahore and Rawalpindi.

Humidity.—The air has been drier than usual all over Northern India and damper than usual all over Southern and Central India. At Chakrata, Simla, and Murree the relative humidity was 28 per cent., and at Lahore and Rawalpindi 25 per cent. below the normal of the month.

Rain.—Has fallen in all the Provinces except Burma, the North-Western Provinces and the plains of the Punjab. At the hill stations, in Malabar, Guzerat, Central India, Sind and Rajputana, however, the amounts received were very small. The Berars and Central Provinces received the largest amount.

The state of the rainfall from November 1st up to the present date is shown in the following table :—

PROVINCES.	Normal average per station, November 1st, to January 11th, 1888.	Difference from normal average for period November 1st, 1887, to January 11th, 1888.	PROVINCES.	Normal average per station, November 1st, to January 11th, 1888.	Difference from normal average for period November 1st, 1887, to January 11th, 1888.
Burma	4·26	—3·14	Malabar	7·55	+1·12
Bengal and Assam	1·07	+0·13	Bombay	0·88	+3·13
N.W. Provinces			Central Provinces		
and Oudh	0·57	—0·43	and Berar	0·88	+1·78
Punjab	1·18	—0·98	Guzerat and Central		
Hill Stations	1·95	—1·43	India	0·62	+0·32
Ceylon	21·91	—7·68	Sind and Rajputana	0·28	—0·19
			Madras	8·56	+0·57

From this it will be seen that there has so far been a large deficiency of rainfall over Burma, Upper India (both on the hills and plains), and in Ceylon, and a considerable excess over a large part of the Peninsula and the Central Provinces.

The concluding table gives a total rainfall of the past week according to the different Provinces.

DIVISIONS.	Number of Stations.	TOTAL RAINFALL.
Burma
Bengal and Assam	6	0·84
North-Western Provinces and Oudh
Punjab
Hill Stations	1	0·03
Ceylon	1	3·16
Malabar Coast	1	0·59
Bombay	5	3·08
Berars and Central Provinces	9	7·04
Guzerat and Central India	2	0·22
Sind—Rajputana	1	0·19
Madras	3	1·59

W. L. DALLAS,
for Meteorological Reporter to the Govt. of India.

Simla, 13th January 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

WEEKLY REPORT ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS.

Madras.—For week ending 14th January 1888.—Rainfall to date generally sufficient, except in parts of Madura and Salem. Wet crops fading in three taluks of Madura from deficient water-supply in tanks. Agricultural operations progressing as usual. Crops slightly damaged here and there by rain, disease or insects. Pasture generally sufficient except in Malabar, where it is scanty. No important fluctuations in prices. General prospects favourable.

Bombay.—For week ending 18th January 1888.—Slight rain in parts of Karachi, Hyderabad, Surat and Belgaum; late rain beneficial to cotton in Dharwar, but prospects of wheat in Dharwar and in one taluka of Panch Mahals, and of standing crops in general in parts of Surat, Thana, Kolaba, Ahmednagar and Satara slightly injured by rain, cloudy weather, or mists. Certain crops in parts of Sholapur, Bijapur, and Belgaum suffering from blight, and in one taluka of Karachi from deficient moisture. Harvesting of early crops in progress in parts of Surat, Nasik, Khandesh, Sholapur, Dharwar and Hyderabad and cotton-picking in parts of Kathiawar and Broach. Probable outturn of late crops in Satara from 11 to 12 annas and in Thana from 12 to 14 annas. Agricultural stock good, except in parts of Nasik, Hyderabad and Shikarpur. Prices of food-grains rising in Sholapur.

Bengal.—For week ending 17th January 1888.—No rain; weather fine and cold. Winter rice harvest is almost over. The outturn has been good in most districts of Northern, Central and Eastern Bengal, below the average in most districts of Behar, Western Bengal, and Orissa, and deficient throughout Chota Nagpore. Prospects of *rabi* and poppy continue generally good, and in Chota Nagpore have much improved. Rain is wanted in Behar and in the Nuddea district. Cutting of sugarcane is in progress, and tobacco is being harvested in Durbhanga. Spring rice is being transplanted and thriving well.

N.-W. P. and Oudh.—For week ending 18th January 1888.—Weather generally cloudy. Light showers have fallen in Gorakhpur, Banda and Farrukhabad. More rain is much needed. Some *rabi* crops have been slightly injured by frost in several districts, but *rabi* prospects are still good. Sugarcane-pressing is in progress; and the poppy crops are doing well. Supplies are sufficient, though prices of food-grains continue high. Scarcity of fodder is reported in Partabgurh and Cawnpore. The condition of cattle is generally good.

Punjab.—For week ending 18th January 1888.—No rain in the Province, except a slight fall at Mooltan and Rawal Pindi. Prices still tend to rise though stationary in some

districts. *Rabi* sowings completed. *Rabi* prospects are generally fair, but rain is urgently wanted throughout the Province, and in a few districts the crops are beginning to suffer severely from continued drought. Slight damage done to crops by high winds in Bhiwani district, Hissar. Cattle are generally healthy, except in Mooltan. Fodder is scarce in most districts. Poppy sowings completed.

Central Provinces.—*For week ending 18th January 1888.*—Weather cloudy in northern districts. Pulses and linseed have been damaged by cloudy weather and frost in three districts, but wheat and other standing crops have been improved by the recent rain. Fodder getting scanty in Raipur, but sufficient elsewhere. Cattle generally in fair condition.

Burma.—*For week ending 14th January 1888.*—Reaping of wet season crops completed in the Prome, Bassein, Henzada, Thayetmyo, Moulmein, and Tavoy districts of Lower Burma, and in the Shwebo, Kyaukse, Pagan, Yamethen, Pyinmana, and Chindwin districts of Upper Burma. Field operations for the coming dry season's crops are in progress in Upper Burma; in other districts the harvest is nearly over. Agricultural stock are healthy, except in Thayetmyo. Estimate of probable outturn of harvest remains unchanged in both Lower and Upper Burma. Price of paddy has risen in Pegu district by ₹13, in Prome by ₹10, in Henzada by ₹1, in Moulmein by ₹5-8, in Amherst by ₹9, in Tavoy by ₹11, in Mandalay by ₹5, and in Meiktila by ₹12-6 per 100 baskets. Price of paddy has fallen in Shwebo by ₹10, in Kyaukse by ₹15, and in Myingyan by ₹5 per 100 baskets. No rain has fallen anywhere.

Assam.—*For week ending 18th January 1888.*—Weather seasonable. Slight rain in Sibsagar and in Goalpara and a heavy shower in Lakhimpur. Reaping of winter rice not yet completed. Gathering of mustard commenced. Outturn not good. Sugarcane is being crushed. Land being broken up in Hill Districts. No report from Naga Hills.

Mysore and Coorg.—*For week ending 18th January 1888.*—No rain has fallen in Mysore. Standing crops in good condition. Sowing operations continue in the Mysore and Tumkur districts. Dry crops in parts of the Bangalore, Tumkur and Chitaldroog districts are reported to be damaged by disease or insects. Outturn of harvests generally fair. Stock cattle in good condition.

No rain in Coorg. Picking coffee and harvesting rice continue. Weather favourable.

Berar and Hyderabad.—*For week ending 18th January 1888.*—In Berar the weather is clear. Cutting and stacking of *jowari* and picking of cotton still going on in some parts of the Province. *Kharif* crops slightly damaged by the late untimely rain. Outturn expected to be fair, but below the average. Standing *rabi* crops flourishing. Agricultural stock in good condition. Fodder ample.

No rain in Hyderabad during the week. Agricultural prospects continue good.

Central India.—*For week ending 18th January 1888.*—Showers in Gwalior. Sufficient rain except in Baghelkhand. Agricultural operations almost completed in the Agency. Crops, condition of agricultural stock, pasturage, and fodder generally good. Prospects and probable outturn good, but below average in Western Malwa and Goona. Prices of food-grains high and rising. Condition of opium crops fair.

Rajputana.—*For week ending 18th January 1888.*—Agricultural operations satisfactory. Standing crops good generally. Harvests good on the whole. Agricultural stock generally in good condition. Pasture or fodder fairly sufficient. Prices steady but high at places.

GOVERNMENT OF INDIA.
REVENUE AND AGRICULTURAL DEPARTMENT.

SPECIAL ARRANGEMENTS IN FORCE AT COOPER'S HILL COLLEGE FOR THE
PROFESSIONAL TRAINING OF FOREST STUDENTS.

Circular No. 1 F.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department—dated Calcutta, the 11th January 1888.

FORESTS.

READ the following Circulars on the subject of the training of Indian Forest Officers at the Royal Indian Engineering College, Cooper's Hill :—

No. 22 F., dated 24th September 1885.
„ 15 F., „ 23th October 1886.
„ 1 F., „ 15th January 1887.
„ 2 F., „ 18th February „
„ 3 F., „ 5th April „

Read, also, the following correspondence with Her Majesty's Secretary of State for India, regarding the special arrangements in force at Cooper's Hill College for the professional training of Forest Students :—

No. 3, dated 23rd July 1887.

From—His EXCELLENCY LORD DUFFERIN, Viceroy, and the HON'ABLES GENERAL SIR F. S. ROBERTS, SIR T. C. HOPE, SIR A. COLVIN, GENERAL G. CHESNEY, A. R. SCOBLE, and J. B. PEILE, Members of Council.

To—Her Majesty's Secretary of State for India.

As we are frequently called upon to make available for employment in the Colonies the services of officers on the active list of our Indian Forest Service; whom we cannot spare without inconvenience, especially as we have to meet similar requisitions in India from the Chiefs of Native States, it has occurred to us to suggest that Dr. Schlich, Inspector General of Forests to the Government of India, on deputation at Cooper's Hill College, might be instructed to prepare a Note, describing the special arrangements in force at that institution for the professional training of candidates for employment in the Forest Service, which might, with Your Lordship's approval, be communicated to the Colonial Office for the information of the Colonial Governments. Those Governments which aim at having a Forest Department of their own would thus have the opportunity afforded them of considering whether they might not themselves make provision for the education at Cooper's Hill College of such trained Forest Officers as may be required by them from time to time.

No. 88 (Revenue), dated 3rd November 1887.

*From—The RIGHT HON'BLE VISCOUNT CROSS, G.C.B., Her Majesty's Secretary
of State for India,*

To—The Government of India.

WITH reference to the letter of Your Excellency's Government in the Forest Department, No. 3, dated 23rd July last, I forward herewith 25 copies of a Paper which has been drawn up, in accordance with your suggestion, by Dr. Schlich, describing the special arrangements in force at the Royal Indian Engineering College, Cooper's Hill, for the professional training of Forest Students. Copies of this document have also been transmitted to the Colonial Office.

2. I take this opportunity of stating that this compilation will take the place of the "Paper of Particulars," and be issued to the public for general information.

**PROSPECTUS OF THE FOREST BRANCH OF THE ROYAL INDIAN
ENGINEERING COLLEGE, COOPER'S HILL.**

[Post Town, Staines. Railway Station, Egham. Telegraph Station, Englefield Green.]

STAFF OF THE COLLEGE.*

President, General Sir ALEXANDER TAYLOR, K.C.B., R.E.

Secretary, J. G. WHIFFIN, Esq., Paymaster-in-Chief, R.N., Retired.

Bursar, J. P. PASCO, Esq., R.N., Retired.

Chaplain, Rev. C. CROSLUGH, D.D.

Engineering Branch.

Assistant Professor of Engineering, A. H. HEATH, Esq., Assoc. Mem. Inst. C.E.

Professor of Surveying, Colonel E. H. COURTENEY, R.E.

Instructor in Geometrical Drawing, T. H. EAGLES, Esq., M.A., Assoc. Inst. C.E., F.B.I.B.A.

Lecturer in Accounts, J. C. HURST, Esq.

Mathematical Branch.

Professor of Mathematics, Rev. J. WOLSTENHOLME, M.A., D.Sc.

Professor of Applied Mathematics, G. M. MINCHIN, Esq., M.A.

Natural Science Branch.

Professor of Chemistry, HERBERT MCLEOD, Esq., F.R.S.

Professor of Physics, W. N. STOCKER, Esq., M.A., Fellow of Brasenose College, Oxon.

Lecturer in Geology and Mineralogy, Professor P. M. DUNCAN, M.B., F.R.S.

Forestry Branch.

Professor of Forestry, W. SCHLICH, Esq., Ph.D., Inspector General of Forests to the Government of India.

Professor of Botany, H. MARSHALL WARD, Esq., M.A., F.L.S., Fellow of Christ's College, Cantab.

Lecturer on Entomology, A. E. SHIPLEY, Esq.

Unclassified Subjects.

Instructor in Freehand Drawing, RUSSELL DAWSON, Esq.

Instructor in French, F. W. MARIASSY, Esq.

Instructor in German, T. H. DITTEL, Esq.

Director of Practical Study in Forestry, Sir DIETRICH BRANDIS, K.C.I.E., Ph.D., F.R.S., late Inspector General of Forests to the Government of India.†

[The arrangements hereinafter described are subject to revision under the orders of the Secretary of State for India.]

1. The Royal Indian Engineering College is primarily maintained, under the orders of the Secretary of State for India in Council, for the education of candidates for the service of Government in the India Public Works, Telegraph, and Forest Departments; but it is open, to the extent of the accommodation available, to all persons desirous of following the course of study pursued in it.

India Forest Department Appointments.

2. Candidates for the India Forest Department are selected under the following arrangements:—

- (a) An applicant must be a natural-born British subject, and must be above 17 and under 21 years of age on the 1st June of the year in which he competes for an appointment. He must be unmarried, and if he marries before reaching India he will forfeit his appointment.
- (b) An applicant must send to the Revenue Department of the India Office, on or before the 1st day of May of the year in which he proposes to compete—
 - (1) His name and parentage, a certificate or other satisfactory evidence of the date of his birth, and the written consent of parent or guardian that his name should be recorded as a candidate.
 - (2) A statement of the places of education at which he may have been since he was nine years old, accompanied by testimonials of good conduct during the last four years. He must also pay a fee of 4*l.* by means of a special stamp, according to instructions which will be communicated to candidates.

* The staff of the College is only given in so far as it concerns the Forest Branch.

† Sir D. Brandis is not on the staff of the College.

- (c) Applicants will have to appear before a Medical Board* at the India Office, and to satisfy the Board that they attain a suitable standard of physical constitution. Particular stress will be laid upon good vision and hearing, and means will be taken to test physical powers of endurance, so as to ensure the selection of persons of active habits and sound constitution.
- (d) The applicants who have successfully passed the medical examination and the physical tests will be examined, usually in the month of June of each year, in the following subjects, marks being assigned as indicated below :—

No. of Group.	Subject.	Maximum.	Minimum.
I.	1. Handwriting 2. Orthography 3. English composition	700	350
II.	4. Arithmetic, in all its branches 5. Geometry, including 1st to 4th and 6th Books of Euclid 6. Algebra, up to and including Binomial Theorem, Arithmetical and Geometrical Series, Interest, and Annuities 7. Logarithms, including use of Tables 8. - (e) The Secretary of State reserves the right to reject any candidate who fails to obtain either the prescribed minimum of marks in any one group, or a total minimum of 2,000 marks.†
- (f) From the competitors who attain the above-mentioned minima of marks and satisfy the requisite conditions in other respects, the Secretary of State will select, as probationers to enter the College, those whom he may deem best adapted for the Forest Service of India. The number of candidates selected annually, which varies according to the requirements of the Forest Service in India, can be ascertained at the Revenue Department of the India Office, and it will also be advertised from time to time. *In 1888 there will be 12 probationers.*

3. The course of study for candidates for the India Forest Service extends over about 23 months. During the first 22 months, including two complete annual sessions, the candidates will prosecute their studies at the College, and during the remaining four months they will be instructed, under suitable supervision, in such British or Continental forests as may be selected for the purpose. Excursions will also be made during part of the College vacations.

4. Each annual session begins in September, and is divided into three terms, with vacations of about four weeks at Christmas, two weeks at Easter, and eight weeks in the summer.

5. An annual charge of 183*l.* is made for each student, which must be paid in advance to the Bank of England in three sums of 61*l.* per term. Receivable orders, with full directions

* With a view to prevent parents and guardians from incurring the inconvenience and expense of preparing candidates who may be physically unfit for the Forest Service, it is suggested that candidates be submitted to examination by the medical adviser of the family, or any other qualified medical practitioner, with regard to the following points :—

1. A weak constitution.
2. Defective vision.
3. Impaired hearing.
4. The existence of any congenital defect.

It is to be understood that this private examination is merely suggested to lessen the chances of disappointment, and that it is by no means intended to take the place of, or to influence in any way, the official examination.

On the subject of the standard of eyesight required for the Indian services, a pamphlet has been published, under the authority of the Secretary of State in Council, by Messrs. Churchill and Sons, 11, New Burlington Street.

† The papers set at previous examinations, together with the number of marks obtained by the successful candidates, are published from time to time in the Reports of the Civil Service Commissioners, which can be procured through any bookseller.

as to the mode of payment, will be forwarded from the India Office to the parents or guardians shortly before the fees fall due. A student will not be allowed into residence until his fee has been paid.

6. A deposit of 5*l.* is required to be paid by each student on admission to the College, as caution money, to cover charges incurred by him for damage to books, instruments, &c., or any College bills outstanding on leaving the College. Any balance over and above such charges will be repaid. This deposit is to be paid with the fee for the first term, making the total payment on that occasion 66*l.*

7. The foregoing payments cover all charges for tuition, board according to the College tariff, lodging with washing, and ordinary medical attendance while in residence at the College. When on tour and during the course of practical instruction, whether in Great Britain or on the Continent, each student receives an allowance of 10*s.* per day in lieu of board, lodging, and washing, and the Secretary of State also defrays the travelling expenses of the students, fees to local Forest Officers, &c.

Students are required to provide their own class books and drawing instruments. Drawing paper, drawing boards, and surveying instruments are provided by the College.

8. The prescribed course of study at the College extends at present over a period of two years, divided into six terms, and comprises the following subjects:—

- (a) Mathematics, including Logarithms and Trigonometry.
- (b) Applied Mathematics, following the ordinary course for Engineering students.
- (c) Surveying, the course being the same as that laid down for Engineering students.
- (d) Descriptive Engineering, comprising a knowledge of the materials used in construction and road-making.
- (e) Geometrical Drawing.
- (f) Freehand Drawing.
- (g) Accounts.
- (h) French or German.
- (i) Physics (Theoretical and Practical).
- (k) Geology and Mineralogy.
- (l) Botany, including Anatomy, Physiology, Systematic Botany, and Pathology, with demonstrations in the laboratory, field, and at the Royal Botanic Gardens at Kew.
- (m) Entomology, preceded by an introduction to General Zoology.
- (n) Forestry in all its branches, with demonstrations in the museum, in adjoining woodlands, and more distant forests.
- (o) Practical course in Forestry, extending over about four months, in suitable forests in Great Britain and on the Continent.

9. Every student will be required to exhibit due diligence in his studies throughout the course, and to give evidence of satisfactory progress, failing which, or in the event of serious personal misconduct, he will not be allowed to remain at the College.

10. During the course of study, the proficiency of the students will be tested by periodical examinations, and on the termination of their studies there will be a final examination.

11. The subjects enumerated in paragraph 8 are grouped in certain main branches of study, and a fixed minimum of qualification is required in each branch, as well as a certain minimum for all branches taken together. Students who obtain these minima will receive the College diploma in Forestry.

12. The candidates who have obtained the above-mentioned diploma, provided they are found to be of sound constitution and free from physical defects which would render them unsuitable for employment, the final decision on which point will rest with the Secretary of State for India, will be nominated Junior Assistant Conservators in the Forest Department of India, ranking in seniority in the service, and choosing the provinces in which they desire to be first employed, according to the results of the examinations. But this choice can only be exercised according to the available vacancies in the different provinces, and on the understanding that officers are at all times liable to be transferred from one province to another at the pleasure of the Government of India.

13. Within a month of his nomination as Junior Assistant Conservator, each nominee must sign articles of agreement describing the terms and conditions of his appointment.

He must embark for India when required to do so by the Secretary of State, and will be provided with a free passage. Failure to embark at the stated time will lead to forfeiture of appointment.

14. The pay of a Junior Assistant Conservator of Forests (which is at present Rs250 per mensem) will commence from the date of arrival in India.

15. Promotion, leave, and pension will be regulated by the rules of the Service for the time being.

16. Every candidate, before proceeding to India, will be required to furnish to the President of the College satisfactory evidence of his competency in riding.

GENERAL RULES.

17. Chemical, physical, and botanical laboratories, a forestry museum, a library, and gymnasium are attached to the College. Means are also provided for the practice of photography. Students making use of the laboratories are supplied with the needful apparatus.

18. The responsibility for the discipline and management of the College and for the superintendence of the studies is vested in the President, under the general control of the Secretary of State for India.

19. The students are distributed in divisions, under personal charge of one of the Professors or Instructors selected by the President; such tutor being responsible for exercising the proper degree of personal supervision over each student in his division, and for conducting necessary correspondence with the student's parents or guardians.

20. Each student residing in the College is provided with a separate room, and with fuel and light, also with the necessary attendance. Furniture and bedding are supplied by the College, but each student is required to provide his own towels and bed linen. Meals are taken in hall. Wine and beer are not included in the ordinary fare, but can be obtained from the College cellar at fixed prices.

21. A chapel is attached to the College, which the students residing in the College are expected to attend, unless specially exempted at the wish of their parents or guardians.

22. Every student will be required to go through a course of gymnastics and also of military exercises, including the use of the rifle.

23. Students are required to wear academical dress, under such regulations as may be prescribed from time to time.

Students not nominated for the Indian Forest Service, but desirous of obtaining a Diploma in Forestry from Cooper's Hill College.

24. Students not nominated for the Indian Forest Service may be received into the College, as far as the available accommodation permits. Such students may pass through the course of instruction prescribed for the nominees of the Indian Forest Service, as detailed above, or they may be permitted to participate in the instruction given in certain subjects only. On attaining the prescribed minima of marks in the several branches of study and in totals, as laid down above, they will receive, as the case may require, either the College Diploma in Forestry or special certificates showing in what subjects they have followed the instruction and with what result.

25. Candidates who desire to be admitted under para. 24. may submit the necessary application at any time, but not later than the 15th day of June of the year named for admission, except with the special permission of the President. The application must be made on the prescribed forms, which can be obtained from the Secretary of the College.

26. Candidates whose applications are found satisfactory as to character and in other respects will be required to undergo an examination, to be held at the College, about the last week in June of the year for admission. The examination will be in the subjects mentioned under para. 2 (d) (or certain portions of them, as the case may require), in so far as it is necessary to ascertain whether the candidate is qualified to follow the course of instruction with advantage (or certain parts of it, as the case may be). Candidates who do not come up to the required standard will not be admitted to the College.

The President may dispense with the whole or any portion of this examination in the case of a candidate who produces an university diploma, or other similar certificate granted by a recognized examining body.

27. Candidates admitted to the College under para. 24, who propose to pass through the full prescribed course of study, will be required to pay the same fees in every respect as those paid by the nominees for the India Forest Service. Candidates who do not become

resident, and are admitted only to certain subjects of study, will be required to pay the fees which may be fixed in each special case in consideration of the extent of their studies. The candidates of both classes will be required to abide by the general rules of the College.

ORDER.— Ordered that a copy be forwarded, for information, to the Governments of Madras and Bombay, the Local Governments and Administrations noted on the margin, and

the Comptroller and Auditor General.

ORDERED, also, that a copy be forwarded to the Inspector General of Forests, for information and for communication to the Director of the Forest School, the Superintendent of Forest Surveys, and the Editor of the *Indian Forester*; and to the Foreign Department, for communication to the Agent to the Governor General in Baluchistan.

ORDERED, further, that these papers be published in the Supplement to the *Gazette of India*.

(True Extract.)

W. C. MACPHERSON,
Offg. Under-Secretary to the Government of India.

PUBLIC WORKS DEPARTMENT.

RESOLUTION.

GENERAL.

Fort William, the 16th January, 1888.

No. 116 G.

PRACTICAL TRAINING OF NATIVE ENGINEERS IN ENGLAND.

Read again—

Resolution in the Public Works Department, No. 1511—57G., dated 29th November 1882, on the subject of practical training of Native Engineers in England.

Read—

Despatch from the Secretary of State for India, to the Government of India, No. 13 P. W., dated 24th March 1887.

Despatch to Secretary of State, No. 63 P. W., dated 31st October 1887.

Despatch from Secretary of State, No. 69 P. W., dated 8th December 1887.

OBSERVATIONS.—The Resolution of 1882, now read again, indicated the procedure under which, as an experiment, not more than two Native Engineers annually were to be sent to England at the public expense for professional training.

2. Under these orders, ten young Engineers, being natives or domiciled Europeans, have been sent to England in the five years from 1883 to 1887 inclusive.

3. In March last, the Secretary of State called for a full report on the results that had been obtained from the experiment, and for a definite opinion of this Government as to their value.

4. A report was accordingly obtained from the several Local Governments concerned as to the value of the experience gained in England by the officers who, after having passed a period of training there, had returned to their work in this country.

Bombay.
Bengal.
Punjab.

5. The three Local Governments consulted were of opinion that the value of the training was not commensurate with the expense incurred.

6. The Government of India, on a perusal of the reports from the Local Governments and of the reports on the progress of the several officers while under training, forwarded from time to time by the Secretary of State, was of opinion that training in England is an undoubted advantage to those officers who have a real desire to profit by it; but that the expenses of it ought to be largely contributed to by the officers themselves.

7. Accordingly, it was recommended that the contribution made by the State should be limited to paying the officers, while absent from duty in India, two-thirds of their salary only, together with an allowance of Rs. 1,000 to assist in defraying the expense of the voyage to and from England. And it was proposed to continue to send annually to England not more than two carefully selected officers, who were willing to accept the modified terms.

8. The orders of the Secretary of State on these proposals have now been received. His Lordship accepts the modified financial conditions proposed by the Government of India; but, in view of the reports received as to the success of the experiment, is inclined only to consider cases of a very special character, which may arise from time to time, and which this Government may deem desirable to recommend in the public interest.

9. In view of these orders, it is now necessary to call for revised recommendations on behalf of young Engineers who fulfil the condition of being natives or domiciled Europeans. Such recommendations should be carefully made on behalf of those only who shew a *bonâ fide* desire to improve their professional knowledge, and must be strongly supported by their immediate superiors, on the ground that the officers possess the necessary qualifications for profiting by their deputation to England.

10. All previous recommendations will, under these orders, be considered as cancelled, and should not be repeated unless they can be now brought forward as cases to be specially considered under the new orders by the Government of India and by the Secretary of State.

The age of officers recommended should be limited for this year (1888) to 30 years, for next year to 28, and thereafter to 25 years.

ORDER.—Ordered that this Resolution be forwarded to the Local Govern-

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.

The Chief Commissioners of the Central Provinces, Burma ^{Upper} Lower, Assam, and Coorg.

The Resident at Hyderabad.

The Agents to the Governor General for Central India, Rajputana, and Baluchistan.

The Director General of Railways.

The Consulting Engineers to the Government of India for Railways, Calcutta, Central Division and Lucknow.

ments, Administrations and Officers noted on the margin; also that it be published in Part I of the *Gazette of India*.

TO ENGINEERS, DISTRICT OFFICERS, AND OTHERS REQUIRING ASSISTANTS.

There are a few names of ex-Students out of employment on the Scebpur College list.

Apply to the Principal, stating requirements and terms offered, including travelling and joining allowance.

NOTICE.

In accordance with the Resolution of the Government of Bengal in the General Department, dated the 6th March, 1886, published on page 541 of the *Calcutta Gazette* of the 31st of the same month, notice is hereby given that an examination for the admission of female students to the certificate class of the Calcutta Medical College will be held in the Theatre of that College on Tuesday, the 14th February, 1888, and following days.

Hours and Subjects of Examination.

Tuesday.—English dictation, Grammar, and Composition—from 1 to 4 P.M.

Wednesday.—History of England and India. Geography: General, and of India in particular—from 1 to 4 P.M.

Thursday.—Arithmetic: the first four rules, vulgar and decimal fractions, and proportion—from 1 to 4 P.M.

Candidates must apply in writing to the Principal of the Medical College, Calcutta, not later than the 11th February, for permission to appear at the examination.

Applications for permission to reside in the Sarnamayi Hostel should be addressed to the Honorary Secretary to the Bengal Branch of the Countess of Dufferin's Fund, Fort William, Calcutta.

A. CROFT,
Director of Public Instruction.

The 6th January, 1888.

NOTICE.

Owing to reduction of Establishment there are thirteen Elephants male and female for sale at the Transport Depôt, Mhow (Central India).

The Elephants are properly trained and some of them have been used for several years for sporting purposes.

They are also trained to harness.

For further particulars apply to Executive Commissariat Officer, Transport, Mhow (Central India).

Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows:—

Terms of subscription, payable annually in advance.

For the complete Series, including postage R22 8

	Without postage.	With postage.
For the Calcutta Series	R10 0	R12 0

„ each of the Madras, Bombay and Allahabad Series	„ 6 0	„ 7 0
---	-------	-------

„ a part of the Calcutta Series purchased separately, inclusive of postage in India	„	„ 2 0
---	---	-------

„ a part of the Madras, Bombay and Allahabad Series purchased separately, inclusive of postage in India	„	„ 1 0
---	---	-------

Persons desiring to subscribe for, or purchase, the Report, should apply to—

Messrs. Thacker, Spink and Co., Calcutta.

„ Thacker & Co., Bombay.

„ Higginbotham & Co., Madras.

The Government Central Book Depot, Bombay.

„ The Curator of Government Books, North-Western Provinces and Oudh.

„ Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1885 should be at once remitted.

NOTICE.

No. 329. *London, 29th December, 1887.*

To His Excellency the Right Honourable the Governor-General of India in Council.

MY LORD,—I have to inform you that the rate of exchange for the adjustment of financial transactions between the British and Indian Governments for the year 1888-89 has been fixed, with the concurrence of the Lords Commissioners of Her Majesty's Treasury, at one shilling and five pence (1s. 5d.) the rupee ; and I request that you will give the necessary instructions for the due observance of this rate in respect of all transactions to which it is applicable.

I have, &c.,

(Sd.) CROSS.

Ordered, that the above Despatch be communicated to the Military and Public Works Departments, and to the Comptroller and Auditor General for information.

Ordered also, that the Despatch be published in the *Gazette of India* for general information.

ACCOUNTS AND FINANCE.

PUBLIC DEBT.

Fort William, the 29th January, 1888.

No. 483.—In pursuance of Rule 22 made by the Government of India under the Indian Securities Act of Section 14, and published in the *Gazette of India*, dated 7th January, 1888, page 6, the following list is hereby advertised, lost or destroyed, in respect of which an order has been made for payment of interest pending the issue of duplicate Security, or for the issue of such duplicate Security. All persons, other than the respective claimants below, who have any claim upon these notes, are warned to communicate immediately with the Comptroller of the Treasury, Calcutta.

Notice is also given that the Promissory notes mentioned in the first division of the list (marked A) discharged at the General Treasury of Fort William on the 30th June, 1888, with all interest due upon them, and that from that date all further interest upon such notes shall cease. Similar notice has already been given of the discharge of the notes mentioned in the second division of the list (marked B).

N. B.—Under Section 13 of the above Act, Government will be discharged from all liability in respect of these original Securities the lapse of six years from (a) the several dates stated against them in the last column of the list or (b) the last payment of interest whichever date is the later.

LEAVE AND APPOINTMENTS.

The 27th January, 1888.

No. 479.—Surgeon-Major H. P. Yeld, Deputy Assay Master, Calcutta Mint, having returned from privilege leave, assumed charge of that appointment from Surgeon F. C. Reeves on the afternoon of the 25th January, 1888.

SEPARATE REVENUE.

SALT.

The 27th January, 1888.

No. 474.—In exercise of the powers conferred by Section 7 of the Indian Salt Act, 1882, and in continuation of the Notification in this Department, No. 343, dated 19th January, 1888, the Governor-General in Council directs that on and from the 19th January, 1888, the duty to be paid on salt manufactured at the Kalabagh mines situated west of the Indus shall be two rupees and eight annas for each maund of 82½ pounds avoirdupois weight.

CODES.

*The 25th January, 1888.***No. 414.**

CIVIL PENSION CODE.

*Page 61.**Section 113.**Substitute the following for clauses “(a),” “(b),” and “(c)” under this section :—**(a) After a service of less than ten years :—*

A gratuity not exceeding (except in special cases, and under the orders of the Government of India) one month's emoluments for each completed year of service. If the emoluments of the officer have been reduced during the last five years of his service, otherwise than as a penalty, average emoluments may, at the discretion of the Local Government, be substituted for emoluments.

*(b) After a service of not less than ten years :—**A pension not exceeding the following amounts :—*

Years of completed service.	Scale of Pension.			Maximum limit of Pension.
10	10 sixtieths of average emoluments			2,000 a year.

*Page 62.**Section 115.**Substitute the following for the “Proviso” under this section :—*

“Proviso.—If an officer's qualifying service began after the 20th January 1871, and after he attained the age of thirty years, then the pension admissible under this section shall be reduced by one-fortieth for every year or part of a year by which his age exceeded thirty years. Gratuities are not subject to any reduction, and in the case of pensions, the fixed limits are to be applied before, and not after, making the reduction.”

*Page 68.**Section 124.**Add the following as “NOTE (2)” under this section :—*

“NOTE (2.)—The provisions of this section do not apply to pensions granted on the graduated scale (section 113).”

E. J. SINKINSON,

Offg. Secretary to the Government of India.

Matter intended for publication in the Supplement should reach the Press not later than Thursday.

E. J. DEAN,
Publisher, Gazette of India.

HIGH COURT—ORIGINAL SIDE.

NOTIFICATION.

Calcutta, the 26th January, 1888.

It is ordered that the following rules be read and passed as the rules and orders of the High Court of Judicature at Fort William in Bengal, to take effect from the 1st day of March, 1888 :—

1. A list of references of every description which are ripe for hearing and are pending before the Court itself or before any of the officers of the Court, or any other commissioner appointed to take accounts or make enquiries, shall be published at such times and in such manner as the Judge ordinarily taking motions on the Original side of the Court may from time to time determine.

2. The printed cause list for each day shall contain a list of the references liable to be heard on that day by the officers before whom such references are pending.
3. Such list of references shall be divided into two parts, the first of such parts to consist of references of an urgent nature or which can be quickly concluded and to be styled "list of urgent references," the second part to consist of all other references and to be styled list of "ordinary references."
4. Urgent references shall include the following :—
Accounts in mortgage suits.
Sales by the Registrar.
The settlement of proclamations, of conditions of sale, or of conveyances.
Inquiries under Section 267 of the Civil Procedure Code or under Section 90 of the Probate and Administration Act.
Inquiries as to what would be proper to be allowed for maintenance or marriage expenses.
Inquiries as to whether proposed terms of settlement would be for the benefit of a minor.
References as to the appointment of guardian and such other enquiries and references as may be determined by the Court or a Judge.
5. Any Judge sitting on the Original side may order any particular reference or enquiry to be taken as an urgent reference. Such order need not be made in Court but may be made upon a representation made by the Registrar or other officer or commissioner.
6. No reference shall be placed in the list of references for the day unless it be ripe for hearing.
7. The Registrar or other officer shall at the commencement of each daily sitting hear applications with regard to pending references and shall not hear any reference until such applications have been exhausted, but no such application shall be made or heard on any day after the hearing of references have been commenced.
8. The officer or commissioner shall on each day in the first place hear in order the urgent references on his list for the day, and shall then proceed to hear in order the ordinary references on his list for the day.
9. Each reference shall, unless otherwise ordered by a Judge, be taken in its turn, and it shall be continued *de die en diem* until it be concluded.
No references on the list of causes for the day shall (without leave of the Court or a Judge) be postponed or adjourned except under circumstances which would justify the postponement or adjournment of a cause. The consent of parties, or the convenience of counsel or attorney shall not of themselves be considered sufficient grounds for the postponement or adjournment of a reference or enquiry.
10. References not on the list of causes for the day can, at the discretion of the person to whom they have been referred, be postponed or adjourned, but subject to the control or orders of the Judge taking motions on the Original side.
11. Any Judge sitting on the Original side may by an order in Court or in chambers postpone or adjourn any reference pending before himself or before any officer or commissioner.
12. When in the opinion of the Judge taking motions on the Original side it is necessary that some or all of the references pending before any officer of the Court or commissioner should be heard by the Court itself or by some other officer or commissioner, such Judge may recall such references into Court and any time make such order as may be necessary for the purpose aforesaid, or if the parties should consent to any such change he may make such order without recalling the reference into Court.
13. These rules are to be read with, and to form part of, the general rules of the Original side.
14. These rules shall come into operation on and from the 1st day of March, 1888.

SURVEY OF INDIA.**NOTIFICATIONS.***Calcutta, the 23rd January, 1888.*

No. 658.—Mr. E. J. Martin, Assistant Surveyor, 1st grade, is granted privilege leave for three months, under Chapter X, Section 138, of the Civil Leave Code, with effect from 7th instant.

The 25th January, 1888.

No. 659.—Lieutenant-Colonel S. H. Cowan, S.C., Officiating Deputy Superintendent, 3rd grade, is granted privilege leave for three months, under Chapter V, Sections 71 to 74 of the Civil Leave Code, with effect from 4th February, 1888, or such subsequent date as he may avail himself thereof.

The 27th January, 1888.

No. 660.—Major J. R. McCullagh, R.E., Deputy Superintendent, 3rd grade, having returned to duty from furlough on the afternoon of the 24th January, 1888, the following reversions are made, with effect from the same date:—

Mr. G. H. Cooke, Officiating Deputy Superintendent, 3rd grade, to revert to his substantive appointment of Deputy Superintendent, 4th grade.

Lieutenant G. B. Hodgson, S.C., Officiating Deputy Superintendent, 4th grade, to revert to his substantive appointment of Assistant Superintendent, 1st grade.

H. R. THUILLIER, Colonel, R.E.,
Surveyor General of India.

INDO-EUROPEAN TELEGRAPH DEPARTMENT.**NOTIFICATIONS.***Calcutta, the 20th January, 1888.*

No. 144.—Dr. J. E. Baker, Medical Superintendent, has been granted by the Director, Persian Telegraph, furlough for two years, under Section 50, and subsidiary leave, not exceeding five days, under Section 64(a) of the Civil Leave Code, with effect from 15th September, 1887, subject to confirmation by the Director-in-Chief, Indo-European Telegraph.

No. 145.—Mr. F. T. B. Daniell, Superintendent (Supernumerary), has been granted by the Director, Persian Telegraph, furlough for two years, under Section 50, and subsidiary leave, not exceeding nine days, under Section 64(a) of the Civil Leave Code, with effect from 20th November, 1887, subject to confirmation by the Director-in-Chief, Indo-European Telegraph.

J. GRIERSON, Colonel,
Examiner of Telegraph Accounts.

AGENT TO THE GOVERNOR-GENERAL, RAJPUTANA.**NOTIFICATION.***Abu, the 19th January, 1888.*

No. 154 G.—It is hereby notified that Surgeon J. Crofts, M.D., resumed charge of his duties as Medical Officer, Kotah and Jhalrapatan, from Surgeon R. Shore, M.D., on the forenoon of the 3rd January, 1888.

By order,
E. A. FRASER, Major,
*First Asst. Agent to the Govr.-Genl.
in Rajputana.*

TO ENGINEERS, DISTRICT OFFICERS, AND OTHERS REQUIRING ASSISTANTS.

There are a few names of ex-Students out of employment on the Seebpur College list.

Apply to the Principal, stating requirements and terms offered, including travelling and joining allowance.

NOTICE.

Owing to reduction of Establishment there are thirteen Elephants male and female for sale at the Transport Depot, Mhow (Central India).

The Elephants are properly trained and some of them have been used for several years for sporting purposes.

They are also trained to harness.

For further particulars apply to Executive Commissariat Officer, Transport, Mhow (Central India).

JOHN ELIOT,

*Offg. Meteorological Reporter to the
Government of India.*

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows:—

Terms of subscription, payable annually in advance.

For the complete Series, including postage . . . Rs. 22 8

	Without postage.	With postage.
For the Calcutta Series . . .	R. 10 0	R. 12 0
„ each of the Madras, Bombay and Allahabad Series . . .	„ 6 0	„ 7 0
„ a part of the Calcutta Series purchased separately, inclusive of postage in India . . .	„	„ 2 0
„ a part of the Madras, Bombay and Allahabad Series purchased separately, inclusive of postage in India . . .	„	„ 1 0

Persons desiring to subscribe for, or purchase, the Report, should apply to—

Messrs. Thacker, Spink and Co., Calcutta.

„ Thacker & Co., Bombay.

„ Higginbotham & Co., Madras.

The Government Central Book Depôt, Bombay.

„ The Curator of Government Books, North-Western Provinces and Oudh.

„ Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1885 should be at once remitted.

NOTICE.

Indian Law Reports.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, by the Calcutta Central Press Company, "Limited," 5—1, Council House Street, at the following rates, payable in advance:—

	One page.	Half page.	Quarter page.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 27th January, 1888, and is hereby promulgated for general information :—

ACT NO. I OF 1888.

An Act to amend the Indian Stamp Act, 1879.

WHEREAS it is expedient to amend certain provisions of the Indian Stamp Act, 1879, relating to policies of insurance ; It is hereby enacted as follows :—

1. For clause (15) of section 3 of that Act the

Amendment of definition of "policy of insurance." following shall be substituted, namely :—

" (15) ' Policy of insurance ' means any instrument by which one person, in consideration of a premium, engages to indemnify another against loss, damage or liability arising from an unknown or contingent event ;

" It includes a life-policy, and includes also any writing evidencing the renewal of, for the purpose of keeping in force, a policy of fire-insurance in respect of which, and of the previous renewal whereof (if any), there has not already been paid the stamp-duty which would have been chargeable if the policy had originally been granted for a longer term than six months."

2. For article 49 of the first schedule to that Act the following shall be substituted for article 49 of Schedule I.

DESCRIPTION OF INSTRUMENT.	PROPER STAMP-DUTY.	
	If drawn singly.	If drawn in duplicate, for each part.
	Rs. A. P.	Rs. A. P.
(a) In the case of sea-insurance— When the amount insured does not exceed . . . 1,000 And for every further sum of Rs. 1,000 or part thereof in excess of . . . 1,000	0 4 0 0 4 0	0 2 0 0 2 0
(b) In the case of fire-insurance— i. In respect of an original policy for a month or any shorter term— When the amount insured does not exceed . . . 1,000 And for every further sum of Rs. 1,000 or part thereof in excess of . . . 1,000 ii. In respect of an original policy for more than one month but not more than three months— When the amount insured does not exceed . . . 1,000	Rs. A. P. 0 2 0 0 2 0 0 3 0	

49. POLICY OF INSURANCE

See Exemption, Schedule II [No. 14 (a)].

DESCRIPTION OF INSTRUMENT.		PROPER STAMP-DUTY.	
49. POLICY OF INSURANCE— <i>continued.</i>	And for every further sum of Rs. 1,000 or part thereof in excess of . 1,000	Rs. A. P. 0 3 0	
	iii. In respect of an original policy for more than three months but not more than six months— Rs. When the amount insured does not exceed . 1,000	0 4 0	
	And for every further sum of Rs. 1,000 or part thereof in excess of . 1,000	0 4 0	
	iv. In respect of an original policy for a longer term than six months— Rs. When the amount insured does not exceed . 1,000	0 6 0	
	And for every further sum of Rs. 1,000 or part thereof in excess of . 1,000	0 6 0	
	v. In respect of renewing, for the purpose of keeping in force, a policy which has been granted for six months or any shorter term and in respect of which, and of the previous renewal whereof (if any), there has not already been paid the duty which would have been chargeable if the policy had originally been granted for a longer term than six months . . .	The same duty as would be payable in respect of an original policy for the amount and term to which the renewal extends; or the excess of the duty which would have been chargeable if the policy had originally been granted for a longer term than six months, over the duty already paid in respect of the policy, and of the previous renewal thereof (if any); whichever is the smaller sum.	
	(c) In the case of any other insurance— Rs. When the amount insured does not exceed . 1,000	If drawn singly. Rs. A. P. 0 6 0	If drawn in duplicate, for each part. Rs. A. P. 0 3 0
	And for every further sum of Rs. 1,000 or part thereof in excess of . 1,000	0 6 0	0 3 0

S. HARVEY JAMES,

Secy. to the Government of India.

The following Report of the Select Committee on the Bill to amend the Indian Stamp Act, 1879, was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 19th January, 1888:—

LEGISLATIVE DEPARTMENT.

WE, the undersigned, Members of the Select Committee to which the Bill to amend the

From Messrs. Begg, Dunlop & Co., dated 14th June, 1887 [Paper No. 1].
 From Registrar, High Court, Calcutta, No. 1470, dated 9th July, 1887 [Paper No. 2].
 From Manager and Underwriter, Commercial Union Assurance Company, Limited, and Secretary, Alliance Assurance Company, No. 9889A., dated 24th June, 1887, and enclosure [Papers No. 3].
 From Agents and Secretaries, Universal Life Assurance Society, Calcutta, No. 11774, dated 6th July, 1887 [Paper No. 4].
 From Registrar, High Court, Calcutta, No. 1471, dated 9th July, 1887 [Paper No. 5].
 From Chief Commissioner, Ajmere-Merwára, No. 801—690, dated 12th July, 1887 [Paper No. 6].
 From Secretary for Berar to Resident, Hyderabad, No. 266G., dated 18th July, 1887 [Paper No. 7].
 From Messrs. Morgan & Co., Attorneys, High Court, Calcutta, No. 5251, dated 23rd July, 1887 [Paper No. 8].
 From Secretary to Chief Commissioner, Coorg, No. 1225—1107, dated 20th July, 1887 [Paper No. 9].
 From Secretary to Chief Commissioner, Burma, No. 634—22S.S., dated 26th July, 1887, and enclosure [Papers No. 10].
 From Chief Secretary to Government, Madras, No. 1611, dated 22nd July, 1887, and enclosures [Papers No. 11].
 From Officiating Under Secretary to Chief Commissioner, Central Provinces, No. 3848—216, dated 1st August, 1887, and enclosures [Papers No. 12].
 From Acting Under Secretary to Government, Bombay, No. 4477, dated 4th August, 1887, and enclosures [Papers No. 13].
 From Secretary to Government, Punjab, No. 842, dated 22nd August, 1887, and enclosures [Papers No. 14].
 Resolution by Government of India, Department of Finance and Commerce, No. 4546, dated 22nd August, 1887, and enclosures [Papers No. 15].
 Endorsement by Acting Chief Secretary to Government, Madras, No. 1861, dated 18th August, 1887, and enclosures [Papers No. 16].
 From Secretary to Government, North-Western Provinces and Oudh, No. 275—XIII-165, dated 17th September, 1887 [Paper No. 17].
 Endorsement by Acting Chief Secretary to Government, Madras, No. 2003, dated 2nd September, 1887, and enclosure [Papers No. 18].
 From Secretary to Government, Bengal, No. 3430, dated 8th September, 1887, and enclosures [Papers No. 19].

Indian Stamp Act, 1879, was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report.

2. We have made it clear that the only renewals on which stamp-duty is to be paid are renewals of fire-policies in respect of which, and of any previous renewal whereof, there has not already been paid full stamp-duty at the highest rate chargeable

in respect of original policies of fire-insurance.

3. We have ascertained that it is sufficient to provide for fire-policies being drawn singly. We have proposed to amend article 49 of the schedule accordingly.

4. We have corrected a clerical error in the fourth sub-clause of clause (b) of the same article, and simplified the expression of the fifth sub-clause.

5. The Bill does not appear to us to stand in need of any other alteration.

6. We may observe that there is nothing in the Bill which will interfere with the practice, where it now obtains, of evidencing renewals of fire-policies from year to year by receipts only for premium paid. If full stamp-duty at the highest rate chargeable in respect of an original policy has once been paid, then the receipt evidencing the renewal will, if it acknowledges the payment of more than twenty rupees, be chargeable with stamp-duty of one anna only under Act I, 1879, Schedule I, article 52.

7. The publication ordered by the Council has been made as follows:—

The Hon'ble F. M. Halliday.

INDIAN STAMP ACT, 1879, AMENDMENT BILL.

The Hon'ble MR. WESTLAND presented the Report of the Select Committee on the Bill to amend the Indian Stamp Act, 1879. He said:—

“ After the publication of the Bill we received a considerable number of criticisms and suggestions from the representatives of Insurance Companies as well as from other authorities. Substantially, no objection has been taken to the purpose to effect which the Bill was drawn; but the number of objections taken to what the Bill did not in any way propose to accomplish made it evident that it was desirable to modify its language so as to make its scope and intention more definite. It may be well then to explain that absolutely no modification is made in the law relating to any other subject than fire-insurance. The Bill modifies the definition of ‘policy of insurance’ by adding a clause which is strictly limited to fire-insurance; and although the amended schedule contains three parts, (a), (b) and (c), it is in (b) alone, which prescribes the duties on fire-insurance, that any modification of the existing law is made. The modification made in it is a reduction of duty, namely, that whereas under the law as it now stands a duty of six annas per Rs. 1,000 is taken on any policy of whatever duration, we now take less than six annas if the policy is for a period not longer than six months. If a short-term policy is renewed we levy duty upon the renewal until the total of six annas is made up, and when this total is made up, the taxation, as under the existing law, ceases.

“ A slight difficulty as to the manner in which the duty on renewals was to be taken is met by wording the definition so that the duty leviable in respect of the renewal need not be denoted upon the original policy, but may be, and oftenest no doubt will be, denoted upon the receipt given by the insurer for the renewal premium.

“ One or two of the Companies made suggestions for the reduction of the rate of duty generally. We no doubt levy in this country a higher rate of duty upon fire-insurance policies than is imposed by the law in force in England; but the present financial position is not such as to warrant our proposing any further relief beyond the reduction, to something like a proportionate rate, of the duty upon short-term policies; and the Bill has therefore been restricted to its original purpose.”

The Council adjourned to Friday, the 27th January, 1888.

S. HARVEY JAMES,
Secretary to the Govt. of India,
Legislative Department.

FORT WILLIAM; }
The 23rd January, 1888. }

NOTE.—The Meeting fixed for the 20th January, 1888, was, by order of His Excellency the President, held on the 19th idem.

SUPPLEMENT TO
The Gazette of India.

No. 4.}

CALCUTTA, SATURDAY, JANUARY 28, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

CIVIL WORKS.

Telegraph.

**ADMINISTRATION REPORT OF THE INDIAN TELEGRAPH DEPARTMENT
FOR THE YEAR 1886-87.**

No. 17T., dated Fort William, January 20th, 1888.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Director General of Telegraphs, No. 469 T., dated 14th December, and its enclosure, the Administration Report of the Indian Telegraph Department for the year 1886-87.

RESOLUTION.—The entire expenditure of the Indian Telegraph Department, whether it be on account of Capital for the original construction, or for charges for the maintenance and working of telegraph lines, is treated in the Imperial accounts as a charge against the General Revenues of India. The difference between the annual gross expenditure of the Department and the Revenue collected has averaged, during the three years previous to the one under review, a sum of more than nineteen lakhs of rupees. During 1886-87, however, this net charge, which represents the drain of the Telegraph Department on the General Revenues, was a little more than two-and-a-half lakhs. This large decrease was due partly to a somewhat smaller Capital Expenditure in the original construction of new works, but in a much greater extent to an increase in the revenue collected.

2. For purely administrative purposes separate Capital and Revenue Accounts are kept of the operations of the Department; but the cost of experimental lines, abandoned lines, and of outlay not incurred upon the

lines and offices now working is excluded from the Capital Account, as here stated. These exhibit the following results: The Capital Expenditure on the existing telegraph system at the end of the year was Rs. 4,04,28,033; the net revenue of the year was Rs. 18,54,590, giving a profit of 4.58 per cent. on the Capital; the Capital Expenditure of 1886-87 was Rs. 21,11,273, which was less by about 8½ lakhs than the average of the previous three years. This expenditure resulted in an increase of 2,524 miles of line, 5,410 miles of wires, and 9 miles of cables to the telegraph system of India, of which a considerable portion was in Upper Burma.

3. The working expenses of the year aggregated Rs. 41,21,873, or nearly five lakhs in excess of the average of the previous three years. The increase is almost entirely due to the maintenance and working of the new lines in Burma. The working expenses, gauged by mile of wire of the entire system, shew a slight increase over those of the previous year, but are less than the average of the three previous ones.

4. The gross revenue of the year was Rs. 59,76,468; it is the largest revenue ever collected in the Department, and exceeds the average of the previous three years by nearly 13½ lakhs of rupees. The net revenue was Rs. 18,54,590, which, in spite of the large increase in working expenses, is also the largest recorded, and exceeds the corresponding average by nearly 8½ lakhs.

5. A general review of the financial results of the year, then, as compared with those immediately preceding it, shews a decreasing expenditure on Capital, a very marked increase in gross revenue, a moderate increase in working expenses, and a large rise in net revenue. These results, regarded from the point of view of telegraphic administration, are sound and satisfactory, as indicating the well-organised power which lies in the Telegraph Department to cope with the increase in work which is represented by the large increase in the gross receipts; but, in order that a sound judgment may be formed as to how far these seemingly favourable results can be accepted as a gauge of the true progress made in establishing a remunerative undertaking, it is necessary to analyse more closely the nature of the revenue on which these results depend.

6. The main source of revenue is the State and Private telegrams: in 1886-87 these taken together increased in number by nearly half a million and in value by some 12½ lakhs of rupees, over the average of the previous three years; but more than 9 lakhs of this increase in value was due to State messages, which, in the year under review, paid a gross revenue of nearly 17 lakhs of rupees to the Telegraph Department, a sum which represents more than one-third of the entire revenue from the two classes combined. To a large extent, then, the favourable results of the year were due to the messages despatched by Government officials, which is a source of revenue that is to a certain extent spurious, and which is liable to great fluctuations according to local and political circumstances, the revenue from Government messages in 1886-87 being more than three times that in 1883-84.

7. The private traffic, which is the main support of telegraph revenue, shews a steady increase, which, however, is not commensurate with the great increase in facilities for communication. The total private traffic carried on inland wires during the last five years is shewn in the following statement:—

YEAR.	Number of private inland messages.	Value of private inland messages.	Number of Signal Offices.	PRIVATE INLAND MESSAGES FOR EACH OFFICE, AVERAGE.	
				Number.	Value.
		Rs.			Rs.
1882-83	1,103,488	12,93,928	324	3,406	3,993
1883-84	1,236,140	14,20,505	347	3,562	4,093
1884-85	1,364,814	15,02,860	521	2,619	2,884
1885-86	1,527,990	16,38,165	684	2,410	2,583
1886-87	1,683,758	18,17,798	699	2,408	2,600

These figures shew that the increase in private messages has not kept pace with the increase in signal offices open for traffic.

8. The foreign traffic, including both State and Private messages, shewed a slight increase, both as regards number and value of messages, over the average of the last three years; but the State foreign messages show a considerable decrease as compared with those of the year immediately preceding the one under review. They are subject, like the inland State messages, to fluctuations due to temporary and political causes: the private traffic, on the other hand, is slowly and steadily increasing.

9. The speed of transmission of messages was maintained at about the average rate during the year, except on the Calcutta-Bombay and Calcutta-Madras and Calcutta-Rangoon lines: on all these the speed deteriorated, in the case of the two first lines to a small extent only. On the Calcutta-Rangoon line the average speed was 3 hours 17 minutes as compared with 1 hour 22 minutes of the previous year. The cause of this falling off is due chiefly to the great increase of traffic on this route on account of the operations in Burma, partly to cyclones which did much damage to the line, and partly to frequent failures of the Madras-Penang Cable, which threw all the China and Australia traffic on to this already overcrowded route.

10. The messages sent as Press telegrams shewed a slight increase in number but decrease in value as compared with the previous year: the gross revenue derived from this class of traffic was Rs. 68,159, of which Rs. 10,992 was for foreign messages.

11. The system of combined post and telegraph offices continues to make steady progress: thirty-five new combined offices were opened, four closed, and one transferred to Telegraph Departmental Agency during the year. There were 326 such offices open at the end of the year, connected to the trunk lines by 4,285 miles of wires. Messages aggregating more than $5\frac{1}{2}$ lakhs of rupees in value were dealt with at these offices: the statistics show that a large proportion of this traffic is due to messages despatched by the native community, and that one of the chief objects of these offices has been already gained; for it is only through the development of this class of traffic that the revenue of the Telegraph Department can be ultimately secured on a permanent and healthy basis.

12. The number of undelivered messages shews a slight increase over the figures of the preceding year: the percentage was 0·38 of the entire number of messages sent. Insufficient and incorrect addresses were the chief causes of non-delivery.

13. Considerable simplification was made in the rules for Telegraphic Money Orders with effect from the 1st January 1887. The result was encouraging, 7,138 telegraphic advices of remittance having been sent during the first quarter of the year 1887 as compared with 2,883 in the same period of the previous year.

14. The business of Telephone Companies in India shewed a slight increase during the year, while the work done by the Telegraph Department itself in connection with telephone exchanges shewed an actual decrease: there appears to be no prospect of any early extension of this method of communication which will be at all commensurate with that which has taken place in other countries.

15. The system of quadruplex working was first introduced into India in January 1887 on the Madras-Bombay line. It has been found that some modification in details on the system employed in England are necessary in order to ensure complete success under the different conditions which obtain in India. More use will be made of hard drawn copper wire in place of iron wire in future, experiments having proved its great superiority.

16. The permanent and temporary lines of telegraph in Upper Burma were extended with considerable difficulty in many directions: numerous field lines were constructed for military purposes in connection with the above; 540 miles of

posts carrying upwards of 900 miles of wire were erected; and forty-five new offices were opened for traffic. The excellent service rendered by all classes of the Telegraph Establishment in connection with their difficult and dangerous duties in this province is again acknowledged by the Government of India. Specific notice has already been taken of the particular services of individual officers in Public Works Department Notification, No. 164 of 24th June 1886, and in Military Department Notification, No. 434 of 16th June 1887.

17. The great services rendered by Sir A. Leppoc Cappel in the direction and administration of the Telegraph Department were acknowledged by the Government when the decoration of Knight Commander of the Indian Empire was conferred upon him on the occasion of the celebration of Her Majesty's Jubilee in February 1887.

18. The attention of the Director General is drawn to the yearly increasing delay in the submission of the Administration Report of the Telegraph Department with a view to its earlier despatch in future years.

ORDER.—Ordered, that a copy of this Resolution, and of the Report, be

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, and Assam.
The Resident at Hyderabad.
The Agents to the Governor General for Central India, Rajputana, and Beluchistan.

forwarded to the Secretary of State and to the Local Governments and Administrations noted on the margin, and to the Government

of Ceylon and the Commissioner in Sind.

Also to the Foreign Department for communication to the Residents at Mysore and Coorg.

Also that a copy of this Resolution be forwarded to the Director General of Telegraphs for information.

Also that a copy of this Resolution and of the Report and Appendices A, B, and F be forwarded to the Home Department of the Government of India for information, and be published in the *Gazette of India*.

R. C. B. PEMBERTON, *Colonel, R.E.*,

Secretary to the Govt. of India.

ADMINISTRATION REPORT

OF THE

INDIAN TELEGRAPH DEPARTMENT

FOR

1886-87.

I.—GENERAL REVIEW.

The transactions of the year show, in all relations, large and satisfactory advances over the previous year.

2. Message Traffic.—2,516,826 paid telegrams were despatched, against 2,289,938 in 1885-86, an increase of 226,888, of which 155,768, or nearly 70 per cent., were Inland Private telegrams. Although satisfactory as an indication of the growing appreciation by the public of the enlarged facilities afforded in recent years, this increase can hardly yet be regarded as an adequate response to the extent of those facilities. It is, however, not unreasonable to expect that the native public will in time appreciate, at its full value, the means of rapid communication which have been so widely extended in their interests, and that this class of traffic will assume far larger proportions: it has already increased 42 per cent. under the stimulus of the extensions effected during the last four years.

One peculiarity of the telegraph traffic in India is the large proportion of telegrams which are despatched on the business of the Government itself, a number which, notwithstanding great fluctuations, is rapidly increasing. In 1885-86 the highest number then on record was reached, but in 1886-87 this number was exceeded by 18·17 per cent., and while ten years ago the annual number was under 100,000, last year the necessities of the military and civil administration led to the despatch of nearly half a million telegrams, many of great length, and transmitted to extreme distances.

3. Message Revenue.—The revenue earned from the despatch of telegrams amounted to ₹48,30,239,* an increase of ₹8,69,187 over the receipts of the previous year. Four-fifths of this increase are for inland telegrams on the service of the Government, the remarkable growth of which has been noticed above; but there was a tangible increase from private telegrams, *vis.*, ₹1,79,633, for inland, and ₹42,496 for foreign traffic, while the earnings on Foreign State telegrams decreased by ₹49,123.

The proportions of the total message revenue due to the several classes of traffic were—

Inland Private telegrams	37·63
Inland State telegrams	33·55
Foreign Private telegrams	27·19
Foreign State telegrams	1·63

* Includes ₹3,829 credited to Provincial Offices.

It would have been more satisfactory if the proportion of Inland Private telegrams had been larger, and all the facts brought out in this report go to show how desirable it is to continue the policy of extending the system into the centres of native trade, in order to encourage the growth of this class of traffic. But for the steps already taken in this direction, there would have been no increase in Inland Private telegrams since the introduction of the present tariff, whereas, owing to the numerous new offices which have been opened, there has been a progressive, if somewhat slow, increase year by year, as shown below :—

1883-84	29,124	Yearly increases in revenue from Inland Private telegrams.
1884-85	88,879	
1885-86	1,33,532	
1886-87	1,79,633	
TOTAL							4,31,168	

Appendix H.
Paras. 46, 47.

4. **New Telegraph Stations.**—178 new offices were opened during the year, raising the number, open to the public on the 31st March 1887, to 2,389. Of these 699 were departmental and combined offices, and the remainder licensed offices on railways and canals. The total number of public telegraph offices has increased 50 per cent. during the past four years (since 1882-83), and the increase in the same period in departmental offices was 385, or 123 per cent.

Paras. 67, 68.
Paras. 71—74.

5. **Extensions of lines.**—The construction works were extensive and continuous, and resulted in the following additions to the mileage :—

Posts	2,524,	raising the total to	30,034 miles.
Wires	5,410,	"	"	.	.	.	86,890 "
Cables	9,	"	"	.	.	.	196 "

Many of these works were carried out in Upper Burma in connection with the military operations, and the value of the aid rendered by the department in those operations has been acknowledged by His Excellency the Commander-in-Chief, and by the Government of India.

Paras. 75—83.

6. **Upkeep of lines.**—The actual, as also the relative, number of interruptions was less than in the previous year, but the average length of each was somewhat increased. This increase may be disregarded, as it was wholly caused by the difficulties of maintenance in Burma. Excluding that Province from the comparison, there appears to have been a marked reduction both in the numbers and duration of interruptions, notwithstanding the expansion of the system—a result most creditable to the maintenance staff. For efficiency of its line maintenance, the Indian department continues to take precedence of all other telegraphic administrations.

Appendix J.
Paras. 68—70.

7. **Licensed Telegraph systems.**—During the year 2,537 miles of wire were erected for railways, and 35 miles for canals, and 140 new offices were fitted up. The following is the extent of the system, maintained by the department for railways and canals, at the close of the year :—

	Railways.	Canals.	TOTAL.
Miles of wire	31,391	596	31,987
" cable	9	9	9
Number of Offices	1,352	27	1,379

8. **Telephones.**—There was an increase in the earnings of the Telephone Companies, but the business is still very restricted. The number of subscribers to the Companies' exchanges in Calcutta, Bombay, Madras, Rangoon, Karachi, and Moulmein was only 849, as compared with 822 in 1886, while the number of private line connections decreased from 100 to 95. Paras. 84—86.

In the Government office exchanges maintained by the department there were eight new connections, while the private line offices were reduced from 257 to 247.

The whole business, it will be seen, is inconsiderable.

9. **Traffic efficiency.**—The high standard of efficiency to which the public have become accustomed was maintained, though with great difficulty, owing to the exceptional nature of the departmental operations in Burma, and to the enormous traffic between India and that distant Province, which was the outcome of the military occupation, and the presence there for some months of the Commander-in-Chief and the head-quarters of the army. The average speed of transmission fell off under these influences, and there was also a slight decrease of average speed on the Calcutta-Madras and Calcutta-Bombay lines; but on all other routes there was improvement, and there was no increase in the percentage of complaints by the public. Para. 50.

10. **Finance.**—The Capital expenditure to the end of the year amounted to Rs. 4,04,28,033. The earnings of the year were Rs. 59,76,463, and the expenditure was Rs. 41,21,873, giving a surplus of Rs. 18,54,590, equivalent to 4.59 per cent. on the Capital. The figures for the previous year were— Paras. 11—15.

	R
Revenue	51,10,986
Expenditure	36,18,695
Surplus	14,92,291

and the interest on Capital was 3.89 per cent.

If, for the year under review, the value of telegrams despatched on the service of the Government, which is only *pro forma* revenue, be deducted from the departmental revenue as shown above, the surplus is reduced to Rs. 1,56,913, and the interest on Capital to 0.38 per cent.

II.—REVENUE AND EXPENDITURE.

11. **Capital Account.**—The expenditure of the year, on the construction of new lines and other works debitable to Capital, was Rs. 21,11,273, made up as follows :—

	R
Lines and Buildings	22,37,418
Tools and Plant	98,985
Workshops { Buildings	9,195
{ Machinery and Plant	2,280*
{ Materials	11,114
Store-houses	8,174
Stores	349,474*
Charge for Exchange on payments in England	77,895
Suspense heads	20,855
TOTAL	<u>21,11,273</u>

12. The total Capital outlay of the department to the end of the year was Rs. 4,04,28,033.

* Credits.

13. **Revenue Account.**—The following is the Revenue Account for the year 1886-87, compared with that for 1885-86 :—

	1885-86.	1886-87.		1885-86.	1886-87.
	<i>R</i>	<i>R</i>		<i>R</i>	<i>R</i>
RECEIPTS.			EXPENDITURE.		
Message Revenue	39,57,317	48,26,410*	Repairs of lines	1,87,025	4,64,601
Receipts from railways and canals for rent of lines and offices supplied and main- tained for them	9,58,282	9,64,997	Direction	1,79,094	1,58,741
Rents of private lines and claims against Guarantees . .	1,05,557	82,975	Accounts	54,115	56,301
Sale of books, Gazettes, &c. .	15,826	16,099	Superintendence	6,94,074	7,40,473
Miscellaneous	35,137	51,767	Line maintenance and es- tablishment	2,38,432	2,41,467
News free and other <i>pro forma</i> messages	38,867	34,215	Check Office	48,989	54,532
			<i>Signal Offices.</i>		
			Departmental	20,57,584	21,68,586
			Non-departmental	1,23,671	1,41,502
			Minor undertakings	6,712	6,427
			Telegraph stamps	5,952	6,089
			Stationery and printed forms	13,950	68,767
			Other items	9,097	14,387
			TOTAL EXPENDITURE	36,18,695	41,21,873
			Surplus receipts	14,92,291	18,54,590
TOTAL	51,10,986	59,76,463	TOTAL	51,10,986	59,76,463

14. It will be seen that against an increased outlay of ₹5,03,178 there was an increase in revenue of ₹8,65,477, making a net improvement of ₹3,62,299. The increased revenue was entirely produced from the despatch of messages, principally in connection with Burma; and the increased expenditure, with the exception of one item, occurred almost entirely in Burma, in the erection and maintenance of lines, and in the upkeep of the numerous new offices which were established there. The exceptional item is an increase of ₹54,817 for stationery and printed forms, which represents the claim of the Superintendent of Government Printing against the department. This expenditure, which was properly included as a debit in 1886-87, was in previous years omitted.

15. The financial result of the year's transactions was a surplus of ₹18,54,590, representing a percentage of 4.59 on the whole capital of the department, calculated up to the close of the year. These figures may fairly be accepted as evidence of economical and intelligent management, and, as a measure of departmental efficiency, they are gratifying, but to arrive at the actual direct gain or loss to the State, from the operations of the department, it would be necessary to deduct the value of State messages, which are included in the above figures.

Excluding the share due to Provincial lines, the value of these amounted to ₹16,97,677, the largest sum ever reached, and ₹6,46,754 more than in 1885-86, also a year of great activity in State correspondence by telegraph; and, as pointed out in paragraph 20 of this report, exceptional activity in this direction implies also abnormal expenditure in other departments of Government, so that increased nominal earnings in the Telegraph Department from this source, cannot be viewed as satisfactory from the point of view of Imperial Finance.

Excluding the value of State Messages, there was a small surplus of ₹1,56,913, representing a percentage on capital of 0.38.

* Excluding ₹3,735 and ₹3,829 credited to Provincial offices in 1885-86 and 1886-87 respectively.

III.—TRAFFIC.

16. The number and value of Paid messages of all kinds, under the two heads State and Private (including those collected in Provincial Offices) are shewn below with the corresponding figures of the previous year. The net increase in 1886-87 amounts to 2,26,888 in number, and ₹8,69,187 in value, or 9·91 and 21·94 per cent. respectively.

CLASS OF MESSAGE.	1886-87.		1885-86.	
	Number.	Value.	Number.	Value.
State Inland	452,277	₹ 16,20,626	382,732	₹ 9,24,445
State Foreign	6,898	78,494	8,105	1,27,617
TOTAL STATE	459,175	16,99,120	390,837	10,52,062
Private Inland	1,683,758	18,17,798	1,527,990	16,38,165
Private Foreign	373,893	13,13,321	371,111	12,70,825
TOTAL PRIVATE	2,057,651	31,31,119	1,899,101	29,08,990
TOTAL STATE AND PRIVATE	2,516,826	48,30,239	2,289,938	39,61,052

In the above totals are included the small sums of ₹3,829 for 1886-87, and ₹3,735 for 1885-86, which are creditable to Provincial revenues, and are, therefore, excluded from the receipts of the Telegraph Department, though forming part of the traffic collections. Making the necessary deduction on this account, the net message revenue of the year as shewn in paragraph 13 stands as follows:—

	₹
State	16,97,677
Private	31,28,733
	<u>48,26,410</u>

17. In Appendix B will be found a statement of the message revenue in greater detail, showing the amounts collected in each division, under each class, contrasted with the figures of the previous year. These statistics refer only to paid messages booked during the year at Departmental or Combined offices, including those received from foreign countries. They exclude all messages booked at Licensed Telegraph offices in India and Burma, though such messages are largely carried to their destination by the wires of the department (see paragraph 52).

18. The proportions in which the traffic was contributed during the year by the four main heads, Inland State, Foreign State, Inland Private, Foreign Private, are shown in the following table:—

CLASS.	INLAND.		FOREIGN.		TOTAL.	
	No.	Value.	No.	Value.	No.	Value.
State	17·97	33·55	0·27	1·63	18·24	35·18
Private	66·90	37·63	14·86	27·19	81·76	64·82
TOTAL	84·87	71·18	15·13	28·82	100·00	100·00

19. The normal proportions of these four classes of traffic have been greatly disturbed during the past year by the large increase in Inland State traffic which has resulted from the military operations in Burma. During the previous four years the receipts from State Inland messages only averaged 19·1 per cent. of the total message revenue, against 33·55 per cent. during 1886-87. Again, the value of Foreign traffic (State and Private) during the same four years was 38·44 per cent. of the whole, and it has now temporarily fallen to 28·82 per cent.

20. **Inland State Messages.**—Inland State messages increased by 69,545 in number, and ₹6,96,181 in value over the figures of 1885-86, being percentages of 18·17 and 75·30 respectively. That the increase is, as stated above, due to the operations in Burma is proved by the fact that in Upper Burma alone, which was formed into a new division at the beginning of the year, these messages amounted to 87,540 in number, and ₹6,89,447 in value, while in Lower Burma the increase over the previous year was 19,809 in number, and ₹98,321 in value. The increase in Inland State messages would have been still more marked, had it not been to some extent counterbalanced by a considerable decrease in this class of message in the Sind, Bengal, Punjab and Bombay Divisions, in which, during the year 1885-86, there was much military activity in connection with the movements of troops to the North-west Frontier.

Inland State messages reached during the year the unprecedented value of ₹16,20,626, the highest previous figures, which occurred during the last Afghan war, having been ₹11,86,635 in 1879-80 and ₹12,98,222 in 1880-81. On the other hand, so recently as in 1883-84, the value of Inland State messages fell to ₹4,71,232, and formed only 14·64 per cent. of the total message revenue, against 33·55 per cent. in the year under review. The history of this class of traffic shows that it is liable to great fluctuations, extremely difficult to forecast, and that it is mainly stimulated to abnormal dimensions by famines, wars, and military operations. Its growth, therefore, is usually an indication of unproductive expenditure in other departments; and as the revenue derived from it is only a transfer of money from one pocket of Government to another, it can only be considered in a very qualified manner as a satisfactory item in the accounts of the Telegraph Department. This traffic, so far as its volume is concerned, is moreover practically independent of tariffs, and as State officials (with the exception of the Meteorological Department) can at present only use the Urgent and Deferred classes, there is little or no analogy between State and Private traffic from the points of view of telegraphic finance and statistics. Inferences of progress or the reverse cannot therefore be drawn from the combined figures, and each class of traffic requires separate treatment and consideration.

21. The principal use of the valuation of State messages is to furnish some measure of the extent to which officials occupy the wires; and the prepayment in cash of such messages, moreover, supplies, in the interests of the public generally, a powerful check against an undue use of telegraphy in cases when the post would answer all purposes. The best stimulus to the growth of real revenue from private traffic is to be found in a thoroughly efficient and rapid service, and the more the wires are freed from unnecessary State business the better can the interests of the public be served. The curtailment, both in length and number, of State messages is therefore a matter of importance; and that there is room for improvement in the matter of length may perhaps be inferred from the fact that in the year 1886-87 the average number of chargeable words in urgent and deferred State messages were 26 and 24 respectively, against 10 in the corresponding classes of Private telegrams.

22. **Foreign State Messages.**—This traffic shows a reduction of 1,207 in number, and ₹49,123 in value, over the figures of the previous year, being

equivalent to 14·89 and 38·49 per cent. respectively. The reduction in the tariff between India and the United Kingdom, referred to in para. 26, accounts partially for this fall, but the main cause is that the receipts in 1885-86 were, as stated in last year's report, quite abnormal, due to special circumstances. Compared with the average of the four years, 1881-82 to 1884-85 inclusive, the increase in 1886-87 is relatively considerable, being 1,711 in number, and ₹34,158 in value, or 32·98 and 77·04 per cent. respectively. The above receipts only include the share of the department, which in the case of a message to the United Kingdom is about one-ninth of the total cost, the remainder being paid away for the transit beyond the Indian frontier. In order to keep down the charge on the revenues of India for this class of messages, an abbreviated word code is in use, by which considerable reductions in cost are effected.

23. Inland Private Messages.—Inland Private messages numbered 1,683,758, of the value of ₹18,17,798, being increases of 155,768 and ₹1,79,633 over the figures of the previous year. The percentages of increase were 10·19 in number and 10·96 in value. These results, as a measure of the general development of private telegraphy in India, are not quite so satisfactory as they at first sight appear. More than one-third of the increase over the previous year occurred in messages sent from Burma, and was mainly due to the absence from their homes of the large military force temporarily quartered in that country. In India the increase was very generally distributed, but, as will be shown below, the dimensions to which this traffic has yet attained fall far short of what might have been anticipated from the greatly extended facilities, in respect to both lines and offices, which have been afforded during the past few years.

24. The present tariff came into operation on the 1st January 1882, and the year 1882-83 is therefore the first complete year for which we have figures showing the results obtained from it. The increase of the Inland Private traffic of 1886-87 over 1882-83 has been 494,321 in number, and ₹4,31,168 in value, or 41·56 and 31·09 per cent. respectively—a disappointing result when it is remembered that at the close of 1882-83 there were only 314 offices open, against 699 at the close of 1886-87. In the 385 offices opened in the interval, the revenue from Inland Private messages during 1886-87 amounted to ₹2,91,495, leaving only ₹1,39,673 to represent the increased revenue from Inland Private messages collected at all other offices (including most of the principal towns in India) in 1886-87, as compared with 1882-83.

In the case of the numbers of messages, a similar result comes out, leaving 221,173, out of a total increase of 494,321, as the increase in the old offices. Deducting from the figures of 1886-87 the number and value of messages booked in the new offices, the increase of 1886-87 over 1882-83 is only 18·5 per cent. in number, and 10 per cent. in value. Moreover, this small increase in four years includes, and must have been largely contributed to by, the traffic *addressed to* the 385 new offices, and, to a great extent, may be said to have been created by the opening of those offices.

Allowance must be made for the fact that in some cases a new office has drawn away traffic from a neighbouring old office, but this does not materially affect the general result, which brings out clearly that the reduced tariff in force since the 1st January 1882 would have been productive, if not of actual loss, at all events of a serious check in the growth of revenue from Inland Private messages, had not its effect been counteracted by the large number of new offices that have been opened during the past four years. The tariff, however, though in itself financially unsuccessful, possesses many advantages in the way of simplicity and adaptation to Indian wants and to the Indian coinage. Combined with free address, free re-direction of telegrams from one station to another, free

delivery up to a five-mile radius, and the abolition of extra fees for messages tendered at night, or after regular hours, it compares most favourably with the regulations in force in almost all other countries, including Great Britain, and its universal application to the immense area of India and Burma places it in the foremost rank in the matter of cheapness. While, therefore, the present tariff may perhaps call for no immediate change, the fact must be recognised that, but for the policy of developing the telegraph system by opening up fresh sources of revenue to the extent of much more than doubling the number of offices, the results would have been very different from those actually obtained.

25. Foreign Private Messages.—The number and value of Foreign Private messages were 373,893 and ₹13,13,321 respectively, the increase over the previous year being only 0·74 per cent. in number and 3·34 per cent. in value.

26. As a result of the International Telegraph Conference held at Berlin in 1885, the rates between Europe and India were reduced, with effect from the 1st July 1886, from 5·60 francs to 5 francs per word, the reduction being borne rateably by all administrations. The effect of this reduction was that a charge of four shillings, instead of four shillings and seven pence, a word was made in England, while in India, owing to the fall in exchange, it was necessary, in spite of the reduction, to raise the old rate of ₹2·12, calculated when exchange was over 1s. 7d., to ₹2·13. The reduction in rate in England had, however, but little effect in increasing the number of messages from that country, the increase having been less than one thousand, while the Indian share of the receipts was ₹26,000 less. On the other hand, the traffic from India showed a moderate increase, notwithstanding the slight enhancement of the rate. These results indicate that, with the elaborate system of writing messages in abbreviated code which now prevails, the effect of small changes in tariff is hardly perceptible, the state of trade being the factor which really controls the traffic. The fall in exchange at the early part of the year was felt severely, as, pending the introduction on the 1st July of the rates fixed at the Berlin Conference, the public were given the benefit of a rate of exchange far above the market rate at which our settlement with other administrations had to be effected. The actual loss during the year on this account was ₹73,177.

27. Classification of Inland Messages.—Of the total inland paid traffic carried during the year, 50·88 per cent. was classed Deferred, 36·38 per cent. Ordinary, 13·58 per cent. Urgent, the small balance of 0·16 per cent. being Local messages, a class which was discontinued on the 1st July 1886.

28. The following tables shew the classification of State, Private, and Press messages separately, compared with the previous year, and with the average of the previous four years. A marked increase in the Urgent class of State messages is the only point calling for notice. The causes of it were the important military operations in Burma, and the consequent great pressure of traffic on the wires, which unavoidably lowered the speed of transmission of Deferred traffic.

Percentage of number of each class of State, Private, and Press Messages compared with previous years.

CLASS.							1886-87.	1885-86.	Average of four years from 1882-83 to 1885-86.

* Exclusive of R12,130 on account of fees for abbreviated addresses, R85,451 on account of Reply deposits, and a debit adjustment of R7,763.

† Local messages were abolished on the 1st July 1886.

30. **Telegraphic Money Orders.**—With effect from the 1st January 1887, a considerable simplification was made in the rules for Telegraphic Money Orders, and the cost to the public of these orders was much reduced. The charge for the telegraphic advice of the remittance made by this department was reduced from R2 to R1, irrespective of the length of the message, the commission charged by the Postal Department being also largely reduced. The rates for this rapid and valuable means of remitting money are now extremely low, and on their introduction an impetus was at once given to this class of business, as proved by the fact that from January to March 1887 7,138 telegraphic advices of remittance was transmitted by the department, against only 2,883 in the corresponding months of the previous year. The duty of this department is limited to the booking, transmission, and delivery of the telegraphic advices, under special precautions, the postmasters at the stations of origin and destination undertaking all the business with the public and the Postal Department. The advantages afforded by the service are very great, more especially in the case of orders for the higher amounts, and as the system becomes better known, it appears probable that it will be largely employed.

31. **Total Number of Messages disposed of.**—The following figures strikingly illustrate the rapid growth of the actual work done by the department during the past eight years. The figures represent the total number of

messages, both paid and free, including all repetitions made in transit :—

1879-80	.	.	.	6,117,437	1883-84	.	.	.	8,271,509
1880-81	.	.	.	6,649,709	1884-85	.	.	.	9,776,896
1881-82	.	.	.	6,719,621	1885-86	.	.	.	12,177,387
1882-83	.	.	.	7,862,671	1886-87	.	.	.	14,096,713

32. The great distances traversed by the bulk of the messages form a peculiar feature of Indian telegraphy, and one which distinguishes it from the telegraphy of Europe. In India the numbers of messages between neighbouring towns are insignificant, compared with those between the great trading centres, and between the producing districts of the interior and the seaboard. To deal with such long distances, the conductivity of the wires and the sensitiveness of the instruments are fixed at a much higher standard than is usual in other countries, but, notwithstanding these precautions, and the advantage that is taken of automatic re-transmission, repetition of messages cannot be otherwise than numerous in so vast a system. The opening up of the distant province of Burma, as well as the establishment of short branch feeder lines to post offices, are both causes which have contributed largely to the increase of signalling work of late, and have rendered inevitable a corresponding strengthening of the signalling staff.

33. Inland Traffic.—The following statement exhibits the growth of State and Private traffic during the past five years, the tariff having remained unchanged during the whole period :—

YEAR.	STATE.						PRIVATE.						TOTAL.						Number of Departmental Offices remaining open at the close of each year.
	Number.	Value.	PERCENTAGE OF NUMBER COMPARED WITH PREVIOUS YEAR.		PERCENTAGE OF VALUE COMPARED WITH PREVIOUS YEAR.		Number.	Value.	PERCENTAGE OF NUMBER COMPARED WITH PREVIOUS YEAR.		PERCENTAGE OF VALUE COMPARED WITH PREVIOUS YEAR.		Number.	Value.	PERCENTAGE OF NUMBER COMPARED WITH PREVIOUS YEAR.		PERCENTAGE OF VALUE COMPARED WITH PREVIOUS YEAR.		
			Increase.	Decrease.	Increase.	Decrease.			Increase.	Decrease.	Increase.	Decrease.			Increase.	Decrease.			
1882-83	253,731	6,09,818	3.21	12.69	1,189,437	13,86,630	14.90	...	5.30	...	1,443,168	19,96,418	12.66	0.93	314

34. Foreign Traffic.—During the period covered by the statement below, the only important changes in tariff occurred during the year 1886-87 (see para. 26). The return exhibits clearly the slow growth of this traffic of late years. During the previous five years the total number of messages increased from 187,060 in 1877-78, to 332,402 in 1881-82, or 77 per cent., while between 1882-83 and 1886-87, the increase has only been 6·9 per cent. Reduced profits in trade, and increased compression of messages by codification, are the main causes of this check in the expansion of the traffic. It is however satisfactory to note that the progress, though slow, is still generally upward.

Year.	STATE.				PRIVATE.				TOTAL.

35. In Appendix C will be found details of the distribution of traffic to and from India by the Suez, Teheran, and Turkish routes to Europe, during the past sixteen years. The percentages refer to the numbers of messages, and those for the last five years are repeated below. The fluctuations are mainly due to interruptions, the normal distribution of the traffic being remarkably steady. Both the Suez and Teheran routes to Europe have worked admirably throughout the year. The Suez route was not interrupted once, and only two brief interruptions of a few hours occurred on the Teheran route (in January), due, it is understood, to snow in Persia. The Turkish route was interrupted twelve times in all in Turkey in Asia; but none of these interruptions were of long duration, the maximum being one of five days in March last between Gournia and Bagdad. On the whole, the route was fairly maintained throughout the year.

ROUTE.		1882-83.	1883-84.	1884-85.	1885-86.	1886-87.

TOTAL .		100'00	100'00	100'00	100'00	100'00

Principal events during 1886-87 affecting the international system of Telegraphs.

36. **Indo-Siam Line.**—Early in the year an alternative route to Bangkok from Moulmein was completed *via* Raheing, considerably to the north of the original route *via* Tavoy and Kanburi. This route has, however, so far proved of no value, having been subjected to frequent and prolonged interruptions in Siamese territory, where it makes a long *détour*, and it has been practically closed for months past. The shorter southern route has worked better, but neither this line, nor its prolongation from Bangkok to Saigon, has yet proved sufficiently reliable to attract traffic, or to compete in any way, as an international route, with the long cable transit *via* Singapore. The entire traffic exchanged *via* Siam amounted in 1885-86 to only 1,662 messages, the share of this department on which was R6,087'6, and these poor results showed no improvement in 1886-87, when the corresponding figures were 1,386 messages, Indian value R6,903'15. The lines from Moulmein to the frontier of Siam have been solidly constructed, and great expense has been incurred in protecting them from interruption, by felling all trees likely to injure the wires by their fall. Notwithstanding the difficulties of the country, the unhealthiness of the climate and slow means of locomotion, communication as far as the British Frontier was well maintained; it may be hoped that the lines to the eastward, in foreign territory, will soon be sufficiently improved to assure regular and rapid communication through to Saigon.

37. **Reduction of Rates between Europe and America.**—The severe competition which prevails between the various cable companies connecting Europe and North America, resulted in a reduction in the rate of the cable transit to six pence a word, with effect from 5th May 1886. One company, the Commercial, better known as the "Mackay-Bennet," held aloof, and maintained a higher rate of 15 pence, but it has recently been obliged to reduce to the six-penny rate. This rate is known to be wholly unremunerative in spite of the increased traffic, and it is not at all improbable that a charge of one shilling, or even higher, will be made when the companies can come to terms amongst themselves.

38. Interruptions of the Madras Penang Cable.—This cable was interrupted on three occasions during the year—

viz., from the 4th September to the 21st September,
 „ 3rd November to the 7th November,
 „ 12th November to the 26th November.

Unfortunately, on the occasion of the first interruption, the alternative cable from Rangoon (Elephant Point) to Penang failed simultaneously, *viz.*, from the 4th to the 18th September, thus cutting off all traffic with the Eastern Extension Cable Co. The Siam line proved itself quite unequal to the transmission of the China traffic thrown upon it, and, for this short period, both Australia and China were dependent for communication, solely on the Great Northern Telegraph Co.'s line through China and Asiatic Russia.

39. Extensions in China.—Telegraphic communications are being rapidly opened up in the interior of China. A large number of offices are already opened, of which thirty-four are reported to have been added during the year. Later reports show that three telegraph offices have already been opened in the province of Yunan, which borders the frontier of Upper Burma, and the prospect is now perhaps within measurable distance of telegraph communication by land being established between India and China.

40. Extensions in Perak.—Telegraphic communications were also opened up during the year in the province of Perak, in which no less than seventeen offices are reported to have been opened during the year.

41. Extensions in West Africa.—The West African Direct Telegraph Co. have largely extended their operations during the year, and have opened offices at Bathurst (Senegambia), Sierra Leone, Accra, Lagos, Bonny, Brass, Grand Bassam, Porto Novo, Gabon, Prince's Island, Island of St. Thomas, and as far south as St. Paul de Loanda in Congo.

Among other extensions may be mentioned the connection by cable of Tangiers with Gibraltar, and of Massowah and Assab with Perim.

42. Interruptions.—The following interruptions of more or less importance to international communications occurred during the year :—

Fao, Bushire—from 18th June to 21st June 1886.
 „ „ „ 27th June to 28th July 1886.
 Cable Malta, Gibraltar—from 7th July to 28th July 1886.
 „ Trinidad, Demerara—from 24th March to 3rd May 1886.
 „ Cable Brest, St. Pierre—from 28th April to 8th June 1886.
 „ „ „ „ 28th January to 22nd March 1887.
 (Elephant Point) Rangoon, Penang—from 4th September to 18th September 1886.
 „ Madras, Penang—from 4th September to 21st September 1886.
 „ „ „ from 3rd November to 7th November 1886.
 „ „ „ from 12th November to 26th November 1886.
 Bangkok, Saigon—from 23rd April 1885 to 7th April 1886.
 „ „ from 24th May 1886 to 26th May 1886.
 „ „ from 14th June 1886 to 16th June 1886.
 „ „ from 24th June 1886 to 25th June 1886.
 „ „ from 26th June 1886 to 28th June 1886.
 „ „ from 19th July 1886 to 28th July 1886.
 „ „ from 12th February 1887 to 20th February 1887.

Singapore, Cape St. Jacques—from 11th January 1887 to 18th January 1887.

Hong-Kong, Amoy—from 2nd December 1886 to 3rd January 1887.

Colon, Jamaica—from 17th September 1886 to 24th December 1886.

Busrah, Gournah (Turkey in Asia)—from 9th January to 11th January 1887.

Gournah—Bagdad (ditto)—from 5th March to 10th March 1887.

43. **Traffic Statistics.**—A graphic representation of the number and value of inland and foreign paid messages year by year, as far back as the record is available, will be found in diagrams A and B.

44. Appendix D is an abstract of signal offices, classed in groups, according to the amount of traffic originating at each, year by year since 1877-78.

45. Appendix E shows the number of signal offices in each division open at the end of the year.

46. The total number of departmental offices open at the end of the year was 699, and the department provided and supervised 1,379 railway and canal offices, of which 1,138 were available to the public.

There were also 644 railway offices not maintained by the Telegraph Department, of which 552 were available to the public.

47. The total number of telegraph offices open to the public during the past five years is shown below:—

	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.
Departmental and Combined	314	349	521	634	699
Railway and other licensed offices	1,288	1,382	1,514	1,577	1,690
TOTAL	1,602	1,731	2,035	2,211	2,389

48. Appendix M is a list, arranged by provinces, of departmental offices opened during the year, *vis.*—

„ Light house-keeper	1
„ Soldiers	64
Total worked by extra-departmental agency	507
„ „ „ purely departmental agency	192
TOTAL	699

* For particulars see Appendix N.

49. **Complaints.**—Appendix F is a synopsis of the complaints received from the public during the year, those in which this department was concerned being separated from those for which railway or foreign lines were responsible. The number of admitted complaints under the former category was 479, against 433 in the previous year, an increase of 10·62 per cent., against a corresponding increase of 10·51 per cent. in the traffic concerned, which, in addition to all messages sent from departmental stations, includes the messages transferred to our lines from licensed systems. Considering the pressure under which the staff was working through a part of the year, and the interruptions referred to in the next para., which involved many additional repetitions of messages, the results compare favourably with those of the previous year.

50. **Speed of Transmission.**—In the following table are given the average times of transmission* occupied by messages (excluding Deferred) over the principal main routes. The results are also graphically shown in diagram C. It will be noticed that there is a slight increase over the time intervals of the previous year on the lines between Calcutta and Bombay and Calcutta and Madras, and a considerable increase on the Rangoon-Calcutta line. One cause of this falling-off in speed was the heavy State traffic to and from Burma, in connection with the military operations and the movement of troops to and from that country. This abnormal traffic, superadded to the always heavy traffic on these long and busy lines, taxed the capacity of the wires to the utmost, and rendered some delays inevitable. Two other causes had a marked influence on the average speed, one, the frequent failures of the Madras-Penang cable in the autumn of last year, throwing all the China and Australia traffic on the already crowded Burma lines; the other, two destructive cyclones, which in November last seriously damaged the lines between Calcutta and Madras, wrecking them for miles, and involving very prolonged interruptions at a time when the traffic demanded that communication should be perfect.

On the important circuits between Bombay and Madras, and between Bombay and Karachi, there was distinct improvement, and between Calcutta and Karachi last year's average was fully maintained.

	1882-83.		1883-84.		1884-85.		1885-86.		1886-87.	
	H.	M.	H.	M.	H.	M.	H.	M.	H.	M.
Calcutta to Karachi . . .	1	24	1	2	0	57	0	51	0	51
Karachi to Calcutta . . .	1	3	0	36	0	35	0	36	0	35
Calcutta to Bombay . . .	1	21	1	6	0	47	0	34	0	40
Bombay to Calcutta . . .	1	0	1	10	0	48	0	36	0	43
Calcutta to Madras . . .	1	16	1	7	1	1	0	50	0	54
Madras to Calcutta . . .	1	18	1	4	0	59	0	46	0	59
Madras to Bombay . . .	1	0	0	40	0	33	0	33	0	24
Bombay to Madras . . .	1	0	0	38	0	28	0	36	0	32
Bombay to Karachi . . .	1	6	0	35	0	35	0	31	0	28
Karachi to Bombay . . .	0	51	0	30	0	24	0	21	0	14
Rangoon to Calcutta . . .	1	27	2	50	2	10	1	22	3	17

* To save the labour of compiling the real average delay from the actual time occupied in transmission of all messages, the averages above referred to are calculated on the mean of the daily maximum and minimum delay on each route, and they are, as a fact, very much higher than the true averages.

51. News free Messages.—The number of free news messages, such as mail steamer reports transmitted during the present and preceding year, have been as follows :—

1885-86	788
1886-87	823

These messages are, as a rule, transmitted to a large number of stations, and the numbers shown above do not represent the work this class of message entails.

52. Traffic with Licensed Telegraphs.—The number of messages transmitted partly over Departmental and partly over Licensed (Railway or Canal) wires is shown below, with the figures of the two previous years. The department receives nothing for the messages tendered at Licensed offices, which are transferred to its lines to reach their destination ; similarly the licensed systems receive nothing for messages tendered at Departmental offices, which are transferred to them for delivery. Moreover, in the interests of the public, their messages are carried as far as possible by departmental wires, and as short a distance as possible by the wires of the licensed systems, with whom the carriage of paid telegrams is a secondary consideration, and always subordinated to the prior requirements of their own traffic. The immense extent of the departmental system is thus placed almost gratuitously at the disposal of the licensed systems, in return for the short transmissions to or from the nearest departmental office which they undertake. The numbers of messages transferred in the two directions conclusively indicate how advantageous to the licensed systems is the present arrangement, the only advantage reaped by the department, for the sacrifice of revenue, being the saving of some account-keeping, and correspondence, which was necessary when the receipts for transferred messages were divided in proportions which, to some extent, represented the comparative value of the services rendered :

	1884-85.	1885-86.	1886-87.
Sent to Railway	132,330	124,288	118,764
Received from Railway	*185,261	†201,264	‡236,152
TOTAL	317,591	325,552	354,916

* Includes 857 Foreign messages originating on Railway Lines and transferred to this Department.

† " 716 " " " " " "

‡ " 525 " " " " " "

53. Press Messages.—The traffic, as will be seen from the table below, shows a slight increase in number, and diminution in value, over the results of the previous year. In Inland telegrams the Deferred and Urgent classes have been proportionately more, and the Ordinary class less, availed of than was the case during the previous four years. (See para. 28.)

In foreign press telegrams to and from the United Kingdom, an important reduction of rates was introduced with effect from the 1st July 1886. The new rates are one-third of the charge per word for ordinary telegrams, *vis.*, 1s. 4d. in England, and 15 annas in India, but the effect of this reduction in stimulating traffic has so far been very small. As the system becomes more known, and

the leading Indian and Home newspapers develop their arrangements for correspondence, it may be hoped that better results will follow. The number of foreign press messages received in India since the reduction of the rate was only 449, which number is not included in the table below.

YEARS.	INLAND.		FOREIGN.		TOTAL.		REMARKS.
	No.	Value.	No.	Value.	No.	Value.	
		<i>R</i>		<i>R</i>		<i>R</i>	
1882-83 . .	10,245	38,795	587	1,758	10,832	40,553	
1883-84 . .	10,218	37,290	532	2,303	10,750	39,593	
1884-85 . .	12,996	49,347	877	3,937	13,873	53,284	
1885-86 . .	15,175	57,985	975	11,442	16,150	69,427	
1886-87 . .	15,963	57,167	1,073	10,992	17,036	68,159	

A statement showing month by month the number and value of Press messages during the year will be found in Appendix G.

54. **Undelivered Messages.**—The number shows an increase over the figures of the previous year, but the percentage of undelivered messages is very little higher. The main cause of increase was the large proportion of telegrams returned by the Dead Letter Office, and may be to a great extent accounted for by the movement of troops to and from Burma, and the unsettled state of that country. The number 47, and percentage '002, of messages which miscarried owing to errors in transmission were practically the same as in the previous year. Insufficient or incorrect addresses were the causes of one-half of the non-deliveries.

CAUSE OF NON-DELIVERY.	1885-86.		1886-87.	
	No.	Percentage.	No.	Percentage.
1. Not found : address insufficient . .	1,955	'074	2,168	'074
2. Not found at address given . .	3,257	'124	3,583	'123
3. Address changed in transmission . .	48	'002	47	'002
4. Left station : new address not known . .	575	'022	560	'019
5. Left India . .	164	'006	186	'007
6. Left for original station . .	1,583	'061	1,678	'057
7. Returned by Dead Letter Office . .	1,489	'057	2,019	'070
8. Addressee or address given unknown . .	431	'016	511	'017
9. Refused . .	132	'005	141	'004
10. Other reasons . .	235	'009	183	'007
TOTAL .	9,867	'377	11,076	'380

55. **Signalling Establishment.**—At the close of the year 1,285 departmental telegraph masters and signallers, and 234 military signallers were employed; in addition, two clerks of public offices, 538 postal clerks, and one light-house keeper were engaged on telegraph duties.

56. The number of soldiers trained in telegraphy during the year was 106, and at its close 105 were under instruction.

Died	19
Dismissed	9
Invalided	8
Resigned	12
Retired	5
Transferred to clerical establishment or to other departments	3
TOTAL	56

57. The number of casualties among the departmental signalling staff during the year was 56, a percentage of 4·36, due to the causes marginally noted.

58. The list of efficient members of Volunteer Corps in the Telegraph Department at the close of the year 1886-87 showed a strength of 369, an increase of 77 over last year.

59. The operations in Upper Burma necessitated the employment in that country of a large number of signallers, both civil and military, to whose lot it has fallen to go through the inevitable discomfort, exposure, and hard work attendant on the first occupation of an uncivilized and hostile country. Heavy extra work was also thrown upon the offices in Lower Burma and Arakan, as well as in Calcutta and many other stations in India, in connection with the operations in Burma; and great credit is due to the signalling staff for the manner in which they met the calls that were made upon them.

60. **Post Office Agency.**—Although the extensions in connection with Post Offices have not been so numerous as in the previous two years, good progress has been made in this direction, more indeed than could reasonably have been anticipated, considering the heavy demands upon the resources of the department in Burma and elsewhere.

61. Thirty-five new combined offices were established, four closed, and one transferred to departmental agency during the year; on the other hand 22 departmental offices were made over to the Postal agency, causing a net increase in the number of combined offices of 52, and raising their total number to 440.

62. The fact that it has been found necessary to close only 9, out of the 335 new offices which have been opened during the past four years, is one illustration of the care which has throughout been taken in selecting localities for the new offices, and another is the comparatively small addition of posts and wires which they have caused as shown in the table below :—

YEAR.	NUMBER OF COMBINED OFFICES OPEN ON 31ST MARCH.		MILEAGE OF LINE AND WIRE ADDED IN CONNECTION WITH THESE EXTENSIONS.	
	Transferred to Postal agency.	New.	New wire on existing supports.	New supports and wire.
1883-84	24	31	612	405
1884-85	73	194	636	1,216
1885-86	92	296	1,662	2,150
1886-87	114	326	1,851	2,434
Net additions during 1886-87	22	30	189	284

63. It cannot of course be expected that the rate of progress which has been made during the past four years should continue in the future. A large proportion of the important towns situated near existing lines of telegraph have now been supplied with telegraph offices, and future extensions to more remote places will require longer lines and involve greater expenditure. Remunerative extensions will therefore be much fewer, as, although the aggregate earnings of the combined offices are considerable, the traffic of each office is usually very small, and not sufficient to cover the cost of erecting and maintaining a long line.

64. The total number of paid messages sent from the combined offices during the year was 457,557, of the value of ₹5,27,462-1, rather less than one-ninth of the total message revenue of the department. Three-quarters of the collections at the combined offices consisted, however, of Private messages, and only one-quarter State, showing that these feeder offices, many of them situated in the heart of the business quarters of towns, have already gained a gratifying success in fulfilling the main object for which they were established, *vis.*, that of attracting the patronage of the native community by bringing telegraphic facilities to their very doors.

65. The number of messages handed in at postal receiving offices, *i.e.*, post offices which are not also telegraph offices, has increased from 29,876 to 31,578, and the amounts collected from ₹30,010 to ₹32,942-10. The number of receiving offices at which messages were actually tendered during 1886-87 was 1,721, but all head and sub post offices throughout the country, as also many village or branch offices, are authorized to receive telegrams. The facilities are therefore very widespread. No great increase can, however, be expected under this head, for, whenever the number of telegrams tendered at a receiving office becomes considerable, the feasibility of making it into a combined telegraph office is carefully considered.

66. There were 276 postal signallers under training during the year, of whom 141 were granted certificates of qualification by the department, 69 withdrew, and 66 were still under instruction at the close of the year.

IV.—EXTENSIONS OF LINES AND LINE MAINTENANCE.

67. Two thousand five hundred and twenty-four miles of line, 5,410 miles of wire and 9 miles of cable were added during the year.

68. The following figures show the system as it stood at the end of the year compared with the previous year:—

	Lines.	Wire.	Cable.
1885-86	27,510	81,480	187
1886-87	30,034	86,890	196

The wires and cables are maintained for the following purposes:—

	Miles of Wire.	Miles of Cable.
Imperial lines	53,873	184
Provincial lines	71	...
Native States	213	...
Railway systems	31,327	9
Canal systems	596	...
Private lines	810	3
TOTAL	86,890	196

69. Appendix I is a statement of the lines, wire, and cables maintained in each division, classified according to the purposes for which used. Appendix J gives the length of the lines, wire, and cables supplied for each railway and canal system.

70. The following are some of the numerous works undertaken for railways:—

For the Southern Mahratta Railway Company,—a line from Ranibednore to Tumkur, 183 miles, carrying 2 wires, and an extra wire from Bellary to the Portuguese frontier, 203 miles.

For the Indian Midland Railway Company,—the line from Bhopal to Jhansi, commenced in 1885-86, was finished, a second wire was added from Bhopal to

Basoda, 58 miles, and lines with 1 and 2 wires, respectively, from Jhansi to Gwalior, 60 miles, and from Jhansi to Kalpi, 93 miles, were constructed.

For the North-Western State Railway,—an extra wire from Kurrachee to Kotri, 105 miles, was supplied on the Sind Pishin Section, a line with two wires was made from Bostan to Gulistan Karez, 34 miles, and the lines along the Sind Sagar Section, commenced in 1885-86, were completed.

For the Bellary-Kistna State Railway,—a permanent line with two wires was erected from Guntakul to Guntur, 257 miles, and the temporary line hitherto used between Guntakul and Cumbum was dismantled. A permanent line with one wire was also made from Guntur to the Kistna terminus.

For the Assam-Bihar State Railway,—a line was made from Purneah to Kushbah.

An extra wire was run up for *the Bombay, Baroda and Central India Railway* from Anand to Sevalia.

For the Bengal and North-Western Railway Company,—a line was constructed along the Nepaulganj Extension.

A line with two wires was made along *His Highness the Nizam's Railway* from Warangal to Dornakul Junction, and thence to the Singareni Coal Fields.

A wire was erected for the *Cuddapah-Nellore State Railway*, from Nellore to Gudur, the line from Gudur to Tirupati was made permanent, and at the same time a second wire was put up.

An additional wire was supplied for the use of the *South Indian Railway Company* from Madras (Egmore) to Pallaveram.

The lines along the *Tirhoot State Railway* were extended from Nirmali to Baptiahi.

A wire was erected from Wadhwan to Dolia for the use of the *Wadhwan-Morvi Railway*, and arrangements made for constructing the line to Morvi.

Large works of reinsulation were carried out on the wires used by the *East Indian Railway*.

For the Lucknow-Sitapur-Sihramau State Railway,—a line was made from Lucknow to Golagokarnath.

71. The following may be mentioned among the works which were carried out for departmental purposes:—

(1) *Additional Wires.*

	Miles.
From Dhubri to Goalpara	57
„ Kolapur to Dharwar	114
The remaining length of the second wire from Rangoon to Moulmein was completed	55
From Agra to Jhansi	136
„ Durbhunga to Nirmali	45
Calcutta to Naraingunj	220

(2) *Other Works.*

The construction of a line from Harnai to Loralai, 49 miles.

Iron masts were substituted for wooden ones at the following river crossings on the direct line *via* the coast between Calcutta and Madras:—

Gundasur.	Kussai.	Kursooa.
Dalkissur.	Soobenreka.	Brahminee.
Bedai.	Sylondee.	Kokoi.
Selai.	Byturnee.	Ganjam.

A new cable was laid across the Pamban Channel, and two of the old cables were repaired.

A second line from Lahore to Multan was commenced.

Many of the temporary branch lines to experimental combined offices were made permanent, and extensions aggregating nearly 500 miles were made in connection with new offices.

A permanent line Golaghat to Manipur, 164 miles.

72. Special Works.—The resources of the department were heavily taxed in connection with the occupation of Upper Burma. Numerous field lines, aggregating 440 miles, were rapidly constructed to aid military operations, and in addition, 540 miles of posts, carrying upwards of 900 miles of wire, were erected. Three hundred and twelve miles of the lines erected during 1885-86, immediately after the occupation of the country, were nearly entirely re-made, and 41 offices were opened.

The political and physical conditions of the country, the almost entire absence of roads, the difficulty of obtaining labour and transport, and the wide area over which the numerous works were scattered—all combined to make the operations exceptionally difficult and dangerous.

73. The staff entrusted with the maintenance of the lines were also much harassed, the wires being frequently cut and stolen by dacoits, who, on one occasion alone, carried off seven miles of wires.

74. The principal works carried out were the following:—

- (a) The line from Mandalay to Bhamo (258 miles) was completed, and has been since working admirably; the Bhamo telegraph office having been opened on the 1st April 1887.
- (b) A line was made from Myingyan to Yamethin, 93 miles.
- (c) Forty-one miles of the line from Yamethin to Fort Stedman were finished.
- (d) The line to the Ruby Mines along the route first selected was nearly completed. On Thabetkyon being ultimately chosen as the base of the road from the river to the mines, a line along that route was commenced, and an office at the mines has since been opened.
- (e) A second wire from the old frontier to Mandalay was erected in continuation of a wire from Rangoon.
- (f) A third wire was put up from Mandalay to Myingyan, the junction of the road line to Yamethin.
- (g) The systematic reconstruction of the main line along the river bank was still in progress at the end of the year.
- (h) An extensive telephone exchange system, comprising 23 offices and 91 miles of wire, was established in Mandalay.

Steps were also taken to open up communication between Assam and Upper Burma. The line from Golaghat to Kohima was reconstructed with iron posts, and an extension, also of permanent material, made to Manipur, a total distance of 164 miles. Stores were collected at Manipur, and the construction of a field line thence, *via* Tammu to the Chindwin, was commenced.

The erection of an additional wire between Calcutta and Rangoon was commenced, chiefly in connection with the Far East traffic *via* Penang. An extra wire was put up from Calcutta to Narayanganj, 220 miles (which is now about to be extended to Chittagong, 147 miles). The erection of the section from Akyab to Rangoon, 446 miles, was started. These wires are to be supported on

a separate line of posts over the most difficult sections, thus securing to a great extent an alternative route for this important traffic.

The value of the work performed by the department in Burma was acknowledged in the Military despatches, and by His Excellency the Governor-General in Council, in Military Department Notification No. 434, dated 16th June 1887, which specially mentioned Messrs. C. P. Landon, C. F. H. Maclean, and R. C. Barker.

75. **Interruptions to Communication.**—Appendix K. is a statement of all faults on lines and in offices which affected communication in any way during the year, and shows their number, nature, and duration. The total number was 1,260, against 1,281 during 1885-86, but although the number was less their average duration was greater. This increase is traceable to the exceptional difficulties of maintaining communication in the Burma and Upper Burma Divisions. If the lines in those divisions be excluded from the totals of both years, it will be found that, notwithstanding a considerable increase in the length of line and in the number of offices, the number as well as the duration of all interruptions shows a marked decrease.

76. The following table shows the number of interruptions due to various causes, compared with last year:—

CAUSE.	NUMBER OF INTERRUPTIONS.	
	1885-86.	1886-87.
Storms	91	86
Wire breaking	88	47
Trees and branches	56	104
Insulators damaged	32	20
Supports breaking	14	11
Fires	23	17
Floods	43	34

77. The damage due directly to floods has been comparatively small. In Eastern Bengal interruptions aggregating 170 hours were caused in October by boats sailing under the line while the country was flooded, and striking the wires with their masts.

In July, interruptions aggregating 335 hours were caused by floods in Upper Burma, Assam, Bengal, Nagpur, Punjab, and Baluchistan.

78. Exceptional storms did much damage. Early in November the direct coast line between Calcutta and Madras was interrupted for 123 hours, in consequence of 78 miles of the section between Madras and Nellore having been seriously damaged by a cyclone. Later in the same month the section between Vizagapatam and Coconada was also struck by a cyclone which partially destroyed the line for over 50 miles.

The lines on the Malabar coast were much injured in May by successive gales, and interruptions aggregating 200 hours were reported.

79. Other special causes of interruption were—

- (1) the failure of a cable at the Bassein Creek on the Rangoon-Elephant Point line, causing an interruption of 292 hours.
- (2) A fire in the Kach Bazar which fused all the wires.
- (3) The wires being cut near Harnai.
- (4) The wires being maliciously tied together between Narainganj and Comilla.

- (5) The wires being struck during artillery practice near Madras, and, on another occasion, by a bullet near Mussooree.

Licensed Systems.

80. The foregoing remarks relate to wires in departmental use only. The particulars of interruptions on wires maintained for licensed systems will be found in Appendix L.

81. The interruptions per mile of wire compare favourably with those of previous years, being '018 for 1886-87, as against '023 for 1885-86 and '024 for 1884-85, showing a progressive improvement.

82. The interruptions due to defects in offices remain about the same, being '08 per office for 1886-87, as compared with '08 for 1885-86 and '077 for 1884-85.

83. As in previous years, the interruptions per 100 kilometres of wire are compared below with the statistics furnished by some of the principal telegraph systems of Europe. India continues to hold the first place for efficiency in this particular.

	NUMBER OF INTERRUPTIONS PER 100 KILOMETRES OF WIRE MAINTAINED.	
	1885-86.	1886-87.
India, including licensed systems	1'33	1'13
Russia	2'75	3'22
Germany	3'63	3'78
France, proper	3'69	3'75
„ colonies	3'65	5'89
Italy	3'48	7'98
Spain	4'52	7'68
Sweden	5'81	8'67
Belgium	10'38	33'45
Switzerland	7'84	14'72

V.—PRIVATE LINES AND TELEPHONE EXCHANGES.

84. In Telephone business there has been no progress to speak of. The same companies carry on work at Calcutta, Bombay, Madras, Rangoon, Karachi and Moulmein, and the extent of their operations and earnings are shewn below:—

YEAR.	Number of subscribers on the 31st December.	Number of Exchange connections.	Number of private lines.	Amount of gross Rentals.
				R
1882	244	244	5	73,009
1883	411	392	34	1,19,865
1884	699	703	77	1,37,490
1885	822	837	100	1,51,349
1886	849	871	95	1,66,876

85. The increase, it will be seen, is small, while in the same business carried on by the Telegraph Department for Government offices, and in exceptional cases for the public, there has been a positive falling off, as shown below :—

YEAR.	Number of Exchanges.	Number of Exchange connections.	PRIVATE LINES.		Amount of Subscriptions.
			Number of Circuits.	Number of Offices.	
1881 . . .	4	24	37	67	₹ 19,808
1882 . . .	8	56	88	147	40,069
1883 . . .	12	92	89	148	47,131
1884 . . .	9	72	122	200	53,213
1885 . . .	8	71	160	257	61,443
1886 . . .	8	79	156	247	60,182

86. These results are to a certain extent disappointing, and it is hoped that with time the prospect may improve; but, it was foreseen at the outset, that the circumstances of this country did not justify the sanguine expectations of many, as to the rapid development in India of private telephone exchange business.

VI.—ELECTRICAL.

87. The principal event in this branch was the introduction of quadruplex working between Madras and Bombay in January last. The system has worked with a fair amount of success, but, owing to the length of the circuit and climatic and other causes, its stability has not yet proved quite equal to that obtained in other countries with generally much shorter distances and more favourable physical conditions. The instruments employed are of the pattern used in England, and require some modification in details to suit our long circuits. This point is receiving attention.

88. Duplex working was also considerably extended, and improved in some important details.

89. The use of hard drawn copper wire in place of iron wire has been under trial in various localities for the past three years, and it has now been decided to extend its use largely on some of the long and important main lines.

Its disadvantages are the need of very careful handling in its erection, and its high rate of expansion and contraction under changes of temperature, but the former can be overcome by the employment of properly trained workmen, and the latter may almost be disregarded in consideration of its immense electrical superiority. The high conductivity of copper as compared with iron is well known, but when hard drawn and pure it is found to possess great mechanical strength, and is practically free from the electro-magnetic inertia which in iron wires so seriously retards the transmission of electricity. In India, where the distances are so enormous compared with those of most other countries, this quality will prove of the greatest value, and marked improvement is confidently expected from its use on some of the long circuits.

It is now largely used in Great Britain, where its advantages have been brought prominently forward and explained by the eminent electrician Mr. Preece, F.R.S., and it is also being introduced by the Western Union Co. in America.

VII.—STORES AND WORKSHOPS.

90. Both these branches were very fully occupied during the year, and, owing to the spasmodic and urgent nature of many of the demands, were often forced to work under great pressure. Upon the efficiency of these two branches depends in large measure the success of all departmental operations, and it is satisfactory to know that both are now well organised, and under capable superintendence.

91. In the workshops numerous articles were manufactured which in former years were imported from England, and, besides repairing all instruments, a continually increasing business, and turning out large quantities of line stores, the workshops made and issued during the year several thousand items of electrical apparatus. The value of the outturn was Rs. 5,23,435.

SIMLA,
The 24th October 1887.

This Return includes 1,094 messages on the service of French and Portuguese Governments and of His Highness the Khan of Khel & the value of which, viz., Rs. 3,510-9, has not been credited to Revenue.

* The total collection of the Provincial Offices, three in number, was Rs. 1,061, of which Rs. 333 were credited to the Government Telegraph Department.

† The total collection of the Provincial Offices, four in number, was Rs. 1,185, of which Rs. 450 were credited to the Government Telegraph Department.

REVENUE REPORT OF IRRIGATION WORKS IN THE PUNJAB FOR 1886-87.

No. 12 I., dated Fort William, January 17th, 1888.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter No. 0407 I., dated 27th November 1887, from the Government of the Punjab, forwarding the Revenue Report of Irrigation Works in the Punjab for 1886-87 and Resolution by that Government reviewing the Report.

OBSERVATIONS.—Capital Accounts are kept for all the canals in the Province of the Punjab which are under the administration of Irrigation Officers, with the exception of the Muzaffargarh Canals, for which only Revenue Accounts are kept. The expenditure on Capital during the year was R21,12,397, which was divided as follows among the three main classes of Irrigation Works :—

	Expenditure during the year 1886-87.	Expenditure to end of the year 1886-87.
	R	R
Protective Public Works	1,06,505	33,69,822
Productive Public Works	20,19,259	5,21,92,444
Minor Works and Navigation (for which Capital and Revenue Accounts are kept)	—13,367	18,99,423
TOTAL .	21,12,397	5,74,61,689

In addition to this, that portion of the expenditure of the Sirhind Canal which is contributed by Native States was R9,84,654; this raised the total capital expended by those States to R28,51,884.

The estimated cost of all the works included in the above statement is R6,09,92,713, so that a comparatively small sum of about 35 lakhs remains unexpended out of existing sanctioned proposals. These contemplate altogether 2,961 miles of canals and 4,468 miles of distributaries, of which 2,855 miles of canals and 3,949 miles of distributaries are completed.

2. The Revenue accounts of the year shewed the following actual results :—

	Gross Revenue.	Net Revenue.	Percentage of Net Revenue on total Capital outlay to end of the year.
	<i>R</i>	<i>R</i>	<i>R</i>
Protective Public Works	26,714	—28,321	<i>Nil</i>
Productive Public Works	81,80,585	17,97,970	3.44
Minor Works and Navigation (of which Capital and Revenue accounts are kept)	10,00,030	2,05,292	10.80
TOTAL .	42,07,279	19,74,941	3.43

The return of 3.44 per cent. shewn above is calculated on the entire capital outlay up to the end of the year, of which a very considerable portion has been expended on works which are not yet in full operation, and another portion on the Chenab Canal which had not during the year under review been opened for irrigation. The net receipts of the year are somewhat abnormally increased by an adjustment of revenue of previous years, amounting to a little more than two lakhs of rupees, which has been made mainly in the accounts of the Bari Doab Canal.

3. The Major Irrigation Works—that is, the Protective and Productive Works—in the Punjab shew, on the whole, a net profit to the State—that is, the net receipts from the commencement up to date have exceeded the charges for simple interest on the capital invested. The excess of net revenue over interest charges amounts to nearly 200 lakhs of rupees and is entirely due to the great profit derived from the Western Jumna Canal; in the case of all the other Major Works, the total interest charges exceed the total net revenue. On none of these works, however, with the exception of the Bari Doab Canal, is irrigation fully developed.

4. The figures in the foregoing paragraphs have been based on the actual results as given in the accounts. The following statement compares the revenue *assessed* in 1886-87 with similar figures for the three previous years :—

	1886-87.	1885-86.	1884-85.	1883-84.
	<i>R</i>	<i>R</i>	<i>R</i>	<i>R</i>
PERENNIAL .	PROTECTIVE WORKS— Swat River Canal	68,342	19,102	...
	PRODUCTIVE WORKS— Western Jumna Canal	12,06,571	9,16,787	11,40,738
	Bari Doab Canal	14,68,350	17,96,938	13,77,388
	Sirhind Canal (British portion)	5,29,340	3,30,374	75,240
	Lower Sohag and Para	18,760	17,755	307
INUNDATION .	Sidnai Canal	57,262
	MINOR WORKS— Those for which Capital and Revenue Accounts are kept	10,03,539	9,36,990	10,13,026
	Those for which only Revenue Accounts are kept	3,35,892	3,54,834	3,69,785
	TOTAL .	46,88,056	43,72,780	39,76,484
				44,60,881

The assessed revenue differs from that actually collected and credited in the accounts in that the rabi assessments are not due within the year in which they are made. The actual outstandings of revenue due but not collected during the year are small in the Punjab: the largest arrears are on the Bari Doab Canal, where the sum of R39,241 was outstanding at the end of 1886-87: the amount is somewhat larger than in the previous year.

5. The assessments shewn in the foregoing paragraph are mainly based on the irrigated areas, which are tabulated in the following statement:—

		1886-87.	1885-86.	1884-85.	1883-84.
		Acres.	Acres.	Acres.	Acres.
PERENNI- AL .	PROTECTIVE WORKS— Swat River Canal . . .	74,373	44,092
	PRODUCTIVE WORKS— Western Jumna Canal . . .	315,911	223,322	279,208	472,426
	Bari Doab Canal . . .	405,152	505,357	376,762	390,860
	Sirhind Canal (British portion) . . .	215,625	152,837	36,102	5,080
INUNDA- TION .	Lower Sohag and Para . . .	17,340	17,246	645	...
	Sidnai Canal . . .	27,162
	MINOR WORKS— Those for which Capital and Revenue Accounts are kept . . .	619,665	592,453	663,536	557,253
	Those for which only Revenue Accounts are kept . . .	275,412	252,260	258,035	226,499
TOTAL .		1,950,640	1,787,567	1,614,288	1,652,068

The Sidnai Canal, which is an inundation canal from the Ravi river in the Multan district, was first opened for irrigation in the kharif season of 1886-87; as the banks were new, only moderate supplies could be passed down the channel.

The area irrigated consisted of 887,773 acres of kharif and 1,062,867 acres of rabi; the area, whether taken by single crops or by the total of both, is the largest on record. The most promising feature in the development of irrigation is the rapid increase in area on the newer works as compared with the forecasts on which the remunerativeness of the projects had been gauged. This is shewn by the following figures:—

		First year in operation.	Second year.	Third year.	Fourth year.
		Acres.	Acres.	Acres.	Acres.
SWAT RIVER CANAL .	{ Forecast . . .	6,000	12,000	18,000	24,000
	{ Actuals . . .	44,092	74,373
SIRHIND CANAL .	{ Forecast . . .	5,080	36,102	65,000	100,000
	{ Actuals . . .	5,080	36,102	152,837	215,625
SIDNAI CANAL .	{ Forecast . . .	2,000	6,000	13,000	21,000
	{ Actuals . . .	27,162

The Swat river canal has irrigated during the year under review, which is the second year of irrigation, a larger area than it was estimated to irrigate in the twelfth year. The Sidnai canal has irrigated more in the first year than it was estimated to do in the fourth. The very large increase

in the area under the Swat River was probably due to the very small rainfall (7.49 inches) of the year. On the other canals the rainfall in the kharif season was generally an average one, but in the rabi season there was drought in the later months which caused a large demand for irrigation.

6. More than one-third of the entire area irrigated by the canals is under wheat; during the year 747,514 acres of this crop were watered, and a harvest estimated at nearly 262 lakhs of rupees in value was gathered. The cotton crop is the next in importance both in area and value: 212,779 acres, valued at 62½ lakhs of rupees, were irrigated. The entire value of the crops irrigated during 1886-87 is estimated at Rs. 67,58,501, which is 111½ lakhs higher than the corresponding figure of the previous year.

7. The number of acres irrigated by each cubic foot of water entering the canals is shewn in Statement I. E., and is compared with similar returns for previous years in the 14th paragraph of the Resolution by the Punjab Government. Considerable doubt is expressed of the accuracy of the observations on which the figures are based, and arrangements are being made to secure more perfect results in the future. This return, when fairly accurate, is a valuable gauge of the efficiency of the management and of the distributary system of a canal.

8. The working expenses including indirect charges are shewn in the following statement:—

		1886-87.	1885-86.	1884-85.	1883-84.
		R	R	R	R
PERENNIAL	PROTECTIVE WORKS—				
	Swat River Canal . . .	55,035	25,009
	PRODUCTIVE WORKS—				
	Western Jumna Canal . . .	5,24,960	5,16,579	4,77,422	4,77,664
	Bari Doab Canal . . .	5,91,230	5,52,042	4,99,607	5,62,330
INUNDATION	Sirhind Canal (British portion) . . .	2,39,603	2,20,280	1,45,210	17,491
	Lower Sohag and Para (inundation) . . .	13,008	8,139
	Sidnai Canal . . .	14,364
	MINOR WORKS—				
	Those for which Capital and Revenue Accounts are kept . . .	7,94,738	6,97,150	8,02,979	9,12,843
	Those for which only Revenue Accounts are kept . . .	1,45,302	1,66,545	1,88,397	1,77,326
	TOTAL . . .	23,77,640	21,85,744	21,13,615	21,47,654
PER ACRE IRRIGATED . . .		1.21	1.22	1.30	1.29

The rate per acre of the working expenses of the Major Works was Rs. 1.36 and that of the Minor Works Rs. 1.05 as compared with Rs. 1.40 and Rs. 1.02 in the previous year. The increased area irrigated by the Western Jumna Canal has reduced the rate of its maintenance charges, but they are still very high both on that and on the Bari Doab Canal, being 1.65 and 1.45 rupees per acre respectively. It is noted that the repairs on the latter

canal were to some degree special, and that steps have been taken to reduce the charges on the Western Jumna Canal.

9. In the 104th and following paragraphs of the Report by the Chief Engineer, some information is given of the progress in construction and development of irrigation from the Native States Branches of the Sirhind Canal. The distributaries were nearly completed at the close of the year, and systematic irrigation was commenced in the rabi crop of 1886-87. The kharif irrigation of the year amounted to only 7,000 acres, but 50,000 acres were watered in the rabi. These figures are only approximate, but it is stated that arrangements have been made for securing full and accurate returns for future years.

10. The only navigable Canals in the Punjab are certain portions of the Western Jumna and of the Sirhind Canals, aggregating 384 miles in total length. The traffic is at present insignificant, the gross revenue being R28,262 and the working expenses R27,019. The value of goods transported was 11½ lakhs of rupees. These results are rather more favourable than those of the two preceding years.

11. The revenue derived from water-power is one of some importance in the Punjab, both on account of the amount collected and from the fact that it entails a very small expenditure on maintenance and other charges. The revenue of the year from this source was R1,03,602 and of 1885-86 R1,35,127. The decrease is due, not to any real falling-off in the normal revenue, but to the fact that abnormally high rents were realized for flour mills in 1885-86 in the expectation that there would be large demands for flour for war supplies. The revenue derived from water-power in the two years previous to 1885-86 was R67,086 and R70,281.

12. The projects for the Sirsa Kharif Branch of the Western Jumna Canal and for the Jhelum Canal, which were referred to in paragraph 10 of the last Resolution of the Government of India on the Revenue Report of Irrigation Works in the Punjab, were not received during the year 1886-87. It is, however, stated that the projects were nearly completed during that year and were actually ready for submission in November last.

ORDER.—Ordered, that copies of this Resolution and of the Report, and of the Resolution by the Punjab Government, be forwarded to the Secretary of State, and to the Finance and Commerce and Revenue and Agricultural Departments of this Government for information.

Also, that copies of this Resolution be forwarded to the Government of the Punjab for information and guidance.

Also, that copies of this Resolution and of the Report and Resolution by the Punjab Government be forwarded to the Local Governments and Administrations noted in the margin, for information.

The Governments of Madras, Bombay, Bengal, and the North-Western Provinces and Oudh, in the Public Works Department.

The Chief Commissioners, Central Provinces and Burma.

The Foreign Department, for communication to the Resident at Mysore and Coorg.

The Resident at Hyderabad.

The Agents to the Governor General for Central India and Rajputana.

Also, that this Resolution and the Resolution by the Local Government, with a few selected tables,

be published in the Supplement to the *Gazette of India*.

R. HOME, Colonel, R.E.,

Depy. Secy. to the Govt. of India.

GOVERNMENT OF PUNJAB.
PUBLIC WORKS DEPARTMENT.
IRRIGATION BRANCH.

No. 5208 I., dated Lahore, the 18th November, 1887.

RESOLUTION—By the Hon'ble the Lieutenant-Governor of the Punjab and its Dependencies.

Read—

Revenue Report of the Officiating Chief Engineer, Irrigation Works, Punjab, for the year ending 31st
March 1887.

RESOLUTION.—The Capital outlay during, and to the end of, 1886-87 is shown in the following table :—

	CANAL.	CAPITAL OUTLAY.	
		During 1886-87.	To end of 1886-87.
		<i>₹</i>	<i>₹</i>
35. Protective Irrigation Works.	Swát River	1,06,505	33,69,822
48. Irrigation Works not charged against Revenue.	Western Jumna	2,69,761	1,05,84,893
	Bári Doáb	65,883	1,61,36,024
	Sirhind	10,21,408	2,23,93,907
	Lower Sohag and Pára	1,38,884	5,61,998
	Sidhnai	1,42,418	7,20,730
	Chenáb	3,80,905	17,94,892
	TOTAL	20,19,259	5,21,92,444
43. Minor Works and Navigation not classed as Productive.	Upper Sutlej	5,77,251
	Lower Sutlej and Chenáb	1,10,102
	Indus	135	7,09,983
	Shahpur	40,739
	Abdul Rahmán Khán's	35,456
	Mádhupur Workshops	—13,502	4,25,892
	TOTAL	—13,367	18,99,423
	TOTAL IMPERIAL	21,12,397	5,74,61,689
Contributions	Sirhind Canal	9,84,654	1,28,51,88

Only Revenue Accounts are kept for the Muzaffargarh Canals. In addition to the outlay during 1886-87, a sum of ₹49,401 has been added to the previous outlay on works not charged against Revenue on account of survey expenses up to the end of 1878-79.

2. The assessments, working expenses, profits, and interest charges were as follows:—

Item.	CANAL.	Assessments.	Working Expenses.	Profit.	Interest charges.
		<i>R</i>	<i>R</i>	<i>R</i>	<i>R</i>
35	Swát River	68,342	55,085	13,307	1,28,042
48	Western Jumna	12,06,571	5,24,360	6,82,211	3,97,392
	Bári Doáb	14,68,350	5,91,230	8,77,120	6,19,036
	Sirhind	5,29,340	2,39,603	2,89,737	8,32,148
	Lower Sohag and Pára	18,760	13,008	5,752	18,998
	Sidhnai	57,262	14,364	42,898	25,130
	Chenáb	61,766
	TOTAL 48 .	32,80,283	13,82,565	18,97,718	19,54,470
	TOTAL 35 AND 48 .	33,48,625	14,37,600	19,11,025	20,82,512
43	Upper Sutlej	1,37,219	1,50,483	—13,264	...
	Lower Sutlej and Chenáb	6,03,388	3,83,789	2,24,599	...
	Indus	2,39,097	2,49,040	—9,943	...
	Shahpur	27,917	11,426	16,491	...
	TOTAL .	10,12,621	7,94,738	2,17,883	...
	Muzaffargarh	3,42,329	1,45,302	1,97,027	...
	TOTAL 43 .	13,54,950	9,40,040	4,14,910	...
	GRAND TOTAL .	47,03,575	23,77,640	23,25,935	20,82,512

The assessments have risen from R43,72,780 in 1885-86 to R47,03,575; the working expenses from R21,85,744 to R23,77,640, and the profits from R21,87,036 to R23,25,935. Excluding the Muzaffargarh Canals, which have no Capital account, the profits show a return of 3·70 per centum on the total Capital outlay at the end of 1886-87, against 3·61 in 1885-86.

3. Taking the Protective and Productive Works, on which alone interest is charged, the assessments have risen from R30,80,956 to R33,48,625, the working expenses from R13,22,049 to R14,37,600, and the profits from R17,58,907 to R19,11,025. The return on the Capital outlay to the end of 1886-87 is 3·44 per centum, against 3·29 for 1885-86, and the profits fall short of the interest charges by R1,71,487. If the Swát River Canal, a Protective Work, be excluded, the return is 3·63 per centum, and the deficit only R56,752, or rather less than the interest charges on the Chenáb Canal which is not yet in operation.

4. The collections under Protective and Productive Works amount to R32,07,249, and after deducting R14,37,600 for working expenses, there remains a balance of R17,69,649 to meet interest charges, amounting to R20,82,512, the result being a deficit of R3,12,863. Excluding the Swát River Canal, as before, the deficit is reduced to R1,56,500.

5. The total net revenue from Protective and Productive Works in operation up to the close of 1886-87 amounted to R4,86,30,956, and the total interest

charges, after carrying out the alterations ordered in Government of India Resolution No. 159A.G., dated 8th July 1887, to R2,96,84,023, so that the balance of net Revenue was R1,89,46,933. At the close of 1885-86, after taking into account the same alterations, it was R1,92,59,796. The falling off will cease as the irrigation on the Sirhind Canal develops.

6. The working expenses of Protective and Productive Public Works amount to R14,37,600 against R13,22,049 in 1885-86, and the rate per acre irrigated is R1'36 against R1'42; the increase in cost is partly due to larger charges to the Revenue Account on new Canals, and partly to heavy outlay on the Bári Doáb Canal Headworks. The working expenses of the Western Jumna Canal are high, and arrangements are being made to reduce them. The working expenses of works not classed as Productive amount to R9,40,040 against R3,63,695 in 1885-86, and the rate per acre is R1'05 against R1'02; there has been an increase in the cost of working the Upper and Lower Sutlej systems owing to improvements to the Canals, the need of which had long been recognized.

7. The cost of Establishment per acre irrigated for the last three years is shewn in the following statement:—

CANALS.	COST OF ESTABLISHMENT PER ACRE.		
	1884-85.	1885-86.	1886-87.
	R	R	R
Swát River Canal	0 21	0 25
Western Jumna Canal	0 91	1 22	0 81
Bári Doáb Canal	0 51	0 45	0 59
Sirhind Canal	0 99	0 35	0 29
Lower Sohág and Pára Canal	0 09	0 15
Sidhnai Canal	0 15
Upper Sutlej Inundation Canals	0 46	0 76	0 54
Lower Sutlej and Chenáb Inundation Canals	0 20	0 21	0 27
Indus Inundation Canals	0 41	0 47	0 44
Muzaffargarh Inundation Canals	0 18	0 15	0 13

The rate for the Western Jumna Canal is much higher than on the Bári Doáb Canal, but it is proposed to amalgamate the Delhi and Karnál Divisions from the commencement of 1888-89, and the cost will then be reduced.

8. The mileage of channels sanctioned and completed at the end of 1886-87, are given in the following table:—

	CANALS.	MILEAGE OF CANALS.		MILEAGE OF DISTRIBUTARIES.		Mileage available for navigation.
		Sanctioned.	Completed.	Sanctioned.	Completed.	
PERENNIAL.	Swát River	22	22	108	108	...
	Western Jumna	370	370	804	804	248
	Bári Doáb	354	354	1,020	1,020	...
	Sirhind { British	314	314	1,952	1,087	136
	Native States	222	222	1,925	1,348	46
INUNDATION.	Chenáb Canal	154	48	321	67	...
	Lower Sohág and Pára	92	12	22	22	...
	Sidhnai	37	37	112	112	...
	Upper Sutlej	203	203	107	107	...
	Lower Sutlej and Chenáb	674	674
	Indus	651	651
	Muzaffargarh	693	693	378	378	...
	Shahpur	90	90	22	22	...
TOTALS { British		3,654	3,548	4,846	4,327	384
{ Native States		222	222	1,925	1,348	46

This shows that, with the exception of the Chenáb Canal, the works in hand are rapidly approaching completion.

9. The areas irrigated during the past five years are as follows :—

YEAR.	PERENNIAL CANALS.			INUNDATION CANAL.			TOTAL.		
	Kharif.	Rabi.	Total.	Kharif.	Rabi.	Total.	Kharif.	Rabi.	Total.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1882-83 . .	319,224	408,634	727,858	533,686	421,728	955,414	852,910	830,362	1,683,272
1883-84 . .	366,567	501,749	868,316	434,262	349,490	783,752	800,829	851,239	1,652,068
1884-85 . .	345,869	346,203	692,072	522,474	399,742	922,216	868,343	745,945	1,614,288
1885-86 . .	368,574	557,034	925,608	501,939	360,020	861,959	870,513	917,054	1,787,567
1886-87 . .	351,472	659,589	1,011,061	536,301	403,278	939,579	887,773	1,062,867	1,950,640

The areas of both the kharif and rabi seasons are the largest on record.

The progress on the Perennial Canals is very satisfactory, and is likely to be maintained as the irrigation on the Sirhind Canal is developing much faster than was expected, the area irrigated during the year being 215,625 acres against a forecast of 100,000 acres. The Swát River Canal irrigation is also extending very rapidly, and the water was very eagerly taken during the rainless rabi. The area on the Inundation Canals is dependent more or less on the nature of the floods in the rivers, as the heads are open and the water in the rivers uncontrolled, but the new Sidhnai Canal, which has a weir across the Rávi at its head, has in its first year irrigated 27,162 acres out of an estimated total area of 64,000 acres, and a large increase may be expected in 1887-88.

10. The areas of the principal crops irrigated during the last five years are detailed below :—

CROPS.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.
	Acres.	Acres.	Acres.	Acres.	Acres.
Sugarcane	69,386	54,675	69,610	58,394	59,104
Rice	119,695	146,857	147,401	147,529	146,777
Jowár	130,532	128,473	159,041	152,756	151,525
Maize	30,694	32,259	18,606	39,994	36,961
Wheat	586,368	615,831	533,838	649,442	747,514
Cotton	167,991	177,308	186,549	196,851	212,779

Sugarcane is somewhat below the average of the preceding four years, but rice has varied little during the five years' period. Jowár and Maize have about the same areas as last year, but the Wheat area is by far the largest on record, and Cotton area appears to be steadily increasing.

11. The estimated value of crops grown on the Canal during 1886-87 is Rs. 5,67,58,501. Taking the Perennial Canals and omitting the Inundation Canals, the crops on which are assisted by well-irrigation, the average value per acre is Rs. 31.72, while the average water rate per acre is only Rs. 3.03 or less than one-tenth.

12. The supplies in the rivers were unusually low during the latter portion of the year, and the whole supply of the Sutlej was for the first time taken into the Sirhind Canal. The securing sluices at the head of the Bári Doáb Canal were again severely damaged by the floods of 1886, but the repairs carried out during the cold weather have withstood the floods of 1887, and the works are now in a very satisfactory condition. The Headworks of the Western Jumna and Sirhind Canals suffered no damage worth mentioning, and complete command over the supply of the latter Canal has been ensured by the falling shutters which were fixed on the crest of the weir during the year.

13. The rainfall during the kharif season was quite up to the average, and a fall of rain in October was of great use for the rabi sowings, but the rainfall during the latter months of the rabi season almost entirely failed over the whole province, and the demand for irrigation was very great.

14. The duty, or area irrigated per cubic foot of water entering the Canal, is given below for the Perennial Canals for the last five years:—

CANAL.	AREA IRRIGATED PER CUBIC FOOT.									
	1882-83.		1883-84.		1884-85.		1885-86.		1886-87.	
	Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.
Swat River	152	62	188
Western Jumna	66	101	74	121	94	81	86	70	66	110
Bari Doab	54	104	53	139	48	115	59	140	69	124
Sirhind	57	126	46	88

A uniform system of calculating the duty has lately been laid down, and attention has been drawn to the necessity for periodical observations of discharge; at present the discharge tables are hardly to be depended on.

15. The Miscellaneous Receipts for the last five years are shown in the following table:—

YEAR.							Miscellaneous Receipts.
							R
1882-83	1,95,408
1883-84	2,35,621
1884-85	2,08,141
1885-86	2,73,568
1886-87	2,28,470

Mill rents and the demand for plantation produce, which are the two principal items of Miscellaneous Revenue, fluctuate a good deal, but an increase may be looked for from the rents of the new mills on the Sirhind Canal.

16. The Sidhnai Canal was opened during the Kharif of 1886-87, but only moderate supplies could be run in it owing to the banks being new. Irrigation was carried on down to the crossing of the North-Western Railway, and owing to the Rajbahas and water-courses having been completed beforehand, a very satisfactory start was made. The demarcation of new villages on the waste lands of this portion was completed, and most of the land given out to settlers. On the Lower Sohag and Para Canal the demarcation of villages was also well advanced.

17. The Native States Branches of the Sirhind Canal was practically completed during the year, and a large number of the Distributaries were handed over to the States for irrigation. The area irrigated from the Native States Branches is not accurately known, but it is estimated at 57,000 acres and the assessments at Rs. 98,875; arrangements have been made for the supply of statistics of their working in future years.

18. The surveys for a Canal from the left bank of the Jhelum, and for the Sirsa (kharif) Branch of the Western Jumna Canal, were almost completed during the year, and the projects for both are now ready for submission to the Government of India. With the exception of the Chenab Canal, the projects

already sanctioned are now practically completed, and the Lieutenant-Governor trusts that the new projects will receive early sanction in order that the annual grants for Productive Public Works may be fully utilized. The Punjab presents an unrivalled field for irrigation projects; there is water, land of good quality and sufficient surplus population to cultivate it, while the scanty and uncertain rainfall makes irrigation a necessity, and guarantees steady returns.

19. Colonel R. Home, R.E., made over charge of the Department to Lieutenant-Colonel F. J. Home, R.E., Officiating Chief Engineer, in November 1886.

20. The Lieutenant-Governor is of opinion that the results of the year's working are satisfactory, and very creditable to the Chief Engineer and other officers of the Irrigation Department.

By order of the Hon'ble the Lieutenant-Governor,

F. J. HOME, *Lieut.-Colonel, R.E.,*

Offg. Joint Secy. to Government, Punjab,

P. W. D., Irrigation Branch.

Statement showing the Financial Results of Irrigation Works in the Punjab up to and for the Year 1886-87, the Revenue Account being based on the collections for the year.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending 18th Jan. 1888.

The meteorological history of the past week has, as indeed has been the case for some time, been singularly uneventful.

At this period of the year it is customary for pressure in the North-West to be disturbed by more or less serious depressions which occasion rapid oscillations of the barometer, and cloudy, squally, weather, and give rain to the plains and snow to the hills of Upper India. During the past week, though the pressure has been far from steady, the falls which have taken place have assumed the form of general oscillations, and have at no time developed into storms or depressions, so that the general distribution has not been materially disturbed, but has remained steadily such as is characteristic of fine cold-weather conditions. Pressure has been steadily low in Ceylon.

On the 12th a rapid barometric rise was reported from Sind and a brisk fall from the Central Provinces, both changes being occasioned by the passage eastward of the storm which was formed over Sind at the close of the preceding week. Previous to its passage eastward, this storm had occasioned unsettled weather over the Indus Valley and the north-west of the Punjab, and rain had fallen at Hyderabad, Multan, Rawalpindi and Sialkot, and snow at Murree. On the 13th, this storm was still visible over Central India and Guzerat, but it was steadily filling up and its effects on the weather were very slight. On the 14th it had disappeared and the distribution of pressure was normal, readings ranging from a large high-pressure area in the North-West to a low-pressure area over Ceylon and the Malabar Coast. The circulation of the winds was in complete accordance with this distribution of pressure. The chart of the 15th showed a fall of the barometer in the Indus Valley, and that the high-pressure area had deserted the north-west of the Punjab, while at the same time, owing to a rather brisk fall at Sibsagar, an area of relatively low pressure had been developed in the Upper Assam Valley, but with these exceptions, the general conditions were unaltered. About $\frac{1}{8}$ an inch of rain had fallen at Sibsagar and a snow-storm was in progress at Quetta. On the 16th slight showers of snow were reported from Quetta, Mussooree, and Chakrata, and of rain from Ajmere and Jeypore, but the rain in the Assam Valley had ceased. On the 17th the rainfall, though still very slight, had become a trifle more general, showers being reported from Jeypore, Agra, Jhansi, Nowgong, Lucknow and Gorakhpore. Snow had again fallen at Mussooree and Chakrata. On the following day, the 18th, the rainfall had extended still further eastward, and was reported from Allahabad, Sutna, and Hazaribagh. On this day, south-west winds were reported from Dhubri and Sibsagar, and the weather in this neighbourhood appeared unsettled.

The mean pressure of the week has been below the average over by far the greater part of the country. The deficiency has been generally greater on the hills than on the plains but has been greatest at Dhubri and Sibsagar. In Ceylon and the extreme south of the Peninsula there has been an excess.

Temperature has been generally low. At the hill stations it has averaged 3° below the normal and in the Central Provinces the defect has been considerable.

The air has been abnormally dry over Northern India.

The concluding table gives the total rainfall of the past week according to provinces :—

DIVISIONS.	Number of Stations.	TOTAL RAINFALL.
Burma
Bengal and Assam	2	0.45
North-Western Provinces and Oudh	5	0.59
Punjab	3	0.32
Hill Stations	4	0.96

W. L. DALLAS,

for Offg. Meteorological Reporter to the Govt. of India.

Simla, 21st January 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

WEEKLY REPORT ON THE STATE OF THE SEASON AND PROSPECTS OF CROPS.

Madras.—*For week ending 21st January 1888.*—No rain during the week. Rainfall up to date generally sufficient, except in parts of Madura and Salem. Wet crops withering in three taluks of Madura from deficient supply of water in tanks. Agricultural operations progressing as usual. Crops good, but slightly damaged here and there by rain, disease, or insects. Pasture generally sufficient but scanty in Malabar and decreasing in Vizagapatam. No material fluctuations in prices. General prospects favourable.

Bombay.—*For week ending 25th January 1888.*—Slight rain in parts of Sind and Kaira. Wheat and gram in three talukas of Belgaum and late crops generally in three talukas of Satara injured by recent rain or unfavourable weather. Wheat damaged in five, and exotic cotton blighted in three, talukas of Dharwar. Prospects of late crops improved in Colaba, Ahmednagar and Bijapur. Harvesting of early crops continues in Surat, Khandesh, Sholapur, Bijapur, Belgaum and Dharwar, that of late crops commenced in Sholapur. Cotton-picking in progress in parts of Kaira, Broach, and Kathiawar. Probable outturn of early crops 7 annas, and of late crops 9 annas in the rupee in Sholapur. Fodder is scarce in two talukas of Nasik and in a few talukas of Hyderabad. Prices of *bajri* in Ahmednagar and the Upper Sind Frontier and of *bajri* and wheat in Nasik rising.

Bengal.—*For week ending 24th January 1888.*—Weather cloudy and very cold. Slight rain fell on the 23rd in almost all districts of Behar, and in some districts of Central, Northern, and Western Bengal, and in Hazareebagh. Winter rice is still being harvested in some districts. The outturn of this crop has been generally good in Central, Northern, and Eastern Bengal, but has been below the average in Chota Nagpur and in most parts of Western Bengal, Behar and Orissa. *Rabi* and poppy crops continue generally promising, and have been much benefited by the rain of the week. Spring rice is being transplanted and is doing well. Pressing of sugarcane is in progress. No marked change in the price of rice in the past fortnight; it is cheaper in the eastern districts than at this time last year, but is dearer in most of the other districts.

Allahabad.—*For week ending 25th January 1888.*—Slight rain fell during the week in all districts, and has much benefited the crops which are

at present thriving. The poppy crop is flourishing. Prices are stationary, but higher. The markets are well supplied. The condition of cattle is generally good.

Punjab.—*For week ending 25th January 1888.*—Rain has fallen in all districts except Hissar, Mooltan and Shahpur. Prices are generally stationary, though still rising in some districts. *Rabi* sowings completed. *Rabi* prospects have improved by the recent fall of rain, but more rain is wanted in some districts. Slight damage done to crops by frost in Jullundur. Stock cattle are healthy. Fodder is scarce in most districts. Poppy sowings completed.

Central Provinces.—*For week ending 25th January 1888.*—Weather generally cloudy, slight rain in Bilaspur. Pulse's slightly damaged by frost in Saugor and Hoshangabad. Linseed poor in Raipur; prospects of crops otherwise favourable. Fodder getting scarce in Raipur.

Burma.—*For week ending 21st January 1888.*—No rain has fallen anywhere. Reaping of wet season crops completed in almost all districts of Lower and Upper Burma. Ploughing and planting of dry weather crops progressing. Health of agricultural stock is good except in part of the Thonegwa district. Estimates of probable outturn of harvest remain unchanged since last report. Price of paddy has fallen considerably in most districts of the Province and has only in three districts risen, *viz.*, in Thonegwa by R7, in Thayetmyo by R5 and in Kyaukse by R5.

Assam.—*For week ending 25th January 1888.*—Weather cold and overcast. Slight rain in Lakhimpur and Sibsagar. Reaping of winter rice nearly over in most districts. Mustard is being gathered. Sugarcane being crushed and tea bushes being pruned. Potato sowing begun in the Khassi Hills. No report from Nowgong.

Mysore and Coorg.—*For week ending 25th January 1888.*—No rain throughout the State during the week. Standing crops in good condition, except in parts of the Bangalore, Kolar, and Tumkur districts, where dry crops have been damaged by insects. Average outturn of harvests generally favourable. Condition of cattle good.

Coorg has also had no rain during the week. Harvesting of rice and picking coffee in parts nearly completed. Prices stationary.

Berar and Hyderabad.—*For week ending 25th January 1888.*—No rain in Berar during the week. Picking of cotton and threshing of *jowari*, also cutting of *tur* and *moong* still continues. The standing *rabi* crops have good prospects, except that gram, lac, and peas have been attacked by insects, and linseed slightly affected by blight in some places. Agricultural stock in good condition. Pasture and fodder plentiful, but getting scarce in some parts. Slight rise in prices of food-grain.

No rain in Hyderabad during the week. Agricultural prospects continue good.

Central India.—*For week ending 25th January 1888.*—Slight rain in the northern parts of Central India. Fall is sufficient. Agricultural operations almost completed. Crops, pasturage and fodder generally good. Prospects and probable outturn good, but below average in Western Malwa and Goona. Condition of agricultural stock generally good, except in Bhopawur. Prices of food-grains high and rising. Opium crop generally good.

Rajputana.—*For week ending 25th January 1888.*—Agricultural operations satisfactory. Standing crops generally good. Harvest good on the whole. Agricultural stock in good condition except at some places. Pasturage fairly sufficient. Prices high in some States. Cotton below average in Kotah and Jhallawar.

E. C. BUCK,

Secretary to the Government of India.

The Gazette of India.

PUBLISHED BY AUTHORITY.

No. 5. } CALCUTTA, SATURDAY, FEBRUARY 4, 1888.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

CONTENTS.

ACCOUNTS AND FINANCE.

RAILWAYS.

Calcutta, the 3rd February, 1888.

No. 529.—The present holders of stock in the Cawnpore-Achnera State Railway, to whom the new consolidated debentures of the Rajputana-Malwa Railway are about to be issued in lieu of the debentures now held by them, are hereby informed that they are required to present their debentures at district treasuries for transmission to the office of the Accountant General, North-Western Provinces and Oudh, by whom the new debentures will be obtained from the Public Debt Office, Calcutta, and forwarded to the Treasury Officers for distribution in exchange for those received.

2. District Officers are requested to adopt measures to have this Notification made known generally throughout their districts, in order that all debenture-holders may comply with the instructions herein given, and that the early distribution of the revised debentures may be secured.

3. Every Treasury Officer should see that a notice, to the effect that he is prepared to receive debentures and forward them to the Accountant General, is posted in a conspicuous place in the Collector's Office and at every Tahsil in the district, both in English and in vernacular.

ORDERED, that this Notification be published in the *Gazette of India* for general information.

LEAVE AND APPOINTMENTS.

*The 31st January, 1888.***No. 546.**

RESOLUTION—By the Government of India, Department of Finance and Commerce.

It has been brought to the notice of the Government of India that officers employed under Government sometimes obtain leave of absence, with the intention of taking up other employment under Government or otherwise, or accept such employment while on leave. Where this is done with the previous knowledge and consent of the officer's Departmental superior, the practice is not open to objection. There is reason however to believe that, in the absence of any specific directions, officers are apt to consider it unnecessary to obtain the consent of their immediate superior before accepting employment elsewhere; and as it seems advisable that this practice should be discontinued, the Governor General in Council has prescribed the following rules:—

- 1.—No Head of an Office should employ, either temporarily or permanently, an officer belonging to another establishment, without the previous consent of the officer on whose establishment he is at the time borne. In cases in which, for reasons which may appear satisfactory to the new employer, such consent cannot be obtained before the officer joins his new appointment, his employment may be made conditional on consent being obtained in due course.
- 2.—It shall be incumbent upon an officer employed under Government, whether on leave or not, before *accepting* other employment, either to resign his previous appointment, or to obtain the consent of his Departmental superior to his accepting such employment. If such consent is not obtained, either previously or, when this is not possible, in due course, the officer renders himself liable to be discharged from his previous appointment, and thus to lose the benefit of his previous service for pension.
2. There is nothing in these rules to prevent an officer on one establishment seeking employment on another. But an officer is not placed under any disability by resigning one appointment to take up another (Civil Pension Code, 101, 1); and it must be held to be a breach of discipline, if an officer actually transfers his services to a new employer without first obtaining the consent of his old employer, or definitely resigning his old employment.

ORDERED, that this Resolution be communicated to the several Local Governments, Administrations, and Heads of Departments for information and guidance.

Ordered also, that the Resolution be published in the *Gazette of India*.

The 2nd February, 1888.

No. 614.—The following grade reversions and promotions of officers of the Account Department in December, 1887, and January, 1888, are hereby notified :—

With effect from the 24th December, 1887, in consequence of the return from privilege leave of Mr. C. E. Crawley—

Mr. R. C. Chapman to cease to officiate as Enrolled Officer, class IV, and to revert to his substantive appointment as Enrolled Officer, class V.

Mr. W. D. F. Cowley to cease to officiate as Enrolled Officer, class V, and to revert to his substantive appointment as Enrolled Officer, class VI.

Mr. J. A. Robertson to cease to officiate as Enrolled Officer, class VI, and to revert to his substantive appointment as Probationer, class VII.

With effect from the 5th January, 1888, in consequence of the departure on privilege leave of Mr. W. Donald—

Mr. H. A. Sim, M.C.S., to officiate as Enrolled Officer, class II.

With effect from the 26th January, 1888, in consequence of the departure on special leave of Mr. O. T. Barrow :—

Mr. R. N. Ray, Enrolled Officer, class IV, to officiate as Enrolled Officer, class II.

Mr. R. C. Chapman, Enrolled Officer, class V, to officiate as Enrolled Officer, class IV.

Mr. W. D. F. Cowley, Enrolled Officer, class VI, to officiate as Enrolled Officer, class V.

Mr. J. A. Robertson, Probationer, class VII, to officiate as Enrolled Officer, class VI.

The 3rd February, 1888.

No. 643.—Mr. F. deH. Larpent relinquished charge of the Office of Deputy Accountant General, Punjab, on the afternoon of the 11th January, 1888, and Mr. C. E. Crawley took charge of the same appointment on the forenoon of the 19th January, 1888.

No. 645.—Mr. H. Keene, Assistant Accountant General, Bengal, having been granted privilege leave for one month and two days, availed himself thereof from the 27th January, 1888.

No. 646.—Mr. O. T. Barrow, Deputy Accountant General, Bombay, having been granted special leave on urgent private affairs for three months and twenty days, and Mr. R. N. Ray having been posted to that appointment, Mr. Barrow made over, and Mr. Ray received, charge thereof on the afternoon of the 25th January, 1888. Mr. Ray made over charge of his duties as Assistant Comptroller General, on the afternoon of the 20th January, 1888.

SEPARATE REVENUE.

STAMPS.

The 31st January, 1888.

No. 481.—Whereas under the terms of Notification in the Department of Finance and Commerce, No. 3646, dated the 13th November, 1880, the Municipality of Madras has paid into

the Government Treasury the sum of ₹500 as composition for the stamp duty chargeable on a sum of ₹1,00,000 which the said Municipality was authorised to borrow and which has been raised by the issue of the undermentioned debentures, dated the 15th December, 1887 :—

Nos. 1 to 20, for ₹ 500 each.

„ 21 to 30, „ 1,000 „

„ 31 to 46, „ 5,000 „

it is hereby notified that, in exercise of the powers conferred by Section 8 of the Indian Stamp Act, 1879, the Governor-General in Council has exempted the abovementioned debentures from any stamp duty with which they might otherwise be chargeable whether on issue, renewal, subdivision, or consolidation.

NOTICE.

In accordance with the Resolution of the Government of Bengal in the General Department, dated the 6th March, 1886, published on page 541 of the *Calcutta Gazette* of the 31st of the same month, notice is hereby given that an examination for the admission of female students to the certificate class of the Calcutta Medical College will be held in the Theatre of that College on Tuesday, the 14th February, 1888, and following days.

Hours and Subjects of Examination.

Tuesday.—English dictation, Grammar, and Composition—from 1 to 4 P.M.

Wednesday.—History of England and India. Geography : General, and of India in particular—from 1 to 4 P.M.

Thursday.—Arithmetic: the first four rules, vulgar and decimal fractions, and proportion—from 1 to 4 P.M.

Candidates must apply in writing to the Principal of the Medical College, Calcutta, not later than the 11th February, for permission to appear at the examination.

Applications for permission to reside in the Sarnamayi Hostel should be addressed to the Honorary Secretary to the Bengal Branch of the Countess of Dufferin's Fund, Fort William, Calcutta.

A. CROFT,

Director of Public Instruction.

The 6th January, 1868.

**TO ENGINEERS, DISTRICT OFFICERS
AND OTHERS REQUIRING
ASSISTANTS.**

There are a few names of ex-Students out of employment on the Secbpur College list.

Apply to the Principal, stating requirements and terms offered, including travelling and joining allowance.

NOTICE.

Owing to reduction of Establishment there are thirteen Elephants male and female for sale at the Transport Depôt, Mhow (Central India).

The Elephants are properly trained and some of them have been used for several years for sporting purposes.

They are also trained to harness.

For further particulars apply to Executive Commissariat Officer, Transport, Mhow (Central India).

JOHN ELIOT,

Offg. Meteorological Reporter to the
Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows:—

Terms of subscription, payable annually in advance.

For the complete Series, including postage		Without postage.	With postage.
For the Calcutta Series		R10 0	R12 0
„ each of the Madras, Bombay and Allahabad Series.		„ 6 0	„ 7 0
„ a part of the Calcutta Series purchased separately, inclusive of postage in India		„	„ 2 0
„ a part of the Madras, Bombay and Allahabad Series purchased separately, inclusive of postage in India		„	„ 1 0

Persons desiring to subscribe for, or purchase, the Report, should apply to—

Messrs. Thacker, Spink and Co., Calcutta.

„ Thacker & Co., Bombay.

„ Higginbotham & Co., Madras.

The Government Central Book Depot, Bombay.

„ The Curator of Government Books, North-Western Provinces and Oudh.

„ Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1885 should be at once remitted.

NOTICE.

Indian Law Reports.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, by the Calcutta Central Press Company, "Limited," 5—1, Council House Street, at the following rates, payable in advance:—

	One page.	Half page.	Quarter page.
For one issue	R 20	R 14	R 9
„ three issues	„ 55	„ 36	„ 24
„ six „	„ 100	„ 68	„ 45
„ nine „	„ 145	„ 96	„ 64
„ twelve „	„ 180	„ 120	„ 80

Bills introduced into the Council of the Governor General of India for making Laws and Regulations or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 27th January, 1888, and was referred to a Select Committee on the 3rd February, 1888 :—

NO. 1 OF 1888.

A Bill to provide for the levy of a Customs-duty on Petroleum.

WHEREAS it is expedient to provide for the levy of a customs-duty on petroleum ; It is hereby enacted as follows :—

I. To the second schedule to the Indian
Addition to Schedule II, Act XI, 1882. Tariff Act, 1882, the following shall be added, namely :— XI of 1882.

No.	Names of Articles	Per	Tariff valuation.	Rate of Duty.
5	Petroleum, including also the liquids commonly known by the names of rock-oil, Rangoon oil, Burma oil, kerosine, paraffine oil, mineral oil, petroline, gasoline, benzol, benzoline, benzine, and any inflammable liquid which is made from petroleum, coal, schist, shale, peat or any other bituminous substance or from any products of petroleum	...	Ad valorem	5 per cent.

VIII of 1878. And whereas the provisos to section 37 of the Sea Customs Act, 1878, do not apply to goods to which a rate of duty is not already applicable; It is further enacted as follows :—

2. The rate of duty applicable to petroleum
Commencement of of which the bill-of-entry
effect of the addition to is delivered, within the
the schedule. meaning of section 37 of
the Sea Customs Act, 1878, to the Customs-
collector under section 86 of that Act after the
passing of this Act shall be the rate of duty
specified in the second schedule to the Indian
XI of 1882. Tariff Act, 1882, as amended by this Act.

STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is to impose an *ad valorem* customs-duty of five per centum on petroleum, of which thirty-two millions of gallons, of the value of over one hundred and twenty-five lakhs of rupees, were imported into British India during the year 1886-87.

The 27th January, 1888.

PART VI.

Debates of the Legislative Council of His Excellency the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR
GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING
LAWS AND REGULATIONS UNDER THE PROVISIONS OF
THE ACT OF PARLIAMENT 24 AND 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 27th January, 1888.

PRESENT :

His Excellency the Viceroy and Governor General of India, K.P., G.C.B.,
G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.

His Honour the Lieutenant-Governor of Bengal, K.C.S.I., C.I.E.

The Hon'ble Lieutenant-General G. T. Chesney, R.E., C.B., C.S.I., C.I.E.

The Hon'ble A. R. Scoble, Q.C.

The Hon'ble Sir C. U. Aitchison, K.C.S.I., C.I.E., LL.D., D.O.L.

The Hon'ble Sir C. A. Elliott, K.C.S.I.

The Hon'ble J. Westland.

The Hon'ble Rana Sir Shankar Bakhsh Singh Bahadur, K.C.I.E.

The Hon'ble Syud Ameer Hossein, C.I.E.

The Hon'ble Rájá Peári Mohan Mukerji, C.S.I.

The Hon'ble W. S. Whiteside.

The Hon'ble J. W. Quinton, C.S.I.

The Hon'ble R. Steel.

The Hon'ble Sir Dinsha Manokji Petit, Kt.

The Hon'ble F. M. Halliday.

INDIAN STAMP ACT, 1879, AMENDMENT BILL.

The Hon'ble MR. WESTLAND moved that the Report of the Select Committee on the Bill to amend the Indian Stamp Act, 1879, be taken into consideration.

The Motion was put and agreed to.

The Hon'ble MR. WESTLAND also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

TARIFF ACT, 1882, AMENDMENT BILL.

The Hon'ble MR. WESTLAND also moved for leave to introduce a Bill to provide for the levy of a customs-duty on petroleum. He said :—

“In asking the permission of the Council to introduce a Bill of which the intention is to increase our revenue, I shall naturally be expected to give some account of our financial position, and to satisfy the Council that an increase of revenue is necessary upon financial grounds. This expectation is all the more justified in consideration of the fact that, last week, we exercised the power given to us by the Legislature, to make an addition of 25 per cent. to the Salt duties, a measure which deserves some explanation in view of the discussions which took place in the Council two years ago on the occasion of the imposition of the Income Tax in its present form. It would be absolutely impossible for me, within any limits of time, to go over anything approaching to the whole ground covered by our Indian accounts; and I would only weary the Council by leading them into a maze of figures in which all connexion would be lost. I shall assume, therefore, that the Council are already acquainted with the position which we realised in the Financial Statement of last March, when we presented our estimates shewing a practical equilibrium of revenue and expenditure. I shall adopt that Financial Statement as my standard, and shall explain, by reference to it, in what respects we now find ourselves worse situated than we then were.

“I know there are people who will not allow me to accept that standard, alleging that it is in itself one of extravagant expenditure and should not be accepted as the foundation of a claim on the part of the Executive Government to an increase of its revenues. Nothing is more common among some of our public critics than to accuse us of wanton extravagance, but I always observe that these accusations waste themselves in generalities, and do not address themselves to specific items of expenditure which it is considered might with advantage be discontinued. There are some people who are so entirely unable to grasp the large figures in which our accounts are presented, that they assume that the fact of our expending 77 crores of rupees every year is in itself proof positive of entire absence of financial control. They forget the enormous area which this expenditure covers. Compare it with the expenditure of the United Kingdom; it is only 60 per cent. of the amount (77 crores against 128, which is the equivalent of 90 million sterling), and yet it covers an area ten times as large and a population seven times as large. Moreover, think how much the effect of this comparison would be enhanced if we were to include in the expenditure of the United Kingdom, as we do in those of India, the hospitals, the roads, and all the other expenditure that is in England charged to Local Rates, and even the expenditure on the maintenance of Railways. I know that the financial circumstances of England and of India are in many respects utterly incapable of direct comparison; but still, I think, we have some claim that those of our critics whose charges of extravagance are based only on the fact that our expenditure is stated in tens of millions, should bear in mind that the accounts we present are the accounts not of one Government, but of one Central and of nine Provincial Governments; and that of these Provincial Governments, five nearly equal in area, and somewhat exceed in population, the five principal Governments in Europe.

“We published, in the Financial Statement of March 1886, the comparative figures of our accounts for the past ten years, and I have seen the argument drawn from these figures that the rapid rate at which we have allowed expenditure to increase argues an absence of proper control. I have seen it made a matter of accusation against us that our expenditure in the first of the series of years alluded to was Rx.* 57,400,000, and in the last of them was Rx. 71,100,000, an increase on the face of it of Rx. 13,700,000, or some-

* The symbol “Rx.” indicates tens of rupees.

thing like 24 per cent. But it is almost a dishonest mistake to take the figures this way in the gross. Dip a little below the surface, and you find that of this Rx. 13,700,000, Rx. 6,800,000 arises in the account of Railways, and merely means that the Government possesses at the end of the period many more miles of Railway than it did at the beginning, and that it has to pay a much higher rate of exchange on the remittances necessary to pay the guaranteed interest. The extension of Irrigation accounts, in the same way, for Rx. 500,000; the famine insurance grant, which was not expenditure, accounts for nearly Rx. 1,000,000; a bumper opium crop accounts for Rx. 750,000; the extension of Post Offices and Telegraphs accounts for Rx. 600,000, but it brings in as big an increase of revenue as of expenditure. There remains only Rx. 4,000,000 to represent any real increase of expenditure; and of this amount even considerable sections would have to be written off as having no bearing on the question of financial control or economy. Rx. 300,000 of it, for example, mean that we remitted the putwari cess in the North-Western Provinces by taking over, as Government expenditure, the establishments which were maintained out of it, and another Rx. 300,000, represent the portion of Salt Revenue which we annually hand over to Native States under the arrangements completed in 1878-79,—a fiscal reform of the utmost importance which led not only to great development of revenue, but also to great economies in expenditure.

“The figures which represent any real increase of expenditure during the ten years under review are dwindling down very rapidly; we have less than 3½ millions still to account for—something like six per cent. during the ten years. And even of this we might at once strike off, as entirely beyond our control, an increase of Rx. 600,000 in the charges for exchange upon our sterling obligations, namely, Rx. 400,000 in the interest on Sterling Debt, and Rx. 200,000 upon Superannuation charges; and as almost beyond our control, another Rx. 600,000 of exchange charges upon the Home Military expenditure. We have almost brought down to Rx. 2,000,000 what may be called the net total of the voluntary increase of expenditure in ten years.

“Of course we might have refused even this amount of increase. We might have refused to open new courts of justice where the increase of the population or of business demanded it. We might have refused to increase police expenditure, which is still, in the opinion of many authorities, at a dangerously low figure, and run the risk of breeding insecurity to life and to property. We might have stopped the increase of schools and of hospitals and of roads. We might have shut our eyes to events in Central Asia, and refused the increases of political and of military expenditure, forced upon us by the approach of a great civilized power on our North-West Frontier. In short, we might have refused to discharge the duties and responsibilities of a civilized Government, either with respect to our own subjects, or to the nations which lie beyond our frontier; and those who think we should have observed this attitude are, to this limited extent, right in pointing to our increase of expenditure as evidence of want of financial control. With such people I do not care to argue, and the Legislative Council is not the place where such arguments are called for.

“But while thus contending that the gross figures of our accounts contain in themselves at least a presumption of the moderate scale of our expenditure, I am far from denying that there is expenditure which cannot be done without. I would only say with reference to the details of it that we who are engaged in the control of expenditure in India, are so impressed with the hugeness of the demand for expenditure which is, of itself, of a useful and beneficial character, that we are the last people to willingly consent to divert to purposes of extravagance, any money which can be made available to meet that more pressing demand. There is hardly any limit to the amount of money that can be usefully spent in India, and the business of the financial authorities, both Imperial and Provincial, consists far too often in refusing money for objects of which the desirability cannot be denied, simply because it cannot be found either out of revenue, or by economies in expenditure.

“This is a process of exhaustion which goes on by a sort of compulsion and without intermission, in the ordinary course of the financial business of

every department, and is sometimes helped forward by special enquiries, such as those made by the Finance Committee of 1886. That Committee has presented to Government a plentiful crop of suggestions which will continue for a long time to exercise the various departments; but I think I may say, both for the President of the Committee who now sits on my left and for myself, that throughout our enquiries we were greatly struck with the carefulness of detail with which expenditure was supervised, and with the very large proportion of cases in which, when we raised questions on the facts before us, we found that the questions were no new ones to the authorities concerned, but had been amply examined and discussed, long before we were set to work to put the authorities once more upon their defence. But in times of financial necessity, the line must be drawn closer. The Finance Committee's work was to indicate in what way this might be done, and it has resulted not only in actual economies, the credit for a large instalment of which was taken in the estimates presented last year, but still more in establishing a more rigorous standard by which expenditure, actual and proposed, has to be judged. The expenditure which has passed the review of that Committee is not likely to be really liable to the charge of extravagance, and that which they did not accept as necessary and justifiable has been, or is being, elaborately examined in search of possible economies.

"I think I have said enough to convince the Council that in adopting, as the standard from which I am to start, the figures of the published estimate for 1887-88, I am not asking them to condone any past sins of extravagance; but am presenting the account of India as it stands after long years of close attention to the interests of economy.

"The period of ten years over whose history I have rapidly glanced, terminated with the year 1884-85; and two years ago Sir A. Colvin, in introducing the Income Tax Bill, described that year as the last of the fat kine; he said that the lean kine were come in, though he did not then know how terribly lean they were going to be. But those who have watched the course of Indian finance during the two years that have intervened since Sir A. Colvin in this place explained the then financial position, will be prepared for the announcement that, from causes which I shall presently explain, we are at the present moment even further from equilibrium than when the Government appealed to the Legislature for an extension of direct taxation. It seems to me that the best way of showing the nature and origin of the difficulties which have thus accumulated about our financial position will be to make a comparison between the figures of our accounts of 1884-85, the last year in which our financial position may be described as satisfactory, and those of the Budget Estimates of 1887-88. These Estimates shewed an equilibrium it is true, but it was, as Sir Auckland Colvin was very careful to explain at the time, an unstable equilibrium, an equality of revenue to expenditure, obtained only by pressing into the service of our expenditure revenues which up till then had formed a sort of reserve.

"For the purposes of this comparison, I have prepared, as my text, the following abstract of the accounts of 1884-85, and of the estimates of 1887-88. Abstracts, of course, may be made up in a hundred ways; but they all come to the same thing in the end, and are merely questions of the arrangement in which we choose to take up the subject in hand. The abstract I now put forward will be very easily traced back into its component figures in the published accounts; its main peculiarity is, that besides shewing the expenditure heads *net* instead of gross, I have separated the exchange figures, so that I may shew first how the comparison would have stood had there been no alteration in the exchange, and I have then shewn in a separate figure the extra charge falling upon us on this account. It will be seen that the totals up to which the Statement works shew that, whereas in 1884-85 we had 51 millions on the Revenue side, of which 48 went in Expenditure and 3 in Exchange, we find ourselves in 1887-88 with 3 millions more of Revenue, namely, 54 in all, but as Exchange now costs us 5 millions instead of 3, the 3 millions better Revenue afford us only one million for real increase of Expenditure.

“I have inserted, for purposes of comparison, the figures for 1883-84, but those I mean to deal with are the figures of 1884-85. The financial position in this last year may be called a position of equilibrium as we then understood the words. There is a nominal deficit of Rx. 387,000, but it is really due to the fact that the date with which our financial year ends, cuts in two the most active season of Land Revenue collection, and according to the distribution of the collections during the few days before and after March 31st, we get into the financial year sometimes a good deal more, and sometimes a good deal less, than twelve months' revenue. In 1884-85, we got a good deal less, but this of course was a mere temporary feature, and accounts for the fact that what was really a position of financial equilibrium shewed in the accounts as a deficit of Rx. 387,000. In fact as we are taking a general view of the financial position, and not confining our observations to the casual circumstances of a single year, we may go further and say that the year 1884-85 would have shewn the surplus of Rx. 500,000 prescribed by the Secretary of State, had it not been that a bumper crop of opium required an expenditure, exceeding by much more than that amount the average expenditure of a series of previous years. So that the financial position of that time might legitimately be described as one in which our ordinary standard of Revenue was sufficient to enable us to meet all ordinary expenditure, to set apart for famine insurance

(a) Includes Marine.

(b) After deduction of the amount charged against accumulated balances of past years (i. e., Provincial deficit). When a Provincial Government draws on its balances to increase its expenditure, it is for the most part under the head that the increase occurs.

(c) Includes 1,000 (one million) arrear charges.

Rx. 1,500,000, to invest in Railway Construction Rx. 263,000, and to shew after all a surplus of Rx. 500,000.

"We have now to compare with this the Budget Estimates of 1887-88; and first let us look at the Revenue side. Land Revenue has of recent years increased pretty steadily at an average of Rx. 120,000 a year and in three years this gives us Rx. 360,000; besides the addition of Rx. 420,000 of Upper Burmah Revenue. Salt, Excise and Stamps have added Rx. 400,000 to our resources. The new Income Tax has given us nearly Rx. 900,000; and other Revenues, say Rx. 200,000, besides Rx. 100,000 in Upper Burmah.

"Railway earnings have increased, but hardly at a more rapid pace than the charges against them on account, mainly, of interest and annuities; of course when exchange is taken into account the heavy addition more than swallows up all benefit by increased earnings, but we are at present dealing with the figures independently of this consideration.

"The saving under interest is apparent only; we have been borrowing in sterling, but it is under the head of Rupee debt that we make transfers from the ordinary to the Railway account of debt; and the apparent saving under interest on ordinary debt re-appears as part of the increase of charge on account of exchange.

"The Civil expenditure (which in our accounts unfortunately includes Marine charges) has increased by Rx. 1,600,000, of which at least Rx. 1,100,000 is due to Upper Burmah; the rest I do not stop to analyze; some of it is a mere set-off against increased revenue, and some of it is the unavoidable excess of estimates which disappears when the accounts are made up.

"For Imperial Public Works our ordinary standard is Rx. 1,000,000 for Military Works, and Rx. 350,000 for Civil Works, but the Budget of 1887-88 is charged, in addition to this, with Rx. 480,000 for Upper Burmah and with Rx. 200,000 for the construction of Military Roads on the North-West Frontier.

"The figures of Army Expenditure shew a very heavy increase; nearly Rx. 1,000,000 arise from the measures taken for the increase of its strength, which were alluded to in the speech of His Excellency the President on the occasion of the introduction of the Income Tax Bill. The real cost of these measures is over Rx. 1,500,000, but various economies and reductions have been secured under other heads of Military Expenditure, so that the net increase on the whole is stated under Rx. 1,000,000. But under this head we have also about Rx. 720,000 of special charges arising out of operations in Upper Burmah.

"We come now to the heaviest difference of all, the addition to the charge on account of exchange. Our remittances in 1884-85 were made at the rate of 19·31 pence (£1=R12·43), but in 1887-88 we estimated we could make them only at 17·5 pence (£1=R13·71); that is to say, each sterling pound of expenditure costs us 1·28 more in Rupees; and this difference, calculated on the whole amount of our sterling expenditure as it stood in 1884-85 (about £14,000,000), comes to Rx. 1,790,000. That is to say, that even if no increase of expenditure of any kind had occurred since 1884-85 we would still have to face an additional charge of this amount.

"Let us then summarize the changes that have taken place in our financial position between 1884-85 and the Budget Statement of 1887-88.

	Rx.
Army charges have increased by	980,000
We are spending on Frontier Roads	200,000
Upper Burmah is costing us—	
Civil and Marine charges	1,100,000
Military and Civil Works	480,000
Military Operations	720,000
	<u>2,300,000</u>
DEDUCT—Revenue	520,000
	<u>1,780,000</u>
Exchange adds to our account	1,790,000
	<u>4,750,000</u>
Total new demands	

These demands we have met as follows:—

	Rx.
(1) We have obtained by the imposition of Income Tax . . .	900,000
(2) And by other improvements of Revenue . . .	960,000
(3) We have stopped for the time the appropriation to Famine insurance of Revenue amounting to . . .	1,450,000
and to Railway Construction of Revenue amounting to, say . . .	260,000
(4) We have diminished the amount of Revenue assigned to Provincial Governments, thereby causing a reduction of their Public Works expenditure by . . .	500,000
(5) And finally we have absorbed the prescribed surplus of . . .	500,000
	<u>4,570,000</u>

“There remains Rx. 180,000 arising out of a number of smaller differences.

“This, then, was the financial position at the time of the Budget Estimates of 1887-88. The fall in the value of silver, the necessity of improving our military strength, and the expenditure connected with the occupation of a new province, had absorbed not only the three years' improvement of revenue, but the whole of the margin which we possessed in 1884-85. Every rupee of the revenue shewn in the estimates of 1887-88 was pledged, as the financial statement put it, “for the necessary expenditure arising from our administrative needs;” and for the risks of war, and of famine, and of exchange, and of opium, nothing whatever was reserved. Nay, more,—we were pledged to heavy expenditure upon the defences of our harbours and of our North-West Frontier, and this expenditure, all unremunerative as it was, was entirely provided for by borrowed money.

“I can speak with the greater freedom in these matters, because in the advice I have given to the Government of India, I have throughout sought counsel of Sir Auckland Colvin. It is not that a new Finance Minister takes up the reins in the middle of the financial year, and changes the policy announced by his predecessor in his Budget Statements. The policy is the policy of the Government of India as a whole, whether Sir A. Colvin is its mouthpiece in March, or I become its mouthpiece in January. In the Financial Statement of March last it was clearly explained, that the question of increase of revenue by taxation had been before the Government, and that its consideration had been adjourned, not because the position was satisfactory, but because we had reached a critical point, and it was just too soon for us to determine exactly how matters would have to be settled. It is not without great reluctance and after serious consideration that the Government of India can proceed to measures of increase of taxation; and so long as the position was such that it was possible it might be tided over without taxation, we refrained from a proposal which we would have had to justify, more by our anticipations of what might happen to us, than by our knowledge of what had actually occurred. The small and continual changes, by which in more settled countries the revenue is from time to time adapted to the expenditure, are out of place in Indian finance; it is our duty to resist change as long as we can, but, when it is at last forced upon us, it is equally our duty to face it.

“The changes which have taken place in our financial position since the date of the Budget, have settled for us the question which was then held in suspense; the strain was then as great as we could bear without resort to new taxation, but there was just a glimmer of hope that it might be relaxed. That hope has vanished; the strain has increased beyond the capacity of our revenue to endure it; and we are driven to seek remedial measures.

“The first item in which our burden is increased is again that of Exchange. The estimate of 1887-88 was taken at $17\frac{1}{2}$ pence. During the past year exchange had been as low as 16 pence, but it had rallied, and it stood at over 18 pence in the beginning of February 1887. There were signs of a fall just before the estimates were published, but with such an unstable item, it was possible only to take current facts for our standard; and we would not have been justified in taking, by anticipation, a lower rate, and founding on our anticipations a claim on the tax payer's pocket. After the year opened, however, exchange settled

down to a much lower rate than that of the estimates; and at that lower rate it has been so singularly stable, that the logic of facts compels us to assume, for all purposes of estimate of our financial position, the lower level, which seems for the present at least to be established, of just under 17 pence. Our present home expenditure is nearly £14,500,000; the military demands and the interest on the capital of the aided Railway Companies having added half a million to the standard of 1884-85; and upon this amount of expenditure the difference between 17·5 pence and 16·9 pence is Rx. 720,000.

“Then the railways have not been doing as well as we anticipated; our receipts under this head are greatly affected by circumstances so entirely beyond our control as the question of good or bad crops in America and in Russia, and the course of prices in England. We must necessarily accept such facts as they come, but the results of the year, up to date, are such as to shew that the Budget Estimate was based on too sanguine a view. We deal with huge figures under this head, for the gross earnings of the Railways which are paid into the Indian Treasury have recently been as follows:—

Actuals	.	1884-85	Rx.	15,958,615
”	.	1885-86	”	17,699,747
”	.	1886-87	”	18,109,537
Budget Estimate, 1887-88	”	18,428,770

“The active Railway season comes at the end of the financial year, and it is quite possible that we may witness a partial recovery before the year’s account is closed; but as matters at present stand, our best estimate is that the net result of the Railway account, even after allowing for the reduction of working expenses, which becomes possible in a time of smaller earnings, may be Rx. 400,000 worse than in the Budget Estimates; and seeing the large amount of unremunerative capital expenditure that is going on, we should not reckon on any immediate improvement bringing in more than will cover the additional interest charges.

“In still one other respect have I to report what looks like a permanent deterioration in the financial position; it is in the effect on our opium revenue of the recent convention regarding the collection of duty in China. In the case of Bengal opium, the addition, or the additional certainty, of the duty in China reacts directly in reducing the auction price; in the case of Bombay opium, we get our full duty, but we cannot expect, if the Chinese maintain the rate of 110 Taels, to maintain the present amount of the export. The loss in the current year will be something between Rx. 250,000 and Rx. 300,000 as compared with Budget Estimate, and it would be unwise to fix the standard of future revenue higher.

“I have mentioned that Rx. 720,000 of special military expenditure in Upper Burmah was proposed in the Budget Estimates for 1887-88. The Government have not found it possible to reduce this expenditure so soon as was anticipated, and the figures of 1887-88 will shew a considerable excess over the Budget Provision. But measures of reduction are now being carried out, and we hope next year to get off with no more than the expenditure estimated for 1887-88.

“The deterioration in our position which we have to face is, therefore, thus made up—

									Rx.
Exchange	720,000
Railways	400,000
Opium	300,000
Total									<u>1,420,000</u>

“If I have succeeded in making plain the financial position with which we started in the estimates presented last March, it will be immediately evident that we are now under an obligation to seek, by improvement of revenue, at least this amount of amelioration.

“I know that it may be objected that part at least of the expenditure which was charged in our estimates is of a temporary and special character only; that

it is of the nature of capital invested once for all. We have a new province, for the acquisition of which we have to pay large sums of money on account of military and military police charges. We have to fit it out with new roads and new buildings, civil and military; in short with all the appliances of a civilized administration. It is a country which we hope will ultimately pay even in a purely financial sense, but just at present it imposes upon us, as was shewn in the last Financial Statement, a net expenditure which may be stated at Rx. 1,780,000. It may be said of this and of the Rx. 200,000 of frontier roads in the Punjab, that they are a sort of Capital expenditure which we should not charge upon the revenues of the year. But there is really only one logical distinction that we can draw with reference to expenditure of this class. If, in respect of any of the expenditure we are now incurring, we calculate that it will produce in future a revenue sufficient to meet the burden of the interest, we may without fear meet it out of borrowed money, because we know that though we refuse to bear the burden now, we throw no burden upon our successors which we do not furnish them with the means of meeting. The financial position of future years will not be the worse for the course of action adopted by us. But in the case of expenditure, whether we call it expenditure on Capital account or on any other account, which will not in future be financially reproductive, we have absolutely no choice left us, but either to meet it out of the revenue of the current year, or by borrowing to throw the charge upon the unincreased revenues of future years; no amount of re-arrangement of accounts can alter the fact that it is a charge against the existing scale of revenue either of the present or of future years. It may be a fair question for discussion, to what extent we are equitably entitled to throw forward such burdens, and to the extent to which we are so entitled, we may fairly face a deficit and leave it to succeeding years to make it good by contributions which will continue after the expenditure has ceased. But there is assuredly no justification for our throwing forward *the whole* of the burden, and compelling future years to bear a charge to which we contribute nothing ourselves.

“But, in distributing the burden between ourselves and future years, we must take into account the whole of the circumstances. The Budget standard of Revenue and Expenditure was Rx. 77,450,000, and we have, as just explained, lost Rx. 700,000 of revenue, and added Rx. 720,000 of expenditure; so that we have now Rx. 76,750,000 of Revenue to meet Rx. 78,170,000 of expenditure. Even if we admit the division of this last into Rx. 1,980,000 of extraordinary expenditure and Rx. 76,190,000 of ordinary, the result will be that, after providing for our ordinary expenditure, we have a surplus of only Rx. 560,000 to set against the so-called extraordinary expenditure of Rx. 1,980,000. But unfortunately we have, of this last class of expenditure, not only the Rx. 1,980,000 just mentioned, which are inside the revenue account of our Budget Statement, but we have also the following amounts which we have not yet considered, and which are shewn among the expenditure charged to loan; namely, about Rx. 750,000 for special defence works and Rx. 1,000,000 for improvement of Railway communication on our North-Western Frontier. We have thus a total of unproductive expenditure of Rx. 3,730,000, and there is no doubt that this rate of expenditure will last for two or three years yet. Can it be pretended, that we do our duty if we contribute to this large amount no more than Rx. 560,000 out of the current revenue, and throw forward the balance of Rx. 3,170,000 as a burden to be met in future years? And the real state of the case would stand even worse than this, for as we have for the present thrown off the burden of insurance against famine, the Rx. 560,000 is all the contribution we have to offer, both for the chances of famine and for the heavy unproductive expenditure to which I have alluded. I do not think that, on the most selfish reckoning of the account between ourselves and future years, such a policy could be justified.

“It is only too likely that future years will have their own burdens to bear. We are a little too apt to talk of our own special burdens as if the financial sky would clear when they passed away, but Indian Financial history shews that

they too often pass away only to be succeeded by special burdens of a new kind, and that we should not too easily reckon on future years retrieving a position now lost. There is only one respect in which we have before us a certainty of relief, namely, that the conversion of the 4 per cent. sterling stock into $3\frac{1}{2}$ per cent stock, will, not next year but in the year after that, reduce our interest charges by £260,000 or Rx. 370,000. We may regard this as a partial insurance against further depreciation, but it is no warrant for our declining to undertake the measures that are necessary to render our present position sufficiently secure.

“I have now described the financial position, and the necessity which lies upon us of seeking to improve it by a considerable addition to our revenues. The Council are aware in what direction we have sought the greater part of the remedy, and that on Thursday, January 19th, we used the powers given us by the Legislature to raise the Salt Duty from Rs. 2 to Rs. 2-8 in continental India, and from 3 annas to Re. 1 in Burmah.

“After what was stated here two years ago, by Sir Auckland Colvin when introducing the Income Tax Bill, I need not say that it is with the greatest reluctance that the Government finds itself obliged to have recourse to the Salt Duty. The Government, in the beginning of 1886, appealed to the Legislature on the ground that before resort was had to a tax which falls on the millions of the poorer classes, it was bound first to obtain a reasonable contribution from the more wealthy. But that having been done, we are now obliged to proceed one step further, and adopt the measure from which we then were able to escape.

“When the Salt Duty, in 1882, was reduced from Rs. 2-14 in Bengal and Rs. 2-8 in the rest of India to Rs. 2, Sir Evelyn Baring wrote thus (*vide* Financial Statement for 1882-83, paragraphs 192 and 201) :—

‘192. In answering, therefore, the question of how far we may safely take off taxes in reliance on the Opium Revenue, a great deal depends on the nature of the tax we take off. If we abandon a source of Revenue which involves a permanent and absolute loss of money, and which moreover, from whatsoever reason, it would be difficult, in the event of the Opium Revenue failing, to restore to its former position, then the course would be open to great objection. If, on the other hand, we reduce a duty with a fair hope that the reduction will increase consumption, and thus, after a while, recoup us for any loss, and if, moreover, the duty can, without any great fiscal disturbance, be re-imposed in the event of the Opium Revenue falling off, then the reduction of taxation would be unobjectionable. The Salt Duty falls within the latter of these two categories.’

* * * * *

‘201. I have said that, by reducing the Salt Duty, the general financial position will be strengthened. We hope that we shall be able to maintain the duty at Rs. 2 a maund, and we have at present no reason to suppose that we shall be unable to do so. By a return to a higher rate we should, of course, to some extent at all events, sacrifice the main object we have in view, *viz.*, to afford some relief from taxation to the poorest classes. At the same time I should observe that if any unforeseen circumstance, such as a heavy fall in the value of silver, takes place, and if, at the same time, the reduction in the Salt Duty does not result in any considerable increase in the consumption of salt, it would be open to us to return temporarily to a higher rate. This is an expedient to which the Government would have recourse with great reluctance. I allude, however, to the possibility of its adoption, for it is clear that should an emergency arise of a nature to diminish our other sources of Revenue or to increase our Expenditure, we shall be in a better position to meet it if the Salt Duty is Rs. 2 a maund than if it were levied at a higher rate.’

“The circumstances under which Sir E. Baring said that the Government might find it necessary to increase the salt duties, have now been realized. The value of silver has heavily fallen; the rupee was 20*d.* when Sir Evelyn Baring wrote, it is 17*d.* now. The opium revenue has failed; for it was then Rx. 9,800,000, and we now put it at Rx. 8,600,000.

“The following statistics, which exclude the figures relating to Burmah, may be given as shewing the consumption of salt and the duty paid on it. The figures are for the sixteen years ending 1886-87; and it may be added that

the first nine months of 1887-88 shew only a very small advance over the same period of 1886-87 :—

Year.	Consumption in thousands of Maunds.	Salt Duty in thousands of Rs.
1871-72 . . .	22,280	5,723
1872-73 . . .	22,833	5,902
1873-74 . . .	22,918	5,876
1874-75 . . .	23,182	5,906
1875-76 . . .	24,720	5,874
1876-77 . . .	24,557	5,985
1877-78 . . .	24,676	6,189
1878-79 . . .	25,205	6,511
1879-80 . . .	27,071	6,910
1880-81 . . .	26,660	6,751
1881-82 . . .	27,158	6,976
1882-83 . . .	28,720	5,729
1883-84 . . .	29,169	5,815
1884-85 . . .	30,746	6,129
1885-86 . . .	30,081	6,003
1886-87 . . .	31,633	6,338

“It may be noted, with reference to these figures, that, reckoning upon the averages above shown, we may divide the whole into two periods. During the earlier of these, which preceded the reduction of duty in 1882, the rate of increase of consumption averaged annually 2·2 per cent.; while since the reduction of duty the annual increase has averaged 2·7 per cent.

“The figures shew also that the extra duty of eight annas may be expected to bring in an extra revenue of Rx. 1,600,000, and considering the improvement in all means of communication and the generally improved condition of the people, we may reasonably hope that the burden of a duty of Rs. 2-8 will not now have any effect in restricting the rate at which the consumption is increasing.

“The case of Burmah is different from that of the rest of India. The duty there has been three annas only, and as the Government of India were bound by treaty to permit salt to enter Upper Burmah at a very low rate of duty, it was practically impossible, while that treaty was in force, to levy, in the shape of Salt tax, from the people of Lower Burmah, the same contribution which was paid by the inhabitants of the rest of India. Another reason used to be urged in the same direction, namely, that the capitation tax in Burmah—or rather the capitation system of assessing Land Revenue—took to some extent the place of the Salt tax in Continental India. It is very difficult to draw comparisons between the burdens of taxation in the various parts of India,—especially when circumstances differ so much as those of Burmah and of Continental India,—but the present Chief Commissioner is strongly of opinion that the increased tax can easily be borne, and should certainly be raised. The present enhancement of the Burmah salt duty will add to the Revenues about Rx. 125,000.

“It is to be noted also, as regards Burmah, that we do not intend to renew the exemption from income tax which hitherto, for administrative reasons, has applied to Lower Burmah. The tax legally applies to the whole of Lower Burmah, but assessment and collection will be made only in towns and centres of trade. We therefore intend, in Lower Burmah at least, as in India generally, to make the richer classes contribute according to their means, while we impose the general Salt tax on all classes alike. In Upper Burmah, too, we hope to increase the revenue by taking measures for the restriction and taxation of the traffic in liquors and opium. We are carefully collecting information towards this end, as we are determined that any excise system which we introduce in Upper Burmah shall be really the imposition of a tax upon existing trade and shall not involve the expansion or creation of a trade where little or none exists.

“Another measure which the Government proposes to adopt for the increase of its revenues is the imposition of an import duty upon petroleum. Import duties in India are matters that require delicate handling, but there is not the

slightest occasion for us to take up the questions affecting such duties generally. I have only to say that we want money, and that whatever may be the case regarding other imports, petroleum is an article in respect of which most of the theoretical objections to an import duty disappear. The importation is, necessarily, and quite apart from any levy of duty, subject to rules and restrictions, which can very easily be made to lend themselves to the convenient and certain collection of duty. The oil is for the most part of a few well-recognized brands, so that there is no difficulty in fixing its value for purpose of duty. The production is a monopoly of one or two countries (mainly, America and Russia) with which the production of India or of other countries can hardly enter into competition, and the circumstances are such that the advantage which the producing countries at present have, will remain practically unaffected by the small duty we propose to levy.

“So far as the consumer is concerned, he will certainly, even after the tax is levied, be better off than he was only a year or two ago; we are taking from him only a small part of the benefit he has received through development of the trade during the past few years.

“The statistics of the trade are as follow :—

Imports of Mineral Oil.

Year.	Quantity, Gallons.	Value, R Lakhs.	Value per Gallon.
			R
1873-74	Not stated .	3.51	...
1874-75	Not stated .	7.98	...
1875-76	621,530	4.46	.719
1876-77	439,123	4.91	1.12
1877-78	2,405,405	22.67	.942
1878-79	3,775,674	27.17	.719
1879-80	7,888,247	43.19	.611
1880-81	10,060,026	48.70	.485
1881-82	9,883,049	50.40	.511
1882-83	21,059,668	92.93	.441
1883-84	13,883,838	56.17	.407
1884-85	27,306,999	115.82	.425
1885-86	21,311,942	85.18	.400
1886-87	31,949,633	125.99	.395
1887-88 (8 months)	20,817,770	80.51	.387

“As the value of the imports of this year is slightly in advance of the quantity imported during the same months of last year, we may estimate the probable annual import at the value of 130 lakhs of Rupees, on which a 5 per cent. duty will give us an income of Rs. 65,000. The cost of collection will, we anticipate, be very little.

“For this project the sanction of the Legislature is required, and it is for permission to introduce an amendment of the Tariff Act for this purpose, that I now apply to the Council.

“The Government have considered the question of imposing a counter-vailing excise duty on oil produced in India, but have decided that this should not be proposed. The only Indian production on any considerable scale is that above Thayetmyo in Burmah. The production there is about 2,400,000 gallons, but as 80 per cent. is lost in refining, there is less than half a million gallons for consumption. A Company which exploited the wells near Akyab, was driven from the market by the competition of American oil. There is a little oil in Assam, but it is not worked, and there is oil round about Rawalpindi, but it is not yet exploited, except to a very limited extent for Government purposes. The Government is labouring with some slight success, to obtain oil at Khattan, in Biluchistan. All these, however, are at the best mere nascent industries, which are utterly out of any chance of competition with imported

oils, and the machinery of an excise duty is not required and should not, in the opinion of the Government, be applied.

"The two sources of revenue to which I have mainly made reference, will give us an enhanced income of Rx. 1,790,000; and we may add Rx. 100,000 as a moderate estimate of the produce of the other revenues to which I have referred. With these our financial position, supposing no further fall in exchange, and no further loss of opium revenue to take place, two contingencies upon which it would be rash to calculate, may be stated in the following way:—

<i>Revenue.</i>	<i>Rx.</i>
Ordinary and Recurrent Revenues as they at present stand	76,750,000
New Salt Duties	1,725,000
Petroleum	65,000
Assessed Taxes and Excise in Burmah	100,000
Total Revenues	87,640,000

<i>Expenditure.</i>	<i>Rx.</i>
Ordinary and Recurrent Expenditure, being Rx. 560,000 short of Revenue	76,190,000
Special expenditure of which, except in the item of Military Expenditure in Burmah, no reduction can be expected for two or three years—	
(1) In Upper Burmah, in excess of Revenue	1,780,000
(2) Frontier Roads on the North-West Frontier	200,000
(3) Special Defences	750,000
	2,730,000
Total charged on Revenue Account	78,920,000

"Besides Rx. 1,000,000 of North-West Frontier Railway Expenditure which is practically of the same category as this last, but is shown as Railway Capital Expenditure outside the Revenue Account.

"The Secretary of State, although in modification of former orders he has directed that the special defence expenditure of Rx. 750,000 should be shown inside the Revenue Account, undertook, in his Budget explanation to Parliament, that the step would not involve the raising of taxation to meet it. Leaving it out of the account therefore, we have a surplus on the revenue account of Rx. 470,000, which is certainly not too much to estimate for, in the face of the risks of further fall in the price of opium and of silver, and of the fact that we are providing nothing for famine insurance and are throwing forward Rx. 1,750,000 of financially unremunerative expenditure, namely, the present annual outlay on special defences to our Harbours and Frontiers, and on Military Railways on our North-West Frontier."

The Hon'ble RÁJÁ PEÁRI MOHAN MUKERJI said:—"I had no notion that the Hon'ble the Finance Member, in moving for leave to introduce a Bill for imposing customs duties on petroleum, would take occasion to place before the Council a statement of the financial position of the Government of India. As a non-official member of Your Excellency's Legislative Council, I wish it to be understood that, without a careful examination of the statement and of the arguments with which the Hon'ble the Finance Member has supported his figures, I am unable to say whether his reasons and the details he has submitted have my full concurrence. The additional duty on salt which Your Excellency has lately imposed by executive order has given the Government of India about £1,500,000, and it is at the same time a measure which has given very general satisfaction as one which will not touch to any appreciable extent even the poorest in the land. If more money is wanted, I think we should look in the direction of the import duties. There might be reasons why the Government should not try to re-impose any import duty on cotton twist and yarns and cotton piece-goods, which would give the Government of India a very large revenue, but I should think that petroleum is rather an insignificant article

of commerce to impose a duty upon. The total value of the article imported to this country barely comes up to a million sterling, and we should remember also that it is one of those articles which has found its way to the homes of the poorest people of the land. Any duty imposed upon it would therefore touch even the poorest classes. There are other things, such as hardware and metals, which are imported to this country to a very large extent. If I am not mistaken, metals to the value of nearly £6,000,000 are imported annually into this country, and about £1,000,000 worth of hardware, and the duty on either of these articles would not touch poor people. I submit these facts to the consideration of the Hon'ble Council and of the Hon'ble the Finance Member."

The Hon'ble MR. WESTLAND said:—"The observations which the last speaker has made tended rather to open out the question which I deliberately avoided taking up, namely, that of the import duties generally. It seems to me that, whatever might have been the objections to the removal of the import duties at the time,—and I know that a number of people, especially those connected with the commerce of the country, thought that the removal of the import duties was not called for,—the fact of the import duties having gone renders it practically impossible for us to re-impose them. As regards the proposal that, leaving the cotton duties alone, we should impose an import duty on hardware, I have only to say that the question of the imposition of import duties generally was one which, from many points of view, it was very difficult to take up; and that, as petroleum offers itself in a very easy manner to the production of a small duty, we have only at present made a proposal to impose an import duty on it, without going further. I fancy that next Friday we shall have some more observations regarding the possible sources of revenue, and it is better for me to reserve till that day any observations I have to make on the general question of raising revenue. I may take this opportunity of making some observations with reference to the procedure adopted by the Government in raising the salt duty the other day, because I have seen opinions expressed in some newspapers to the effect that the Government was not justified in resorting to what was considered an extraordinary means of raising the duty, namely, by issuing suddenly an executive order for raising an additional revenue of Rs. 1,600,000. I think we are justified, in the first place, by the consideration that, the legislature having laid down a definite mode of imposing the salt duty, it was not open to the Government of India to proceed in any other way. Besides, to announce the imposition of the duty beforehand would only be to disturb and disarrange the whole trade. If we were to announce to those who were engaged in the salt trade that the duty of Rs. 2, which was at present levied, would at some future date be raised to Rs. 2-8, the only result would be that everybody would make a rush to at once clear out the whole of the salt they could possibly get, and the result would be that a great part of the duty which we intended to impose would be evaded, to the advantage of a few individuals and the general loss of the State. It is always advisable, in the case of the imposition of new tariff duties, that the new measures should be taken suddenly and at once, so that every person might, as far as possible, be placed upon a precisely equal footing."

His Excellency THE PRESIDENT said:—"I do not think it necessary at this stage of the proceedings to trouble the Council with any special observations in regard to the motion before it. But I cannot help expressing my satisfaction at hearing from our hon'ble colleague Rájá Peári Mohan Mukerji that the recent increase which we have made in the salt duty has met with his approval. Representing so fully as he does the views of the intelligent and educated Native community of India, that expression of opinion on his part is very valuable. Of course it is with extreme reluctance that any one in my position can give his consent to any increase to the burdens of the people of India. Unfortunately it has become my lot on two several occasions to add to the taxation of the country. But in justification of this hard necessity it is sufficient for me to remark that since my arrival in India, owing to the depreciation in the price of silver, the annual accumulative loss to

the Government has progressively increased year by year by a million pounds sterling. The loss in 1884-85, when I first took up the reins of government, stood at £3,400,000; in 1885-86 it amounted to £4,100,000; in 1886-87 to £5,400,000; and now in 1887-88 to £6,200,000. But, even in the presence of these growing embarrassments, I would certainly have been unwilling to have agreed to an increase of the salt tax, had it not been, as the Hon'ble Mr. Westland has most clearly explained to the Council, that a somewhat unexpected loss of revenue had declared itself during the last year under two other heads—through a fall in the price of opium and in our railway receipts. As the Government would not have been in a position to suggest to the Council on other grounds than those of mere conjecture that any improvement would take place in future years under the head of exchange or even under either of the other two heads of income I have referred to, it became obviously our duty at once to strengthen our financial position and to provide ourselves with a working surplus. By the executive measure which we adopted a few days ago, and by the Bill which is now about to be introduced into the Council, I trust that this satisfactory result will be obtained. I am very glad that my hon'ble friend Mr. Westland has noticed the circumstances under which the Government was induced to issue a Gazette notification raising the salt duty. In acting as we have done, we have merely acted in accordance with the intentions of an Act of the Legislature which placed us in possession of those powers which we put in motion. To have adopted any other course would have been undesirable. To have given the kind of notice which some persons seem to have desired would have only benefited a certain number of individuals at the expense of the community at large. I can quite understand that my hon'ble colleague Rájá Peári Mohan Mukerji should have felt himself—and in that respect he has merely expressed what, I am sure, is the feeling of his colleagues—unable at this stage of the proceedings to enter into any of those larger questions of finance which my hon'ble friend Mr. Westland has brought to the notice of the Council. But I hope that he will appreciate the desire of the Government of India, in submitting to the Council so full a financial statement as that made by Mr. Westland, to profit by the experience and advice of those eminent gentlemen I see around me."

The Motion was put and agreed to.

The Hon'ble Mr. WESTLAND also introduced the Bill. He said:—"The Bill, as hon'ble members will see, consists of two sections. The first makes a formal addition to the schedule which imposes import duties under the Indian Tariff Act of 1882. In that schedule we have adopted the definition of 'petroleum' which is given in the Petroleum Act, and it will be seen that our proposal is to impose an *ad valorem* duty of 5 per cent. The second section has for its object to make perfectly clear the manner in which, and the extent to which, the duty shall be brought into operation. There is a proviso in the Sea-customs Act—namely, under section 37—which has the effect, with reference to articles on which an existing duty is raised, of exempting from increased duties those shipments in respect of which port-clearance has already been granted, that is to say, which are in course of import but which have not yet passed the custom-house. This proviso, we are advised, does not, as a matter of law, operate in the case of petroleum, because the duty on petroleum is not raised, but a new duty is imposed. But if this proviso under section 37 did apply, then we are of opinion that we ought specifically to provide that it should not do so. The operation of section 37 is practically to give to people who happen to be possessors of petroleum at sea an advantage which is an advantage gained at the cost of the State; whereas every other person who is a producer of petroleum will have to pay the duty, those who happen to be the possessors of the petroleum which is on the sea obtain the advantage of landing it free, while the action taken by us will probably have the effect of raising the price in their favour. It seems to us unnecessary, if we do wish to raise a tax on petroleum, to secure for these petroleum dealers a special advantage of three months, and therefore we propose to the Council that the proviso of section 37 shall not apply in the case of the imposition of

this new duty upon petroleum. At the next meeting of the Council I shall move that this Bill be taken into consideration with the view of having it passed, if the Council approve, on the same day."

The Council adjourned to Friday, the 3rd February, 1888.

S. HARVEY JAMES,

Secretary to the Govt. of India,

Legislative Department.

FORT WILLIAM ;
The 1st February, 1888. }

SUPPLEMENT TO
The Gazette of India.

No. 5.} CALCUTTA, SATURDAY, FEBRUARY 4, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately in a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

RAILWAY CONSTRUCTION.

PROJECTED RAILWAY FROM MOGHAL SARAI TO PURI.
Trade Statistics of Chota Nagpur.

No. 1303-R.C., dated Fort William, 14th December 1887.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Public Works Department Resolution No. 799 R. C., dated 12th August 1887.

OBSERVATIONS.—Through inadvertence a note, dated 15th July 1882, by Mr. H. H. Risley, C.S., Officiating Deputy Commissioner of Manbhoom, on the trade of Chota Nagpur was published as the second enclosure to the Resolution now read again, instead of a later report by that officer, dated 7th May 1883, containing the results of a more complete investigation regarding the trade of the Chota Nagpur District.

RESOLUTION.—His Excellency the Governor-General in Council is accordingly pleased to direct that the later report shall be published for general information in supersession of the note previously published.

ORDER.—Ordered, that this Resolution, together with the report above referred to, be communicated to the Governments of Bengal and the North-Western Provinces and Oudh, and the Chief Commissioner of the Central Provinces, and be published in the Supplement to the *Gazette of India* for general information.

By order,
M. C. BRACKENBURY, Major, R.E.,
Under-Secretary.

Document accompanying.
Report dated 7th May 1883, by Mr. H. H. Risley, C.S.,
Officiating Deputy Commissioner of Manbhoom.

Enclosure to Public Works Department Resolution No. 1303 R.C. of 1887.

Report, dated 7th May 1883, by H. H. RISLEY, Esq., C.S., Officiating Deputy Commissioner of Manbhoom, on the trade of Chota Nagpore in its bearing on the proposed Railway from Sitarampore to the Central Provinces.

1. *Plan of this Report.*—An attempt will be made in this report to describe the general character of the country included in the Chota Nagpore Division; its mineral and agricultural products; the marts at which the trade of the area is collected, and the routes by which it is conveyed. Having thus indicated roughly the resources of the country as a whole, I shall proceed to discuss in detail the chief articles with which its trade is concerned, and shall endeavour to frame from such data as are available an approximate estimate of the probable trade on the proposed railway from Sitarampore on the East Indian line to Nagpore in the Central Provinces during the first few years of its existence. With the through traffic which may be looked for between the Central Provinces and Calcutta I shall not attempt to deal, nor shall I concern myself with *local* trade, properly so called, between places situated within Chota Nagpore.

2. *Character of the country.*—The Chota Nagpore Division is a pear-shaped tract of hilly and undulating country, forming three successive steps from the high lands of Central India to the alluvial plains of Bengal. On the extreme west of the division, the Tributary States, a confused mass of hills, ravines and plateaux project like a wedge into Rewa and the Central Provinces, sending off streams on the north towards the Sone and the river system of Behar, and on the south towards Orissa and the Bay of Bengal. It is believed that, at a remote geological period, the entire country now included in the Tributary States formed a uniform table-land, elevated about 3,600 feet above the sea. Traces of such a state of things are to be found in the flat-topped hills, locally known as *pāts*, several of which mark the descent from the State of Sirgoojah into the British district of Lohardugga. The combined action of rivers, wind and rain has long since broken up the original plateau into a hill system so complicated as to render it impossible to define the physical features of the Tributary States with minute precision.

3. *Lohardugga District.*—The district of Lohardugga, forming the central and north-western portion of the division, comprises three tracts of country, which differ essentially in aspect and physical conformation—Chota Nagpore proper, the five pergunnahs bordering on Manbhoom and the sub-division of Palamow. Chota Nagpore proper as distinguished from the Commissioner's Division bearing that name, is an elevated table-land situated about 2,100 feet above the sea, and occupying the central and southern portion of Lohardugga district. The five pergunnahs on the east resemble in most respects the adjoining district of Manbhoom. Their average elevation is about 1,000 feet less than the central plateau. On the north-west the table-land falls away into the sub-division of Palamow, which extends on the north to Behar and the Mirzapore district of the North-West Provinces. On the east and south Palamow consists of spurs thrown off from the plateaux of Hazaribagh and Chota Nagpore proper, while the rest of the sub-division is a tangled mass of isolated peaks and long irregular stretches of broken hills. The average elevation of the country is about 1,200 feet above sea-level, but the surface is wilder and more cut up by rock and jungle than in Chota Nagpore proper, and there are no level areas of any extent except the valleys of the North Koel and Amanat, to which rice cultivation is confined.

4. *Hazaribagh District.*—On the north and north-east of Lohardugga, the central plateau of Hazaribagh rises to an average height of 2,000 feet above the sea. This plateau, which is connected by a narrow neck of land with the corresponding level in Lohardugga, occupies only a limited area, while the rest of the district lies at an average elevation of 1,200 or 1,300 feet above sea-level. The northern portion of Hazaribagh is divided by a well-marked range of hills from the plains of Gya district which are about 800 feet below the lower level of Hazaribagh.

5. *Manbhoom District.*—Due east of Lohardugga, and south-east of Hazaribagh, the district of Manbhoom forms the last step in the gradual descent from the highland of Central India to the delta of Bengal. Here the undulations of the surface become less pronounced, and follow each other at longer intervals than in Lohardugga and Hazaribagh, while level tracts of considerable extent are of more frequent occurrence. In the central and eastern portions of the district the country is open and consists of rolling downs, dotted here and there with isolated conical hills. The average elevation may be taken at 800 feet above sea level.

6. *Singbhoom District.*—The south-eastern corner of the division is occupied by the district of Singbhoom, an elevated basin shut in on the north, west and south by the spurs of the Chota Nagpore plateau and the hills of the Orissa Tributary States, and imperfectly open on the east towards the district of Midnapore. Chaibassa, in the centre of the district, is about 700 feet above the sea; but the surrounding ranges of hills are considerably higher.

7. *Geological Character.*—The prevailing geological formations of the Chota Nagpore Division belong to the metamorphic or granite and gneiss series, and to the sub-metamorphic or slate and quartzite series. Coal-bearing shales and sandstones occur over the whole area except in the district of Singhbhum, frequently in conjunction with iron stone shales and hematite. The known coal-fields of the division and some of their more important characteristics are shown in the following table:—

Number.	Name of coal-fields.	Where situated.	Area in square miles of coal-bearing strata.		Estimated yield in tons.	Percentage of carbon-ash and volatile matter.	Maximum thickness of seams.	REMARKS.
			Sq. M.	Feet.			Feet.	
1	Lakharpur	Sirgoojah State	400	4,500	Dip of coal-bearing strata very small.

8. *Coal. The Jheria field.*—Of the coal-fields enumerated above, only two have any direct bearing upon the prospects of the railway from Sitarampore—the Jheria coal-field (No. 15 on the list), and the Hingir coal-field (No. 4 on the list). The greater portion of the Jheria field lies north of the river Damoodar in the sub-division of Govindpore. Its length from east to west is about 18 miles, its greatest breadth from north to south being 10 miles. Its south-eastern corner, marked by the village of Tasra on the north bank of the Damoodar, is about 12 miles from Jhapra, a village between Purulia and Raghunathpore through which the line will pass. There would be little difficulty in constructing a coal line up to the Damoodar through the country traversed by the existing road from Jhapra to Govindpore. The surface undulations are trifling, and hardly any bridging would be required, as the line would run parallel to the small streams draining into the Damoodar. During the dry season coal could be transported across the river on a temporary bridge, operations being wholly suspended in the rains. Of that part of the field which is situated to the north of the Damoodar, the eastern portion belongs to the zemindar of Jheria, and the western to the zemindar of Nowagur, a minor under the charge of the Court of Wards. A narrow strip of coal-bearing strata on the south of the Damoodar, lying about 12 miles from the nearest point on the line, belongs to the Rajah of Pachete. If the coal of this southern strip is as good, and the strata dip at as small angles as in the northern area, the southern part of the field should apparently be opened up first, as the Damoodar will in any case interfere with the transport of coal from the northern section of the field. The entire question will doubtless be carefully worked out when the construction of the railway is sanctioned. It may be gathered from the geological reports that the Jheria coal-field presents special facilities for cheap working, in that the coal lies very near the surface, and the strata dip at unusually small angle to the horizon.

9. *The Hingir field.*—The line will pass through the southern portion of the Hingir field situated partly in the Chota Nagpore Tributary State of Gangpur, and partly in the

* Records, Geological Survey of India, volume state of Raigurbh in the Central Provinces. In VIII, part 4.

discussing the probable economic value of this field Mr. V. Ball, F. R. S., remarks* :—"The seams which are exposed in the portion of the field at present under description are neither very numerous nor individually of promising quality; but it must be remembered that the coal-measure rocks are not only as a whole very slightly disturbed from their original horizontal position, but are much covered by superficial deposits, and that there is a complete want of sections which might show the succession of beds

constituting the group. The true or even approximate value of the field therefore can only be ascertained by borings. In the meantime it may safely be asserted that there is a fair prospect of this field proving to be of considerable value."

10. *Iron and Limestone*.—An elaborate report on the iron works at Burrakur, which are about to be experimentally worked by Government, has been published in the *Gazette of India*, and I need not attempt to discuss the prospects of the scheme. A copy of a map prepared by Ritter Von Schwarz, the Engineer in charge of the works, showing the places where iron ore, limestone and coal occur in the immediate neighbourhood of the iron works, is annexed to this report. The probable demand on the railway for carriage of manufactured iron, limestone and lime is roughly estimated in para. 75 below.

11. *Copper in Singbhoom*.—In 1854 the copper veins and mines of Singbhoom worked in pre-historic times by a people whom local tradition alleges to have been Jaius, were described by Captain J. C. Haughton in the *Asiatic Society's Journal*. His paper attracted the notice of two Calcutta merchants, who engaged Mr. Emil Stöhr, a skilled mining geologist, to make investigations. In 1857 a Company was started, and fine raw ore was turned out at the rate of from 1,200 to 1,300 cwt. a month, and delivered in Calcutta by way of Purulia and Raneeunge. From the first the enterprise was conducted on too expensive a scale. A high mining rent was paid, and a foundry with a steam engine was erected at great cost before there was ore enough to supply it. In 1859 the Company was dissolved, and the buildings and machinery sold at a nominal price. In 1862 a second Company was formed, only to be dissolved in 1864, without having paid even their mining rent for the two years during which they worked.

12. The copper ores are described by Mr. V. Ball, F. R. S., as occurring in a zone of schists forming the northern flank of a broken spur of hills thrown off from the plateau of Chota Nagpore. Measured along the strike, these copper-bearing rocks extend in an easterly and south-easterly direction for nearly eighty miles. The metal occurs both in lodes and as a deposit disseminated through the materials which compose the schists. There is no reason to believe that the supply of ore has been exhausted either by the ancient miners, or by recent workings. The failure of the two European Companies is fully accounted for by the unhealthiness of the climate, the bad means of communication, and the scanty supply of fuel and lime. Within the last twenty years the wholesale clearing of jungle has materially improved the climate, while the railway passing through the copper bearing rocks may be relied on, either to supply the means of reducing the ore on the spot, or to convey it to any place selected for the establishment of a foundry.

13. *Copper in Manbhoom*.—Copper is believed to occur also near Dhadka in Manbhoom, about 35 miles to the east of the proposed line; but no scientific account of the deposits has been published, and I have no means of determining their probable value. Lead containing a large proportion of silver is said to have been found in the same neighbourhood.

14. *Minerals in Hazaribagh*.—In Hazaribagh lead of good quality has been found in scattered nodules, but the sources of the metal have not been traced. Tin, copper and antimony have been worked at various times, both by Europeans and natives, with very moderate success. A Company has recently been started to work copper mines at Baragunda near Giridi in Hazaribagh, and their shares are now quoted at a premium. Mica occurs in many places in the north of Hazaribagh district, where some mines long managed on a wasteful system by natives have recently been opened out by European practical miners. As none of the minerals found in Hazaribagh are likely to be carried by the Sitarampore-Nagpore Railway, I need not discuss at length the conditions under which they might be profitably worked. I will merely remark that, in the event of the Patna-Gya State Railway being extended through Palamow along the Damoodar valley to Purulia, the iron ores and coal of pergunnah Karanpura, south-west of Hazaribagh, may come to be of considerable value. It is doubtful, indeed, whether limestone can be found in sufficient quantities to support large iron-works, but this point does not seem to have been very fully enquired into.

15. *Potstones*.—The trade in potstone plates is said to have increased greatly of late years. Its chief centre is Patcoom in the south-west corner of the district. The opening of the railway will probably stimulate the demand for these heavy articles. The supply of the stone is said to be unlimited. The following remarks on the subject are extracted from a paper on Manbhoom district by Mr. V. Ball :—

"Chloritic schists, passing on the one hand into talcose, and on the other into serpentinous rocks, occur not uncommonly in the submetamorphic, and somewhat less frequently in the metamorphic series. In building, the varieties of this material have only been used on a small scale for ornamental purposes, for which some of them, as being tough and at the same time easily carved, are particularly suited. They are more extensively employed in the manufacture of altars, in idols, plates, and bowls. In the southern part of Manbhoom, on the frontiers of Singbhoom, there are numerous workings which generally take the form of narrow mines, but are deserted during the rains. From these mines a considerable quantity of stone is annually extracted; the blocks are roughly dressed to the shape required, be it for *lingam* plate or bowl. They are then fixed in a rude lathe, cut into form, and finished with a smooth surface. When finished they are carted off to Burdwan, where they are in great demand, and a portion are sent on to Calcutta for sale. One class of the varieties used stands fire well, while the other does not. The former is of course the most esteemed by the natives. The cracking of the latter is probably due to the water in combination in the more chloritic varieties which becomes released on the application of heat. In many of the ancient temples in Chota Nagpore, images made from this material are met with."

16. *Forests*.—The gradual spread of cultivation, the incessant demand for railway sleepers, and the practice of girdling the trees for resin have combined to denude the

districts of Hazaribagh, Lohardugga and Manbhoom of most of their valuable *sâl* forests. Extensive jungles still remain uncleared in these districts, but nearly all the trees big enough to make sleepers have been thinned out, and little besides saplings is left. Forest reserves have been formed by Government in the north-west of Hazaribagh, in the south of Palamow and in the western corner of Singbhoom, and throughout the division the landholders are now beginning to establish small reserves locally known as *rakhwals*. These, however, are not worked on any regular system; their boundaries are usually ill-defined, and the conflicting claims of the landlord and the villagers are a fruitful source of litigation in the Criminal Courts. A scheme for preserving the private forests of Chota Nagpore has recently been under consideration by Government. Forest officers were deputed to examine the forests, but it is believed that, except in Singbhoom, which has only been resorted to for sleepers within the last two or three years, and in the south of Lohardugga the private forests of the division contain little timber worth preserving. In the Tributary States the original forests are still virtually untouched. Cart-roads do not exist, and the rivers cannot be used for floating timber. Here the proposed railway will open out an enormous area of virgin forest which, if properly worked, ought to meet almost any demand for an indefinite period.

17. *Agriculture. Rice cultivation.*—The system of agriculture followed in Chota Nagpore is determined, particularly in the case of rice, by the physical conformation of the country. This consists mostly of long undulating ridges between which the drainage runs off to join the large streams. The lower slopes of these ridges, and the swampy ground between, supply the only land on which a wet rice crop can be raised. The soil is, in the first instance, brought under cultivation by cutting level terraces out of the hill side, a small bank to hold up water being left round the edge of each plot. The hill sides, thus treated, present the appearance of a series of steps, varying from one to five feet in height; and when the slopes are too steep for terracing, or the soil too stony for cultivation, the bed of the stream is banked up and made into one long, narrow rice-field.

18. *Oilseeds and other upland crops.*—Wheat, barley, various kinds of millet, Indian-corn, *marua*, pulses, oilseeds, sugarcane, betel-nut, cotton, tobacco, are cultivated on the higher levels of the surface where the rice terraces leave off. In Hazaribagh and Chota Nagpore proper, tea is grown by European planters on lands of this class. In 1880-81 thirty-six tea plantations had been opened in the two districts. The gross yield for that year is reported as 237,666 pounds.

19. *Agricultural statistics.*—Attempts were made at the time of the revenue survey, about twenty years ago, to record the area actually under cultivation, and to distinguish between cultivable and uncultivable waste. Conjectural estimates of the area under particular crops have been framed at various times by the district officers. None of these statistics can claim to be even approximately accurate. Within the last twenty years the cultivated area has been continually extended, and it frequently happened that the survey of a particular village was made at a time when there were no crops on the ground. Again, owing to the nature of the country, it is in many cases difficult to say whether a given plot of land is cultivable or not; and steep slopes which have the most sterile appearance are frequently terraced into rice lands. Although no estimate of the area of cultivable waste would possess the smallest statistical value, there can be little doubt that the opening out of the country by the railway will be followed by an enormous extension of cultivation. It may even be hoped that emigrants from the overcrowded districts of Behar will not only break up fresh land, but also introduce improved methods of agriculture. Recent enquiries into the cultivation of sugarcane in Manbhoom have shown that the local cultivators are far behind the ryots of Behar both in their system of tillage and in their treatment of the canes when cut. Almost the only villages where any improvement on the old methods can be traced are those held by Hindoo middlemen from Behar.

20. *Area and population.*—The area and population of the Chota Nagpore Division, as ascertained in the census of 1881, are as follow :—

	Area in square miles.	Population.
Lohardugga	12,015	1,609,244
Hazaribagh	7,021	1,104,742
Manbhoom	4,147	1,058,228
Singbhoom	3,753	453,775
Tributary States	16,051	678,002
TOTAL	43,026	4,903,991

21. *Strength of the aboriginal element.*—The details of the census of 1881 have not yet been published, but it may be noted that, of the population recorded in the previous census of 1872, 54 per cent. belonged to aboriginal or semi-aboriginal races. Taking the division as a whole, we may fairly assume that at least 50 per cent. of the population are more or less of aboriginal descent. No difficulty therefore need be anticipated in procuring cheap labour for the earthwork of the new railway, even in the most unhealthy parts of the line. The aborigines of Chota Nagpore are conspicuous for their immunity from malarious fever, and it is mainly by labourers of this class imported into Assam that new tea gardens are opened out in that unhealthy province.

22. *Exports and Imports.*—The chief exports of the Chota Nagpore Division are the following:—

Rice	Chiefly from Manbhoom and Singbhoom.
Indian-corn	Chiefly from Manbhoom.
Wheat	From Hazaribagh.
Pulses	{ Mung (<i>Phaseolus Mungo</i>). Urid (<i>Phaseolus Roxburghii</i>) known as Biri in Manbhoom. Gram (<i>Cicer Arietinum</i>) from Hazaribagh.
Oilseeds	{ Saraua—mustard. Til (<i>Sesamum Orientale</i>). Tisi—Linseed. Surguja—(<i>Guizotia Oleifera</i>).
Cotton	Only from Palamow.
Timber	{ From South Lohardugga and North Singbhoom.
Bamboos	
Chope	Or rope made of jungle fibre.
Babui	String made of babui grass.
Tassar silk	Manbhoom and Hazaribagh.
Tassar cocoons.	
Hides.	
Horns.	
Shell-lac	From Lohardugga and Manbhoom.
Ghee	Manbhoom, Hazaribagh and Palamow.
Tea	Hazaribagh and Lohardugga.
Jungle products.	
Petals of the mohua tree.	
Catechu.	
Resin.	
Stick-lac.	
Dye substances of various kinds.	
Wax.	
Gallnuts (haritaki).	
Coal from Manbhoom and Hazaribagh.	
Iron from Hazaribagh and Lohardugga.	
Mica from Hazaribagh.	

The chief imports are—

European piece-goods.
European twist.
Blankets.
Salt.
Spices.
Betel-nut.
Molasses.
Tobacco.
Umbrellas.
Brass utensils.
Paper.
Wines and spirits.
Oilman's stores.
Gunny-bags—to Hazaribagh.

23. *General course of trade.*—It will be clear from paras. 2 to 6 above, and from the annexed map on which the chief lines of hills have been roughly delineated, that on the west and south Chota Nagpore is shut in by the hills of the Central Provinces and Orissa, while there are but few practicable outlets through the bordering ranges which mark the descent into the plains of Behar. Hence the main currents of export trade, like the main lines of drainage, follow the natural slope of the country from west and north-west towards the east, converging gradually, after entering Manbhoom District, on the railway stations of Burrakur, Raneogunge, Panaghur, Durgapore, Mankur and Burdwan, and the trade centres of Bankoora, Sonamukhi, Rajgram, Mejhia, Bishanpur and Indas. Three main exceptions to this general rule deserve special notice—

- (i)—Of the surplus produce of Palamow and Sirgoojah, which is collected in the marts of Garwa, Daltongunge, Hosenabad and Moharajgunge in Palamow, nearly the whole is exported to Gya, Shahabad and Mirzapore, and it may be expected that the Gya-Patna State Railway will attract a continually increasing proportion of the trade of these marts, as well as of Chatra in the west of Hazaribagh.
- (ii)—Part of the trade of the north of Hazaribagh, collected in the mart of Mirzajunge, finds its way into Monghyr District; part is exported from Giridi on a branch of the East Indian Railway; while a considerable portion of the export trade of Chatra goes to Gya.
- (iii)—The export trade of that part of Dhalbhoom, the eastern pergunnah of Singbhoom, which lies to the east of the Kapargadi hills, has its natural outlet towards Midnapore. Ghatsila, the chief village of Dhalbhoom, is not much more than 60 miles from the mouth of the Midnapore Canal, and we may expect that, when the roads in Singbhoom are put in order, a very considerable traffic will pass out of the district by this route.

24. *Export routes.*—The areas of country which either now export, or may ultimately be expected to export by way of Gya, Giridi and Midnapore have been roughly marked on the map in blue. At present a certain proportion of the trade, even of these remote parts, flows towards Raneegunge, but it can hardly be expected that this reversal of natural conditions will continue when communications come to be improved. All the exports from the remaining areas find their way sooner or later through Manbhoom district on one or other of the roads marked by red lines on the map, to the districts of Burdwan and Bankoora, and in particular to the great mart of Raneegunge, either for local consumption or for transport to Calcutta from stations on the East Indian Railway.

25. *Hazaribagh District.*—Chatra, about 36 miles north-west of the civil station, is the chief market of the Hazaribagh district. Situated on a comparatively level tract between the central plateau of the district and the tangled mass of rock and ravine which forms its western frontier, in such a way as to command the openings of the passes from the north-west, west, and south-west, it is well suited by its position to be the distributing market for the country produce of Palamow and the Tributary States. The principal articles imported into Chatra are the following:—Rice, Indian-corn, oilseeds, pulses, and mohua petals are imported from Lohardugga and the Tributary States of Gangpur, Jushpur, and Sirgoojah. From the same places are also brought stick-lac, resin, tasar silk, cocoons, gum, cotton, and unwrought iron. The districts of Gya and Shahabad send wheat, gram, masur (*Ervum lens*) khesari (*Lathyrus sativus*) and similar cereals, as well as turmeric, pepper and other vegetables. Zinc and tin are also sent in small quantities from these districts. Tobacco is imported from Patna. English cloth, brass or bell-metal, household utensils, salt, pepper, and *supari* or betel-nut are imported from Burdwan, Raneegunge and Calcutta. The export trade supplies Lohardugga and the Tributary States with English cloth, salt, pepper, tobacco, household utensils, turmeric, &c. Rice, Indian-corn, marua (*Eleusine coracana*) pulses, mohua flowers, and ghee are sent to Gya and Shahabad. Oilseeds, ghee, mohua flowers, gram, oil and molasses are also exported to Burdwan and Raneegunge. Patna takes iron and certain proportion of stick-lac; but the bulk of the lac which finds its way into the Chatra market is sent to the great lac factories of Mirzapore district. Almost the whole of the Chatra trade is carried by pack-bullocks, as the passes leading up to the town on all sides, except the east, are at present inaccessible to carts.

26. *Trade of Chatra.*—The following estimate of a year's trade between Lohardugga and Chatra is taken from Mr. Spring's notes on the alternative line from Surti through the Damoodar valley, Lohardugga and Sirgoojah (Collection of papers on railway surveys, page 47):—

Exported from Lohardugga to Chatra.	Mauuds.	Imported to Lohardugga.	Mauuds.
Grain of sorts	40,000	Salt	7,000
Oilseeds of sorts	35,000	Tobacco	6,000
Cotton	4,000	Goor	3,000
Lac	3,000	Wheat, spices, cloth	1,000
Iron, gum, mohua, leather, &c.	6,000		
TOTAL	88,000	TOTAL	17,000

Mr. Spring also notices "a comparatively active iron industry" in the town of Tandwa, about 18 miles south-west of Hazaribagh. Tandwa is the centre of the indigenous iron manufacture of the Karanpura valley, and supplies Chatra with a large proportion of the iron afterwards exported to Behar. The export trade of those parts of Hazaribagh which do not deal through Chatra is collected at Chumparan, Burhee, Barsot, Barkatta, Atka, Bagodor and Dumri on the Grand Trunk Road; at Mirzagunge, Pachumba and Giridi in the north-east of the district; and at Gola and Pitarbar in the south-east. The marts on the Grand Trunk Road deal for the most part direct with Raneegunge, but a small proportion of their produce is taken on to the East Indian Railway at Burrakur. Mirzagunge and Pachumba despatch their surplus from Giridi; while Gola and Pitarbar trade with the important mart of Jhalda, 28 miles west of Purulia. Hazaribagh itself exports both by Giridi and along the Grand Trunk Road. It is difficult to foresee the precise effects of the proposed railway extensions on the trade of the Hazaribagh district, but it may be assumed that the Sitarampore-Nagpore line will deprive Chatra of the export trade which it now attracts from South Lohardugga, Jushpur and part of Sirgoojah; and that the extension of the Patna-Gya line into Palamow will still further curtail the agency business from which the town derives its importance. At present the railway station at Giridi is cut off from the main stream of trade along the Grand Trunk Road by the unbridged Burrakur river, which is impassable for days at a time during the rains, and very destructive to carts even during the dry season on account of the steepness of its rocky banks and the depth of sand in its bed. Carters from Chatra and the marts on the Grand Trunk Road halting at Govindpore on their way to Raneegunge have repeatedly assured me that if the Burrakur were bridged, they would take their goods to Giridi. We may

expect then that, when the recently sanctioned bridge over the Burrakur is completed, the traffic of the Giridi station will show a remarkable increase, while a corresponding diminution will take place in the trade of Raneegunge. The trade of Gola and Pitarbar will, I think, ultimately come on to the Sitarampore-Nagpore line either at Raghunathpore or Purulia. The old Trunk Road, running from Raghunathpore through Chas to Hazaribagh, has recently been repaired in Manbhoom, and promises to serve as an important feeder to the railway. At present it joins the road from Ramgurh through Gola to the village of Mahoora on the Hazaribagh border, but the old line running direct to Hazaribagh is still in existence, and the question of putting it in thorough repair will have to be considered when the railway comes into working.

27. *Lohardugga District.*—The principal seats of trade in Lohardugga district are Garwa, Hoseenabad, Daltongunge and Moharajunge in the Palamow sub-division; and Ranehee, Lohardugga, Palkot, Lodhma, Biru, Bandu, Tamar and Sili in the head-quarters sub-division. Garwa in Palamow forms the distributing trade centre for the surplus produce of great part of Sirgoojah, of the Tributary States further west, and of Palamow sub-division itself. The Garwa market is held during the dry season on the sands of a river, and is one of the largest in the Chota Nagpore Division. Strick-lac, resin, catechu, cocoons of tasar silk, hides, rice, oilseeds, ghee, cotton, and iron are collected there and at the other Palamow marts mentioned above for export to Chatra and Gya. Piece-goods, brass vessels, blankets, silk, salt, tobacco, spices, drugs, and beads are imported from Behar for local consumption and to supply the stocks of itinerant merchants who take these articles into Sirgoojah and Korea. Nearly all the trade of the head-quarters sub-division flows eastward to the mart of Jhalda in Manbhoom, and thence through Purulia to Bankoora and Raneegunge. The only exceptions to this rule are—

- (i) A small area in the west of the district roughly marked off on the map by the dotted line drawn from Biru through Palkot to a point about 12 miles east of Lohardugga town, which at present sends its surplus produce by pack-bullocks to Chatra; and
- (ii) a still smaller area in the south-east which exports through Patcoom to Chandil, and thence by Burrabazar and Manbazar to Bankoora.

28. It appears, however, that as the roads leading eastward are gradually improved and rendered passable for carts, the proportion of the export trade flowing towards Ranehee and Jhalda is even now tending to increase, while the attraction of Chatra shows signs of declining. At present, no doubt, the tendency I speak of is not very conspicuous; but in the ordinary course of events the primitive modes of transport on which the Chatra trade depends are bound to be beaten out of the field by wheeled transport plying along more direct and more convenient routes. Chatra owes its predominance as a trade centre for Western Chota Nagpore to the various causes which have delayed the construction of cart roads in the west and south-west of Lohardugga district. As soon as the system of roads planned for the district is completed, it may be assumed that the entire traffic of the head-quarters sub-division and of the Tributary States, except Chaug, Bhakar and North Sirgoojah, will flow eastward towards Jhalda. At what points it will strike the new railway is a difficult question to determine beforehand; but I may mention that the Deputy Commissioner of Lohardugga agrees with me in thinking that the trade of the northern portion of the area in question, including the marts of Lohardugga, Ranehee and Silli, will go to Purulia; that the traffic of the south, collected at Palkot and Biru, will come on to the line at Lamgarh and Chakradharpore; and that the south-eastern corner of the district represented by the mart of Tamar will export by way of Kharsawan or Chandil. As soon as the railway is sanctioned, the District Road Committee will probably set about aligning feeder roads to some of these points.

29. *Singbhoom District.*—The chief marts of Singbhoom district are Chaibassa, Chakradharpore, Sonna, Kharsawan, Saraikola, and Haldipukur in Singbhoom proper, and Ghatsila and Bharagora in the outlying pergunnah of the Dhalbhoom. Dhalbhoom, which is cut off from the rest of the district by a range of hills traversed only by a single pass, trades with Midnapore. The exports of the central and western portions of the district are sent as a rule to Raneegunge and Bankoora. Produce is also said to be exported to Gya through Ranehee, Tandwa, and Chatra. Most of the district trade is at present in the hands of petty itinerant traders who move about from village to village during the cold weather purchasing country produce or taking it in exchange for salt, which they import monthly on pack-bullocks from Ghatal and Midnapore. When the railway is opened, it will probably absorb the whole of the district trade as soon as the local dealers have had time to realize the changed conditions. At first, perhaps, the eastern villages of Dhalbhoom will continue to trade with Ghatal and Midnapore; but when a good road has been made through the Kapargadi Pass, and a few more Marwari merchants have settled at Chaibassa, that town will become the main centre of trade for Singbhoom, Keonjhar, and Mohurbhunj.

30. *Manbhoom District.*—The peculiar position of Manbhoom in relation to the trade of Chota Nagpore has been remarked upon above in explaining the routes by which the produce of Lohardugga and part of Hazaribagh reaches the East Indian Railway. Three main lines of export cross the district from west to east—the Grand Trunk Road with *chuttis* or roadside marts of Topechansi, Rajgunge, Govindpore, Nirsa and Chirkunda; the

provincial road from Ranches to Bankoora passing through Jhalda and Purulia; and a southern line, imperfectly defined by any finished roads, which brings produce from the south and south-east of Lohardugga through Chandil, Burrabazar, and Manbazar to Bishanpore and Bankoora. From south to north these lines are crossed by the main road from Chaibassa through Purulia to Burrakur, passing the marts of Chandil, Purulia and Raghunathpore. An incomplete line running from north-west to south-east through Chas and Raghunathpore towards Raneegunge promises to bring the produce of south-eastern Hazaribagh and perhaps of a larger area on to the railway at Raghunathpore. A glance at the annexed trade map will show the positions of the chief marts in Manbhoom and their relations to the existing roads and the new railway. Clearly the traffic along the Trunk Road will not seek the new line. Indeed, by the time the line is open the volume of this traffic will probably have been much reduced by the bridging of the Burrakur river between Dumri and Giridi, so that the portion of the Trunk Road passing through Manbhoom will merely serve the local trade of the Govindpore Sub-division and the large export of coal from the collieries between Nirsa and Burrakur. All the traffic on the other routes described will be carried by the new railway. How far the influence of the line will extend in an easterly direction depends upon causes which it is impossible to analyse here. My own opinion is that after a short period of adjustment, during which new centres of trade will be formed at Chandil, Purulia and Raghunathpore, the entire trade of Eastern Manbhoom and of the western pergunnahs of Bankoora will be drawn on to the new line,—that is to say, the centres of attraction for trade purposes will move to the west and occupy points on the railway.

31. *Import trade.*—In describing the trade routes of the division, I have discussed the question almost entirely in terms of export. The import trade follows the same main lines as the export trade, and needs no special description. Places which export to stations on the East Indian Railway procure their imports from the same source, and this holds good equally in the case of the areas exporting to Gya, Mirzapore and Midnapore.

32. *Attraction of Raneegunge.*—It was remarked above that some of the exports of Chatra and Hazaribagh are sent by cart along the Grand Trunk Road to Burrakur or Raneegunge. The preference for Raneegunge over the two nearest stations on the line is mainly due to the fact that the trade of Raneegunge is incomparably larger than that of either Burrakur or Giridi, and that consignors can count upon disposing of their entire produce to a single wholesale dealer and getting at once whatever they may require for the return journey. At Burrakur or Giridi, where the machinery of trade is as yet imperfectly developed, a consignor of country produce would probably have to dispose of his stock in dribblets and to pick up his return load of piece-goods, salt and tobacco from half a dozen different dealers. For this reason and probably also because the consignors have running accounts with the large merchants at Raneegunge, the majority of carts exporting country produce travel for their market 70 miles beyond Giridi, their nearest railway station, and 25 miles beyond Burrakur. The point is chiefly of importance as illustrating the indifference to delay and the reluctance to abandon traditional routes and methods which are so characteristic of the ordinary country trader.

33. The articles thus sent are oilseeds, gram, ghee, mohua, molasses, and lac: oilseeds forming about 90 per cent. of the trade. For the most part the carts go direct to Raneegunge, passing within 26 miles of Giridi, and within one mile of Burrakur station. They return to Chatra with salt, piece-goods, brass utensils, pepper, turmeric, and tobacco. While at Raneegunge I asked some of the leading merchants why this considerable body of trade has diverted from Gya, apparently its natural outlet, to so distant a point as Raneegunge, the answer was that oilseeds, the staple export being largely grown in Gya, were sold there in ordinary years at the same price as in Chatra, while at the ordinary rates of cart-hire a profit could be made by sending them to Raneegunge.

34. *Minor trade agencies.*—It is not pretended that the foregoing paragraphs give anything more than a very general outline of the operations of trade over a large province. No reference has been made to the weekly markets held in all large villages, to the small travelling dealers (*beparis*), or to the agents of large merchants who settle for a time at convenient centres and buy up the produce of the neighbourhood. In a country where but few large centres of trade exist, it is from sources such as these that the chief marts shown in the map derive their stocks for export, and the imports are distributed through the same channels. No statistical record of these operations is possible. As Chota Nagpore is gradually opened up by the railway and by improved roads, we may expect that new marts will spring up, and that the trade of the division will tend to concentrate itself, while itinerant dealers and transport by means of pack-bullocks will tend to disappear.

35. *Data for estimate of trade.*—I will now examine at length the various data which exist for estimating the probable yearly goods traffic which the Nagpore Railway may count upon carrying from and to places in Chota Nagpore. The first and most obvious source of information is the reports of the district officers, which take the form either of special reports on the trade of the district or of sections devoted to that subject in the General Administration Reports. In most cases the information given is of the vaguest character, and throws very little light even on such an elementary matter as the main lines which the trade follows. In Manbhoom, considerable attention has been paid to the question of trade statistics, and for the last three years

special reports on the subject have been drawn up by a native officer of great local experience. Some of these figures will be reproduced and examined below. Clearly they have been compiled with great labour, and aim at a higher standard of completeness than those supplied from other districts of the division. They are based almost entirely on the following data :—

- (a) Statements of local traders resident in Purulia as to the quantity or value of the stocks passing through their hands during the year, and the proportion of such stocks drawn from, or exported to, districts other than Manbhoom. Traders from the interior of the district were questioned on these points when they visited Purulia, and in all cases from 30 to 50 per cent. was added by way of correcting the mahajan's natural tendency to understate his stocks.
- (b) Estimates made by local traders at the instance of the compiling officer of the quantity or value of particular articles exported from, or imported into, the whole district.
- (c) Estimates framed by the compiling officer of the quantity or value of particular articles which the population of the district ought, on an average, to consume.
- (d) In some instances the traders' books were referred to.

36. With regard to (a), it would be waste of time to dwell upon the various sources of error which such a method of enquiry involves. Every local trader is possessed with a constant dread of enhanced license-tax, and regards statistical enquiries of any kind with the more suspicion because he is quite incapable of understanding the remote general objects which such enquiries have in view. He may believe that the officer with whom he is talking at the moment has no ulterior designs in respect of taxation; but nothing would persuade him that incautious disclosures made by him as to the extent of his dealings might not hereafter be used by another officer or another department for the purpose of assessing a new tax or enhancing an old one. The clumsy expedient of adding a uniform percentage to the statements of stock could only yield correct results if every man lied in exactly the same ratio to the truth. In the present case as the mahajans were informed that this correction would be applied, there can be little doubt that many of them made allowance for it in framing their statements. As to (b), no one who has seen anything of the mahajan class in Chota Nagpore can have failed to be struck by their peculiar inability to take a general view of any subject. Each man knows his own business and nothing more, and it is simply preposterous to expect him to be able to estimate the exports or imports of a whole district, which to him represents merely a set of arbitrary boundaries laid down for the convenience of the courts. Least of all would he be able to distinguish local exports and imports from goods in direct or indirect transit to other districts. At the best, moreover, the enquiry was only partial. It is not pretended that all the traders in the district were consulted, and that the figures represent the total of their statements and estimates. On the contrary, the compiling officer admits that he never left Purulia, and that he merely took any opportunity that offered of questioning traders from the interior who happened to come to the district head-quarters.

36. *ii. Special enquiries from mahajans.*—In January last I spent several days in Raneegunge in attempting to ascertain from the local merchants, not the actual quantities of goods consigned to them from Chota Nagpore, but the *proportion* of the traffic passing through their hands which come from that part of the country. To ask them actual quantities would of course have been futile, as even if they had placed their books absolutely at my disposal, it is doubtful whether the necessary particulars would have been on record, and in any case the labour of compilation would have been prohibitory. I hoped, moreover, to disarm their suspicions by abstaining from all enquiries as to the extent of their business, and confining my questions to the *percentage* drawn from or exported to Chota Nagpore. After visiting every substantial merchant in the town, I gave up the attempt as hopeless for several reasons.

37. In some cases the dealers themselves had the vaguest ideas as to the source and destination of their own business; they did not know which of the Chota Nagpore marts served particular districts, or what extent of country was included in the Chota Nagpore Division. Though shrewd enough in points of detail as to prices and carriage, they were curiously ignorant as to the general course of trade and the possible changes arising from the extension of railways. Goods came to them because they had always come, and they saw no reasons for anticipating changes. It might be that the opening of the Gya Railway had reduced the trade with Chatra, but they could not say to what extent, or whether the reduction was likely to be permanent. Others affected great readiness to impart information and improvised extravagantly large statistics of the traffic which a glance at the railway figures showed to be impossible. The Marwaries, among whom are the chief merchants of Raneegunge, took a different line. Their leading man went through the railway statistics with me, and after consulting his countrymen gave me a rough statement of the percentage of each article entered in those returns which was exported from or imported to Chota Nagpore. He said, for instance, that 25 per cent. of the piece-goods, salt, flour, betel and turmeric appearing in the railway returns was intended for Chota Nagpore, and that 18 per cent. of the oilseeds came from Chota Nagpore. He let out, however, in conversation that, in his opinion, a line joining the East Indian Railway at

Sitarampore would in a few years ruin the native trade of Raneeunge. All the traders along the new line of rail who now employ agents in Raneeunge would, he said, deal direct with Calcutta, while men off the line would arrange their business through agents at Purulia, Chaibassa and other new centres of trade. Raneeunge would cease to be the chief distributing centre for Chota Nagpore, and the men in whose hands the trade is now would either have to accept the loss of a safe and lucrative commission business or to start afresh in one of the new centres further west. The latter alternative would be hardly less distasteful to them than the former. Large sums have been spent by men of this class on substantial masonry buildings in Raneeunge. Most of them have permanently settled in the place, and do not contemplate returning to their own country. If they are driven to transfer their seats of business to places on the line, they can only do so at a heavy loss. Nor will the new business at any one centre be such as to compensate them for the loss of the old. The effect of the new railway will be to dissipate and distribute among several centres the business hitherto concentrated at Raneeunge. From the tone adopted in discussing the matter by the most influential and intelligent native merchants, I am satisfied that they are on the whole opposed to the project for a line to Sitarampore, and that their statements as to the proportions of the existing trade which are concerned with particular localities cannot be regarded as trustworthy. Information derived from them is vitiated by their special bias against the present scheme, as well as by the general prejudices which they share with the rest of their class.

38. *iii. Estimates from population not generally applicable.*—To argue from the recorded population of a district to its probable ultimate consumption is no doubt a legitimate process, but it can only be applied with confidence in the case of salt and perhaps of some

* Note.—This is the standard taken by Sir John Strachey at page 230 of "The Finances and Public Works of India." Mr. Power, the Deputy Commissioner of Lohardugga, has enquired into the subject in that district, and finds that the "average annual consumption, if anything, exceeds Sir John Strachey's standard." The Bengal Trade Report for 1881-82 puts the average consumption per head as follows :—

	lbs.	oz.	
Bengal	10	13	Oriasa.
Behar	9	9½	Chota Nagpore.

staple food-grains. Thus in the case of salt we can say that 17lbs is the amount required during the year by an adult, and that 12lbs * is the average annual consumption in India per head of population, and we may infer from this that with improved communications and a low duty the Chota Nagpore Division may be expected to consume perhaps 7,00,000 maunds of salt. An attempt has been made by the compiler of the Manbhoom trade reports to calculate the import of

European piece-goods on a somewhat similar method. Taking the population of the district at 1,042,117, as recorded in the last census, and deducting 281,174 for children and persons who do not wear European cloth, the remaining 760,943 persons are divided into four classes spending, respectively, Rs. 75-4-1 and 8 annas per head on European cloth during the year. The number of persons in each class is then estimated, and their consumption calculated on the following scale :—

	Rs. A. P.	Rs.
2,000 of the upper class spending per annum	75 0 0	1,50,000
200,000 " middle class " "	4 0 0	8,00,000
200,000 " cultivators " "	1 0 0	2,00,000
358,943 " poorer classes " "	0 8 0	1,79,471
<u>760,943 persons spend per annum</u>		<u>13,29,471</u>

Deducting from this Rs. 3,62,000, being the value of twist imported from Calcutta to be made into cloth in the district, the remainder Rs. 9,67,471 is taken as the minimum value "of piece-goods imported from Calcutta for the consumption of the people of Manbhoom." It is not clear why a smaller amount was entered in the figured estimate for 1881-82 and subjected to a further deduction on account of re-exports; but the whole calculation rests upon such highly conjectural data, that it would be waste of time to examine it in detail. Again, the import of salt is calculated on the assumption that 999,452 men consume 1 tola a day, or 4.56 seers (say 9 lbs.) in the year. I have not ascertained why the salt-consuming population was taken at this particular figure, which corresponds neither with the total population of the district nor with the total number of males or heads of families recorded in the last census.

39. A similar form of argument is used by Mr. Parker in paragraphs 84 to 87 of his report† on the preliminary surveys for the Nagpore Railways and the annexed statement, and is mentioned in the Bengal Government letter forwarding the report to the Government of India as on the whole the most reliable method of estimating the probable receipts of the line. To this I would add that, while Mr. Parker's calculation is probably sound enough as an estimate of the minimum traffic, it must necessarily reproduce the defects of the returns upon which it is based. These returns, I believe, are largely derived from a system of road registration. I have had some experience of road registration in Manbhoom, where it is conducted under fairly favourable conditions, and the stations are so placed as to be open to constant supervision. In my opinion every system of the kind greatly understates the amount of the traffic which it professes to record. The men who keep the registers are ignorant and ill-paid, they do not understand the object of their work, and they take as little trouble over

† No. 584, dated 14th June 1882.

it as possible. Numbers of carts evade the registering station or slip past it during the night, and the carters themselves understate the quantities of goods they are carrying. What the percentage of error may be it is impossible to say precisely, but in many cases I believe it to exceed 25 per cent. Of course it would be a random mode of procedure to add that percentage to Mr. Parker's figures, but if this were done, I believe it would be borne out by the working results of the line.

40. *iv. Statistics of the East Indian Railway.*—I have already explained in paragraph 23 above, that the great bulk of the existing trade of Chota Nagpore finds its way by various routes to the stations on the East Indian line between Burrakur and Burdwan. In order to ascertain what light the traffic returns of the East Indian Railway would throw upon the prospects of the new line, I obtained from Mr. Bradford Leslie a statement showing in detail the quantity of each article exported from and imported into each of the stations from Burrakur to Burdwan, inclusive, during the year 1882. Taking this statement as a basis, I hoped to be able to ascertain from the chief dealers at each station what proportion of the goods shown in the railway statistics came from or went to Chota Nagpore. My experience at Raneegunge showed that it was impossible to separate the Chota Nagpore traffic from the traffic of the area intervening between the proposed new line and the East Indian Railway. Raneegunge was the most promising place for the experiment, as the Chota Nagpore trade goes there direct by cart and is not filtered through a number of different marts before it reaches the rail. In the case of Panagarh, Mankur and Burdwan, the statistics probably include a certain proportion of Chota Nagpore goods; but these are consigned in the first instance to merchants at Bankoora, Bishenpore, Sonamukhi, Krishnagore and other intermediate marts, and reach the railway as exports from those places, not from Chota Nagpore. At these stations the attempt to trace back any branch of trade to its sources would have been even a greater failure than at Raneegunge. For these reasons the returns of the East Indian Railway are not of very precise statistical value for my present purpose, except in the case of articles produced exclusively in Chota Nagpore, and of stations like Sitarampore and Burrakur which deal only with that part of the country. They suggest, however, some important inference as to the traffic of the new line, and they serve to illustrate and supplement the defects of the statistics collected by actual registration in Manbhoom district. I shall refer to them largely in discussing the trade of particular articles.

41. *v. Statistics of local registration.*—The registration figures, imperfect though they are, form the only local statistics which can pretend to even approximate accuracy. The system on which they are collected requires some explanation. For the last thirty years or so *serais* or rest-houses for carts and travellers have been kept up at regular intervals along the Grand Trunk Road. In that portion of the road which passes through Manbhoom, it has been the practice for many years past to prohibit carters from halting for the night anywhere except in a *serai*. How far this practice is based upon any formal order is a point I have never been able to clear up. Certainly no such order is on official record in the district. But the custom, which dates back to times when the trunk road was unsafe for travellers, is well known and is in the main enforced by the mounted patrol on the road. A fee of one pice is paid for each cart, and the right to collect these fees is farmed out yearly by public auction, the *serais*, wells, etc., being repaired from the proceeds. In February 1881, while in charge of the Govindpore Sub-Division, I made arrangements for recording daily the number of carts passing through the *serai* at Govindpore on the Grand Trunk Road, with the starting-place and destination of each cart and the quantity of goods carried. The system was carefully supervised, and the figures are believed to be substantially correct. They certainly do not exaggerate the traffic, as it was to the interest of the farmer of the *serai* by whom the register was kept to understate the number of carts and thus reduce the apparent profit on his lease. On the other hand the conformation of the country at Govindpore renders it impossible for carters to evade the *serai* by going off the road, while the patrol system prevents them from halting at intermediate points and passing the *serai* during the night: perhaps 10 or 15 per cent. might be added to make up for carts which escaped registration, or were purposely omitted by the farmer; but on the whole the conditions are so favourable to correct registration that it is doubtful whether any connection need be applied. In August 1881, before leaving for Hazaribagh, I compiled the statistics thus collected for the six months from February to July 1881 inclusive, and submitted a report on the subject to the district officer, suggesting the introduction of a system by which it was hoped that the whole of the traffic likely to be carried by the proposed railway (southern route) might be registered at certain points in the Manbhoom district by a salaried agency, such as is employed to record the trade on the roads leading into Calcutta. Nothing was paid to the farmer of the *serai* at Govindpore. He was merely supplied with paper and told to record certain particulars, it being further understood that the totals were made up for my information only and were not to be made use of at the yearly auction of *serais*. The proposal was recommended by the late Deputy Commissioner to the Commissioner of the Division, but it was lost sight of in consequence of Mr. Hewitt's absence on leave. In October 1881 a new sub-divisional officer stopped the registration of traffic at Govindpore. On my return to Manbhoom in April 1882, I moved the Deputy Commissioner to start registration in the head-quarters sub-division on the Govindpore unpaid system, and since June 1882 traffic has been recorded at the *serais* at Govindpore, Purulia and Nadiara. These points are marked with red flags on the map.

42. If the system had worked at head-quarters as well as it did at Govindpore, the returns from Nadiara on the direct road from Ranchee to Bankoora, Raneegunge and Burrakur would have shown approximately the whole of the trade with Jhalda, Ranchee and other centres farther west, while the Purulia station would have recorded the trade of southern

Manbhoom and of all Singbhoom, except the area which deals with Midnapore. Experience, however, has shown that of the Singbhoom trade a large portion evades the Purulia *serai* by taking advantage of a cross road skirting the south of the town and joining the main road to Bankoora some two miles to the east of the *serai*. Considerable quantities of goods from Singbhoom are consigned to merchants at Chandil, and find their way to Bankoora by a rough tract through Burrabazar and Manbazar; some are consigned to merchants at Purulia and are never registered at all, as the carts have no occasion to use the *serai*. Moreover *serais* have only been introduced into the head-quarters sub-division within the last two or three years; the carters do not see the advantages of them, and prefer camping out under trees; they will even make a considerable detour to avoid paying the fees, and in this part of the district we have neither ancient custom nor a regular road patrol to enforce the order that carters must halt at night in a *serai*. It would be out of place to discuss in this report the policy of putting pressure on the cartmen to induce them to use the *serais*; but I may mention that I made enquiries on the subject in Raneegunge, and found that the leading merchants there not only approved of the system, but have so far recognised it as to admit charges for *serai* fees as part of the standard cart-hire from Raneegunge to Raghunathpore and places further west.

43. It follows from what has been said in the last paragraph, that the percentage to be added to correct understatements in the Purulia and Nadiara figures is much larger than in the case of the statistics collected at Govindpore. I would estimate it at from 40 to 50 per cent. in the case of Purulia, where several sources of error affect the total, and at about 25 per cent. in the case of Nadiara, where the routes available for evading the *serai* are fewer, and we have only the novelty of the system to look to. In dealing with the trade in particular articles I have in every case shown the actual figures, and have not attempted to correct them by adding a conjectural percentage.

44. In the following paragraphs the statistics, such as they are, derived from the railway returns and the records of local registration, are reproduced and compared, and an attempt is made to estimate approximately the quantity of each article which the proposed railway may be called upon to carry. From the nature of the case only an approximate estimate is possible. I have endeavoured, however, to bring together under the head of each article all general information that has any bearing upon its distribution in Chota Nagpore, and thus to supplement as far as possible statistical defects. For convenience of reference I have followed the alphabetical arrangement of the railway returns.

IMPORTS.

45. *Beer*.—During 1882 the net imports of beer, other than commissariat beer, into the stations from Burdwan to Burrakur inclusive, amounted to 2,075 maunds. The largest quantities were to

	Mds.		Mds.
Burdwan	341	Assensole	960
Raneegunge	372	Burrakur	321

Probably no portion of the imports of Burdwan or Assensole passed on to Chota Nagpore. At both places there is a large European community, and the imports shown in the returns may be taken to have been consumed locally. At Raneegunge the European community is now very small, owing to the transfer of all railway servants to Assensole. Lohardugga and Singbhoom get their supplies from Raneegunge, while Manbhoom for the most part imports through Burrakur. Having regard to the numbers of the Europeans in the three districts, the imports of beer may be taken, on a moderate estimate, at from 300 to 400 maunds a year. Beer is not separately shown in the statistics of trade registration. It comes up in boxes, of which neither the cartmen nor the *serai* farmers would know the contents.

46. *Betel-nuts and leaves*.—The railway figures show the following net imports for 1882:—

	Mds.
Burdwan	2,351
Panaghur	380
Durgapore	81
Oudal	4
Raneegunge	11,874
Assensole	784
Sitarampore	576
Burrakur	599
TOTAL	16,649

Pan (*Piper betel*) and *supari* (*Areca catechu*) are hardly grown at all in Chota Nagpore, the climate being too dry for either to flourish. Consequently the entire province, except the areas dealing with Gya, Giridi and Midnapore, draws its supplies of this indispensable luxury from Bengal proper. All natives agree in describing the consumption as very large. We know that numerous quantities of betel are grown in Bankoora and Burdwan, and in

view of this fact it would hardly be unfair to assume that these districts produce enough to supply themselves, and that the railway imports represent the amount sent westward to meet the demand from Chota Nagpore. It is possible that this may understate the case, and that Chota Nagpore not only takes off the entire surplus of Burdwan and Bankoora, but imports through the East Indian Railway besides. The Raneegunge dealers, whom I consulted on the point, thought that one-fourth of the imports by rail into Raneegunge passed on into Chota Nagpore, but their bias against the line was so pronounced, and their incapacity to deal with large estimates so apparent, that I attach little importance to their opinion. On the whole I think 8,000 maunds would be a reasonable estimate of the amount the railway will carry during the year. Under the head of betel the road registration returns show for the last seven months of 1882—

153 maunds registered at Purulia,
28 " " at Nadiara,
<hr/>
153

or a yearly average of 252 maunds. This does not necessarily affect the correctness of the rough estimate given above. Both *pan* and *supari* are usually brought up in the same carts with salt, but only the salt which makes up the chief part of each load is declared by the cartmen, while the *pan* and *supari* escape registration.

47. *Blankets, Country*.—The railway imports are—

	Mds.
Burdwan	41
Kanoo	42
Panaghur	27
Raneegunge	395
Assensole	96
Sitarampore	64
Burrakur	430
<hr/>	
TOTAL	1,095

The whole of the imports of Sitarampore and Burrakur, and 200 maunds out of the imports of Raneegunge, may be taken to represent the Chota Nagpore demand—in round numbers 700 maunds. There is a large and steady demand for blankets in Chota Nagpore. On the plateaux of Hazaribagh and Ranchee the cold is intense in winter, and a large supply of blankets is required every year for coolies migrating to Assam.

48. *Brass and brass-ware*.—Are imported from Raneegunge and Bankoora. The Chota Nagpore braziers do not make enough for local wants, and their workmanship is clumsy. A good deal of brass is imported to be worked up locally into the massive ornaments worn by women of the aboriginal races. The railway figures for 1882 show the following net imports:—

	M .	
Burdwan	1	
Kanoo	886	
Mankur	3	
Panaghur	587	
Durgapore	1,008	} Supplying Bankoora.
Raneegunge	456	
Burrakur	588	
<hr/>		
TOTAL	3,582	

Local registration shows 197 maunds at Purulia and 566 at Nadiara for the last seven months of 1882, or an average of 1,308 for a year. Comparing the two sets of figures, and allowing for the large omissions in registration at Purulia, arising from the causes explained in paragraph 42 above, I think 2,000 maunds may be taken as a minimum estimate of a year's imports.

48½. *Cotton and yarn* —Under this head the railway figures amount to 30,945 maunds, of which Raneegunge contributes 12,645 and Burrakur, 10,065, while the local registration returns show—

	Mds.
At Purulia	3,475
At Nadiara	661
<hr/>	
TOTAL	4,136

or an average yearly import of 6,440 maunds. With regard to the latter figures, it must be remembered that Raghunathpore and Chasnanda, the two chief centres of the local weaving

trade, take up large quantities of thread which never reach the registration stations at all. Taking this fact into account, and particularly having regard to the large import into Burrakur which supplies Chota Nagpore, I would estimate the imports of cotton and yarn at about 12,000 maunds in the year. The quantities registered locally came from Burrakur, Raneegunge and Bankoora, and were destined for Purulia, Jhalda, Chaibassa and two small marts in Manbhoom, which are not shown on the map.

49. *Grain, oats*.—During 1882, 14,850 maunds of oats were imported into Burrakur. It is said to be ground up with gram and Indian-corn into a peculiar kind of *sutloo*. Most of the import of oats went to Jhalda.

50. *Grain, wheat*.—The railway returns show a net import into Raneegunge of 28,271 maunds of wheat during 1882, and of 120 maunds into Burrakur. Wheat is not very much grown in Chota Nagpore, as it requires irrigation and more care than the average cultivator is willing to bestow upon any crop. The average import may be taken at 10,000 maunds.

51. *Other grains and pulses*.—Under this head the railway figures show net imports amounting to 2,99,354 maunds distributed among the following stations:—

	Mds.
Burdwan	1,26,451
Kanoo	263
Mankur	3,400
Panaghur	10,107
Durgapore	2,347
Ondal	14
Raneegunge	1,27,098
Assensole	4,682
Sitarampore	4,151
Burrakur	20,661
TOTAL	2,99,354

It is impossible to analyse these figures. At Burrakur I was told that *khesari*, *musari*, *kalai* and peas were included under the head of "Others." In 1881-82 the import of grain into Manbhoom was estimated at 8,000 maunds. Large quantities are also sent to Singbhoom and Lohardugga. Only 948 maunds equivalent to a yearly average of 1,620 maunds were registered locally. All of this was consigned to places in Manbhoom. Arguing from the railway figures, it seems probable that the 25,000 maunds imported into Burrakur and Sitarampore were destined for Chota Nagpore, but no more definite conclusion than this can be drawn from the materials as they stand.

52. *Gunny-bags*.—The railway statistics give a net import of 6,949 maunds, of which

	Mds.
Raneegunge took	1,931
Sitarampore	484
Burrakur	364
TOTAL	2,779

Only 60 maunds were registered locally, all for Jhalda. Doubtless there is a steady demand for gunny-bags for use in the export trade, but no reliance can be placed on any estimate of quantities. It deserves notice that the large traffic carried by pack-bullocks depends entirely upon gunny-bags. There are several devices for carting grain, stick-lac, tasar, cocoons, &c., in bulk, but the couple of maunds or so which form a bullock's load must be packed in bags, and the bags must be equal to standing a considerable strain and much knocking about.

53. *Jaggery and Molasses*.—The net imports by rail were:—

	Mds.
Burdwan	2,053
Mankur	255
Panaghur	989
Durgapore	88
Ondal	49
Toposi	15
Raneegunge	23,808
Assensole	129
Sitarampore	83
Burrakur	669
TOTAL	28,585

The local returns show 784 maunds registered in seven months, being an average annual import of 1,344 maunds. Sugarcane cultivation is very backward in Chota Nagpore. Inferior kinds of cane are grown; manure is very sparingly used, and the methods of extracting the juice are primitive and wasteful. These facts may serve to explain the large imports of jaggery and molasses into Raneegunge, a place which clearly does not require 23,000 maunds

for local consumption. I would estimate the Chota Nagpore demand at about 15,000 maunds in the year.

54. *Oil in barrels, cases, and skins.*—Under this head, which includes kerosine oil, the railway returns show a net import of 16,246 maunds, Raneegunge taking 5,697, Assensole 1,910, Sitarampore 1,263 and Burrakur 207. Thus the import of the stations which ordinarily supply Chota Nagpore comes to 9,077 maunds. Only 185 maunds were registered locally. Kerosine oil is widely known and much used all over the division, not only for lighting purposes but for outward application in diseases affecting the skin. On the data, as they stand, 5,000 maunds might be taken as a rough estimate of the annual imports of oil, but the estimate would have no statistical value. We can only say that both kerosine and cocoanut oil are imported from Bengal, and that the import will certainly increase largely when the railway is opened.

55. *Oil-cake.*—The same remarks apply to oil-cake. A small import of 284 maunds was registered, while the Railway figures give a total of 68,070 maunds, of which

	Mds.
Raneegunge took	31,224
Sitaranpore	1,760
Burrakur	2,136
TOTAL	35,120

Here, again, no estimate is possible, but it is tolerably certain that a large portion of the imports of these three stations found its way to Chota Nagpore.

56. *Paper.*—The railway figures show net imports of 733 maunds to Burdwan, 28 to Panaghur, and 246 to Raneegunge—in all 1,007 maunds during 1882. For the official year 1881-82 the value of the imports of paper into Manbhoom district was estimated at Rs. 10,000. No estimate of quantities can be framed. So far as I can ascertain, paper is not manufactured locally.

57. *Piece-goods.*—Under this important head the net imports for 1882, according to the Railway returns, were as follow :—

	Mds.
Burdwan	14,118
Kanoo	55
Mankur	720
Panaghur	3,925
Rajbandh	24
Durgapore	283
Raneegunge	20,441
Assensole	516
Sitaranpore	154
Burrakur	22,587
TOTAL	62,823

During the last seven months of 1882 there were registered in Manbhoom—

At Govindpore 433 maunds for Chatra and Ranchi, •
 At Purulia 3,036 „ for Purulia and Jhalda,
 At Nadiara 4,164 „ for Jhalda and Ranchi,

giving a yearly average import of 13,000 maunds. Comparing the two sets of figures, and having regard to the fact that the imports of Singhbloom seem to have escaped registration, I should estimate the Chota Nagpore imports of piece-goods at 30,000 maunds. This estimate is, I think, borne out by the large imports into Raneegunge and Burrakur. Roughly speaking, the whole of the Burrakur imports go to Chota Nagpore, and in this case I should assume that half of the Raneegunge import finds its way to this division. I have not attempted to account for any portion of the imports of Burdwan and Panaghur, but there can be no doubt that some of these goods come into Chota Nagpore through Sonamukhi, Bisenpore and Bankoora. The consumption of European piece-goods has increased greatly of late years among the aboriginal and semi-aboriginal races of the division. In particular the exports from Lohardugga to the Tributary States are said to be developing rapidly, but as they enter and leave the district at numberless points, no accurate account of the quantity can be kept. It is extremely difficult to register trade carried on pack-bullocks, as the drivers can leave the road at will to avoid the annoyance of being stopped and questioned about their loads.

58. *Potatoes.*—The Railway returns show net imports amounting to 21,167 maunds during 1882, of which—

	Mds.
Raneegunge took	13,247
Assensole	2,363
Sitaranpore	550
Burrakur	2,306
TOTAL	18,466

Only 63 maunds were registered at Purulia as imported from Bankoora and Raneegunge, but this very much understates the facts. Potatoes are very little grown in Chota Nagpore.

and the existing imports, whatever their amount may be, will increase enormously directly the railway is opened. Perhaps 8,000 maunds may be taken as a conjectural estimate of the demand.

59. *Salt*.—The railway statistics give the net imports for 1882 as follows:—

	Mds.
Burdwan	82,192
Mankur	7,684
Panaghur	19,941
Durgapore	3,839
Raneegunge	2,51,904
Assensole	2,960
Sitarampore	2,486
Burrakur	73,511
TOTAL	4,44,597

Local registration yields the following results:—

	Mds.
Govindpore	33,975
Purulia	10,375
Nadiara	27,796

representing an average annual import of 1,23,528 maunds. Of the quantity registered at Govindpore, 22,116 maunds were destined for Chatra, the remainder being consigned to Rajgunge, Topechansi, Dumri, Bogodor, Atka, Bārkatā, Burhee and Chauparun, all marts on the Grand Trunk Road. The chief sources of supply were Raneegunge (30,101), Burrakur (2,336), Burdwan (1,280). The Purulia returns include 6,043 maunds for Purulia, 1,470 for Balarampore, 849 for Sirkabad, 418 for Chaibassa, and smaller amounts for Jhalda, Chandil and Ranchee. Burrakur supplied 4,924 maunds, Raneegunge 2,539, Bankoora 1,840 and Mejha 875. Out of the quantity registered at Nadiara, 19,910 maunds were for Jhalda, 6,305 for Ranchee, 784 for Toolin, and smaller amounts for Bagmundi and Jaipore in Manbhoom, and Bundu and Tamar in Lohardugga. The supply was drawn from Raneegunge (18,264), Burrakur (2,579), Bankoora (2,224), Krishnagore (1,909), Sonamukhi (1,348) and Mejha (402).

60. On the face of the returns it is clear, that for the reasons explained in paragraph 42 above, the salt supply of Singhbhum has escaped registration. If Chaibassa imported so much as 418 maunds by this route, it is morally certain that much more must have been imported. The point, however, is not very material. In order to estimate the demand for salt after the railway is open, we may assume that the line will supply Manbhoom, Singhbhum, the head-quarters sub-division of Lohardugga, the south-eastern corner of Hazaribagh, and the Tributary States of Bonai, Gangpur, Udaipur and Jaspur. It will probably supply parts of Sirgoojah and Korea as well, but I have left these out of account as a set-off to possible over-estimates in the area already assumed. Now, the population of the tract I have described, according to the last census, is, as nearly as I can calculate, 3,174,444. Taking the average annual consumption per head at 12lbs as given by Sir John Strachey, the total yearly demand will be in round numbers 2,38,000 maunds, the whole of which will have to be carried for varying distances by the new railway.

61. *Spices*.—The net import according to the Railway returns is 17,066 maunds, including 14,140 maunds to Burdwan, 1,545 to Raneegunge and 1,069 to Burrakur. Local statistics show a total of 754, or an average annual import of 1,384 maunds. Probably 1,500 maunds may prove a fair estimate.

62. *Sugar*.—A total import of 2,787 maunds appears in the Railway returns, including 1,366 maunds to Raneegunge, 681 to Assensole and 25 to Burrakur. The local statistics show 219 maunds. All for Purulia and Chaibassa. Probably 500 maunds would be a fair estimate of the normal demand.

63. *Tamarind*.—The Railway returns give a net import of 881 maunds, 241 to Raneegunge and 23 to Burrakur. Tamarind is not shown in the local statistics, and has probably been included under the head of spices.

64. *Tobacco*.—The total net imports of tobacco according to the Railway figures is 87,745 maunds distributed as follows:—

	Mds.
Burdwan	47,482
Kanoo	11
Mankur	443
Panaghur	287
Rajbandh	82
Doorgapore	170
Raneegunge	22,350
Assensole	549
Sitarampore	436
Burrakur	15,886
TOTAL	87,475

The registration returns of Manbhoom show 2,195 maunds (giving a yearly average of 3,756 maunds), chiefly for Purulia and Jhalda. Considering how little tobacco is grown in Chota Nagpore, the annual imports cannot well be less than 30,000 maunds, and we may assume that the Railway will carry at least this amount.

65. *Turmeric*.—Net import according to Railway figures 9,109 maunds, including 5,290 to Raneegeunge and 3,065 to Burrakur. Registered locally 1,257 maunds, or a yearly average of 2,148 maunds. These imports went to Purulia, Jhalda and Ranchee. Probably 5,000 maunds may be taken as the normal average import.

66. *Wines and spirits*.—Net imports by Railway 1,802 maunds including 299 to Raneegeunge, 810 to Assensole, 13 to Sitarampore and 20 to Burrakur. Only 24 cases shown separately in local returns, the rest being included in the items "boxes" and "miscellaneous."

EXPORTS.

67. *Babooi string*.—This string, made from jungle grass, is not separately recorded in the Railway returns. The trade is believed to be increasing. Large quantities of *babooi* pass through Purulia from Singbhoom, and the article is in great demand in Bankoora and Burdwan, for use in thatching. During the seven months from June to December 1882, 585 maunds were registered at Nadiara and Purulia. Most of this came from Jhalda, and the Singbhoom exports appear to have escaped registration. I have ascertained by special enquiries that between the 20th November 1882 and the 19th March 1883, 478 maunds of this article passed through Chandil from Singbhoom. Much of the trade is carried on *sagars*, or block-wheeled carts, and on pack-bullocks or ponies. It is therefore peculiarly difficult to register, as *sagars* can go almost anywhere and their owners, as a rule, dislike the *serais*. In the district trade reports already referred to, the exports of this article from Manbhoom alone were estimated as follows:—

	Mds.
In 1879-80	10,000
" 1880-81	20,000
" 1881-82	40,000

These figures are admittedly conjectural; but having regard to the peculiar conditions under which *babooi* string is exported, and the known defects of our system of registration, I believe the Railway may count upon carrying between 10,000 and 20,000 maunds of this string during the year. Of course the estimate is not based upon any statistics, but I have myself seen such large quantities of *babooi* passing along the roads that I am sure the registration returns give no idea of the magnitude of the trade.

68. *Coal*.—The Railway returns show a large export of coal from Burrakur and Sitarampore. Most of this comes from collieries close to Burrakur, and will not affect the new line. Some coal will probably be carried on the section of the line between the Damoodar river and Sitarampore, but the statistics available do not enable me to say how much, as there are no separate returns for the collieries lying near this section. In paragraph 8 above, I have made some general remarks on the possible development of the Jheria and Hingir fields. No estimate can be framed of the quantity of coal which those fields might throw upon the Railway. It would probably be very large. In a note upon the prospects of a Railway through Lohardugga and Sirgoojah to the Central Provinces, the Commissioner of Chota Nagpore has laid some stress upon the importance of encouraging the use of coal for cooking purposes by the people of India. Wood-fuel is known to be getting dearer almost yearly; the clearing of jungle progresses rapidly, and the operations of the Forest Department, for preventing and remedying the effects of wasteful management, cannot be expected to produce any tangible result for years to come. If the people themselves could be induced so far to modify their habits as to use coal for cooking, not only would the incessant clearing of jungle, with its evil effects on the rainfall and on the moisture of the soil, be put a stop to, but there might be some prospect of the manure, which is now used for fuel, being put upon the land. While in Raneegeunge, in January last, I ascertained that coke is very largely used there for domestic purposes. Every man who works in the coal mines gets a basket or two of small coal given him free of charge, and most of the miners are reported to help themselves liberally into the bargain. This coal is made into coke and used for cooking. Again, in the east of Govindpore sub-division there are a number of small coal-pits under native management, which export coke to Hooghly and Howrah, where it is sold by retail for cooking. These no doubt are only small beginnings among people who are accustomed to see coal in continual use, who feel the pressure of the high price of wood, and who, as a rule, are not in a position to supply themselves with cow-dung fuel. But the fact that a beginning has been made in a matter where native prejudices are peculiarly strong seems to point to an almost indefinite expansion of coal traffic, directly railways have opened up fresh supplies of coal and made it worth the while of producers to work for the native retail demand. Even now I believe much might be done in the way of popularising the use of coal if the matter could be brought to the notice of natives in some practical way.

69. *Dye-woods*.—Both Hazaribagh and Lohardugga produce excellent indigenous dyes which are used in the manufacture of carpets carried on in the Hazaribagh Jail. A list of

the Lohardugga dyes is given at pages 349-50 of my statistical account of Lohardugga district, forming Volume XVI of Dr. Hunter's Statistical Account of Bengal. The trade may be expected to develop when the railway is opened, but no estimate of the probable exports can be framed.

70. *Grain, Rice.*—The Railway returns for 1882 show the following net exports :—

Bardwan	5,85,084
Kanoo	41,496
Mankur	39,879
Panaghur	4,372
Rajbandh	441
Durgapore	34,007
Ondul	44
Raneegunge	5,91,574
Assensole	1,651
Sitarampore	9,026
Burrakur	41,417
TOTAL	13,49,791

Only 4,098 maunds were registered locally, mostly from Purulia and Jhaldah, showing a yearly average export of 7,020 maunds. The large rice trade from Singhbhum appears to have escaped registration altogether. I have ascertained that 3,000 maunds passed through Chandil between November 1882 and March 1883, destined for Raneegunge and Burrakur. In the District Trade Report for 1881-82 the export of rice from Manbhum only was estimated at 20,000 maunds in 1879-80, and 10,000 maunds in 1880-81. In 1881-82 exportation was said to have stopped owing to the reduced demand consequent on good harvests in Bengal proper; and the local surplus was believed to have been stored awaiting a rise of prices. The district officer on the other hand doubted the existence of any considerable surplus, thinking that most of the rice exported from Manbhum came really from Singhbhum. The registration returns show that rice is exported from Manbhum, but I think they materially understate the quantity. The existence of a large export from Singhbhum is generally admitted. I would estimate the normal exports of both districts at 50,000 maunds; but I anticipate a large increase when the railway is open.

71. *Hides.*—The exports of hides according to the Railway statistics are :—

Bardwan	14,886
Kanoo	225
Panaghur	191
Durgapore	16
Raneegunge	30,555
Assensole	601
Sitarampore	593
Burrakur	1,181
TOTAL	47,748

The local figures show 9,980 *hides* (not maunds) registered at Purulia and 33,289 at Nadiara, being a yearly average of 74,172 hides, or, taking six hides to a maund, of 12,000 maunds. This, however, does not fairly represent the trade of the division. While at Raneegunge in January last, I saw some of the leading hide merchants there, and their statements, though statistically indefinite, went to show that a large proportion of the Raneegunge exports is derived from Chota Nagpore. On a comparison of the Railway figures with the registration returns, and paying due regard to the general opinion as to the magnitude of the trade, I would estimate the quantity of hides to be carried by the new railway at from 25,000 to 30,000 maunds.

72. *Horns.*—Net exports, according to Railway figures, 1,764 maunds, 1,386 from Raneegunge and 320 from Burrakur. None registered locally. The export in 1881-82 was estimated at 1,000 maunds in the District Trade Report.

73. *Hurrah or myrobolans.*—The Railway figures show an export of 7,344 maunds, of which 7,235 are from Raneegunge, the rest being divided between Bardwan, Panaghur and Mankur. Only 108 maunds, destined for Bankoora, were registered locally. The trade, however, is known to be large. The tree (*Terminalia chebula*), which yields myrobolans, grows almost exclusively in Chota Nagpore, and it may safely be inferred that the whole of the export shown in the Railway returns came originally from the districts of this division.

74. *Lac, including lac-dye, shell-lac, stick-lac, and refuse*—Net exports, according to Railway statistics, 1,03,181 maunds divided among the stations as follows :—

Bardwan	141
Mankur	985
Panaghur	23,033
Raneegunge	27,348
Burrakur	48,034
TOTAL	99,541

The local registration returns show—

Govindpore	:	:	:	:	:	:	:	:	:	4,088
Purulia	:	:	:	:	:	:	:	:	:	7,689
Nadiara	:	:	:	:	:	:	:	:	:	24,132

TOTAL . 35,909 for seven months,

representing an average annual export of 61,548 maunds. There is, however, good reason for believing that the local registration understates the magnitude of the trade. The lac factories at Nirsha Chas and Raghunathpore lie outside the circle commanded by the registering stations, and their exports have not been recorded. Again, very little stick-lac is grown in Burdwan and Bankoora. Shell-lac, it is true, is manufactured in large quantities, but the raw material is drawn from Chota Nagpore. It may be assumed therefore that the whole of the Railway exports—in round numbers 1,00,000 maunds—come in one shape or other from Chota Nagpore, and that this quantity will be carried by the new railway for varying distances.

75. *Lime*.—The exports of lime from Burrakur during 1882 amounted to 2,34,366 maunds, all of which come from places in Govindpore to the west of the Burrakur river. In the villages along the Grand Trunk Road between Nirsha and Chirkoonda, there are large surface deposits of *ghooling* or nodular limestone, which are worked for lime. It will be seen from the annexed map that Ritter von Schwarz, Superintendent of the Government Experimental Ironworks at Burrakur, has discovered numerous deposits of pure limestone on the south of the Pachete hill. When the railway is open, these quarries will be able to undersell the small Govindpore quarries mentioned above. They will be closer to the rail, and they will send their produce direct to Sitarampore. Assuming the demand to remain the same—and it would probably increase—the railway might count upon carrying, say, 3,00,000 maunds of lime a year from near the Pachete hill to the Sitarampore station. Again, if the Burrakur Ironworks are started on a large scale, I understand they will require 75,000 tons of limestone a year to supply one large and two blast-furnaces, or 120,000 tons for two large and two small furnaces, as has been recommended by Ritter von Schwarz. The whole or a large portion of this would be carried by the railway, though only for a short distance. The railway would also carry all iron manufactured by the Burrakur Works which may be sent westward. The demand of the Central Provinces is estimated officially at 15,000 tons a year.

Seeds, including mustard, surgooja, and other oilseeds.—The Railway returns show the following statistics :—

Stations.	Exports.	Imports.
Burdwan	3,176	1,74,472
Kanoo
Mankur	164	26,090
Panaghur	7	6,633
Rajbandh	...	35
Durgapore	102	2,311
Raneegunge	56,696	58,724
Assensole	...	1,876
Sitarampore	14	327
Burrakur	...	5,217
TOTAL	60,159	2,75,685

Local registration gives the following results :—

Govindpore	:	:	:	:	:	:	:	:	32,483
Nadiara	:	:	:	:	:	:	:	:	30,979
TOTAL	:	:	:	:	:	:	:	:	63,462

or a yearly average export of 1,08,792 maunds. Most of the exports registered at Govindpore were from Chatra, Bagodar, Burhi and other marts in Hazaribagh; their destinations being Raneegunge, Burrakur and Burdwan. The exports through Nadiara were mostly from Jhalda for Raneegunge, Bankoora and Sonamookhi. It must be admitted that the figures quoted above are rather puzzling. Oilseeds are the chief and most conspicuous export of Chota Nagpore. One sees enormous quantities of them on every road during the cold weather, and, as pack-bullocks are largely employed to carry them, it may be assumed that a considerable proportion of the export escapes registration. Taking the registration figures as they stand without making any allowance for omissions, and merely correcting them so as to represent a full year's export, it will be seen that nearly 50,000 maunds do not reach the East Indian Railway at all. On the other hand the Railway figures show an enormous importation of oilseeds into Burdwan and Bankoora, from which we may infer that these districts grow oilseeds comparatively little and require large quantities of oil. The amount, then, by which the local figures exceed the Railway statistics, represents the consumption of the tract of country lying between the registration stations and the East Indian Railway. The cultivation of oilseeds will probably extend itself remarkably when the railway is opened. It is a kind of cultivation which gives little trouble and which the people understand. No irrigation is needed, and I have seen excellent crops grown between the stumps on land recently cleared from jungle. Within a few years the railway may count upon carrying some 5,00,000 maunds yearly.

77. *Tea*.—The Railway figures show an export of 2,273 maunds, all from Lohardugga and Hazaribagh. In 1880-81 there were thirty-six tea plantations in these two districts.

The industry can hardly be described as remarkably flourishing, but it has the great advantage of cheap labour, and is not likely to die out until the local rates of wages and system of hiring labour undergo some more material changes than can be foreseen at present.

78. *Timber*.—The Railway returns show a slight preponderance of imports over exports, and thus throw no light upon the Chota Nagpore trade. The local registration figures give a total of 11,542 sleepers, registered thus :—

At Govindpore	8,106
„ Purulia	547
„ Nadiara	2,889

Besides sleepers, there is also a considerable export of *rollahs* (sâl saplings) to Burdwan and Bankoora, where they are used for house-posts, rafters, &c. The large demand for these young trees probably does more harm to the forests than that for heavy timber which can only be cut from mature trees. It would be useless to attempt to speculate upon the timber trade that may be carried by the new line. Sources of supply hitherto untouched will be opened up, but the extent to which these will be drawn upon depends upon factors at present unknown—such as the extension of Railways, the system of forest conservancy introduced in zenindari forests, the cost at which iron sleepers can be made, and the like.

79. *Tasar silk cocoons*.—Are exported to Bankoora, Burdwan, Beerbhoom and Azimgarh in the North-West Provinces. The exports for the three years ending 31st March 1882 were estimated as follows in the District Trade Report already referred to :—

1879-80	30,000 Kahans of 1,280 cocoons each.
1880-81	15,000 „
1881-82	7,500 „

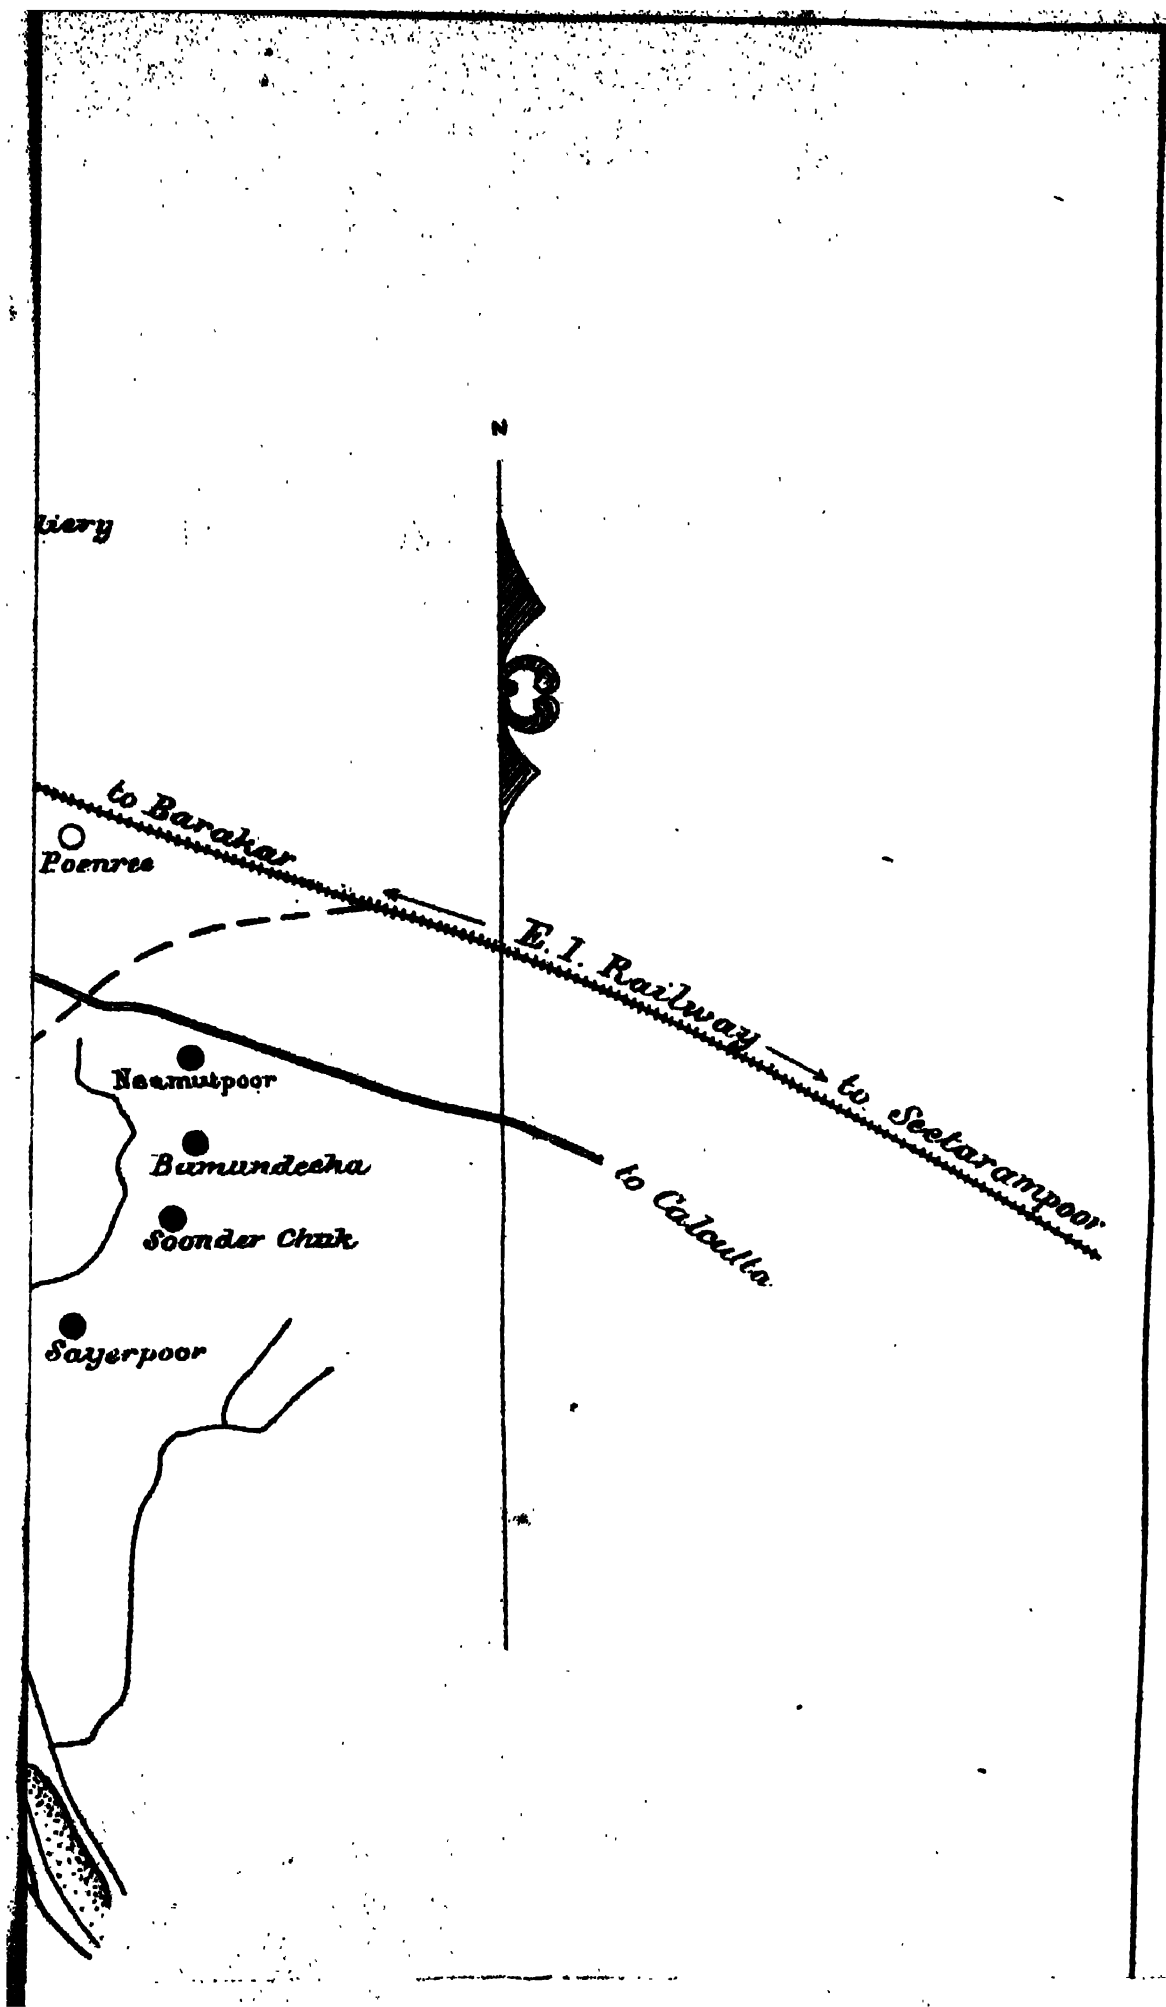

No reliance, however, can be placed on these figures, nor is there any reason for believing that the exports declined during this period so remarkably as the estimate would show. Some special registration started by me in Chandil in November last as a sort of rough check upon the returns given by the *serai* farmer in Purulia shows that 4,077 *kahans* of cocoons passed through the Chandil market between the 20th November 1882 and the 19th March 1883. Cocoons are very light and take up much space in proportion to their weight, so that the trade would not be very important to the railway.

80. *Summary*.—For the sake of comparison, the estimates of the trade in particular articles, attempted in the foregoing paragraphs, are collected and re-stated below in a tabular form. This mode of statement brings out clearly enough the fragmentary and imperfect character of the estimates. No one who possesses a fair general knowledge of Chota Nagpore, and has watched the trade which passes along the main roads will accept my estimate of imports as fairly representing the true demand. At the same time it is difficult to see how the quantities can be materially raised without putting the existing data altogether aside and framing an estimate by mere guesswork. No attempt has been made here to anticipate the enormous extension of the import trade which will follow upon the opening of the railway. At present Chota Nagpore is in a primitive stage of economic development. The price of almost all articles, excepting perhaps salt, is determined more by custom than by competition, and everywhere the tendency is for a small ring of mahajans to frustrate or minimize the operation of pure economic causes by manipulating this customary price in accordance with their own interests. Within the last two years several public markets have been opened in Manbhoom, and the determined opposition offered to these by small cliques of petty dealers has shown very clearly how the country stands in need of the wholesome competition which a railway is likely to introduce—

Imports.	Mds.	Exports.	Mds.
Beer	400	Grass and babooi string	20,000
Hotel-nuts	8,000	Coal	...
Blankets	700	Dye-woods	...
Brass and brassware	2,000	Grain-rice	50,000
Cotton and yarn	12,000	Hides	30,000
Grain, oats	14,000	Horns	1,000
Wheat	10,000	Hurrah or myrobalans	8,000
Other grains and pulses	25,000	Iron	...

Spices	1,500		
Sugar	500		
Tamarind	200		
Tobacco	30,000		
Turneric	5,000		
Wines and spirits	500		
TOTAL	4,28,300		

81. It will be seen that under the head of exports no attempt has been made to estimate the quantities of coal, dye-woods, iron, limestone, and tasar-cocoons which the railway may be called upon to carry. The possible development of rival coal-fields, the success of the Burrakur Ironworks, the demand which may spring up for indigenous dyes, and the prospects of tasar silk in the European market—all these are causes too obscure and too complicated for it to be possible to anticipate their results and express them in a statistical form. It can only be said that these factors may have an important influence on the future of the railway, and that some of them stand a fair chance of coming into play on a large scale within the next ten years.

82. *The Midnapore Route.*—In conclusion, I would add a few remarks upon the so-called Midnapore route, or to speak more accurately, upon the proposal to substitute for the route from Chaibassa to Sitarampore, as laid down by last year's survey, a route from Chaibassa to Calcutta through or near the town of Midnapore. The engineering difficulties to be encountered on this route form, I understand, the subject of a special report by Mr. F. J. E. Spring, and need not be further referred to here. The competition of the canal on the sections from Midnapore to Calcutta has often been discussed before, and it has already been shown that owing to the additional outlay involved in crossing a country intersected by huge tidal rivers, and liable to be flooded on a large scale, the carriage of a ton of wheat from the Central Provinces to Calcutta would be no cheaper by the Midnapore than by the so-called Burrakur route. One point, however,—and that perhaps the most important of all—has not yet been prominently brought to notice. Under ordinary conditions any railway may reckon upon carrying the trade of a strip of a country lying upon either side of the line. How broad the strip may be depends upon circumstances, but it is always a strip. This may be called the normal relation of a railway to the country which it serves, and it is the relation which obtains in the case of the Midnapore route. On the section from Chaibassa to Midnapore the traffic-yielding strip will necessarily be narrow, as it is hemmed in by the hills of the Oriassa Tributary States on the one side and of the Chota Nagpore plateau on the other. The section from Midnapore to Calcutta would command a wide belt of traffic, but here the competition of cheap and easy communication by water has to be considered. On the other hand, the route from Chaibassa to Sitarampore not only has no water communication to fear, but owing to the peculiar conformation of the country both commands the traffic of its own strip and cuts off, so to speak, the traffic of an enormous tract of country to the west, which can only find an outlet by flowing towards the new line. It crosses, as it were, the mouth of an estuary of trade and intercepts its entire contents. This argument, the force of which will be evident from a glance at the annexed trade-map, applies equally to the route through Midnapore itself and to the alternative scheme suggested by Mr. Wilson, Collector of Midnapore, for taking the line to Guwahati, at the junction of the Hooghly and Rupnarain, and connecting it by a steam ferry with the Diamond Harbour line. The latter route may be cheaper than the former, but it has special inconveniences of its own; and if it can be shown that neither will command such a large body of traffic as the Sitarampore route, both are equally condemned.

Despatch from Her Majesty's Secretary of State for India, No. 45, dated the 24th March 1887.

R E S O L U T I O N .

IN Home Department Resolution, dated the 12th February 1886, cited in the preamble, on the subject of the scheme for the establishment of six Government Scholarships tenable in England by Natives of India, it was provided that each scholar should be required to bind himself by a written engagement to submit to such regulations as may from time to time be framed by Her Majesty's Secretary of State for the guidance of the scholars during their stay in England.

With reference to this provision the Secretary of State was asked to lay down such regulations as may be deemed necessary, and the following rules have been prescribed by His Lordship :—

1. Every scholar shall, on reaching England, at once present himself at the India Office, and report his arrival in writing.

2. Every scholar shall, without any unnecessary delay, inform the Secretary of State to which University he intends to proceed, and shall at once take steps to enter himself at the College he has selected, or (with the special permission of the Secretary of State) as a non-collegiate student.

3. Every scholar shall, within four weeks of reaching England, submit for the approval of the Secretary of State a statement showing the general course of study he proposes to follow; and the course approved shall not be changed without the sanction of the Secretary of State.

4. Every scholar shall, at the end of each University term, submit to the Secretary of State a certificate from the proper College or University authority, showing that his residence, conduct, and progress in study have been satisfactory during the term.

5. Every scholar shall at all times obey such instructions as he may receive from the Secretary of State.

6. Subject to a due compliance with the above conditions, the allowance, at the rate of £200 a year for three years, will be paid monthly in advance by the India Office, commencing from the date of the scholar's reporting his arrival in England.

7. Every scholar will forfeit his scholarship who, not being disabled by illness or prevented by any other cause which the Secretary of State may consider sufficient, fails to complete a residence of three years in England, or who is guilty of misconduct or disregard of the orders of the Secretary of State. If a scholarship be forfeited, the scholar will lose his claim to a free return passage to India, and will further become liable to refund the cost of his free passage to England.

The Governor General in Council requests that steps may be taken to cause a copy of these rules to be furnished to each selected scholar on his nomination.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Governments of Madras, Bombay and the Punjab for information and guidance.

Ordered also, that a copy be forwarded to the Governments of Bengal and the North-Western Provinces and Oudh, the Chief Commissioners of the Central Provinces, Burma, Assam and Coorg and the Resident at Hyderabad for information; and to the Registrar of the Calcutta University for information and guidance.

Ordered further that the Resolution be published in the Supplement to the *Gazette of India*.

Weather Review of India for the Week ending 25th Jan. 1888.

The weather of the past week has been very much more unsettled than that of several weeks past, and fairly heavy rain has fallen over nearly the whole of Northern and Central India.

On the 19th the distribution of pressure and the general circulation of the winds were fairly normal, a large area of high pressure, with its apex over the western desert, stretching from North-Western India across the central parts of the country south-eastward as far as Orissa. On the northern side of this high-pressure area the wind was north-westerly and westerly, on its southern side north-easterly and easterly; the weather was fine and dry except at Purneah and Sibsagar. On the 20th a rapid barometric fall was reported from Quetta and the Indus Valley, the wind had shifted to west and south-west in Lower Sind and to south-east at Jacobabad, Ajmere and Indore. Hence a depression appeared to be advancing on our western frontier from Baluchistan. At the same time the high-pressure area had retreated eastward and lay over the Central Provinces and Western Bengal. There was, however, as yet no rain beyond a few drops at Sibsagar. On the 21st a rapid barometric rise had taken place in the north-west of the Punjab, and the barometer had almost ceased to fall in Baluchistan and the Indus Valley. A large diffused depression existed over Sind, Guzerat, Central India and the Berars, and a south-easterly current of air was appearing over Central and a large part of Northern India. This current had occasioned slight rain at Multan, Peshawar and Rawalpindi and slight snow at Murree. On the following day, the 22nd, the depression had become much more distinctly marked, and had its centre over Rajputana. It occasioned a very well defined cyclonic circulation of the winds over a large part of India. Rain had extended to nearly all parts of the Punjab as well as to Sutna, Mt. Abu and Jhansi, and snow was falling at Murree and Simla. By the morning of the 23rd the depression which was rapidly filling up had reached Seoni. Its passage eastward had been accompanied by the extension eastward of the rainfall area, and rain was reported from the greater part of Bengal, from the N.-W. Provinces, the Punjab and several central stations. Snow had fallen over the whole of the North-West Himalaya. On the 24th the depression, which had still further filled up, lay between Raipur and Gopalpore, the barometer had risen over North-Western and Central India, and the weather, except in Bengal, had improved, while the wind directions had become fairly normal again over a large part of the country. At Quetta, however, the barometer had again fallen briskly, the wind shifted to S. S. W., and snow recommenced. On the 25th the barometer was again falling quickly over North-Western India and moderately over most other parts of the country. A fresh depression had appeared near Deesa and a south-easterly current of air was again being developed over Northern India. The sky was overcast over North-Western and part of Central India, and rain had fallen over the Indus Valley, the Punjab and at Roorkee. Snow was falling over the North-West Himalaya from Mussoorie to Murree.

Pressure.—The mean pressure of the week, compared with the normal average of the month, shows a slight excess in Burma, Bengal, the North-Western Provinces, Central India and the Peninsula, and a deficiency elsewhere. The defect was greatest at the hill stations in North-Western India, but was also large at Jacobabad. The excess was greatest in the Peninsula.

Temperature.—The mean temperature has been below the monthly average except in Burma, Ceylon and some places in the Peninsula. The defect was very large on the hills, but was considerable over the whole of North-Western and part of Central India.

Rain—Has fallen in all the provinces except Burma, Bombay and Malabar, though in Ceylon, the Central Provinces and Madras the week's fall was insignificant. Sialkote, Mussoorie and Simla received the largest amount of precipitation, but all over the Punjab and the hills the falls were fairly heavy.

The result of the week's rainfall has been to considerably reduce the deficiency previously existing over Northern India, and indeed at a few places in Western Bengal, the North-Western Provinces and the Punjab the total rainfall since the beginning of November is now in excess of the average.

The concluding table gives the rainfall of the week according to the different provinces.

DIVISIONS.	Number of stations.	Total rainfall.
Burma
Bengal and Assam	10	3'44
North-Western Provinces and Oudh	8	3'24
Punjab	9	6'73
Hill Stations	6	9'01

W. L. DALLAS,

for Meteorological Reporter to the Govt. of India.

Simla, 27th January 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and prospects of the Crops.

Madras.—For week ending 28th January 1888.—No rain except a small quantity in Ganjam and Tinnevely. Rainfall to date generally sufficient except in parts of Madura where wet crops in four taluks are withering from deficient supply of water in tanks. Agricultural operations progressing as usual. Crops good, but slightly damaged here and there by rain, disease or insects. Pasture generally sufficient but scanty in Malabar and parts of Madura and Anantapur and decreasing in Vizagapatam. No material fluctuations in prices. General prospects favourable.

Bombay.—For week ending 1st February 1888.—Rain in parts of Sind, Ahmedabad, Kaira, Baroda and Kathiawar. Standing crops in parts of Shikarpur benefited by it; standing crops in parts of Satara and Baroda and cotton and wheat in Ahmedabad injured by rain or cloudy weather. *Jowari* in parts of Poona, wheat in parts of Porbandar, wheat and gram in parts of Belgaum and wheat and exotic cotton in parts of Dharwar suffering from blight. Harvesting of early crops in progress in parts of Hyderabad, Khandesh, Sholapur and Dharwar, and of late crops in parts of Poona, Ahmednagar, Sholapur, Bijapur and Kathiawar. Cotton-picking continues in parts of Ahmedabad, Broach, Surat and Kathiawar. Standing crops fair in Surat, Belgaum, Dharwar and Colaba, middling in Thana and Bijapur, good in other districts. Probable outturn of late crops from 10 to 14 annas in Ahmednagar. Agricultural stock good except in a few taluks of Hyderabad and in parts of Nasik.

Bengal.—*For week ending 31st January 1888.*—General rain fell during the week, and the weather was much colder than in the previous week. The winter rice has been harvested, the outturn being on the whole somewhat deficient. Rain has benefited the *rabi* and poppy crops which promise well, and has also facilitated ploughing for early rice, jute and indigo. Spring rice is doing well. Sugarcane is being pressed and is yielding a good outturn. Mustard and other early *rabi* crops have begun to be gathered. Mustard is an indifferent crop in Hazaribagh and Manbhoom.

N.-W. Provinces and Oudh.—*For week ending 1st February 1888.*—There has been general and good rain and the prospects of the *rabi* crops are everywhere satisfactory. The poppy crop is flourishing. Markets are amply supplied but prices remain high. The condition of cattle is good.

Punjab.—*For week ending 1st February 1888.*—Rain has fallen throughout the province. Prices are generally stationary though rising in a few districts. *Rabi* sowings completed; barley sowings commenced in the Sialkot district. *Rabi* prospects have improved by the recent fall of rain, but more rain is wanted in some districts. No damage done to crops. Stock cattle are generally healthy except at Shahpur. Fodder is scarce in most districts. Poppy sowings completed.

Central Provinces.—*For week ending 1st February 1888.*—Slight rain has fallen in places and hail in eastern districts which is reported to have caused some damage to crops in Raipur and Bilaspur. Linseed injured in Seoni, Hoshangabad and Raipur and gram and pulses in Saugor and Hoshangabad. Prospects otherwise favourable. Cattle in fair condition.

Burma.—*For week ending 28th January 1888.*—Wet season crops reaped in all districts of the Province except in Kyaukphyu. Ploughing and planting of dry weather crops progressing. Condition of agricultural stock good except in Bassein and Thayetmyo. Estimates of probable outturn of harvest remain unchanged since last report. Price of paddy has risen slightly in the Thayetmyo, Shwebo, Myingyan and Minbu districts and has fallen slightly in the Chindwin district. Slight rain has fallen in the Akyab, Prome and Amherst districts of Lower Burma and in the Bhamo, Myadaung, Shwebo, Chindwin, Myingyan, Minbu and Meiktila districts of Upper Burma.

Assam.—*For week ending 1st February 1888.*—Weather cold and windy. Slight rain fell in most districts doing good to tea seedlings and other crops. Harvesting of cold weather crops almost over. Land is being prepared for summer crops and potatoes are being sown in Hill districts.

Mysore and Coorg.—*For week ending 1st February 1888.*—No rain in Mysore during the week. Sugarcane is being milled and arecanut gathered in parts. Stock cattle in good condition.

No rain in Coorg during the week. Harvesting of rice completed in parts. Threshing has commenced. Prospects good. Prices stationary.

Berar and Hyderabad.—*For week ending 1st February 1888.*—No rain in Berar during the week. Rainfall up to date quite sufficient. Threshing of *jowari*, *tur* and *mung*, and picking of cotton completed in some parts of the province. *Rabi* crops generally promising. Condition of cattle good. Fodder getting scarce in some taluks. No marked changes in the prices of food grains.

Agricultural prospects in Hyderabad continue good. No rain.

Central India.—*For week ending 1st February 1888.*—Slight rain in Gwalior, Goona and Neemuch. Fall of rain in Central India reported sufficient. Agricultural operations completed except in Bhopal, Bundelkhand, and Western Malwa. Standing crops and outturn of harvest generally good, but below average in Western Malwa and Goona. Slight damage to crops in Sirsa by hailstorm.

Agricultural stock everywhere good. Pasturage and fodder good. Prices of food grains rising or high. Opium fairly good.

Rajputana.—*For week ending 1st February 1888.*—Rainfall good for season throughout Rajputana; agricultural operations satisfactory. Standing crops generally good. Harvests good on the whole. Agricultural stock generally good. Pasturage or fodder fairly sufficient. Prices still high in some places. Opium damaged in places.

E. C. BUCK,
Secretary to the Government of India.

Fort William, the 10th February, 1888.

No. 16I. E.—An Investiture of the Most Eminent Order of the Indian Empire was held in Calcutta on Saturday, the 4th February, 1888, at Government House, for the purpose of investing, in obedience to the Command of Her Majesty the Queen, Empress of India, and Sovereign of the aforesaid order, His Excellency the Right Hon'ble ROBERT BOURKE, BARON CONNEMARA, Governor of the Presidency of Fort St. George, with the Insignia of the First Class; the Hon'ble RANA SHANKAR BAKHSH SINGH BAHADUR, C.I.E., of Thalrai, the Hon'ble MAHARAJA PASUPATI ANANDA GAJAPATI RAZ of Vizianagram, SURGEON-GENERAL BENJAMIN SIMPSON, M.D., ALBERT JAMES LEPOC CAPPEL, ESQ., NAWAB ALI KADAR SAYAD HASAN ALI BAHADUR of Murshidabad, MAHARAJA LACHMESSAR SINGH BAHADUR of Darbhanga, BAPU SAHIB AVAR of Gwalior, DONALD MACKENZIE WALLACE, ESQ., and the Hon'ble ALFRED WOODLEY CROFT, C.I.E., M.A., with the Insignia of the Second Class; and of decorating SAIYID AMIR ALI, CAPTAIN CHARLES WEMYSS MUIR, Bengal Staff Corps, FREDERICK THOMAS GRANVILLE WALTON, ESQ., KAZI SAIYID AHMAD, KHAN BAHADUR, and the Hon'ble SAIYID AMIR HUSAIN with the Badge of the Third Class of the Order.

The following Members of the Order, who were summoned, attended the Investiture.

The Hon'ble GREGORY CHARLES PAUL, C.I.E.

The Reverend Father EUGENE LAFONT, S.J., C.I.E.

STEPHEN PAGET WALTER VYVYAN LUKE, ESQ., C.I.E.

The Hon'ble MIR HUMAYUN JAH BAHADUR.

The Hon'ble SIR STEUART COLVIN BAYLEY, K.C.S.I., C.I.E.

MAHAMAHOPADHYAYA MAHESH CHANDRA NYAYARATNA, C.I.E.

JOHN LAMBERT, ESQ., C.I.E.

LIEUTENANT-COLONEL JOHN ROBERTSON, C.I.E.

The Hon'ble SIR CHARLES UMPHERSTON AITCHISON, K.C.S.I., C.I.E.

The Hon'ble RANA SHANKAR BAKHSH SINGH BAHADUR, C.I.E.

The Hon'ble DR. MAHENDRA LAL SARKAR, C.I.E.

NAWAB ABDUL LATIF BAHADUR, C.I.E.

LIEUTENANT-COLONEL DAVID WILKINSON CAMPBELL, C.I.E.

The Hon'ble ALFRED WOODLEY CROFT, C.I.E.

RAI KANHAI LAL DE BAHADUR, C.I.E.

RAJA DURGA CHARAN LAHA, C.I.E.

LIEUTENANT-COLONEL LEWIS CONWAY-GORDON, C.I.E.

DEMETRIUS PANIOTY, ESQ., C.I.E.

BABU SARAT CHANDRA DAS, C.I.E.

COLONEL AUGUSTUS LEMESSURIER, C.I.E.

The Hon'ble LIEUTENANT-GENERAL GEORGE T. CHESNEY, C.B., C.S.I., C.I.E.

The Hon'ble COLMAN PATRICK LOUIS MACAULAY, C.I.E.

The seats of Members of the Order were placed on either side of the Dais, right and left, in alternate order according to seniority.

Preliminary Ceremonies.

There being no Knights Grand Commanders or Knights Commanders present, the Companions of the Order met in the Assembling Tent. A procession was formed of the Members of the Order according to ancient custom, the Junior preceding the Senior Members. As the procession entered the Darbar Tent, a Royal Salute of 31 guns was fired. All present rose and remained standing till the GRAND MASTER took his seat.

The following was the order of the procession:—

The Under-Secretary in the Foreign Department.

The Secretary of the Order.

Companions of the Order of the Indian Empire.

Aide-de-Camp to the Viceroy.

Military Secretary to the Viceroy.

Aide-de-Camp to the Viceroy.

Private Secretary to the Viceroy.

His Excellency the Grand Master, G.M.I.E.

Pages and Attendants of His Excellency the GRAND MASTER.

On reaching their seats the Members of the Order filed off, right and left, and made their reverence to the GRAND MASTER as His Excellency passed. The Band played the National Anthem.

The Secretary then reported that the business was the investiture under the Sovereign's Grants of His Excellency the Right Hon'ble ROBERT BOURKE, BARON CONNEMARA, as a Knight Grand Commandar; of the Hon'ble RANA SHANKAR BAKSH SINGH BAHADUR, Companion of the Most Eminent Order of the Indian Empire, the Hon'ble MAHARAJA PASUPATI ANANDA GAJAPATI RAZ of Vizianagram, SURGEON-GENERAL BENJAMIN SIMPSON, ALBERT JAMES LEPOC CAPPEL, ESQ., NAWAB ALI KADAR SAYAD HASAN ALI BAHADUR of Murshidabad, MAHARAJA LACHMESSAR SINGH BAHADUR of Darbangha, BAPU SAHIB AVAR of Gwalior, DONALD MACKENZIE WALLACE, ESQ., and the Hon'ble ALFRED WOODLEY CROFT, Companion of the Most Eminent Order of the Indian Empire, as Knights Commanders; and the decoration of SAIYID AMIR ALI, CAPTAIN CHARLES WEMYSS MUIR, FREDERICK THOMAS GRANVILLE WALTON, ESQ., KAZI SAIYID AHMAD, KHAN BAHADUR, and the Hon'ble SAIYID AMIR HUSAIN as Companions of the Order.

Investiture of the Knight Grand Commander of the Order.

The Secretary then delivered to His Excellency the GRAND MASTER the Sovereign's Grant of the dignity of Knight Grand Commander.

The Secretary of the Order with the Under-Secretary in the Foreign Department and two Companions (in place of two junior Knights Commanders) then withdrew in order to conduct the Right Hon'ble the BARON CONNEMARA from the Assembling Tent into the presence of the GRAND MASTER.

A procession was formed in the Assembling Tent of—

The Under-Secretary in the Foreign Department, bearing the Insignia of the Order.

The Secretary of the Order.

The two Companions.

His Excellency the Right Hon'ble ROBERT BOURKE, BARON CONNEMARA.

Pages and personal Staff of the Right Hon'ble the BARON CONNEMARA.

The Guard of Honor presented arms as the Right Hon'ble the BARON CONNEMARA passed. All Members of the Order rose and remained standing until the proclamation hereinafter mentioned was made.

The Right Hon'ble the BARON CONNEMARA with the two Companions advanced to within a few paces from the Dais, and the Under-Secretary in the Foreign Department placed the Insignia on the table.

The GRAND MASTER then conferred on the Right Hon'ble the BARON CONNEMARA, the Title, Degree and Honor of a Knight Bachelor of the United Kingdom of Great Britain and Ireland.

The Secretary, having received from the GRAND MASTER and read the Sovereign's Grant in favour of the Right Hon'ble the BARON CONNEMARA, conducted him to the table, and the Junior of the two Companions, receiving the Riband and Badge from the Secretary, decorated the Right Hon'ble the BARON CONNEMARA therewith, and the Senior Companion, receiving the Star of the Order from the Secretary, attached it in its proper place.

The two Companions next robed the Right Hon'ble the BARON CONNEMARA with the Mantle of the Order.

This done, the Right Hon'ble the BARON CONNEMARA was conducted by the Secretary to the front of the Dais, and made his reverence to the GRAND MASTER.

Meanwhile the two Companions withdrew to their places and remained standing.

The Under-Secretary took from the table the Collar of the Knight Grand Commander, and, with due reverence, delivered it to the GRAND MASTER.

The GRAND MASTER, remaining seated, then invested the Right Hon'ble the BARON CONNEMARA with the Collar, and addressed to him the following admonition :—

"In the name of the Queen and Empress of India and by Her Majesty's Command, I hereby invest You with the Honourable Insignia of the Order of the Indian Empire, of which Most Eminent Order Her Majesty has been graciously pleased to appoint You to be a Knight Grand Commander."

A salute of 17 guns was then fired.

When the admonition had been given, the newly invested Knight Grand Commander made his reverence to the GRAND MASTER, and was conducted by the Secretary to the seat appointed for him in front of which he remained standing. The Guard of Honor presented arms, and the Secretary of the Order proclaimed the full titles of the Right Hon'ble the BARON CONNEMARA, that is to say :—

His Excellency the Right Hon'ble Sir ROBERT BOURKE, BARON CONNEMARA, Knight Grand Commander of the Most Eminent Order of the Indian Empire and a Member of Her Majesty's Most Honorable Privy Council.

The proclamation being ended, all resumed their seats.

Investiture of Knights Commanders of the Order.

The investiture of the Knight Grand Commander having been finished, the Under-Secretary in the Foreign Department and two Companions conducted the Hon'ble RANA SHANKAR BAKHSH SINGH BAHADUR, Companion of the Order of the Indian Empire, from his seat to the Dais, where he made his reverence, after which he was conducted by the Secretary to the table.

Members of the Third Class of the Order present rose from their seats.

The two Companions, by desire of the GRAND MASTER, on receiving the Star of the Order from the Secretary, attached it in the proper place. This done, the Hon'ble RANA SHANKAR BAKHSH SINGH BAHADUR was conducted by the Secretary to the front of the Dais, and made his reverence to the Grand Master.

Meanwhile the two Companions withdrew to their places and remained standing.

The Under-Secretary then, with due reverence, delivered the Riband and Badge of the Order to the GRAND MASTER.

The GRAND MASTER next invested the Hon'ble RANA SHANKAR BAKHSH SINGH BAHADUR with the Riband and Badge, addressing him as follows:—

“In the name of the Queen and Empress of India and by Her Majesty's Command, I hereby invest You with the Honorable Insignia of the Order of the Indian Empire, of which Most Eminent Order Her Majesty has been graciously pleased to appoint You to be a Knight Commander.”

The newly-invested Knight then made his reverence to the GRAND MASTER, and was led by the Secretary to the seat appointed for him. Those standing resumed their seats.

Similar ceremonies were observed on the investiture as Knights Commanders of the Hon'ble MAHARAJA PASUPATI ANANDA GAJAPATI RAZ of Vizianagram, SURGEON-GENERAL BENJAMIN SIMPSON, ALBERT JAMES LEPPON CAPPEL, ESQ., NAWAB ALI KADAR SAYAD HASAN ALI BAHADUR of Murshidabad, MAHARAJA LACHMESSAR SINGH BAHADUR of Darbhanga, BAPU SAHIB AVAR of Gwalior, DONALD MACKENZIE WALLACE, ESQ., and the Hon'ble ALFRED WOODLEY CROFT.

On Surgeon-General BENJAMIN SIMPSON, ALBERT JAMES LEPPON CAPPEL, ESQ., DONALD MACKENZIE WALLACE, ESQ., and the Hon'ble ALFRED WOODLEY CROFT being first led up to the Dais and making their reverence to the Grand Master, and before they were invested with the Insignia of the Order, the Grand Master conferred upon them respectively the Title, Degree and Honor of a Knight Bachelor of the United Kingdom of Great Britain and Ireland.

Decoration of Companions of the Order.

The investiture of the Knights Commanders having been finished, the Secretary in the Foreign Department with due reverence presented to the GRAND MASTER a Badge of the Third Class of the Order.

The Under-Secretary in the Foreign Department then conducted Saiyid AMIR ALI to the front of the Dais, where he made his reverence to the GRAND MASTER.

The GRAND MASTER then handed the Badge of the Third Class of the Order for SAIYID AMIR ALI to the Secretary, who attached it in its proper place. Thereafter SAIYID AMIR ALI made his reverence to the GRAND MASTER, and was conducted by the Under-Secretary to the seat appointed for him.

Similar ceremonies were observed in conferring the Badges of the Third Class on CAPTAIN CHARLES WEMYSS MUIR, FREDERICK THOMAS GRANVILLE WALTON, ESQ., KAZI SAIYID AHMAD, KHAN BAHADUR, and the Hon'ble SAIYID AMIR HUSAIN.

The Secretary then represented that there was no further business.

A procession of the Knight Grand Commander, Knights Commanders and Companions of the Order of the Indian Empire was thereupon formed and left the Darbar Tent and returned to the Assembling Tent in the reverse order to that in which it entered, a Grand March being performed and the Guard of Honor presenting arms.

Full dress was worn by all Officers on this occasion, and evening dress by Gentlemen who were not entitled to wear uniform.

By Command of His Excellency the GRAND MASTER,

W. J. CUNINGHAM,

for Secretary to the Most Eminent Order of the
Indian Empire.

SEPARATE REVENUE.

ASSESSED TAXES.

INCOME TAX.

The 8th February, 1888.

No. 676.—In supersession of Notification by the Government of India in the Department of

Finance and Commerce, No. 434, dated the 27th April, 1886, and in exercise of the powers conferred by Section 6 of Act II of 1886, the Governor-General in Council is pleased to exempt from liability to the tax payable under the said Act the income of universities or other associations or bodies existing solely for educational purposes, and of local authorities as defined in Section (3), Clause 1 of the Act.

2. Nothing in this Notification shall extend to interest payable on a Government security in respect of any period (the period running to date of payment of interest from last date of payment thereof) during which a transfer of the security has been effected.

SEPARATE REVENUE. SALT.

The 11th February, 1888.

No. 769.—In exercise of the power conferred by the last paragraph of section 1 of the Indian Salt Act, 1882, the Governor General in Council is pleased to extend to the districts of the Orissa Division, on and from the eleventh day of February 1888, the whole of the said Act with the exception of the following portions, namely:—

- (1) the portions thereof specified in the second paragraph of section 1;
- (2) the words “an Assistant Commissioner of Northern India Salt Revenue, and also includes” in the second clause of section 3;
- (3) the words “any officer of the Northern India Salt Department, and also includes” in the third clause of section 3;
- (4) section 5; and
- (5) section 31.

2. Under the provisions of section 28 of the Act aforesaid the Governor General in Council is pleased to make a rule that any thing to be done under that Act by the Commissioner of Northern India Salt Revenue is to be done in the districts of the Orissa Division by the Commissioner of Salt and Abkari Revenue, Madras Presidency.

No. 771.—The following Rules made by the Governor General in Council in exercise of the powers conferred by the Indian Salt Act, 1882, are published under section 29 of the said Act:—

Preliminary.

1. These rules are applicable to the districts of the Orissa Division only.

Manufacture, Storage, and Sale of Salt under License.

2. No person who is not duly licensed in the manner hereinafter provided shall manufacture salt.

3. Any person wishing to manufacture salt shall apply for a license to the Assistant Commissioner of Salt Revenue in charge of the Division in which it is desired to carry on the manufacture, who may grant or withhold it as he shall see fit.

4. Each such license shall contain the name of the person to whom it is given; shall specify the limits within which such manufacture shall be carried on, and the places where the salt so manufactured shall be stored; shall expire on such date as may be stated therein; and shall be subject to the following conditions:—

- i.—The provisions of the Act and of all Rules duly made under it shall be strictly observed by the licensee, his agents, and servants.
- ii.—None but good salt, capable in the judgment of the Assistant Commissioner of bearing the duty fixed from time to time by the Governor General in Council under section 7 of the Act, shall be manufactured. The Salt Revenue Officer in charge of any Salt Store may refuse to permit the removal of any salt stored therein which he may consider not to be so capable, pending the decision of the Assistant Commissioner. All salt adjudged by the Assistant Commissioner to be inferior shall be destroyed in his presence, or in the presence of such officer as he may depute for the purpose, in such manner as he may direct.
- iii.—On or before the first day of each month during which or any part of which—
 - (a) the manufacture of salt is in progress, or any salt remains unstored, in the licensee's Salt Works; or
 - (b) any salt manufactured by the licensee remains in store in any Salt Store, the licensee shall, if required, pay into such Government treasury or sub-treasury as the Assistant Commissioner shall appoint, such sum as the Assistant Commissioner shall prescribe on account of the cost of the guarding establishments maintained by Government at such Salt Works or Salt Store;
 provided that, when the Salt Works of two or more licensees are so situated that they can be effectively supervised by a single establishment, or that when two or more licensees store their salt in a single Salt Store, one establishment only may be employed for the guarding of such Salt Works or Salt Store, as the case may be, and that the cost of it shall be recovered from the several licensees in such proportions as the Assistant Commissioner may direct.

Provided also that if, after the expiry of the license, it shall be found that the cost (the prescribed pensionary and leave allowance contributions included) of the Government guarding establishments actually employed at the Salt Works and Salt Store during the period of the currency of the license, or the licensee's proportion of such cost, as the case may be, has not exceeded five per centum of the revenue derived by Government during such period from the levy of duty on salt manufactured in the licensee's Salt Works and issued from the Salt Store for consumption on payment of duty, the whole amount of the monthly sums paid as aforesaid shall be refunded to the licensee; and that if such cost or proportion thereof has exceeded five per centum of such revenue, in that case five per centum of such revenue shall be returned.

iv.—No alteration shall be made in the pans, wells, or other plant of the Salt Work as existing at the date of the license without written sanction from the Salt Revenue Officer in charge of the Circle.

v.—Any wilful breach of the conditions of his license by the licensee, or by his servants with his connivance and privity, or by his heirs, administrators or assigns, shall entail forfeiture or suspension of the license at the discretion of the Assistant Commissioner in addition to any penalty which may by law be imposed for such breach.

vi.—All salt remaining in any Salt Work, the license to manufacture salt at which has been cancelled or suspended, shall be stored in the appointed place within fifteen days of the date of such cancellation or suspension; and all salt manufactured in any such Salt Work, which shall be in store at such date or shall subsequently be brought into store as hereinbefore provided, shall be removed on payment of duty within six months of such date. The Assistant Commissioner may cause any salt which may not be so stored after such period of fifteen days, or which may remain in store after the expiry of such period of six months, to be stored, or to be put up to auction, and sold if the price offered be equal to the excise duty leviable thereon, as the case may be. If the Assistant Commissioner shall cause such salt to be stored, the cost of such storage, including the expenses of transport, if any, shall be recovered from the licensee. If such salt be so sold, and if the price bid be less than the excise duty leviable thereon, the Assistant Commissioner may cause the salt to be destroyed in such manner as he shall think fit.

Such licenses shall also be subject to such further conditions as the Assistant Commissioner may from time to time prescribe for the protection of the Government revenue.

5. The licensee shall commence and close manufacture within such dates as may be prescribed by the Assistant Commissioner, and shall at the commencement of each manufacturing season, intimate in writing to the officer in charge of the Circle the number and extent of the pans which he intends to work in that season.

6. The licensee shall fence in the place of manufacture and the drying-grounds, and shall keep the fences in a proper state of repair to the satisfaction of the Assistant Commissioner, and shall refrain from injuring the same by entering or leaving the works by other than the authorised pathways. Permission will not be granted to commence manufacture in any year unless and until this condition is complied with.

7. All salt scraped shall be removed to the drying-ground before sunset of the same day. The officer in charge of the Works may order all salt not so removed to be destroyed in such manner as he shall deem fit.

8. Salt removed to the drying-ground shall be kept there only in such places as may be directed by the officer in charge of the Works.

9. Unless in the case of floods, or from other unavoidable necessity, salt shall be moved from the drying-grounds only to the Salt Store, and to the Salt Store only for the purpose of storage after permission to store has been obtained, at such times and in such quantities as may be ordered by the officer in charge of the Works.

10. In all cases in which he may consider it necessary for the protection of the revenue, the Assistant Commissioner may direct that no salt shall be moved from the drying-grounds to the Salt Store except in sealed bags, into each of which an equal weight or quantity of salt shall be placed, and under a written pass from the Salt Revenue Officer in charge of the Works. Such pass shall specify the name of the manufacturer, the number of his license, the route by which the salt is to be transported, the number of bags, and the date on which the pass is granted. A copy of every such pass shall be forwarded by the officer granting it to the Assistant Commissioner. All salt removed under such pass shall be weighed or estimated by measurement previous to such removal by the Salt Revenue establishments. The bags shall be sewn on the inside and sealed in such manner as the Assistant Commissioner may from time to time prescribe, and shall be conveyed direct and without unnecessary delay from the Works to the Salt Store by the route prescribed in the pass, which shall be delivered for record to the officer in charge of the Salt Store, without removal of the seals or undoing the fastenings or otherwise tampering with the bags or the abstraction of their contents. All expenses connected with the weightment and bagging of the salt and with the sealing of the bags shall be paid by the licensee.

11. If the whole or any portion of a consignment of salt despatched from the Works to the Salt Store be not delivered at the Salt Store within the time mentioned in the pass, or if any bag or bags comprised in any such consignment be found, on arrival at the Salt

Store and on inspection by the officer in charge thereof, to have been tampered with by removal of the seal or seals, or in any other manner, the licensee shall, on demand in writing, pay to the Assistant Commissioner enhanced duty on the said consignment, or on the portion thereof which has not been so delivered, or on the salt contained, at the time of their despatch from the Works, in the bag or bags so tampered with, as the case may be, at such rate as the Assistant Commissioner shall direct, not being more than double the rate for the time being imposed by rule under section 7(a) of the Act on salt manufactured in the Orissa Division; and shall also, if so required, forthwith remove from the Salt Store the said consignment or portion thereof, if subsequently received at the Salt Store, or the bag or bags so tampered with, as the case may be. Any such consignment or portion thereof, if subsequently received at the Salt Store, or bag or bags appearing to have been tampered with, may be detained by the officer in charge of the Salt Store pending the orders of the Assistant Commissioner. If the owner of any such consignment, &c., as aforesaid shall refuse to pay enhanced duty as aforesaid, or if he shall fail or neglect so to pay within seven days after the receipt of demand, the Assistant Commissioner may sell the whole or any part of such consignment, if subsequently received at the Salt Store, in such manner and at such time and place as he may think fit, and may credit the proceeds to Government. Before a demand for enhanced duty is made on a licensee under this rule, the Assistant Commissioner must be satisfied that an offence under section 9 of the Act has been committed, and, where the salt exceeds five sers in weight, he must make the report required by section 13.

Provided always that no such demand for the payment of enhanced duty as aforesaid shall be made if the owner of any such consignment as aforesaid shall satisfy the Assistant Commissioner or his official superior that the failure to deliver the said consignment or any part thereof at the Salt Store within the time specified in the pass, or that the removal of the seal or seals from a bag or bags, or other appearance of tampering with a bag or bags, was due to stress of weather or to accidents occurring to the boats or vehicles used in the transport of such consignment, or to other unavoidable cause beyond his power of control.

12. If the officer in charge of the Salt Store be satisfied that salt delivered to him has been transported according to rule and to the conditions of the pass, if the salt has been removed from the Salt Works under pass, he shall permit the licensee to store the salt.

13. The salt shall be stored in such places and in such manner as the Assistant Commissioner may from time to time authorize and direct by the servants and at the expense of the licensee.

14. All salt shall be stored within forty-five days of the date on which it was made, and within thirty days of the date fixed for the closing of manufacture.

15. The Assistant Commissioner may extend the above periods of forty-five days and thirty days respectively in case storage should be unavoidably delayed by rain or by any other sufficient cause.

16. If a licensee shall fail to store his salt within the periods above prescribed, the officer in charge of the Circle shall take such steps as he may consider necessary for its storage; and the cost of such storage shall be recovered from the licensee.

17. No salt so stored shall be permitted to be removed from the Store on sale and payment of duty until the cost of such storage has been paid by, or has been recovered from, such licensee.

18. The officer in charge of the Circle may refuse to allow the storage of salt which he considers to be insufficiently dried for storage.

19. All salt shall be weighed into store under the supervision and directions of a Salt Revenue Officer of such rank as the Assistant Commissioner shall appoint. The buildings in which storage is made shall be previously approved by the Assistant Commissioner, and shall be divided into compartments in such manner as he shall direct. In each such compartment, so long as so much salt shall be available for storage, an equal weight of salt, not being less than five hundred maunds, shall be stored. No additional storage will be allowed in any compartment from the salt contained in which any removals may have been made, except after the re-weighment of the remainder of the salt and before the resumption of removals from such remainder.

20. The licensee shall keep in a proper state of repair, to the satisfaction of the Assistant Commissioner, all buildings used for the storage of his salt. If he shall fail to begin any repairs which the Assistant Commissioner may order him to make within ten days of the receipt of a written notice from the Assistant Commissioner directing him to make such repairs, or shall fail to complete any such repairs within the time specified in such notice, the Assistant Commissioner may proceed to have such repairs executed, and may recover the cost thereof from the licensee.

21. The licensee shall provide and maintain suitable and secure fastenings to the buildings in which the salt is stored, to the satisfaction of the Assistant Commissioner, for the attachment of locks to be provided by Government. The keys of all such locks will be retained by the officer in charge of the Salt Store, but the licensee will be at liberty to affix his own locks also, provided that he shall always, on the requisition of the Assistant Commissioner or of the officer in charge of the Circle or of the Salt Store, immediately remove his locks.

22. The Assistant Commissioner may, at his discretion, call on the licensee to store any sifted or refuse salt manufactured by him which may be lying unstored within the limits of the Salt Works, or, at the option of the licensee, to destroy the same. If the licensee shall fail either to store or to destroy such salt within ten days of the receipt of the order so to do, the Assistant Commissioner may cause such salt to be destroyed, and may recover the cost of such destruction from the licensee; and the Assistant Commissioner shall have authority to determine finally, and without appeal, whether any salt is sifted or refuse for the purposes of this rule.

23. Unless in the case of floods, or from other unavoidable necessity, no salt shall be removed from any Salt Store except for consumption on payment of duty under a permit.

24. Persons wishing to remove salt from a Salt Store for consumption on payment of duty, shall first pay the charges due thereon into such Government treasury or sub-treasury as may from time to time be appointed, and shall receive in return a receipt.

Fractions of quarter maunds shall be paid for as quarter maunds.

25. The receipt shall be presented with a written requisition to the Salt Revenue Officer in charge of the Salt Store, who will grant in lieu a permit for the removal of the salt, and will depute a subordinate officer to supervise its weighment and issue to the holder of the permit. If, however, the officer in charge of the Salt Store suspect the genuineness of the receipt or other fraud, he may refuse to issue the permit except under security equivalent to the full value of the salt covered by such receipt, together with the duty leviable thereon, and shall refer the case for the orders of his superior.

26. No permit will be granted for the removal of less than twenty-four maunds of salt at one time, except to complete the clearance of a compartment, or as a sample, for which latter purpose one maund of salt may be removed from each compartment on not more than three occasions.

27. Salt will only be issued on such days and at such times as the Assistant Commissioner may appoint for each Salt Store. All salt shall be removed on the day on which it is weighed out, and shall, for this purpose, be placed in bags, to be provided by the holder of the permit to the satisfaction of the officer in charge of the Salt Store, into each of which the same weight of salt shall be placed. When the weighment and bagging of the salt is completed, the bags will be retained, until check-weighed by an Inspector or Assistant Inspector, who will counter-sign the permit, and allow the removal of the salt.

28. If on check-weighment of any consignment of salt by an Inspector or Assistant Inspector as aforesaid it is found to exceed the quantity entered in the permit, the following practice shall be observed by the Inspector or Assistant Inspector:—

(a) If the excess is not more than one per cent., he shall allow the consignment to pass unquestioned.

(b) If the excess exceeds one per cent., he shall—

(1) if the officer in charge of the Circle, and if satisfied on inquiry that an offence punishable under section 9 of the Act has been committed, either detain the whole consignment and make complaint to a Magistrate and institute proceedings with a view to the confiscation of such salt, or release the consignment on payment of such penalty under section 13 of the Act as he may think proper, provided that no salt shall be released on payment of a penalty if the excess shall exceed 3 per cent., except under the orders of the Assistant Commissioner; or

(2) if subordinate to the officer in charge of the Circle, detain the whole consignment and report the matter without delay for the orders of the officer in charge of the Circle, who shall dispose of it in the manner last hereinbefore provided.

29. All salt shall be weighed, both when stored and also when removed on payment of duty, with the scales provided by Government for the purpose, in such manner as the Assistant Commissioner may from time to time direct.

30. No storage or removals of salt will be allowed on Sundays or authorized holidays, or on days on which, in the opinion of the officer in charge of the Store, the state of the weather is such as to render storage or removals inadvisable.

31. Licensees shall furnish the labour for conveying the machines and weights to be used in the storage and removal of salt from the place where they may be to the place where they may be required to be used for storage and removals. The licensee for the storage or removal of whose salt any machines or weights are last used on any day shall supply the labour for replacing the same in the place where they are usually kept, and for cleaning the same to the satisfaction of the officer in charge.

32. Licensees shall be responsible for all damage, other than fair wear and tear, done to machines or weights in the storage or removal of their salt.

33. Nothing in these rules shall apply to the manufacture of salt by or on behalf of Government.

34. The Assistant Commissioner may prescribe all forms necessary for the administration of the Act.

Protected area, and the possession, transport, and sale of salt therein.

35. The area defined for the purpose of section 6, clause (e), round the Salt Works of Orissa shall extend to a distance of two miles from the boundary of each *panga* Salt Work on all sides. Such areas are termed "protected areas."

36. No person shall possess or transport more than one ser of salt within a protected area, unless it be—

- (i) protected by a rawánah;
- (ii) within the boundaries of a Salt Work;
- (iii) in transit from a Salt Work to a Salt Store;
- (iv) in the possession of an officer of Government;
- (v) in the possession of a person licensed under Rule 44.

37. Rawánahs for the transport of salt within protected areas will be issued by the officer in charge of the Salt Store from which the salt is removed, or by such officers as the Assistant Commissioner may appoint for the purpose.

38. Rawánahs shall be current and valid for such periods as the officer issuing them may fix as reasonable and sufficient to allow of the salt reaching its destination or passing beyond the limits of the protected area or areas concerned, as the case may be. The date on which the currency of a rawánah terminates shall be specified therein.

39. An officer issuing a rawánah may specify therein the route by which the salt shall be removed, and such rawánah shall not be valid except along the route so specified. He may also specify the hour at which the currency of a rawánah shall terminate.

40. Every rawánah shall be returned to the Inspector of the Circle in which it was issued, either by hand or by means of a registered letter within seven days of the termination of the period for which it was current.

41. Rawánahs shall always accompany the salt to which they refer, and shall be produced on demand for the inspection of any officer of the Salt or Police Department. Such officer shall be at liberty to endorse such remarks thereon as he may think fit.

42. Any officer of the Salt or Police Department may detain any consignment of salt covered by a rawánah within a protected area for the purpose of weighing the same. Such weighment shall be made by such officer as the Inspector of the Circle may generally or specially appoint for the purpose.

43. If on weighment of salt so detained it is found to exceed the quantity entered in the rawánah, the weighing officer shall proceed as prescribed in Rule 28.

44. The Assistant Commissioner may issue licenses for the possession and retail sale of salt within any protected area, subject to such conditions as he may from time to time prescribe. Such license shall only cover the possession and sale of salt within the licensee's shop, the position of which shall be clearly defined therein.

45. Every person retailing salt under such a license shall keep a register of sales written up daily, and such other accounts as the Assistant Commissioner may prescribe, and shall permit any officer of the Salt Department, of not lower grade than a Sub-Inspector, to examine such accounts on demand, and to weigh the salt in store on his premises.

46. On the arrival of a consignment of salt at the shop of any licensed vendor, he shall within twenty-four hours notify its receipt in writing to the Inspector of the Circle, specifying in such notice the number and date of the rawánah, the quantity and description of the salt covered thereby, and the store from which it was obtained.

47. Every person licensed to sell salt within a protected area under Rule 44 shall, on the first day of each month, submit to the Inspector of the Circle within which his shop is situated a statement signed by him specifying the quantity of salt received and sold by him in the previous month. Such statement shall be in such form and shall contain such particulars as the Assistant Commissioner may from time to time prescribe.

48. Clause V of Rule 4 shall apply to licenses for the retail sale of salt within protected areas.

Disposal of persons arrested.

49. Salt Revenue Officers who may make arrests shall, unless empowered under the ante-penultimate paragraph of section 20, at once send the persons arrested, with any independent witnesses whose attendance they may be able to secure, to the nearest police station, at the same time making a full report of the circumstances under which the arrest was made through the Inspector of the Circle, to the Assistant Commissioner.

Seizure, disposal, or destruction of things liable to be seized or destroyed under the Act.

50. All property seized by Salt Revenue Officers as liable to confiscation under the Act shall be sent for safe custody to the officer in charge of the Circle, or to the nearest Salt Store or police station, as most convenient.

51. When property is sent to a police station, it shall be accompanied by a written request to receive and retain it.

52. When illicitly manufactured salt is thus handed over to the police, the senior police officer present at the station shall, in the presence of the witnesses to the seizure and of the accused person, if present, after weighing and recording the weight of each, take from each distinct kind or quality of salt seized (if there be more than one such kind or quality) three samples of not less than 5 tolahs each, which he shall seal with the official seal of the police station, and, after numbering them, deliver two of them to the officer who made the seizure, recording at the same time, on the printed form of request to receive the property which will be presented to him, a note specifying the total weight of each kind seized, according to the weighments made before him, and the corresponding numbers of the samples. The remainder of the salt and the third sample shall be sealed up with the seals of the officer who made the seizure and of the police station, and shall remain in a secure place in such station till such time as a written order shall be sent by the officer in charge of the Circle either for the destruction of the articles seized, which shall be carried into effect by the officer presenting such request in the presence of some officer of the police station, and the same certified on the reverse of the order, or for the delivery of the same, or part thereof, as the case may be, to the bearer of the order for production in Court.

53. When salt is delivered at a Salt Store for safe custody, the officer in charge thereof shall adopt the same course with respect thereto as is in Rule 52 prescribed for adoption by the police.

54. When a seizure is made by an officer in charge of a Circle in person, or when salt is delivered to any such officer under Rule 50, he may either follow the foregoing procedure, deputing one of his subordinates present at the seizure to take the salt to the police station and receive the samples, or he may himself on the spot take out and seal up the samples and the rest of the seized salt with his own seal. He may then either take the salt seized with him to deposit where he considers it will be safest, or send it for deposit to the nearest or

most accessible Salt Store or police station, to be kept, as in the previous case, until further orders. If, however, an officer in charge of a Circle himself seals the salt, he must, in the event of the identity of the salt produced in Court being denied by the accused, be prepared to attend and prove the same in person.

55. When any property other than illicitly manufactured salt is sent for safe custody to an officer in charge of a Circle, or to a Salt Store, or to a police station, such officer, or the officer in charge of the Salt Store or police station, as the case may be, shall make such arrangements as he shall think fit, and as shall be suitable, according to the nature of the case, for the safe custody of such property, pending the orders of a Magistrate, or of the officer in charge of the Circle, or of the Assistant Commissioner, or of the Commissioner of the Division as the case may be.

56. When anything is seized and detained under the Act or the rules made under the Act, it shall not be released until all duty, penalties, and charges due on account thereof have been paid by the owner to the officer who is in possession of such thing.

If the thing is reported for confiscation, it shall not be released unless orders for the release are received from competent authority.

57. If the property so seized and detained shall be an animal, the owner shall provide for its due care and keep, in default of which the animal may be sold to defray charges.

58. If orders are received from competent authority for the release of anything seized and detained, and no duty or penalty is payable in respect of such thing, it shall at once be given up to the owner or his agent on his paying all charges incurred.

59. Should no one be present to receive the thing released the officer in charge thereof shall do his best to give notice to the owner of the order of the release, and shall cause a similar notice to be affixed on the office premises, at the Assistant Commissioner's office, and at the police station nearest to the owner's residence.

If within two calendar months from the date of the notice no person, entitled to receive the thing, claim it and pay all charges incurred, it shall be sold and the proceeds placed in deposit. After a further period of three calendar months, the money shall be credited to the Government.

60. If any duty is leviable or penalty is imposed by competent authority in respect of the thing seized, unless such duty or penalty, together with all charges incurred, be paid within seven days of the receipt of the orders of competent authority for release subject to such payment, the thing shall be sold, and from the proceeds the duty, penalty, and charges shall be deducted, and the balance made over to the owner or his agent.

Should no one be present to receive the money, notice, as under Rule 59, shall be given, the money being kept in deposit for three calendar months.

If not claimed within the period, it shall be credited to the Government.

61. When orders are received from competent authority for the confiscation of anything seized and detained, it shall, with all convenient despatch, be sold or destroyed as the Assistant Commissioner of Salt Revenue may direct.

62. When a Magistrate orders the confiscation of works, materials or implements under section 9 of the Act, they shall be sold or destroyed by dismantling or otherwise under the orders of the Assistant Commissioner of Salt Revenue.

General.

63. All Salt Revenue Officers and all gazetted officers of other departments shall at all time have free passage over all works for the manufacture of salt at which a license has been granted under these rules.

64. The Assistant Commissioner may establish such guard stations at and around Salt Works and Salt Stores as he shall think necessary for the safety of the revenue, and may require that all salt removed from Salt Works for transport to a Salt Store, or from a Salt Store for consumption on payment of duty, shall be taken direct to such guard station as he shall prescribe for examination and comparison with the quantity and other particulars entered in the pass or permit. The Salt Revenue Officer in charge of any such guard station may detain any such consignment of salt which he may find not to correspond with the entries in the pass or permit, pending the orders of the officer in charge of the Circle.

65. Under such general rules as the Assistant Commissioner shall prescribe, all Salt Revenue Officers, not below the rank of Assistant Inspector, shall be at liberty to examine and weigh the salt in store in any Salt Store at any time.

66. The licensee and his servants shall have access to the places where salt is manufactured and stored only during such hours as the Assistant Commissioner may fix for the purpose.

Appeals.

67. Subject to the provisions of these Rules, any person dissatisfied with an order passed by a Salt Revenue Officer may appeal to the immediate superior of such officer. All such appeals shall be accompanied by authenticated copies of the orders appealed against, and shall be forwarded through the officer whose orders are appealed against. For the purposes of this rule, the immediate superior of an Assistant Commissioner, who is an Assistant Commissioner of the Madras Salt Department, shall be the Deputy Commissioner of Salt and Abkari Revenue of the Northern Division, Madras Presidency, and the immediate superior of an Assistant Commissioner, who is a Deputy Commissioner of the Madras Salt Department, shall be the Commissioner of Salt and Abkari Revenue, Madras Presidency. An order passed on an appeal by the Commissioner of Salt and Abkari Revenue, Madras Presidency, shall be final.

PAPER CURRENCY.

PUBLIC WORKS DEPARTMENT.**NOTIFICATIONS.**

Fort William, the 4th February, 1888.

No. 41.—CORRIGENDUM.—In Public Works Department Notification No. 16, dated 14th January, 1888, placing Colonel A. LeMessurier, R.E., on special duty, for 19th December, 1887, read 16th December, 1887.

No. 42.—Rai Sahib Dharm Sing Soin, Assistant Engineer, 1st grade, temporarily employed in the Punjab, is permanently transferred to that Province from the Local Administration List.

No. 43.—Lieutenant Philip Geoffrey Twining, R.E., is appointed to the Department as an Assistant Engineer, 2nd grade, and posted to State Railways.

Lieutenant Twining is placed at the disposal of the Director General of Railways.

No. 44.—The services of Mr. R. T. Denne, Executive Engineer, 4th grade temporary rank, State Railways, temporarily employed in Baluchistan, are placed at the disposal of the Bengal-Nagpur Railway Company.

The 6th February, 1888.

No. 45.—Mr. C. J. K. Watson, Executive Engineer, 3rd grade, Bengal, is temporarily transferred to the Accounts Branch, with the temporary rank of Examiner, 4th class, 3rd grade, and is posted to the Office of the Examiner of Public Works Accounts, North-Western Provinces and Oudh.

The 7th February, 1888.

No. 46.—Lieutenant-Colonel W. J. Engledue, R.E., Executive Engineer, 1st grade, State Railways, attached to the Office of the Consulting Engineer to the Government of India for Railways, Calcutta, is granted special leave for one year, under the terms of Public Works Department letter Nos. 1940—41 G., dated 3rd October, 1887, with effect from the 15th March, or from such date as he may avail himself of it.

The 8th February, 1888.

No. 47.—Mr. H. A. D. Wathen, Deputy Examiner of Accounts in the Office of the Examiner of Guaranteed Railway Accounts, Madras, is granted furlough out of India for eighteen months, under Section 50 of the Civil Leave Code, with effect from the 1st March, 1888, or such subsequent date as he may be permitted to avail himself of it.

No. 48.—The following postings are ordered in the Superior Accounts Branch :—

Mr. J. S. Partridge, Examiner of Accounts on being relieved of his duties on the Madras State Railways, is appointed Government Examiner of Accounts, Southern Mahratta Railway.

Mr. F. Morrison, Government Examiner of Accounts, Southern Mahratta Railway, on being relieved by Mr. Partridge, is appointed Examiner of Guaranteed Railway Accounts, Madras.

The 9th February, 1888.

No. 49.—The following is published for general information :—

No. 261G.

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
GENERAL.

CIVIL ENGINEERS' PROVIDENT FUND.

Fort William, the 2nd February, 1888.

Read again—

Public Works Department Resolution No. 1525 G., dated 5th August 1887.

Read also—

Letter No. 3148 G., dated 6th October 1887, from the Government of Bengal, enquiring whether the rules for admission of Officers of the Telegraph Department to the Civil Engineers' Provident Fund were likely to be made applicable to the Officers of the Traffic Department of State Railways.

RESOLUTION.—The question of the admission of members of the Superior Revenue Establishment of State Railways to the benefits of the Civil Engineers' Provident Fund having been under consideration, His Excellency the Governor General in Council is pleased to decide that pensionable Civil members of the Superior Revenue Establishment of State Railways, who, by the orders of Circular No. 1 Railway, dated 26th January 1883, are excluded from participation in the benefits of the State Railway Provident Institution, are admissible to the Civil Engineers' Provident Fund under the rules published with Resolution No. 1525 G., dated August 5th, 1887.

2. Arrears in one sum may be paid by an Officer of the above class, joining the Fund, for the whole or any portion of the period between the 1st January 1886, when subscriptions to the State Railway Provident Funds were disallowed, and the date of joining the Civil Engineers' Provident Fund, provided that in the case of officers now in India, no arrears shall be allowed to be paid later than the 30th April next; and in the case of officers on leave out of India, that no arrear payments shall be allowed after the expiry of 3 months from their return from leave. All payments of arrears should be supported by a certificate from the Examiner or Accountant General holding the subscriber's Leave and Service Register, who will be responsible for seeing that such payments do not exceed the maximum limits admissible.

3. The following words should be added to Rule I of the Rules for the Civil Engineers' Provident Fund, published with Public Works Department Resolution No. 1525 G., dated 5th August 1887 :—

5. All Civil Officers of the Superior Revenue Establishment of State Railways, who are pensionable.

And the following to Rule II, Clause 2 :—

The Officers of the State Railway Superior Revenue Establishment to whom these rules apply must be pensionable, and consequently appointed before 1st September 1881. Hence in their case the deposits are purely voluntary.

ORDER.—Ordered, that this Resolution be forwarded to all Local Governments and Administrations and the Officers noted on the margin, and to the Department of Finance and Commerce. Also that it be published in the *Gazette of India* and all local gazettes.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma ^{Upper}/_{Lower}, Assam, and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General for Central India, Rajputana, and Biluchistan.
The Accountant General, Public Works Department.
The Inspector General of Military Works.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Central Division, and Lucknow.
The Director General of Telegraphs in India.
The Superintendent of Works, Simla Imperial Circle.

The 10th February, 1888.

No. 50.—Captain R. O. Lloyd, R.E., Executive Engineer, 2nd grade, on return from field service, reverted to the Public Works Department, with effect from 2nd February, 1888.

No. 51.—Mr. C. A. B. Target, Executive Engineer, 1st grade, Rajputana, temporarily employed under the Madras Government, is transferred to Burma Provincial Establishment.

No. 52.—Rai Amrito Lall Roy Chowdry Bahadoor, Executive Engineer, 2nd grade, Bengal, is transferred temporarily to Madras.

No. 53.—The services of the undermentioned officers are temporarily placed at the disposal of the Punjab Government for employment on the Patiala-Bhatinda Railway :—

Mr. W. A. Lesmond, Executive Engineer, 2nd grade, State Railways.

Mr. R. L. Campbell, Executive Engineer, 4th grade, sub. *pro tem.*, State Railways.

R. C. B. PEMBERTON, Colonel, R.E.,
Secretary to the Government of India.

WOOD FUEL.

NOTICE TO MANAGERS OF MILLS, BREWERIES, ICE COMPANIES, TANNERIES, BRICK-BURNERS, COMMISSARIAT OFFICERS, SUPERINTENDENTS OF JAILS, AND OTHER LARGE CONSUMERS OF FUEL.

Wood fuel, chiefly sal, thoroughly dry, having been cut two years ago, is available in the quantities and at the places stated below :—

		Maunds.
Oudh Forest Depot near Lucknow-Sitapur Railway City Station . . .	Lucknow	39,300
Oudh Forest Depot near Oudh and Rohilkhand Charbagh Railway Station . . .		
Oudh Forest Depot near Bahramghat Railway Station . . .	Bahramghat	43,700

Tenders for the purchase of the whole, or portions of the above in even hundreds of maunds, will be received by the Conservator of Forests, Oudh Circle, Camp *via* Lucknow, up to the 25th February, 1888. The maund is the Government maund of 82½ pounds. The fuel to be removed by purchasers into their own carts and removed from Depôts (unless specially agreed upon otherwise) within a month of acceptances of tender.

Fuel to be paid for on delivery of each 100 maunds.

Ten per cent. earnest-money will be required before the purchase is considered as completed; this will remain with Conservator for the payment of the last 1/10th of the amount purchased.

Conservator is not bound to accept the lowest or any tender. The fuel can be seen by applying to the Muharrirs in charge of the Depôts.

The Lucknow-Sitapur Railway having now reached the Government Forests in Kheri, wood fuel can be supplied in large quantities annually either in Lucknow, Sitapur, or in the Forest. Arrangements can also be made for the supply of large quantities of tanning and paper mill materials.

E. WOOD, Captain,

Conservator of Forests, N.-W. P. & Oudh,

Oudh Circle.

JOHN ELIOT,

Offg. Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows:—

Terms of subscription, payable annually in advance.		
For the complete Series, including postage		
	Without postage.	With postage.
	R10 0	R12 0

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 10th February, 1888, and is hereby promulgated for general information :—

ACT NO. II OF 1888.

An Act to provide for the levy of a Customs-duty on Petroleum.

WHEREAS it is expedient to provide for the levy of a customs-duty on petroleum ; It is hereby enacted as follows :—

I. To the second schedule to the Indian Tariff Act, 1882, the following shall be added, namely :—

Addition to Schedule II, Act XI, 1882.

No.	Names of Articles.	Per	Tariff valuation.	Rate of Duty.
5	Petroleum, including also the liquids commonly known by the names of rock-oil, Rangoon oil, Burma oil, kerosine, paraffine oil, mineral oil, petroline, gasoline, benzol, benzoline, bensine, and any inflammable liquid which is made from petroleum, coal, schist, shale, peat or any other bituminous substance or from any products of petroleum	Imperial gallon.	...	Six pies.
	<i>Exception.</i> —Petroleum which has its flashing point at or above two hundred degrees of Fahrenheit's thermometer and is proved to the satisfaction of the Customs-collector to be intended to be used exclusively for the batching of jute or other fibre or for lubricating purposes.			

VIII of 1878. And whereas the provisos to section 37 of the Sea Customs Act, 1878, do not apply to goods to which a rate of duty is not already applicable; It is further enacted as follows :—

2. The rate of duty applicable to petroleum Commencement of of which the bill-of-entry effect of the addition to is delivered, within the the schedule. meaning of section 37 of the Sea Customs Act, 1878, to the Customs-collector under section 86 of that Act after the passing of this Act, shall be the rate of duty specified in the second schedule to the Indian XI of 1882. Tariff Act, 1882, as amended by this Act.

S. HARVEY JAMES,
Secretary to the Government of India.

The following Report of the Select Committee on the Bill to provide for the levy of a Customs-duty on Petroleum was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 10th February, 1888.

LEGISLATIVE DEPARTMENT.

WE, the undersigned, Members of the Select Committee to which the Bill to provide for the levy of a Customs-duty on Petroleum was referred, have considered the Bill and have the honour to submit this our Report with the Bill as amended by us annexed thereto.

2. We have proposed the imposition of a duty of six pies per imperial gallon instead of an *ad valorem* duty of five per cent., and the exception from liability to the duty of petroleum which has its flashing point at or above two hundred degrees of Fahrenheit's thermometer and is proved to the satisfaction of the Customs-collector to be intended to be used exclusively for the batching of jute or other fibre, or for lubricating purposes.

3. We do not consider that the Bill need be re-published, and we recommend that it be passed as amended by us.

Debates of the Legislative Council of His Excellency the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR
GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING
LAWS AND REGULATIONS UNDER THE PROVISIONS OF
THE ACT OF PARLIAMENT 24 AND 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 3rd February, 1888.

PRESENT :

His Excellency the Viceroy and Governor General of India, K.P., G.C.B.,
G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I., C.I.E.
The Hon'ble Lieutenant-General G. T. Chesney, R.E., C.B., C.S.I., C.I.E.
The Hon'ble A. R. Scoble, Q.C.
The Hon'ble Sir C. U. Aitchison, K.C.S.I., C.I.E., LL.D., D.C.L.
The Hon'ble Sir C. A. Elliott, K.C.S.I.
The Hon'ble J. Westland.
The Hon'ble Rana Sir Shankar Bakhsh Singh Bahadur, K.C.I.E.
The Hon'ble Syud Ameer Hossein, C.I.E.
The Hon'ble Rájá Peári Mohan Mukerji, C.S.I.
The Hon'ble W. S. Whiteside.
The Hon'ble G. H. P. Evans.
The Hon'ble J. W. Quinton, C.S.I.
The Hon'ble R. Steel.
The Hon'ble Sir Dinshaw Manockjee Petit, Kt.
The Hon'ble F. M. Halliday.

INDIAN TARIFF ACT, 1882, AMENDMENT BILL.

The Hon'ble MR. WESTLAND moved that the Bill to provide for the levy of a customs-duty on petroleum be referred to a Select Committee consisting of the Hon'ble Messrs. Scoble, Whiteside, Steel and Halliday and the Mover, with instructions to report in one week. He said :—

“ Last week I explained to the Council that I would on that day week propose that the Bill for the levy of a customs-duty on petroleum should be taken

into consideration by the Council. But since then some circumstances have been brought to my knowledge which render it desirable that the Bill should be laid before a Select Committee before it is brought up before Your Excellency's Council. In the first place, there is a difficulty in the definition which we have applied to petroleum. It has been explained to us that this definition covers not only illuminating oils, which we ordinarily understand by petroleum, but a number of oils which are used for such purposes as lubricating and 'batching'—a process in the preparation of jute for manufacture. It is not our intention to impose a tax on lubricating or batching oil; and if we can by amending our definition more accurately exempt these oils from the operation of the duty, it is desirable to do so. Then, besides this my hon'ble friend Mr. Steel has brought to my notice that, owing to circumstances connected with the trade in petroleum, there are reasons why it is desirable that, in lieu of an *ad valorem* duty, a duty of so much per gallon ought to be adopted. My hon'ble friend will, no doubt, explain this matter in full to the Council, but, as the proposition has been made, I think it is desirable that it should be considered with more deliberation than can be done at a meeting of this Council. I therefore propose that the Bill be referred in the first place to a Select Committee. We shall lose a week's revenue at least by this step, but, considering the support which Your Lordship's proposals have received from the mercantile community, and even from the firms which are engaged in the import of petroleum, I think it is desirable that we should meet their convenience by examining the details of the Bill in the light of the opinions which they have given us. I hope by this means to be able to produce the Bill before the Council after another week in a form in which it will be possible for the Council to pass it."

The Hon'ble SIR DINSHAW MANOCKJEE PETIT said :—"Not having read the statement of the financial position of the Government of India which the Hon'ble Mr. Westland had placed before the Council at the last meeting in moving for leave to introduce the Bill for the imposition of a duty on petroleum, I was not able to express an opinion on the question then; but now that I have gone through this statement I see that the major portion of the loss which the Government has sustained was owing to the low rate of exchange, over which no one had any control, and in order to recoup this loss to some extent I am of opinion that an *ad valorem* duty on petroleum appears to be the least objectionable. Kerosine is now largely used by even the poorest classes. Take, for instance, a family consisting of four persons of this class; the weekly consumption of this oil among them is very often less than one quart bottle; and, if a duty of five per cent. is imposed on a 10-gallon case holding about 48 quart bottles and worth from Rs. 3 to Rs. 5 according to quality, the amount of duty, say, on a case worth Rs. 5, would be four annas (or 48 pies), and that is about one pie a quart bottle. Consequently this duty will not prove at all oppressive even on the poorest classes. I see that an objection in some quarters has been raised against the increase in the salt-tax of an additional duty of eight annas per maund; but, if the figures on this question are gone into, it will be found that this increase would be as little felt by the masses as would the duty on petroleum. As circumstances have arisen which necessitate the imposition of a duty on petroleum, and as this imposition would not, as I have above shown, at all affect the poor, I have nothing to say against its being levied.

"To recoup the continued heavy loss which has to be sustained every year in exchange, and which loss may hereafter still increase since exchange has fallen within a short time from 1s. 7d. to 1s. 5d., and may go still lower to 1s. 3d., I have to suggest that the question of imposing an import and export duty be considered, and for this purpose Government should, if it think it advisable, ask for the opinions of well experienced European and Native merchants in the three Presidencies, to see what their feelings and views on the subject are."

The Hon'ble MR. STEEL said :—"In the remarks which I propose to make I will, in the first place, address myself to the subject of the Bill now before the Council.

"I take no objection to the principle involved in the taxation of imported petroleum. On the contrary, I am convinced that, if additional revenue be required, there is no less objectionable source from which it can be drawn. I would have preferred that the amount of the duty had been fixed at an anna per gallon, which would have produced 20 lakhs, as it appears doubtful policy to impose a tax which will yield but 6½ lakhs of revenue. Even the higher rate of duty would not, in my opinion, materially affect the consumer, nor impede the development of trade. A tax on petroleum possesses the important advantage that it will involve little wastage for the cost of collection. The revenue derived from it promises to increase steadily from year to year, and will eventually be a valuable resource. But, while approving of the principle of the Bill, I desire to suggest that it may be greatly improved by substituting a tax on measurement for an *ad valorem* duty. A tax on value will give rise to disputes in appraising the oil. It will tend to discourage imports of the purer qualities of oil, and will encourage shipments of the cheaper and more dangerous kinds such as have in former years caused much trouble to Government. There is another objection to an *ad valorem* duty on this article. The value of a case of petroleum consists in about equal proportions of the cost of the oil itself and that of the tins and box in which it is packed. Now, if oil be imported in tanks and landed in bulk, such oil would practically be admitted at one-half the duty imposed on goods landed in the customary packages. I believe there is a probability that Russian oil may soon be imported in tanks. I am in a position to inform the Council that importers would prefer a duty of 4 annas per case of 8 imperial gallons, which would yield 10 lakhs of revenue, to the 5 per cent. duty on value proposed in the Bill and estimated to produce 6½ lakhs. Any oil imported in bulk might pay the same duty of half an anna per imperial gallon. I trust these suggestions may be considered by the Select Committee. The hon'ble member has explained to us that the second clause of the Bill is designed to make it clear that the immediate operation of the law will not be limited or restrained by the reservations of the Sea-customs Act, which, if they had applied, would have permitted shipments cleared for an Indian port before the passing of the Bill to escape free of duty. On this point I entirely agree with my hon'ble friend. In the case of the recent enhancement of the salt-duty, the effect of section 37 of the Sea-customs Act has certainly been to benefit individuals at the cost of the public revenue. I should be glad to see the recurrence of such an anomaly prevented, and would be prepared to support a modification of the law repealing the clause in question. While on this point I must express the surprise and regret with which I have seen blame imputed to Government for enhancing the salt-duty by an executive order. Speaking on behalf of the mercantile community, I do not hesitate to say that any other course would have involved most serious loss to the revenue, for which Government would have been justly held responsible. The unfortunate proviso of the Sea-customs Act to which I have referred has put 10 lakhs into the pockets of individuals at the cost of the public. A fortnight's notice of your intention would have doubled the loss to the country.

"The writers in the press seem to be ignorant that Government possesses statutory power to increase the salt-duty to any point within three rupees per maund without legislation—a power that is confined to salt. Another complaint advanced in the press is the alleged loss which has fallen upon the owners of bonded salt in consequence of the imposition of the enhanced duty. I have made particular enquiries into this allegation, and it may be of interest to the Council if I explain the facts. The great bulk of the Liverpool salt in bond is owned by a syndicate of Native salt-dealers. These gentlemen are also the owners of a much larger quantity of salt on the way which will escape at the old duty. The immediate effect of the change has been to increase the value of floating salt by ten rupees a ton, and to depreciate that of bonded salt by three rupees a ton. On the balance the syndicate will be gainers of a very large sum. One European firm stands in the same fortunate position. The Bombay salt in stock yields a large profit to the owners, as the duty was paid in Bombay at the lower rate at the time of shipment. The only other interest to be considered is that of the Muhammadan importers of Kurcuch salt from Aden and Jeddah. These mer-

chants are the owners of about three lakhs of maunds of bonded salt, the value of which is temporarily depreciated, and I originally feared they might be losers by the change. Yesterday, however, the three principal merchants called upon me to explain their position and ask my advice. Their spokesman, who is a gentleman of great intelligence and polished manners, answered with perfect frankness the questions I addressed to him; and it appears that, while losers in respect of their bonded stock, they have been the owners of a considerable quantity of salt afloat, by which they will make more than they will lose. Their complaint when analyzed amounted merely to their objection that, while the change in the duty had given a great profit to their neighbours, it had given them little advantage. The deputation left me, as I believe, perfectly satisfied with the explanations I gave to them. It is thus evident the owners of bonded salt have suffered no hardship.

"I will now take advantage of this opportunity to make some general remarks suggested by the statement of the Hon'ble Finance Minister. The public will regard with particular satisfaction the fact that such a statement has been submitted to us. It will be recognized that, by the adoption of such an unusual course, Your Lordship's Government has shewn in the most practical form a desire to obtain for your measures the support of public opinion. It will be believed that on this mark of your confidence we may found the hope that Your Lordship's powerful advocacy will be given to that demand for a modification of the Council's Act which has recently been expressed with a unanimity almost unexampled in Indian experience.

"The hon'ble member began his speech by repudiating the assumption that our present annual rate of expenditure can only result from extravagant administration. On this abstract question his defence was complete. He shewed that the ordinary expenditure on administration has only increased by two millions or 3 per cent. in ten years—a period which has probably added 15 per cent. to the population. So far from agreeing with those who charge the Government with extravagance, I believe it is far more open to criticism on the ground of penurious reluctance to incur expenditure for the better administration of justice and the increasing requirements of advancing civilization. On the subject of military expenditure the public is not in a position to offer intelligent criticism. Your Lordship's military advisers must be the judges of the value and necessity of military works. We have every reason to entrust them with our fullest confidence. We hold Government responsible for making us safe against any possible enemy—so safe that no one shall venture to attack us. Expenditure may be nothing more than a premium of insurance against panic and the reckless waste it occasions; but, even so, it is money well spent. And, if this responsibility is thrown upon Government, we must not grudge the means necessary for its efficient discharge. Nor do I complain that an unreasonable share of the cost of our defence will be thrown upon the coming year. I think the hon'ble member's views are entitled to generous support as those of a cautious and courageous financier.

"And now, my Lord, I must say something concerning the means adopted by Government for the restoration of financial equilibrium; and such value as this debate may possess will be derived from the expression of public opinion on this subject. As these measures have already been taken, and as we are now discussing what has been already done, and not what is yet to do, the debate is necessarily rather of an academic than a practical character. I trust, however, that the Council will not complain if I avail myself of this rare opportunity to offer some observations on the general subject of the comparative merits of direct and indirect taxation. The intelligent Englishman is apt to regard this comparison from the standpoint of his own experience. He knows that in his own country an income-tax yields without trouble a very large revenue. He knows that the proportionate cost of collection is small. He is a free-trader, and he knows that, if import-duties are to provide an important share of the British revenue, they must be exacted on a scale which will greatly curtail the volume of imports. He knows that, as trade is but another name for barter, a restriction of imports

would involve a diminished demand for English industrial products, now taken by other countries as payment for the goods which England imports. As an enlightened disciple of free-trade principles, he knows how the interests of England are best served. But when such a man turns his attention to Indian finance he will have much to learn. He will find that a six-penny income-tax produces but a small amount of revenue: that of that amount 8 per cent. is wasted in the cost of collection. He will be told that an income-tax is obnoxious to every body; that it harasses not only those who pay, but also those who should not be asked to pay but who are worried with demands which it costs them much trouble and expense to set aside. For myself I may say that, while I have always considered an income-tax correct in theory, the experience of the last two years has greatly increased my objections to it on practical grounds. When the enquirer turns to examine the incidence of indirect taxation in India he must be prepared for a new revelation. He will find that a salt-duty produces a large revenue without complaint from any quarter; that my hon'ble friend by a stroke of the pen can find a million and three-quarters of revenue which will not cost an additional rupee to collect; that the consumer, who will now be taxed a half-penny per month for his salt, will continue to use as much as he wants, and that, if the tax were a farthing per month, he would use no more; that there will be as little cause for complaint now the duty is increased as there was for gratitude when it was recklessly reduced. I have every confidence that the duties on salt and petroleum will not in the slightest degree limit the consumption; that our English and American friends will send us as much salt and petroleum as before, and will take from us as much of our produce in exchange. But, having said so much in favour of indirect taxation, I may be asked why I do not push my argument to its legitimate conclusion and advocate the re-imposition of the import-duties on piece-goods and the immediate abolition of the income-tax. My reply to this must be that I see no use in discussing a matter outside the range of practical politics. I think the duties were rashly taken off, but under present circumstances I know we will not be allowed to re-impose them.

"And now, my Lord, I will venture to say that it will be a mistake if this debate is allowed to take too gloomy a tone. We have much reason to look forward with hope to the future. Agriculture, the great stand-bye of the Empire, is flourishing as it never flourished before. The manufacturing interests are prospering and developing to the great benefit of the country. Trade is growing in magnitude. Communications are being rapidly improved. Our debt, although large, is amply covered by the value of State property. Burma will soon be peaceful and prosperous. Our frontier defences will before long be in a satisfactory condition. In your recent speech, my Lord, you attracted the sympathy of the country by the expression of your regret that it should have been your unpleasant duty to add to the burdens of the people. But the day may not be far distant when some Viceroy (I hope in the interests of the Empire it may be yourself) will have the pleasant task of remitting taxation on justifiable grounds. When that day comes, I trust you will be able to consult your Legislative Council, and we are ready with our programme. I trust the court-fees will be reduced and the rice-tax remitted. The obnoxious income-tax should be the next to go, and when any further power of remission remains we will not complain if our Finance Minister tampers with the salt-duty."

The Hon'ble MR. EVANS said:—"I am not an expert in financial matters, but having watched with interest the course of Indian finances from 1878, when I first had the honour of being a member of Your Excellency's Council, I am strongly impressed with the conviction that indirect taxation must be our mainstay in this country, and that further attempts at direct taxation will cause waste and friction disproportionate to the results. It has been suggested in this particular instance that the import-duty upon piece-goods should be re-imposed. Apart from the fact, as has been pointed out, that this is not a practical proposal, it appears to me that their re-imposition in the shape in which they existed before has become an impossibility. The growing competition between India and Lancashire will prevent their being re-imposed without their being of a protective

character. I have not seen any practical proposals for raising the necessary money to meet the exigencies of the State but those which have been adopted by the Government of India, namely, the increase in the salt-duties and the tax on petroleum. The statement which was made by the Hon'ble the Financial Member on the last occasion is a very able statement. It shows very clearly the strain which has been imposed upon the resources of India by the continued fall in exchange, the diminished revenue from opium, combined with the necessity for expenditure on our north-western frontier defences and the expenditure in Upper Burma. It also shows very clearly—what I believe to be the case—that the public moneys in India are disbursed with strict economy and supervision in the administration of this vast empire. It is also clear, I think, that the Government has done what it can, and with considerable success by the Finance Commission, to prune and reduce establishment expenses to the extent which was within the scope of that Commission. But the outlook, with the possibility of a further fall in exchange and a great probability of a further diminution of the opium-revenue from the increasing growth of the poppy in China and other causes, together with the necessity of continuing our increased expenditure in Burma for some time to come, is not a cheerful one. I am, I believe, expressing the views of many when I say that the time has arrived for the Home authorities seriously to take in hand reforms which the Governor General in Council is powerless to effect or to deal with. The Home charges are what cause India to feel the exchange, and the Home charges are what India cannot deal with. They are very heavy and are capable of great reduction. The enormous expenses thrown upon India by the short-service system, and the constant movement of troops between England and India, involves enormous increased expenditure; and many competent authorities are of opinion that the increased expenditure brings no increase of efficiency, but rather the reverse. The expensive transport system and many points raised by the late Army Commission are matters which the Home Government is bound to grapple with. The India Office itself needs a thorough overhauling, and considerable reductions might be made; for the times have changed, and it will almost certainly appear that the system is more cumbrous and expensive than is needed. The purchasing and spending departments at Home should be narrowly looked into. *Quis custodiet ipsos custodes?* There is also the further important question as to whether the old system of presidencies with separate Governors and Commanders-in-Chief, and separate armies, should be maintained; and this too presses for solution. I think, when all has been done that can be done on this side, we are entitled to look for some relief from the other side of the water. Having helped ourselves all we can, we are entitled to call on the higher powers for aid. Meanwhile, the government of this country must be carried on, but unless the Home authorities bestir themselves shortly they must expect to encounter grave and general dissatisfaction."

The Hon'ble SYUD AMEER HOSSEIN said:—"My Lord, since the introduction of the Bill last week, I have made enquiries in direct communication with the dealers of kerosine oil, to ascertain what would be the incidence of the proposed duty. The present market or contract value of each box containing two tins of the oil as entered in the invoice is Rs. 3-9. The duty at five per cent. would amount to about three annas per box. The oil is retailed in the bázár to the poor people in bottles. Each box contains 10 gallons of the oil, capable of filling up 48 quart bottles. So the 48 bottles will pay a duty of three annas or 36 pies, and therefore each bottle will pay a duty of three-fourths of a pie. The present retail price of a bottle of oil is one and half annas or 18 pies. The addition of three-fourths of a pie to the 18 pies will not be an appreciable burden to the poor people. The above calculations satisfactorily prove the unobjectionable character of the proposed duty. I have read with great interest the very able Financial Statement laid before the Council by the Hon'ble Finance Minister. I think that the hon'ble member has made out a good case for the increased taxation, which happily has taken the indirect form. I feel bound to say, my Lord, that nothing is so unsuited to this country as direct taxation. The law may not be so harmful or inequitable in theory, but its administration, in spite

of the closest supervision of the controlling authorities, is nearly always unsatisfactory, and sometimes attended with a good deal of oppression.

"At the risk of treading on forbidden ground, I respectfully trust, my Lord, that, should necessity arise for a further increase of revenue, recourse may be had to that form of indirect taxation which was abolished by this Council a few years ago, and which, so far as India is concerned, is the least objectionable impost."

The Hon'ble RANA SIR SHANKAR BAKHSH SINGH BAHADUR said :—"I have fully considered the Petroleum Bill and the Statement of its Objects and Reasons. Since petroleum (including various kinds of inflammable liquids enumerated in the Bill) is an article of trade, it does not seem to me improper to levy a customs-duty on the same on its being imported into British India from any other country or island. My reasons for the above conclusion are as follows :—

"(1) the Government has, both on land and water, afforded every convenience and safety to the public by means of railways and steamers, which facilitate commercial communications with distant countries, and thereby cause the prosperity and development of commerce ;

"(2) the Government, as far as possible, protects the property of every individual.

"Having these reasons in view, I entirely agree with the hon'ble member, Mr. Westland, in his proposal to impose a duty on petroleum ; but, since at the same time it appears from the Statement of Objects and Reasons that the trade of petroleum has been on the increase for the last two years only, I beg to suggest that in the beginning, if deemed advisable, the rate of duty should be a little lower than that which has been proposed. In future, the rate may be raised if the said trade prove more flourishing, or if the present increase therein remain in after years steady."

The Hon'ble RAJA PEARI MOHAN MUKERJI said :—"The increased duty imposed upon salt a few days ago will so nearly meet the anticipated deficit, and the revenue expected from the proposed levy of a customs-duty on petroleum is altogether so small, that I was tempted for a moment to suppose that one of the objects for which this small measure has been proposed was to overcome the legal difficulty in the way of gratifying a widely and influentially expressed public desire. Such a supposition would, perhaps, have been wholly groundless, but I nevertheless feel beholden to Your Excellency's Government for having allowed me and my non-official colleagues in their Hon'ble Council an opportunity for discussing the main features of the financial budget for the ensuing year. The Hon'ble the Finance Member is to be congratulated on the lucid exposition of the financial position of the country which he has given to the Council. The inevitable expenditure for the defences of the north-western frontier and for bringing Upper Burma under civilised administration would have been met from the ordinary and recurrent revenues of the country if the increased loss by exchange and the falling off in the opium-revenue and the gross earnings of railways had not caused a strain beyond the capacity of our revenues to bear. It is again a sort of expenditure which, on account of its being immediately unproductive, must be charged on the revenues of the year. To think of meeting it by raising a loan would be extremely unwise, as it would permanently add to the burdens of the country and make the financial position of future years much worse. Before we realise therefore a substantial saving of expenditure by such measures of economy as might be carried without diminishing the efficiency of the various departments of the administration, there is a clear necessity for a large addition to the recurrent revenues of the ensuing year. The increased salt-revenues will supply this addition and leave but a small deficit, and, as petroleum is not a very important article of commerce and a duty upon it is likely to touch the poorer classes, I suggested at the last meeting the propriety of looking to other articles for raising a revenue upon by means of an import-duty. Whether a duty on metals and hardware would not press more harshly than one on mineral oils, at least on certain races and classes of the people, is, however, a

question which in the absence of carefully prepared statistics I do not wish to face. The very universality of its use points to petroleum as an excisable commodity, and all objections to a duty upon it in this country, based upon humanitarian grounds, vanish when it is considered that the average incidence of the tax upon every family in the empire will be less than half an anna a year."

The Hon'ble MR. WESTLAND said :—" It has been particularly gratifying to myself, and I doubt not also to the other members of Your Excellency's Government, to find that the proposals we have made for the restitution of our financial position have been so generally accepted by those who are most qualified to pronounce an opinion regarding them. I am afraid that a sense of relief from taxation in a more unacceptable form may have conduced in some degree to the general acceptance of the enhancement of the salt-duty. For myself, therefore, I would not carry this public approval of our policy so far as to remove the reluctance with which we had recourse to the salt-duties, and I shall be very glad when the time comes in which we can relegate the eight annas, which we have now re-imposed, back to the position in which Sir Evelyn Baring placed it, namely, that of a reserve to be appealed to in times of trouble. But our first duty undoubtedly was to put ourselves right with the world, by making our revenue adequate to our expenditure, and I think it is a matter on which we may well congratulate ourselves that our full and frank statement of our financial position has enabled the public to realize the difficulties which we had to meet, and to give its approval to the means we are adopting to escape from them.

" It is only fair that I should say we have no intention of now folding our arms and, having secured what we hope may be a balance on the right side, of relaxing our efforts in the direction of economy. So long as our financial position is dependent upon the maintenance of a salt-duty of Rs. 2-8, we must regard ourselves, in the management of our expenditure, as still under the same obligations which a deficit would impose upon us. We must also do our best in the development of our existing revenues. I look hopefully to a considerable increase in the excise-revenues, and believe that a great deal might be done in Northern India by the introduction of the methods which in Bombay and in Madras have so powerfully contributed to the increase of revenue under this head. I believe also that we have far from exhausted the possibilities of the provincial system, and I am of opinion that we may find in further development of it a means of increasing our financial strength. By these, and by other means, we must strive to bring more near to us the date when it may be possible to examine our revenues for the purpose of remission. My hon'ble friend Mr. Steel has recommended to our notice in this respect the rice-duties, which have certainly been repeatedly condemned on economic grounds, and which only financial necessity has preserved in existence. But I am afraid that remissions of revenue have at present only an academic interest, and it is only waste of time to discuss now what will most likely have to wait for our successors to decide.

" And for the same reasons I must also claim exemption from the duty of saying anything about the import-duties generally. The policy of their remission has been referred to more than once, both in former debates and during the present one. But the policy, I submit, must be regarded as a closed book. The practical questions which submit themselves for our decision are sufficiently numerous, and sufficiently important to occupy our whole attention; and the practical question with regard to the import-duties is not whether they should have been remitted or not, but whether, having been remitted, it is practicable now to re-impose them. To this question I do not think there can be two answers. Manchester and Bombay are now such rivals that it would be quite unjustifiable to tax Manchester with an import-duty unless we also taxed Bombay with an excise-duty; and the difficulties in the way of an excise-duty, especially with reference to mills which lie in Native territory or which might be transferred to Native territory, are such as to place the proposal outside the range of practical politics.

" The Hon'ble Rájá Peári Mohan Mukerji has in connexion with this subject referred to the propriety of re-imposing the duties on metals and hardware. The

tax upon metals yielded only 10 lakhs, and the tax upon hardware amounted to under 3 lakhs. Apart from the general inadvisability of re-imposing import-duties, there are practical considerations against the re-imposition of particular duties the proceeds of which would be small; for it can never be worth while to introduce the general machinery of a customs-duty for the purpose of obtaining the small sum of 13 lakhs. The justification for the imposition of a duty on petroleum lies in the fact that it can be done under the existing conditions of the trade with practically no additional expense or restrictions upon the trade. That would not be the case in regard to the imposition of duties on metals and hardware; and, moreover, I do not endorse the contention of my hon'ble friend that a tax on metals and hardware will only fall on the rich and not in any respect on the poorer classes.

"My hon'ble friend Mr. Steel has also referred to the claims made on behalf of litigants that we should reduce the fees payable by them, and the same subject was taken up in the letter, to which he has made allusion, of the Chamber which he so ably represents. For one reason I am glad that the reference has been made, because it gives me an opportunity of removing what seems to be a very general misapprehension. I shall not discuss the question whether the administration of civil justice may or may not be made a source of revenue just as reasonably as any other Governmental business: that is a question on which, especially in India, there may very well be two opinions. But I would simply ask the question—On what ground is it supposed that, as matters stand, the Government makes any profit at all? No figures that I have ever seen establish such a conclusion. It is easy to show that the revenue from court-fees more than covers the cost of the salaries of officers and the establishments employed in connexion with Civil Courts; but, before a fair account can be made up, numerous other items have to be regarded. You have to reckon, for example, the cost of pensions and of leave-allowances, and the cost of providing and maintaining buildings. It is not a very easy thing to do, but we have made elaborate investigations upon this basis; and the result, so far as we have made it out, does not support the view which has been too readily assumed by my hon'ble friend and by others. To mention only the case of the larger provinces: there is a considerable loss in Bombay; in the North-Western Provinces we also overspend the income by about 10 per cent.; in Madras we make a saving of about 5 or 6 per cent.; and in Bengal the saving is probably somewhat larger than that. The smaller provinces show a loss in every case. I cannot state in actual figures the result for the whole of India, but so much at least appears evident, so far as our investigation has gone, that very little, if any, profit is made out of the whole business, and that litigants do not, on the whole, pay more than is required for the maintenance of the Courts of law. I think it is very important that these facts should be known. The high judicial authorities who are charged with the over-sight of the administration of justice are necessarily, in the plain exercise of their duty, continually pressing for improvements and additional expenditure in all directions; and they have a strong case if it were really true that Government made the administration of civil justice a source of revenue. But, as this is not the case, India cannot afford to pay for perfection in that department any more than in any other, and the Government is not justified in setting aside financial considerations in dealing with these subjects. It is, to say the least of it, doubtful how far the reduction of the court-fees duties, even if carried out, would give the anticipated relief to litigants. Although I cannot speak from personal experience, I believe the payment of court-fees forms but a small proportion of the total of the law charges incurred by a litigant, and the reduction of their amount would make no great difference in the total of the charges which the litigant has to meet. But in any case the facts I have stated will show that, so far as the Executive Government goes, there is very little chance of our being able to afford any reduction of the revenue from court-fees as long as the expenditure bears its present proportion to the receipts; and that, if the public consider their burden too heavy, the only condition on which relief can be afforded is that by some reforms in procedure or system, or by some other means, a better tale of work be obtained from the existing Courts.

"My hon'ble friend Mr. Steel has referred also to certain complaints which have been put forward as to the hardships entailed upon the owners of salt in bond. The fact is, according to information which I also have received, that the owners of salt in bond happen also to be owners of larger quantities of salt in course of transit by sea; and, as he has explained, these owners, having large quantities of salt at sea in respect of which the provisions of section 37 of the Sea-customs Act applies, are able to realise large and totally unexpected profits; and while they are engaged in selling, at this unusual profit, the salt they have at sea, they of course put off, in the meantime, the sale of the salt they have in bond. The hon'ble member will, perhaps, be extremely surprised to hear that these merchants have made this the subject of a memorial to the Government, in which they refer to the action of the Government in suddenly increasing the salt-duties as imposing upon them a "ruinous loss." "Ruinous loss" is certainly a curious term to apply to an operation that has brought them an unexpected profit of some lakhs of rupees. I have no doubt that they would like to have its operation extended also to the duty upon salt in bond, by which, of course, their profits would be enhanced to double the amount they will now receive. But, when an importer deliberately chooses to bond his goods instead of bringing them to sale when first landed, he must accept the risk of an alteration of the duty at the time at which he chooses to bring the goods for consumption. It is very pleasant to learn that the notification of the enhancement of duty has not as a matter of fact involved any loss to the salt-merchants of Calcutta, but I confess it would have been preferable if the operation of the Sea-customs Act had not entailed a loss to the Treasury and a gain to them of the duty upon salt in course of transit by sea.

"On one other point, I wish, with Your Excellency's permission, to offer some observations. The proposal has been made that our present difficulties may be evaded by the plan of separating Burma from the rest of India, constituting it a separate province and borrowing against its future revenues. For such a plan, of course, separation from India must be absolute and complete; the mere separation of the Burma budget into a separate account, while still remaining part of the revenue and expenditure for which the Indian Government are responsible, would mean nothing at all. You do not get rid of expenditure, and of the liability that it imposes upon you, by the simple process of writing it under a separate account. But this separation of Burma into a new and separate financial entity is one of those proposals which crumble to pieces the moment you attempt to give them definite practical shape. The whole basis of it, of course, is that the local revenue is not at present, and is not likely for some time to come to be, equal to meeting the expenditure. We cast Burma adrift on the express ground that it is for practical purposes insolvent, and financially not worth keeping. But who will lend money upon the security of revenues such as these? Burma has no credit; it cannot have, if it is disparaged at the very start by such a policy. Whatever money is raised therefore must be raised on the credit of India; and we come back to the very methods to which I put forth the objections by anticipation last week. There is no difference whatever between the plan of opening a new Burma account and borrowing on the credit of India to meet the deficit it is to show, and the plan of charging the expenditure as Indian expenditure and borrowing instead of raising revenue to meet it. The latter is the honest and straightforward way of stating the facts; the former is an elaborate device for concealing the truth from yourself.

"A financial separation is therefore a practical impossibility, but, even if it were not so, it would be a policy to which we have no right to resort. The annexation of Burma differs in no respect from the various annexations which we have made from time to time, and which have built up the India we now know. One after the other they have been incorporated in the empire, brought under one common administration, one common system, bound together by ties—administrative, political, military and commercial—which render any idea of separation an impossibility. Some provinces are rich and advanced, some are poor and backward; but all have benefited enormously by the linking together in a common system. We have no more right to cast Burma out of the common brotherhood and to tell it to bear its own burdens than

we have to select the poorer portions of Bengal or Assam and to tell them that the wealth of their neighbours cannot be applied to giving them a share in the common civilization. For thirty or forty years Burma has been a member of the empire, has borne its share in its burdens, has paid like the other provinces its contribution towards the common imperial expenditure. After having obtained from it for so many years all the advantages which arise from the broader basis on which the empire has been built, and the measure of financial relief which is due to its participation in the common burdens, I cannot conceive by what right we can now impose upon it the burden of the new conquest and tell it that it must from its own resources and without help from us bridge over the interval that has to elapse between our first occupation of a new and undeveloped province and the time when it ceases to be a burden and becomes a support to our financial position. For Upper Burma, its annexation and its administration, we, the Indian empire, are responsible; and it would be as unjust politically, as I believe it would be in the end financially foolish, were we to attempt to pass on to others' shoulders the burden of the responsibility we have deliberately assumed. The time has not yet come when we need stand aghast at our own greatness and beg one of our own minor provinces to take off our hands the responsibilities which that greatness imposes upon us."

The Hon'ble LIEUTENANT-GENERAL CHESNEY said:—"I did not intend to trouble the Council with any remarks to-day, but something has been said by my hon'ble friend Mr. Steel in the course of his very interesting and lucid statement which tempts me to offer a few observations on the subject. I think we must all be indebted to the hon'ble member for having in a few words of admirable common sense explained away a great deal of the nonsense which has been talked during the last few days about the irregular action of the Government in regard to the mode by which the salt-duty has been enhanced; and it is very gratifying to find the general policy of the Government supported by so high an authority. But one remark was made by him to which I venture to take exception. My hon'ble friend spoke in terms of blame of the action of the Government in 1882 when they reduced the salt-duties: he spoke of the 'reckless' reduction of the salt-duties in 1882. I venture to demur to that expression as being a correct interpretation of the facts of the case. The Government in 1882 had a considerable surplus in hand; and here I might venture to remind the Council that India, whose financial condition my hon'ble friend Mr. Evans considers to be gloomy, shares with England the happy position which, with the single exception of the United States of America, it alone possesses among all civilised countries, of ever having a surplus in any years. If you examine the financial condition of all the countries in Europe, there is one point in which they all agree, namely, that there is uniformly a deficit, and uniformly a fresh loan, every year. The revenues of France, Russia, Italy, and I believe Germany also, year by year fail to make good the necessary expenditure, and the deficit has to be filled up by the inevitable loan. India has had occasionally to borrow money, but it has fortunately had during the last thirty years several years of surplus. India and England are the only two countries in that happy condition. Now, as regards the mode of dealing with a surplus, I think we may take a lesson from the practice which is followed in England. In England, when there is a surplus the practice used to be to take off some of the import-duties in order to cheapen articles which are in common use. After a time, when the process of reduction of the import-duties had been carried to a very great extent, then English financiers began to operate upon the income-tax. The practice having been dropped of the further remission of import-duties, there were practically only two ways of dealing with a surplus—to reduce the income-tax or to pay off a portion of the national debt; and the former alternative has been the one usually adopted. Now, in this country the salt-duties practically take the place of the income-tax in England. The income-tax in England is paid by a large proportion of the community, whereas in India the income-tax falls upon a very small percentage of the people, and it is only by dealing with a tax which affects the mass of the community that any considerable operation is possible, while, as has been repeatedly pointed out, the salt-duty is a duty which can be increased or reduced at will without any additional

expenditure for collection. Now, there were two courses open to the Government of 1882—to lower the salt-duties or to pay off debt. Suppose the Government had not pursued the 'reckless' course of reducing the salt-duties which had been commented upon by my hon'ble friend Mr. Steel; what would have been the certain consequence of maintaining that tax at the higher rate? Anybody acquainted with the history of Indian administration will know that there could have been but one certain result—the expenditure would have increased to the full extent of the surplus in a very short time. The Government of India with a surplus to dispose of would be immediately subjected to the pressure of the Local Administrations for larger grants of money, and we may be sure it would be inundated with proposals from all directions—from admirable motives no doubt—for the means of improved administration in all branches, and the surplus would soon be consumed. If, therefore, the salt-duties had not been reduced in 1882, the Government of India would have been left at this period without that valuable resource to enable it to retrieve its financial position. I venture to think that it is always incumbent upon the Government to pare down its revenue as well as its expenditure, and that a good surplus of one year should not be made available for increased expenditure, but should rather be applied to the reduction of taxation.

"I wish also to make one observation in reply to what has fallen from the Hon'ble Mr. Evans as to the gloomy prospects of Indian finance. In this my hon'ble friend echoes a good deal of what has been said during the last few days about the state of the Indian finances in many different quarters. I saw the other day in a highly respectable newspaper published at Allahabad, which generally writes in a very lucid strain, a reference to what it called the present financial crisis. Now I am old enough to recollect a good many financial crises. First of all came the great crisis of the mutiny, when forty millions had been spent, the collection of the revenue had been stopped over a large part of the country, and the treasury was empty—an occasion when it might indeed appear as if we were on the eve of national bankruptcy. Yet three years afterwards we had already arrived at a time of prosperity and a handsome surplus. Then, in 1876, there was a crisis during the famine, when we had to spend no less than sixteen millions merely to keep people alive. Then came the great drain upon the Government during the time of the Afghan War, when twenty millions were spent. Then again you heard the old story about financial bankruptcy. Three years afterwards, and during the time of Sir Evelyn Baring, he was able to bring out a prosperous budget with a large surplus. In face of these financial crises I think the language used in regard to the present state of things is a little hysterical. It is quite true that under conceivable circumstances, if all things combined to go wrong together—if exchange continued to go down—if the revenue from opium continued to fall, if trade became more depressed, then certainly we might be in a bad way. But, as my hon'ble friend Mr. Steel has reminded us, this is not a time of mercantile or social depression. The very loss by exchange, which is one of the causes of difficulty for the Government, in the opinion of a good many competent judges is a source of great prosperity to the country. I think, therefore, that, if we look back at the history of these real financial crises through which the Government has safely emerged, we need not be alarmed at the present state of affairs, which, compared with what has happened in the past, is merely a financial ripple on the water."

His Excellency THE PRESIDENT said:—"Our hon'ble colleague the Finance Member may certainly be congratulated on the candid and generous manner in which his financial statement has been received by all the members of this Council; and it is gratifying to the Government to feel that not only do we possess the unanimous approval and support of the Council, but that we may fairly conclude that the views which have been expressed by Mr. Steel in his very weighty speech, by Mr. Evans and by all the Native members are the reflex of that intelligent public opinion which they are so well entitled to represent. The question has been so ably dealt with by every member who has spoken, and the consensus of opinion is so general, that it is unnecessary for me to trouble the Council further. Of course the real difficulty attending our financial

policy is the instability of silver. With an uncertainty of that kind introduced into all his calculations, no Finance Minister can ever enjoy any real repose. He must be always conscious that in the unknown future there may exist contingencies which will upset all his calculations and destroy the anticipated equilibrium in his budget; but from the very nature of the case all that the Government can do is to exercise its best intelligence in calculating the probabilities of the actual situation and leave the ultimate issue in the hands of Providence. As I have already had occasion to say, had it not been for the fall in silver which has made me three millions a year a poorer Viceroy than I was when I first came to the country, notwithstanding even the fall in opium and the expenditure in Burma, I think we might have tided over our present difficulties without any resort to increased taxation. From what I have recently heard from our Minister in China it does not seem likely that any very considerable change in the mercantile relations between China and India as regards opium is likely to ensue. Again, though we have no right to allow such an anticipation to influence our practical policy, we may fairly hope that our railway receipts will also recover. With regard to Burma, there is no doubt that, although during the last year the expenditure has been very heavy,—heavier even than was anticipated,—it will be a diminishing charge, and even in the budget we are now preparing a change for the better will be shown. Moreover, it must be remembered that Lower Burma may be expected, if not altogether, at all events to a considerable extent, to be able to carry Upper Burma on its back. It is true the surplus revenue of Lower Burma which annually accrues over and above the expenses of its own administration, and now amounts to nearly a million, only represents the fair share which that province might be called upon to pay towards the general imperial expenses of administration; but, on the other hand, it is clear that, if Lower Burma did not exist, the large sums which for some years past we have received from thence would have had to be supplied by India herself from extra taxation from which she has now been relieved. Consequently, were the accounts of the two provinces to be united, the deficit in regard to Upper Burma, even for the present, will be found to be inconsiderable. It will be interesting to the Council to know that not only are we daily receiving satisfactory proofs of the rapidity with which Upper Burma is settling down and order is being established, but that we have made most satisfactory progress in dealing with all those subordinate questions which affect the Shan States and our relations both with Siam and China. It has been stated that this Government has determined upon the subjugation of the Shan States and that we are about to send a *corps d'armée* in order to carry this purpose into effect. Such an observation only shows how very great is the misconception which prevails in regard to the political and geographical condition of what are known as the Shan States. As you are aware, Burma may be described as a broad valley traversed by the Irrawaddy and the Chindwin, with the Arakan mountains on the western side and a corresponding high plateau on the eastern side. It is upon this plateau, which extends as far as the Salween, that the Burmese Shan States are situated. These States have always been subject to Upper Burma, and, when we took possession of that country, we sent messages to their various Chiefs that from henceforth they were to regard Her Majesty the Queen as their Sovereign. This information was received upon their part in a satisfactory manner, and they suggested that we should send up some officers to settle the exact nature of their future relations with us. We have taken advantage of the cold weather to despatch two political officers into the Shan States accompanied each by a small column. These gentlemen have traversed the whole district from one end to the other in perfect security, and have been everywhere received in a cordial manner, both by the population and by the various Chiefs. Not only so, but our agents have met on the extreme eastern frontier of Shan Burma the authorities of Siam, and have come to a preliminary understanding with them as to the frontier which is hereafter to divide the Shan States under British rule from those under Siamese jurisdiction. But what perhaps is even a more gratifying feature in the situation is the fact that the Government of His Majesty the Emperor of China is exhibiting towards us a most friendly spirit, and is doing everything we could desire to render

the settlement of that part of Burma which borders on China easy and successful. The Viceroy of Yunnan has received instructions to order the officials on the Chinese frontier to cultivate friendly relations with us, and the effect of this action upon the part of China is now becoming very marked. I may mention, as an additional proof of the desire of China to exhibit a conciliatory spirit towards the Government of India, that she is using her best efforts to induce the garrison of Tibetans who have passed beyond their own frontier and have built a fort on a road which was made by the Indian Government in Sikkin, and over which we have definite and strict legal rights, to retire within their own territories. Consequently, although, as must always be the case in a new province recently added to the empire, a very considerable outlay will be necessary in Burma with the view to furnishing it with roads, jails, barracks and public buildings, and for the purpose of opening up what are undoubtedly its large material resources, I do not think that any one need apprehend that our expenditure in Burma will eventually prove a source of financial embarrassment to the Indian Government. Thanking the members of the Council for the patience with which they have listened to my few observations, for the generous spirit in which they have received the financial statement which has been placed before them, as well as for the valuable suggestions which have fallen from various members, I proceed to put the motion, namely, that the Bill to provide for the levy of a customs-duty on petroleum be referred to a Select Committee consisting of the Hon'ble Messrs. Scoble, Whiteside, Steel, Halliday and Westland."

The Motion was put and agreed to.

The Council adjourned to Friday, the 10th February, 1888.

S. HARVEY JAMES,
Secretary to the Govt. of India,
Legislative Department.

FORT WILLIAM; }
The 8th February, 1888. }

SUPPLEMENT TO
The Gazette of India.

No. 6.} CALCUTTA, SATURDAY, FEBRUARY 11, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending 1st Feb. 1888.

The unsettled conditions which had characterised the weather for the period January 19th to January 25th continued into the week under review.

On the 26th the depression, which was reported from the neighbourhood of Deesa on the 25th, had reached Seoni, where the barometer had fallen $\frac{1}{8}$ th of an inch. On the same day a second depression was shown over the north-west of the Panjab. The effect of these two depressions was to occasion a strongly marked easterly and south-easterly current of wind over the Gangetic plain, a westerly wind in the south of the Panjab, and a north-westerly wind over Rajputana and Guzerat. Both currents brought up much moisture. Rain was general over Northern India, Central India, and Rajputana, and snow fell on the hills. The heaviest rainfall was 2 inches at Patna, 1 inch at Roorkee and over $\frac{1}{2}$ an inch at Agra, Ludhiana, Lahore, Sialkot, Rawalpindi and Jeypore. The snow in the North-West Himalaya was exceptionally heavy, the undrifted snow at Mussooree and Simla measuring about 3 feet in depth. On the 27th the depression in the north-west had disappeared, but rain was reported from all parts of Bengal and the North-Western Provinces and from one or two stations in the central parts of the country and from Rawalpindi. Further snow had fallen on the hills, but the amounts were much less than on the preceding day. The depression from Seoni had reached Gopalpore, and the rainfall over Bengal and the head of the Bay was probably largely due to the ascensional movements taking place within the area of this depression. On the 28th the general barometric distribution had assumed a more normal form. A large area of high

pressure (30·10" and above) had appeared over North-Western India, and the winds in that neighbourhood had returned to their usual north-westerly and westerly direction. Over the Bay readings were still abnormally low, and the depression, which had been shown near Gopalpore on the previous day, had apparently passed out to sea and was crossing the head of the Bay. In consequence, while fine weather was reported from most parts of Upper India, rain still continued over a large part of Bengal, Assam and the head of the Bay. The wind directions over Central India and the Peninsula were very irregular, westerly and north-westerly winds prevailing largely. By the morning of the 29th the depression over the Bay had reached the Arakan Coast, and rain was reported from Akyab, Thyetmio, Chittagong and Cuttack. With the exception of the head of the Bay where pressure was very deficient, the general distribution was fairly normal, a large high-pressure area overlying Northern India, with relatively low readings over the Malabar Coast and Ceylon. At Kurrachee the barometer was falling briskly with a rather strong easterly wind, and rain was reported from Sind and Dera Ismail Khan and snow from the North-West Himalaya. The wind circulation over Northern and Central India was fairly regular. On the 30th the chart showed a well-marked storm lying to the west of Kathiawar. It occasioned a cyclonic circulation of the winds in its neighbourhood and gave rain to Guzerat, the south of Rajputana and Lower Sind. On the opposite side of India, conditions had improved, the disturbance near Akyab having disappeared and the rain and cyclonic winds ceased. A large high-pressure area still overlay Northern India and except for the Kathiawar depression, conditions generally looked tolerably settled. On the 31st this depression had advanced eastward as far as Indore. It appeared to be slowly filling up, but was still surrounded by a well-marked cyclonic circulation of the winds. It was giving rain to all the Rajputana stations and to Deesa and Rajkote. The chart of February 1st showed that the barometer was rising slightly in the north-west but falling elsewhere. The depression near Indore had disappeared but another, though very slight depression, lay between Ratnagiri and Bombay, and conditions off the Sind Coast again looked very unsettled. Slight rain had fallen at Kurrachee and Jeypore.

Pressure.—The mean pressure of the week has been above the monthly average around the Gulf of Martaban, in Behar, the North-Western Provinces, the south-east of the Panjab, in the Peninsula (except the Circars) and in Rajputana and Central India; below it elsewhere. The greatest deficiency has been over the hills (where the barometer has been very low), the greatest excess on the Malabar Coast.

Temperature.—Has been above the monthly average in Burma, Ceylon, Malabar, and Madras, but has been much below elsewhere. In Northern, North-Western and Central India the weather has been exceptionally cold—more particularly on the hills. The mean deficiency, as compared with the monthly average, has been 3° in the Central Provinces, 4° in Bengal and the Panjab, 6° in the North-Western Provinces, Guzerat and Central India, 8° in Sind and Rajputana and 9° at the hill stations. Sharp frost has prevailed on the hills during nearly the whole week.

Humidity.—The air has been damper than usual almost everywhere.

Rain.—The rainfall of the week over the greater part of the country has been exceptionally heavy. In Malabar and Bombay there has been no rain, and in Ceylon, the Berars and Central Provinces and Madras only an insignificant amount, but elsewhere the total has been everywhere high. The greatest average fall per station was in the hills.

This wet week has had the effect of considerably reducing the deficiency which previously prevailed over Northern India. At several places in Bengal, the North-Western Provinces, the Panjab, Sind and Rajputana, the seasonal rainfall is now in excess of the average and at nearly all stations in those Provinces the existing deficiency is generally slight.

The concluding table gives the total rainfall of the past week according to the different provinces.

DIVISIONS.	Number of stations.	Total rainfall.
Burma	2	1'11
Bengal and Assam	16	17'05
North-Western Provinces and Oudh	9	5'16
Panjab	7	3'48
Hill Stations	6	13'03
Ceylon	1	0'02
Malabar Coast
Bombay
Berars and Central Provinces	2	0'30
Guzerat and Central India	5	2'46
Sind—Rajputana	5	6'92
Madras	1	0'25

W. L. DALLAS,

for Meteorological Reporter to the Govt. of India.

Simla, 4th February 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and prospects of the Crops.

Madras.—*For week ending 4th February 1888.*—No rain, except a small quantity in Ganjam and Vizagapatam. Rainfall to date generally sufficient, except in parts of Vizagapatam, Madura, Tinnevely and Salem. Water-supply for cultivation deficient in four talukas of Madura. Agricultural operations progressing as usual. Crops generally good, but slightly damaged here and there by rain, disease or insects. Pasture generally sufficient, but scanty in Malabar, and parts of Madura and Anantapur, and decreasing in Vizagapatam. No material fluctuations in prices. General prospects favourable.

Bombay.—*For week ending 8th February 1888.*—Rain in most districts of Sind, Guzerat and Kathiawar, favourable to late crops in Karachi, but wheat and cotton in parts of Ahmedabad and Kathiawar, cotton in parts of Broach and Baroda and some other crops in parts of Kaira and Panch Mahals and Baroda damaged by it; *jowari* in parts of Poona, linseed and gram in parts of Sholapur and exotic cotton and wheat in parts of Dharwar blighted; wheat in one taluka of Kaira damaged by rust and standing crops in one taluka of Nasik by adverse winds. Harvesting of early crops in progress in parts of Hyderabad, Khandesh and Sholapur and of late crops in parts of Khandesh, Nasik, Dharwar, Ahmednagar, Poona, Bijapur, Sholapur, Belgaum and Rajkot. Cotton-picking continues in parts of Surat and Kathiawar. Standing crops fair in Surat, Colaba and Belgaum, middling in Thana and good in other districts. Prospects of cotton in Wadhwan from 8 to 10 annas.

Bengal.—*For week ending 7th February 1888.*—No rain, the weather was fine throughout the week. The *rabi* and poppy crops have been much benefited by the rain of the last week, and are now generally doing well. Mustard and pulses are being gathered. The outturn of mustard is below the average in Chota Nagpore and in the Bhagulpore and Purneah districts. Sugarcane harvest is proceeding, and is giving a good outturn generally. Prospects of tobacco are promising, also of *ganja* in the Rajshahye district. *Boro* paddy is being planted out, and is thriving well. Ploughing for early rice, jute and indigo is in progress. Price of rice remained almost stationary during the last fortnight.

N.-W. Provinces and Oudh.—*For week ending 8th February 1888.*—Slight rain fell in most districts during the week. Clear weather is now needed for the crops in Lucknow, Cawnpore and Jhansi. The prospects of *rabi* are good and the poppy crop is thriving. The markets are full, but prices are still high. Condition of agricultural stock generally good.

Punjab.—*For week ending 8th February 1888.*—Rain has fallen in almost every district. Prices are very unsettled; in two districts a rise is reported; in others prices are stationary or falling. *Rabi* prospects have been greatly improved by the recent fall of rain; in Delhi and Hissar more rain is wanted. Prospects are now good. No damage done to crops. Stock cattle are healthy, except at Shahpur. Fodder is scarce in most districts, but grass prospects have improved. Poppy sowings completed.

Central Provinces.—*For week ending 8th February 1888.*—Weather rather cloudy, with slight rain in Seoni. The winter crops are generally in good condition; but linseed has been injured in Raipur, and a very poor outturn is expected. Prices are rising in Jabalpur and Bilaspur. Cattle in good condition.

Burma.—*For week ending 4th February 1888.*—Slight rain has fallen in the Akyab and Sandoway districts of Lower Burma, and in the Bhamo, Sagaing, Chindwin, Kyaukse, Pagan and Yamethin districts of Upper Burma. Ploughing and planting of dry-weather crops progressing. Health of cattle is good in most districts. No change in estimates of probable outturn of harvest since last report. Price of paddy has risen largely in the Mergui and Chindwin districts, and slightly in Akyab, Thonegwa and Myadoung. Price of paddy has fallen slightly in Rangoon, Hanthawaddy and Shwegyin.

Assam.—*For week ending 8th February 1888.*—Weather cold and cloudy with a few showers during the week. Winter rice harvest over in most districts. Sugarcane is being crushed. Tea-pruning nearly finished. Ploughing for summer rice general.

Mysore and Coorg.—*For week ending 8th February 1888.*—No rain. Standing crops in good condition, except in one taluka of the Shimoga district, where the wheat crop is reported to be affected by disease. Outturn of harvest favourable. Cattle generally in good condition. Prices slightly fallen in the Bangalore district.

Coorg has also had no rain. The coffee crop has been mostly picked. Prices of coffee have been falling, but show inclination to rise again.

Berar and Hyderabad.—*For week ending 8th February 1888.*—No rain during the week. Rainfall good throughout the province. Threshing of *jowari*, *tur* and *moong* continues. Standing *rabi* crop in good condition. Cultivators are engaged in preparing soil for the next season. Cattle healthy. Fodder insufficient in the Amraoti district. No noticeable change in the prices of food grains.

No rain in Hyderabad during the week. Agricultural prospects continue good.

Central India.—*For week ending 8th February 1888.*—Slight rain; except in Bhopal and Bhopawar fall has been sufficient. No change in agricultural operations since last week. Standing crops generally good. Outturn expected good, except in Western Malwa and Goona. Slight damage to wheat by blight in Bhopawar and hail in Goona. Agricultural stock and pasturage and forage good. Stock reported to be indifferent in Goona. Prices of food grains rising or high. Opium crops fairly good.

Rajputana.—*For week ending 8th February 1888.*—Rainfall above the average. Agricultural operations satisfactory. Standing crops much improved by recent rain. Present prospects good. Agricultural stock generally good. Pasturage or fodder sufficient. Prices steady, but still high in some States.

E. C. BUCK,
Secretary to the Government of India.

S. HARVEY JAMES,

Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.—ESTABLISHMENTS.

Calcutta, the 14th February, 1888.

No. 19.—Captain R. C. Temple, Cantonment Magistrate, Mandalay, is appointed to be an Assistant Commissioner of the 2nd grade, in Burma, but will continue to hold the appointment of Cantonment Magistrate, Mandalay, until further orders.

The 17th February, 1888.

No. 76.—With reference to Home Department Notification, No. 480, dated 19th November, 1887, the following despatch from Her Majesty's Secretary of State for India is published for general information:—

No. 5, Public, dated India Office, London, 12th January, 1888.

From—Her Majesty's Secretary of State for India,

To—His Excellency the Right Honorable the Governor-General of India in Council.

With reference to your Letter No. 61, of the 29th November, I have to inform your Excellency in Council that Her Majesty the Queen, Empress of India, has been pleased to approve the appointment of Sir Auckland Colvin, K.C.M.G., C.I.E., to be Lieutenant-Governor of the North-Western Provinces and Chief Commissioner of Oudh.

JUDICIAL.

The 16th February, 1888.

No. 300.—In accordance with the provisions of section 37, sub-section (1), of the Births, Deaths, and Marriages Registration Act, No. VI of 1886, the Governor-General in Council is pleased to publish, for general information, the following draft

rules which His Excellency in Council proposes to make under sections 26, 28, and 36 of the Act.

The draft will be taken into consideration on the expiration of two months from the date of this Notification :—

In exercise of the powers conferred by sections 26, 28 and 36 of the Births, Deaths and Marriages Registration Act, 1886, the Governor-General in Council is pleased to make the following rules :—

1. In these rules, unless there is something repugnant in the subject or context,—

(1) "the Act" means the Births, Deaths and Marriages Registration Act, 1886 :

(2) "schedule" means a schedule to these rules :

(3) "Registrar-General" and "Registrar" mean, respectively, a Registrar-General of Births, Deaths and Marriages and a Registrar of Births and Deaths appointed under the Act : and

(4) "sign", used with reference to a person who is unable to write his name, includes mark.

2. Notices of births and deaths shall be in the forms set forth in Schedule A and Schedule B, respectively.

3. Every such notice shall be signed by the person giving it, and shall specify the capacity in which the person claims to be authorized to give it.

4. Every such notice shall ordinarily be presented to the Registrar for the local area in which the birth or death occurred within three months of the date of the birth or death to which it refers, as the case may be :

Provided that the Registrar may, of his own authority, for any reason which he considers sufficient, accept notice of a birth or death at any time within six months from the date of its occurrence, and with the special sanction in writing of the Registrar-General, after that time.

5. An appeal against an order of a Registrar refusing to register a birth or death on any other ground than that referred to in proviso (a) to section 19 of the Act shall lie to the Registrar-General, who may, in his discretion, either confirm the order of the Registrar or direct him to register the birth or death.

6. Registers of births and deaths shall be kept in the forms set forth in Schedule C and Schedule D, respectively.

7. When a birth or death has occurred during a journey,

or when the person giving notice of a birth or death was compelled by duty, or urgent necessity, or unavoidable accident, to leave the local area in which such birth or death occurred, so soon after its occurrence that he was unable to give the prescribed notice to the Registrar for that local area,

any Registrar may receive notice of such birth or death, and register the same as if it were a birth or death which had occurred within the local area for which he has been appointed.

8. The provisions of rule 4, as to the time within which notice of a birth or death must be given, shall apply to every notice of a birth or death given under the circumstances described in the last foregoing rule.

9. In every case of a birth or death admitted to registration under rule 7, the Registrar to whom the notice of the birth or death is given shall record in his register the reason why the notice was not given to the Registrar of the local area within which the birth or death occurred, and shall, within one week from the date of the registration of the birth or death, forward to the Registrar-General, and to the Registrar of the local area within which the birth or death occurred, a copy of the entry in the register relating to the birth or death.

Every Registrar shall paste into a book kept by him for the purpose all copies of entries received by him under this rule, and the book containing the copies shall be, at all reasonable times, open to inspection by any person desiring to inspect it.

10. The Registrar for any local area including a port may register any birth or death which has occurred on the high seas on board any ship arriving at such port :

Provided that notice of the birth or death is given to such Registrar within sixty days after the arrival of the ship.

In the notice of such birth or death, and in the entry thereof in the register, there shall be specified, in lieu of the name of the place at which, the name of the ship on which, the event occurred, and the name of the Commander of the ship and the approximate latitude and longitude of the ship's position at the time of the birth or death.

11. Every certificate of registration of a birth or death given by a Registrar under section 23 of the Act shall be in the form set forth in Schedule E.

12. At the foot of every copy of an entry given under section 9 or section 25 of the Act there shall be written a certificate, dated and subscribed by the Registrar-General or officer authorized under section 9, or by the Registrar, as the case may be, that the copy is a true copy of the entry.

13. Every Registrar shall keep, in the form set forth in Schedule F, a register of all certificates of registration and copies of entries given by him.

Every Registrar-General shall keep a register in a similar form of all copies given by him of entries in the certified copies of the registers sent to his office.

14. The copies of entries of births and deaths which Registrars are required by section 24 of the Act to send to the Registrar-General, shall be certified in the form set forth in Schedule G, and shall be sent at intervals of three months, on or as nearly as possible after the 1st January, April, July and October in each year.

Should no entries be made in a register during the preceding three months, a certificate to this effect shall be sent to the Registrar-General.

15. The indexes which are required by section 7 of the Act to be made of the certified copies of registers of births, deaths and marriages sent to the office of the Registrar-General shall be in the forms set forth in Schedule H, Schedule I and Schedule J, respectively.

Every entry in an index shall be made alphabetically with reference to the initial letter of the name of the person indicated by the entry.

In the index of certified copies of entries of marriages, the names of both the husband and the wife must be indexed.

In the case of a person of European descent the initial letter will be the first letter of the surname, and in the case of any other person, the first letter of his name, and not that of his rank, title or class.

16. A Registrar may, of his own motion, correct, in manner prescribed in section 28 of the Act, any error in form made in an entry of a birth or death in a register of births or register of deaths kept by him under the Act.

In every case in which an entry is corrected under this rule, intimation thereof shall (if practicable) be communicated, within one week from the date of the correction being made, to the person who gave the notice of the birth or death.

17. When an error in substance in any entry of a birth or death in a register of

births or register of deaths is asserted to have been made, the Registrar may correct the error, in manner prescribed in section 28 of the Act, on application made in writing, and signed in the presence of two witnesses attesting the signature, by any person authorised under section 20 or 21, as the case may be, to give notice of the birth or death to which the entry relates:

Provided that the Registrar is satisfied that the application is well-founded.

An appeal against an order of a Registrar under this rule refusing to correct an asserted error in an entry in a register shall lie to the Registrar-General, who may, in his discretion, either confirm the order of the Registrar or direct him to correct the error.

18. Without the special sanction in writing of the Registrar-General, an application for the correction of an entry in a register of births or register of deaths shall not be entertained after the expiration of one year from the date on which the notice of the birth or death was given.

19. The sums specified in Schedule K shall be the fees payable under the sections of the Act there referred to:

Provided that soldiers and non-commissioned officers of Her Majesty's Regular Forces and all seamen shall be exempted from the payment of any fees.

20. Every Registrar-General and Registrar shall keep a register, in the form set forth in Schedule L, of all fees realised under these rules, and shall forward the fees at the end of each month to the nearest treasury to be credited to Government. The treasury officer shall give the Registrar a certificate of the amount so credited, and the Registrar shall send a copy of the certificate to the Registrar-General.

SCHEDULES.

SCHEDULE A.

Notice of a Birth.

(Rule 2.)

To the Registrar of Births and Deaths for (*local area or class*).

I, A. B. (*name, description and residence*) being (*here state the capacity in which the person claims to be authorized to give the notice*), hereby give notice, for the purposes of section 19, Act VI of 1886, that on (*date*) at (*place*) I, A. B. or, my wife, C. D., or C. D. (*name and description*), was delivered of a , and I request that the said birth may be registered.

————— Signature.

SCHEDULE B.

Notice of a Death.

(Rule 2.)

To the Registrar of Births and Deaths for (*local area or class*).

I, A. B. (*name, description and residence*) being (*here state the capacity in which the person claims to be authorised to give the notice*), hereby give notice, for the purposes of section 19, Act VI of 1886, that on (*date*) at (*place*) my (*state relationship*) C. D. (*name and description*), or, C. D. (*name and description*), died of _____, and I request that the said death may be registered.

_____ Signature.

SCHEDULE C.

Register of Births.

(Rule 6.)

1. Serial number.
2. Date of birth.
3. Place of birth.
4. Name, if any.
5. Sex.
6. Name, race, religion and occupation of father.
7. Name, race and religion of mother.
8. Signature, description and residence of person giving notice.
9. Signature, description and residence of mother and person acknowledging himself to be father (*column only to be used in the case referred to in section 19, proviso (b), and section 22, sub-section (3).*)
10. Reason why notice was not given to Registrar within whose local area birth occurred (*column only to be used in the case of a birth registered under rule 7*).
11. Date of registration.
12. Signature of Registrar.
13. Rectification of error in entry.

SCHEDULE D.

Register of Deaths.

(Rule 6.)

1. Serial number.
2. Date of death.
3. Place of death.
4. Name, sex, race, religion and occupation of deceased.
5. Names, race, religion and occupation of parents of deceased.
6. When deceased was a married woman or a widow, name, race, religion and occupation of her husband or late husband.
7. Age of deceased.
8. Cause of death.
9. Signature, description and residence of person giving notice.

10. Reason why notice was not given to Registrar within whose local area death occurred (*column only to be used in the case of a death registered under rule 7*).

11. Date of registration.

12. Signature of Registrar.

13. Rectification of error in entry.

SCHEDULE E.

Certificate of Registration of Birth or Death.

(Rule 11.)

Certified that I have this day registered the birth (*or death*) to which the entry in the Register of Births (*or Deaths*), of which a true copy is above-written, relates.

Dated the _____ of _____

A. B.,

Registrar of Births and Deaths
for (*local area or class*).

SCHEDULE F.

Register of Certificates of Registration or Copies of Entries granted.

(Rule 13.)

1. Serial number.
2. Name and residence of person applying for certificate or copy.
3. Date of application.
4. Nature of certificate or copy granted.
5. Date of grant of certificate or copy.
6. Fee paid.
7. Initials of Registrar.
8. Remarks.

SCHEDULE G.

Certificate of truth of copies of entries sent to Registrar-General.

(Rule 14.)

Certified that the above, which contains entries from No. _____ regarding _____ to No. _____ regarding _____, is a true copy of all the entries in the Register of Births (*or Register of Deaths, as the case may be*) kept by me for the three months ending the day of _____, 18 _____.

Dated the _____ of _____

(Signature).

Registrar of Births and Deaths
for (*local area or class*).

SCHEDULE H.

Index of certified copies of Registers of Births.

(Rule 15.)

Name and sex.

Father's name.

Date.

Place.

Reference to certified copy of register.

SCHEDULE I.

Index of certified copies of Registers of Deaths.

(Rule 15.)

Name and sex.

Father's name.

Date.

Place.

Reference to certified copy of register.

SCHEDULE J.

Index of certified copies of entries of Marriages.

(Rule 15.)

Name of (husband) (wife).

Date.

Place.

Reference to certified copy of entry.

SCHEDULE K.

Fees leviable under ss. 8, 23, and 25 of the Act.

(Rule 19.)

	Rs.	A.	P.
(i) Under section 8 for inspection of indexes in the office of a Registrar-General—			
(a) For the first year	1	0	0
(b) For every additional year four annas up to a maximum for one inspection of	5	0	0
(ii) Under section 8 for each copy of an entry in a certified copy of a register in the office of a Registrar-General	1	0	0
(iii) Under section 23 for a certificate of registration of birth or death	1	0	0
(iv) Under section 25 for search in a register of births or deaths—			
(a) for the first year	1	0	0
(b) for every additional year, four annas up to a maximum for one search of	5	0	0
(v) Under section 25 for each copy of an entry given by a Registrar	1	0	0

SCHEDULE L.

Register of Fees.

(Rule 20.)

1. Serial number.

1. I have received your letter No. 7 of the 29th of November last, intimating that the Right Reverend Thomas Valpy French, D.D., has resigned, with effect from the 21st ultimo, the Bishoprick of Lahore and the Chaplaincy attached to the See.
2. I have to inform your Excellency in Council that Her Majesty has been pleased to appoint the Venerable Henry James Matthew, M.A., Archdeacon of Lahore and a Senior Chaplain on the Establishment, to be Bishop of Lahore.

PATENTS.

The 15th February, 1888.

No. 262.—Specifications of the undermentioned inventions have been filed, under the provisions of Act XV of 1859, in the Office of the Secretary to the Government of India in the Home Department. Copies have been sent to one of the Secretaries to each of the Governments of Bengal, Fort St. George, Bombay, and the North-Western Provinces. A copy of every specification is open to public inspection, at all reasonable hours, at the Office of the Secretary to the Government of India in the Home Department at the Presidency, upon payment of a fee of one Rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying:—

No. 141 of 1887.—Henry Hamilton Remfry, Solicitor and Patent Agent, of 5, Fancy Lane, Calcutta, for a mode of preventing induction in telegraphy, telephony and the like, and apparatus therefor.

No. 143 of 1887.—Henry Hamilton Remfry, Solicitor and Patent Agent, of 5, Fancy Lane, Calcutta, for improvements in automatic telegraphy and apparatus used therefor, parts of which are applicable to ordinary telegraphy.

No. 84 of 1888.—James Wainwright, Pattern-maker, of Greenheys, Manchester, in the County of Lancaster, England, and Henry Briggs, Plumber, of Moss Side, Manchester, aforesaid, for improvements in automatic fire-extinguishing apparatus.

No. 13 of 1888.—Evan Rowlands, of No. 116, Collins Street, West, in the City of Melbourne and Colony of Victoria, aerated water manufacturer, for improved apparatus for drawing aerated liquids from fountains or reservoirs.

BOOKS.

The 16th February, 1888.

No. 310.—The following order of Her Majesty in Council published in the *London Gazette* of the 2nd December, 1887, is republished for general information :—

Extract from the "London Gazette" of Friday, 2nd December, 1887.

At the Court at Windsor, the 28th day of November, 1887.

P R E S E N T.

The QUEEN'S Most Excellent Majesty.

Lord President.

Lord Stanley of Preston.

Secretary Sir Henry Holland, Bart.

Whereas the Convention of which an English translation is set out in the First Schedule to this Order has been concluded between Her Majesty the Queen of the United Kingdom of Great Britain and Ireland and the foreign countries named in this Order, with respect to the protection to be given by way of copyright to the authors of literary and artistic works :

And whereas the ratifications of the said Convention were exchanged on the fifth day of September, one thousand eight hundred and eighty-seven, between Her Majesty the Queen and the Governments of the foreign countries following, that is to say :

Belgium ; France ; Germany ; Hayti ; Italy ; Spain ; Switzerland ; Tunis.

And whereas Her Majesty in Council is satisfied that the foreign countries named in this Order have made such provisions as it appears to Her Majesty expedient to require for the protection of authors of works first produced in Her Majesty's dominions :

Now, therefore, Her Majesty, by and with the advice of Her Privy Council, and by virtue of the authority committed to Her by the International Copyright Acts, 1844 to 1886, doth order ; and it is hereby ordered, as follows :

1. The Convention as set forth in the First Schedule to this Order, shall, as from the commencement of this Order, have full effect throughout Her Majesty's Dominions, and all persons are enjoined to observe the same.

2. This Order shall extend to the foreign countries following, that is to say :

Belgium ; France ; Germany ; Hayti ; Italy ; Spain ; Switzerland ; Tunis ; and the above countries are in this Order referred to as the foreign countries of the Copyright Union, and those foreign countries together with Her Majesty's dominions, are in this Order referred to as the countries of the Copyright Union.

3. The author of a literary or artistic work which, on or after the commencement of this Order is first produced in one of the foreign countries of the Copyright Union shall, subject as in this Order and in the International Copyright Acts, 1844 to 1886, mentioned, have as respects that work throughout Her Majesty's dominions, the same right of copyright, including any right capable of being conferred by an Order in Council under section two or section five of the International Copyright Act, 1844, or under any other enactment, as if the work had been first produced in the United Kingdom, and shall have such right during the same period ;

Provided that the author of a literary or artistic work shall not have any greater right or longer term of copyright therein, than that which he enjoys in the country in which the work is first produced.

The author of any literary or artistic work first produced before the commencement of this Order shall have the rights and remedies to which he is entitled under section six of the International Copyright Act, 1886.

4. The rights conferred by the International Copyright Acts, 1844 to 1886, shall, in the case of a literary or artistic work first produced in one of the foreign countries of the Copyright Union by an author who is not a subject or citizen of any of the said foreign countries, be limited as follows, that is to say, the author shall not be entitled to take legal proceedings in Her Majesty's dominions for protecting any copyright in such work, but the publisher of such work shall, for the purpose of any legal proceedings in Her Majesty's dominions for protecting any copyright in such work, be deemed to be entitled to such copyright as if he were the author, but without prejudice to the rights of such author and publisher as between themselves.

5. A literary or artistic work first produced simultaneously in two or more countries of the Copyright Union shall be deemed for the purpose of copyright to have been first produced in that one of those countries in which the term of copyright in the work is shortest.

6. Section six of the International Copyright Act, 1852, shall not apply to any dramatic piece to which protection is extended by virtue of this Order.

7. The orders mentioned in the Second Schedule to this order are hereby revoked;

Provided that neither such revocation, nor anything else in this Order, shall prejudicially affect any right acquired or accrued before the commencement of this Order, by virtue of any Order hereby revoked, and any person entitled to such right shall continue entitled thereto, and to the remedies for the same, in like manner as if this Order had not been made.

8. This Order shall be construed as if it formed part of the International Copyright Act, 1886.

9. This Order shall come into operation on the sixth day of December, one thousand eight hundred and eighty-seven, which day is in this Order referred to as the commencement of this Order.

And the Lords Commissioners of Her Majesty's Treasury are to give the necessary orders herein accordingly.

C. L. PEEL.

FIRST SCHEDULE.

Copyright Convention.

Convention for protecting effectively and in as uniform a manner as possible, the rights of authors over their literary and artistic works. Made on the fifth day of September, one thousand eight hundred and eighty-seven, between Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, Empress of India; His Majesty the German Emperor, King of Prussia; His Majesty the King of the Belgians; Her Majesty the Queen Regent of Spain, in the name of His Catholic Majesty the King of Spain; the President of the French Republic; the President of the Republic of Haiti; His Majesty the King of Italy; the Federal Council of the Swiss Confederation; His Highness the Bey of Tunis.

[The following is an English Translation of the Convention, with the omission of the formal beginning and end.]

ARTICLE I.

The Contracting States are constituted into an Union for the protection of the rights of authors over their literary and artistic works.

ARTICLE II.

Authors of any of the countries of the Union, or their lawful representatives, shall enjoy in the other countries for their works, whether published in one of those countries or unpublished, the rights which the respective laws do now or may hereafter grant to natives.

The enjoyment of these rights is subject to the accomplishment of the conditions and formalities prescribed by law in the country of origin of the work, and cannot exceed in the other countries the term of protection granted in the said country of origin.

The country of origin of the work is that in which the work is first published, or if such publication takes place simultaneously in several countries of the Union, that one of them in which the shortest term of protection is granted by law.

For unpublished works the country to which the author belongs is considered the country of origin of the work.

ARTICLE III.

The stipulations of the present Convention apply equally to the publishers of literary and artistic works published in one of the countries of the Union, but of which the authors belong to a country which is not a party to the Union.

ARTICLE IV.

The expression "literary and artistic works" comprehends books, pamphlets, and all other writings; dramatic or dramatico-musical works, musical compositions with or without words; works of design, painting, sculpture, and engraving; lithographs, illustrations, geographical charts, plans, sketches, and plastic works relative to geography, topography, architecture, or science in general; in fact, every production whatsoever in the literary, scientific, or artistic domain which can be published by any mode of impression or reproduction.

ARTICLE V.

Authors of any of the countries of the Union, or their lawful representatives, shall enjoy in the other countries the exclusive right of making or authorising the translation of their works until the expiration of ten years from the publication of the original work in one of the countries of the Union.

For works published in incomplete parts ("livraisons") the period of ten years commences from the date of publication of the last part of the original work.

For works composed of several volumes published at intervals, as well as for bulletins or collections ("cahiers") published by literary or scientific societies, or by private persons, each volume, bulletin, or collection is, with regard to the period of ten years, considered as a separate work.

In the cases provided for by the present Article and for the calculation of the period of the protection, the 31st December of the year in which the work was published is admitted as the date of publication.

ARTICLE VI.

Authorised translations are protected as original works. They consequently enjoy the protection stipulated in Articles II and III as regards their unauthorised reproduction in the countries of the Union.

It is understood that, in the case of a work for which the translating right has fallen into the public domain, the translator cannot oppose the translation of the same work by other writers.

ARTICLE VII.

Articles from newspapers or periodicals published in any of the countries of the Union may be reproduced in original or in translation in the other countries of the Union, unless the authors or publishers have expressly forbidden it. For periodicals it is sufficient if the prohibition is made in a general manner at the beginning of each number of the periodical.

This prohibition cannot in any case apply to articles of political discussion, or to the reproduction of news of the day or current topics.

ARTICLE VIII.

As regards the liberty of extracting portions from literary or artistic works for use in publications destined for educational or scientific purposes, or for chrestomathies, the matter is to be decided by the legislation of the different countries of the Union, or by special arrangements existing or to be concluded between them.

ARTICLE IX.

The stipulations of Article II apply to the public representation of dramatic or dramatico-musical works, whether such works be published or not.

Authors of dramatic or dramatico-musical works, or their lawful representatives, are, during the existence of their exclusive right of translation, equally protected against the unauthorized public representation of translations of their works.

The stipulations of Article II apply equally to the public performance of unpublished musical works or of published works in which the author has expressly declared on the title page or commencement of the work that he forbids the public performance.

ARTICLE X.

Unauthorized indirect appropriations of a literary or artistic work, of various kinds, such as *adaptations, arrangements of music, &c.*, are specially included amongst the illicit reproductions to which the present Convention applies, when they are only the reproduction of a particular work, in the same form, or in another form, with non-essential alterations, additions, or abridgments, so made as not to confer the character of a new original work.

It is agreed that, in the application of the present Article, the tribunals of the various countries of the Union will, if there is occasion, conform themselves to the provisions of their respective laws.

ARTICLE XI.

In order that the authors of works protected by the present Convention shall, in the absence of proof to the contrary, be considered as such, and be consequently admitted to institute proceedings against pirates before the courts of the various countries of the Union, it will be sufficient that their name be indicated on the work in the accustomed manner.

For anonymous or pseudonymous works, the publisher whose name is indicated on the work is entitled to protect the rights belonging to the author. He is, without other proof, reputed the lawful representative of the anonymous or pseudonymous author.

It is, nevertheless, agreed that the tribunals may, if necessary, require the production of a certificate from the competent authority to the effect that the formalities prescribed by law in the country of origin have been accomplished, as contemplated in Article II.

ARTICLE XII.

Pirated works may be seized on importation into those countries of the Union where the original work enjoys legal protection.

The seizure shall take place conformably to the domestic law of each State.

ARTICLE XIII.

It is understood that the provisions of the present Convention cannot in any way derogate from the right belonging to the Government of each country of the Union to permit, to control, or to prohibit, by measures of domestic legislation or police, the circulation, representation, or exhibition of any works or productions in regard to which the competent authority may find it necessary to exercise that right.

ARTICLE XIV.

Under the reserves and conditions to be determined by common agreement,* the present Convention applies to all works which at the moment of its coming into force have not yet fallen into the public domain in the country of origin.

ARTICLE XV.

It is understood that the Governments of the countries of the Union reserve to themselves respectively the right to enter into separate and particular arrangements between each other, provided always that such arrangements confer upon authors or their lawful representatives more extended rights than those granted by the Union, or embody other stipulations not contrary to the present Convention.

ARTICLE XVI.

An international office is established, under the name of the "Office of the International Union for the Protection of Literary and Artistic Works."

This office, of which the expenses will be borne by the Administrations of all the countries of the Union, is placed under the high authority of the Superior Administration of the Swiss Confederation, and works under its direction. The functions of this office are determined by common accord between the countries of the Union.

ARTICLE XVII.

The present Convention may be submitted to revisions in order to introduce therein amendments calculated to perfect the system of the Union.

Questions of this kind, as well as those which are of interest to the Union in other respects, will be considered in Conferences to be held successively in the countries of the Union by delegates of the said countries.

It is understood that no alteration in the present Convention shall be binding on the Union except by the unanimous consent of the countries composing it.

ARTICLE XVIII.

Countries which have not become parties to the present Convention, and which grant by their domestic law the protection of rights secured by this Convention, shall be admitted to accede thereto on request to that effect.

Such accession shall be notified in writing to the Government of the Swiss Confederation, who will communicate it to all the other countries of the Union.

Such accession shall imply full adhesion to all the clauses and admission to all the advantages provided by the present Convention.

ARTICLE XIX.

Countries acceding to the present Convention shall also have the right to accede thereto at any time for their Colonies or foreign possessions.

They may do this either by a general declaration comprehending all their Colonies or possessions within the accession, or by specially naming those comprised therein, or by simply indicating those which are excluded.

* See paragraph 4 of Final Protocol.

ARTICLE XX.

The present Convention shall be put in force three months after the exchange of the ratifications, and shall remain in effect for an indefinite period until the termination of a year from the day on which it may have been denounced.

Such denunciation shall be made to the Government authorised to receive accessions, and shall only be effective as regards the country making it, the Convention remaining in full force and effect for the other countries of the Union.

ARTICLE XXI.

The present Convention shall be ratified, and the ratifications exchanged at Berne, within the space of one year at the latest.

Additional Article.

The Convention concluded this day in no wise affects the maintenance of existing Conventions between the Contracting States, provided always that such Conventions confer on authors, or their lawful representatives, rights more extended than those secured by the Union, or contain other stipulations which are not contrary to the said Convention.

Final Protocol.

1. As regards Article IV it is agreed that those countries of the Union where the character of artistic works is not refused to photographs, engage to admit them to the benefits of the Convention concluded to-day, from the date of its coming into effect. They are, however, not bound to protect the authors of such works further than is permitted by their own legislation except in the case of international engagements already existing, or which may hereafter be entered into by them.

It is understood that an authorized photograph of a protected work of art shall enjoy legal protection in all the countries of the Union, as contemplated by the said Convention for the same period as the principal right of reproduction of the work itself subsists, and within the limits of private arrangements between those who have legal rights.

2. As regards Article IX it is agreed that those countries of the Union whose legislation implicitly includes choreographic works amongst dramatico-musical works expressly admit the former works to the benefits of the Convention concluded this day.

It is, however, understood that questions which may arise on the application of this clause shall rest within the competence of the respective tribunals to decide.

3. It is understood that the manufacture and sale of instruments for the mechanical reproduction of musical airs which are copyright, shall not be considered as constituting an infringement of musical copyright.

4. The common agreement alluded to in Article XIV of the Convention is established as follows :—

The application of the Convention to works which have not fallen into the public domain at the time when it comes into force, shall operate according to the stipulations on this head which may be contained in special Conventions either existing or to be concluded.

In the absence of such stipulations between any countries of the Union, the respective countries shall regulate, each for itself, by its domestic legislation, the manner in which the principle contained in Article XIV is to be applied.

5. The organization of the International Office established in virtue of Article XVI of the Convention, shall be fixed by a regulation which shall be drawn up by the Government of the Swiss Confederation.

The official language of the International Office will be French.

The International Office will collect all kinds of information relative to the protection of the rights of authors over their literary and artistic works. It will arrange and publish such information. It will study questions of general utility likely to be of interest to the Union, and, by the aid of documents placed at its disposal by the different Administrations, will edit a periodical publication in the French language treating questions which concern the Union. The Governments of the countries of the Union reserve to themselves the faculty of authorizing, by common accord, the publication by the office of an addition in one or more other languages if experience should show this to be requisite.

The International Office will always hold itself at the disposal of members of the Union, with the view to furnish them with any special information they may require relative to the protection of literary and artistic works.

The administration of the country where a Conference is about to be held, will prepare the programme of the Conference with the assistance of the International Office.

The Director of the International Office will attend the sittings of the Conferences, and will take part in the discussions without a deliberative voice. He will make an annual report on his administration, which shall be communicated to all the members of the Union.

The expenses of the office of the International Union shall be shared by the contracting States. Unless a fresh arrangement be made, they cannot exceed a sum of sixty thousand francs a year. This sum may be increased by the decision of one of the Conferences provided for in Article XVII.

The share of the total expense to be paid by each country shall be determined by the division of the contracting and acceding States into six classes, each of which shall contribute in the proportion of a certain number of units :—

First class	25 units.
Second class	20 „
Third class	15 „
Fourth class	10 „
Fifth class	5 „
Sixth class	3 „

These co-efficients will be multiplied by the number of States of each class, and the total product thus obtained will give the number of units by which the total expense is to be divided. The quotient will give the amount of the unity of expense. Each State will declare, at the time of its accession, in which of the said classes it desires to be placed.

The Swiss Administration will prepare the Budget of the office, superintend its expenditure, make the necessary advances, and draw up the annual account, which shall be communicated to all the other Administrations.

6. The next Conference shall be held at Paris between four and six years from the date of the coming into force of the Convoution.

The French Government will fix the date within these limits after having consulted the International Office.

7. It is agreed that, as regards the exchange of ratifications contemplated in Article XXI, each contracting party shall give a single instrument, which shall be deposited with those of the other States, in the Government Archives of the Swiss Confederation. Each party shall receive in exchange a copy of the procès-verbal of the exchange of ratifications, signed by the Plenipotentiaries present.

The present final Protocol, which shall be ratified with the Convention concluded this day, shall be considered as forming an integral part of the said Convention, and shall have the same force, effect, and duration.

SECOND SCHEDULE.
Orders in Council Revoked.

Orders in Council of the dates named below for securing the privileges of copyright in Her Majesty's dominions to authors of works of literature and the fine arts and dramatic pieces, and musical compositions, first produced in the following foreign countries, namely :—

Foreign Country.	Date of Order.

RESOLUTION.
TELEGRAPH ESTABLISHMENT.

The 15th February, 1888.

No. 33 T. E.

AMALGAMATION OF THE INDO-EUROPEAN TELEGRAPH DEPARTMENT WITH THE
INDIAN TELEGRAPH DEPARTMENT.

Read again—

Despatch No. 8, Telegraph, dated 17th March 1887, from Secretary of State for India, to the Government of India.

Despatch No. 10, Telegraph, dated 10th October 1887, from the Government of India, to the Secretary of State for India.

Read also—

Despatch No. 1, Telegraph, dated 5th January 1888, from the Secretary of State for India, to the Government of India.

Telegram from Secretary of State, dated 31st January 1888.

OBSERVATIONS.—In the Despatch now read, the Secretary of State for India communicates the decision of Her Majesty's Government arrived at after communication with the Government of India, that no successor shall be appointed to Colonel Sir R. Murdoch Smith, K.C.M.G., R.E., the present Director-in-Chief of the Indo-European Telegraph Department, and that the administration of that Telegraph system shall come immediately under the Director General of Telegraphs in India.

His Lordship's telegram of 31st January 1888 intimates the retirement of Colonel Sir R. Murdoch Smith on the 15th instant.

RESOLUTION.—In accordance with the instructions received, as noted above, the Director General of Telegraphs in India will assume charge of the Indo-European Telegraph Department on the afternoon of the 15th February 1888.

From that date the title of the head of the amalgamated system will be "Director General of Telegraphs" instead of, as at present, Director General of Telegraphs in India.

ORDER.—Ordered that copies of this Resolution be forwarded to the several

Foreign Department.
Finance Department.
Home Department.

Revenue and Agricultural Department.
Legislative Department.
Military Department.

Departments of the Government of India, and to the Local Governments and Administrations and Officers marginally noted, for information, and also be published in the *Gazette of India*.

information, and also be published in the *Gazette of India*.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.

The Chief Commissioners of the Central Provinces, Burma ^{Upper}/_{Lower}, Assam, and Coorg.

The Resident at Hyderabad.

The Agents to the Governor General for Central India, Rajputana and Baluchistan.

The Accountant General, Public Works Department.

The Inspector General of Military Works.

The Director General of Railways.

The Consulting Engineers to the Government of India for Railways, Calcutta, Central Division and Lucknow.

Ordered also, that copy of this Resolution be forwarded to the Director General of Telegraphs in India, and to the Directors, Persian and Persian Gulf Telegraphs, for information and guidance.

R. C. B. PEMBERTON, Colonel, R.E.,

Secretary to the Govt. of India.

R. V. RIDDELL, Lieut.-Colonel, R.E.,

Master of the Mint.

CALCUTTA MINT,

The 16th February, 1888.

WOOD FUEL.

NOTICE TO MANAGERS OF MILLS, BREWERIES, ICE COMPANIES, TANNERIES, BRICK-BURNERS, COMMISSARIAT OFFICERS, SUPERINTENDENTS OF JAILS, AND OTHER LARGE CONSUMERS OF FUEL.

Wood fuel, chiefly sal, thoroughly dry, having been cut two years ago, is available in the quantities and at the places stated below :—

		Maunds.
Oudh Forest Depôt near Lucknow-Sitapur Railway City Station	Lucknow	39,300
Oudh Forest Depôt near Oudh and Rohilkhand Charbagh Railway Station	Lucknow	18,900
Oudh Forest Depôt near Bahramghât Railway Station	Bahramghât	43,700

Tenders for the purchase of the whole, or portions of the above in even hundreds of maunds, will be received by the Conservator of Forests, Oudh Circle, Camp *via* Lucknow, up to the 25th February, 1888. The maund is the Government maund of 82½ pounds. The fuel to be removed by purchasers into their own carts and removed from Depôts (unless specially agreed upon otherwise) within a month of acceptances of tender.

Fuel to be paid for on delivery of each 100 maunds.

Ten per cent. earnest-money will be required before the purchase is considered as completed; this will remain with Conservator for the payment of the last 1/10th of the amount purchased.

Conservator is not bound to accept the lowest or any tender. The fuel can be seen by applying to the Muharrirs in charge of the Depôts.

The Lucknow-Sitapur Railway having now reached the Government Forests in Kheri, wood fuel can be supplied in large quantities annually either in Lucknow, Sitapur, or in the Forest. Arrangements can also be made for the supply of large quantities of tanning and paper mill materials.

E. WOOD, *Captain,*

*Conservator of Forests, N.-W. P. & Oudh,
Oudh Circle.*

JOHN ELIOT,

Offg. Meteorological Reporter to the
Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows:—

Terms of subscription, payable annually in advance.		
For the complete Series, including postage		
	Without postage.	With postage.
For the Calcutta Series	<i>R10 0</i>	<i>R12 0</i>
" each of the Madras, Bombay and Allahabad Series.	" 6 0	" 7 0
" a part of the Calcutta Series purchased separately, inclusive of postage in India	"	" 2 0
" a part of the Madras, Bombay and Allahabad Series purchased separately, inclusive of postage in India	"	" 1 0

Persons desiring to subscribe for, or purchase, the Report, should apply to—

- Messrs. Thacker, Spink and Co., Calcutta.
 „ Thacker & Co., Bombay.
 „ Higginbotham & Co., Madras.
 The Government Central Book Depot, Bombay.
 „ The Curator of Government Books, North-Western Provinces and Oudh.
 „ Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1885 should be at once remitted.

NOTICE.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 17th February, 1888, and is hereby promulgated for general information:—

ACT NO. III OF 1888.

An Act to amend the Law relating to the Regulation of Police.

WHEREAS it is expedient to relax those provisions of Acts for the regulation of police which restrict the employment of police-officers to the presidency, province or place of the police-establishment of which they are members; It is hereby enacted as follows:—

Title, extent and commencement. I. (1) This Act may be called the Police Act, 1888.

(2) It extends to the whole of British India; and

(3) It shall come into force at once.

2. (1) Notwithstanding anything in Act XXIV of 1859 (an Act for the better regulation of the Police within the territories subject to the Presidency of Fort St. George), Act V of 1861 (an Act for the Regulation of Police), the Bombay District Police Act, 1867, or any Act relating to the police in any presidency-town, the Governor General in Council may, by notification in the Gazette of India, create a general police district embracing parts of two or more presidencies, provinces or places, and direct the enrolment under Act V of 1861 of a police-force for service therein.

(2) With respect to such a district and the police-force enrolled therefor, the functions of the Local Government under Act V of 1861, the Code of Criminal Procedure, 1882, and any other enactment for the time being in force relating to police shall, subject to any orders which the Governor General in Council may make in this behalf, be discharged by the Governor General in Council, or by such Local Government or other authority as the Governor General in Council may appoint, and the functions of the Inspector General of Police, Deputy Inspectors General, Assistant Inspectors General, District Superintendents of Police and Assistant District Superintendents under Act V of 1861 and any other enactment for the time being in force shall, subject as aforesaid, be discharged by such officer or officers as may be appointed by the authority ordinarily discharging under this sub-section the functions of the Local Government with respect to the district and force.

(3) Subject to any orders which the Governor General in Council may make in this behalf, members of a police-force enrolled for service in a general police district created under sub-section (1) shall have within every part of any presidency, province or place, of which any part is included in the district the powers, duties, privileges and liabilities which, as police-officers appointed under Act V of 1861, they have within the district.

(4) Any member of such a force whom the authority ordinarily discharging with respect thereto the functions of the Local Government under sub-section (2) has generally or specially empowered to act under this sub-section may, subject to any orders which the Governor General in Council may make in this behalf, exercise in any part of the local area in which he has the powers of a police-officer under sub-section (3) any of the powers which an officer in charge of a police-station has in

that part, and, when so exercising any such power, shall, subject as aforesaid, be deemed to be an officer in charge of a police-station discharging the functions of such an officer within the limits of his station.

(5) Subject to any orders which the Governor General in Council may make in this behalf, a part of a presidency, province or place included in a general police district under sub-section (1) shall not by reason of being included therein cease for the purposes of any enactment relating to police to be part of the presidency, province or place of which it forms part.

(6) For the purposes of this section, and subject to the provisions thereof, Act V of 1861 shall, notwithstanding anything in section 46

of that Act, be deemed to take effect throughout the whole of British India.

3. Notwithstanding anything in any of the Acts mentioned or referred to in the last foregoing section, but subject to any orders which the Governor General in Council may make in this behalf, a member of the police-establishment of any presidency, province or place may discharge the functions of a police-officer in any part of British India beyond the limits of the presidency, province or place, and shall, while so discharging such functions, be deemed to be a member of the police-establishment of that part and be vested with the powers, functions and privileges, and be subject to the liabilities, of a police-officer belonging to that establishment.

S. HARVEY JAMES,

Secretary to the Government of India.

The following Report of the Select Committee on the Bill to amend the law relating to the Regulation of Police was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 10th February, 1888 :—

LEGISLATIVE DEPARTMENT.

WE, the undersigned, Members of the Select Committee to which the Bill to amend

From Secretary to Chief Commissioner, Coorg, No. 2149—2477, dated 22nd November, 1887, and enclosures [Papers No. 1].

From Secretary to Chief Commissioner, Assam, No. 2760, dated 26th November, 1887 [Paper No. 2].

From Chief Commissioner, Ajmere-Merwara, No. 1434, dated 28th November, 1887 [Paper No. 3].

From Chief Secretary to Government, Madras, No. 2764, dated 7th December, 1887, and enclosures [Papers No. 4].

From Secretary for Berar to Resident, Hyderabad, No. 524 G., dated 27th December, 1887, and enclosures [Papers No. 5].

From Officiating Under Secretary to Chief Commissioner, Central Provinces, No. 28—3, dated 3rd January, 1888 [Paper No. 6].

From Chief Secretary to Government, North-Western Provinces and Oudh, No. 14—VIII-562-II, dated 6th January, 1888, and enclosures [Papers No. 7].

From Officiating Chief Secretary to Chief Commissioner, Burma, No. 79 I.N., dated 6th January, 1888 [Paper No. 8].

From Chief Secretary to Government, Bengal, No. 49 J., dated 9th January, 1888, and enclosures [Papers No. 9].

From Officiating Secretary to Government, Punjab, No. 30, dated 11th January, 1888, and enclosures [Papers No. 10].

From Registrar, High Court, Calcutta, No. 94, dated 13th January, 1888 [Paper No. 11].

From Acting Under Secretary to Government, Bombay, No. 213, dated 12th January, 1888, and enclosures [Papers No. 12].

Bill that a part of a presidency-town may be included in a general police district created under that sub-section.

3. By sub-section (2) of the same section we have proposed to enable the authority controlling the police-force enrolled for service in such a district to discharge certain functions which the Code of Criminal Procedure assigns to the Local Government.

4. By sub-sections (3) and (4) of the same section we have provided for the exercise by officers of a special police-force of the powers of police-officers in places beyond the limits of the general police district for service in which they have been enrolled.

Memorandum by J. T. Woodroffe, Esq., Barrister-at-law, Calcutta, dated 25th January, 1888 [Paper No. 24].

date and amend the law relating to the Protection of Inventions and Designs was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto.

2. *Section 5.*—We have added a clause to the effect that models are only to be called for in exceptional cases.

3. *Section 6.*—We have provided that a fee for an inquiry and report under this section is

not to be paid by an applicant unless the inquiry and report are made by a person who is not in the service of the Government. In proposing this provision we have been guided by the opinions expressed in the papers which we have considered, and, in particular, by the Resolution of the Government of India in the Home Department, No. 10—1101, dated the 21st July, 1875.

4. *Section 9.*—In re-drafting this section respecting the form and contents of specifications we have had regard to the Rules of Practice in the United States Patent Office as revised last year.

5. *Section 11.*—We have required copies of specifications to be sent to the Chief Commissioner of Burma as well as to the Governments of Madras and Bombay.

6. *Section 15.*—We have expressly provided that the High Court may, if it sees fit, invite objections to the extension of an exclusive privilege.

7. *Section 20.*—We have provided that when an inventor has, in any country other than British India or the United Kingdom, acquired an exclusive privilege in respect of an invention, he must, if he desires to acquire such a privilege in British India, apply for leave to file a specification of the invention within one year from the date of his having acquired the exclusive privilege in the other country.

8. *Section 28.*—We have also provided that, if an exclusive privilege acquired in respect of an invention in British India has been acquired in any other country and is revoked or expires as regards that country, it is to cease as regards British India also.

9. *Section 38.*—We have proposed to extend the period within which, in case of fraud on an actual inventor, a suit may be instituted by him for the assertion of his title to an exclusive privilege in respect of his invention, and to require the Court in assessing damages in such a suit to have regard to the degree of diligence which the inventor has exerted in the prosecution of his claim.

10. *Section 44.*—This section follows section 36 of 46 & 47 Vic., cap. 57, and provides for the assignment of an exclusive privilege for any particular place.

11. *Sections 45 and 47.*—We have here amplified the provisions of the Bill respecting the performance of acts by agents.

12. *Sections 51 and 61 and Fifth Schedule.*—We have added to the Schedules a form of an application for an order for the registration of a design, and have provided for copies of drawings, photographs or tracings of designs being sent for record to Madras, Bombay and Rangoon.

13. *Second and Third Schedules.*—We have proposed to vary the form, though not the substance, of these Schedules.

14. *Fourth Schedule.*—We have proposed that an exclusive privilege be enjoyed on a payment of Rs. 40 for the first four years, of Rs. 50 annually for the next five years, and of Rs. 100 annually for every subsequent year of the continuance of the privilege.

15. The publication ordered by the Council has been made as follows:—

*The Inventions and Designs Bill.**(Part I.—Inventions.—Section 1-5.)***No. II.**

A Bill to Consolidate and amend the law relating to the Protection of Inventions and Designs.

WHEREAS it is expedient to consolidate and amend the law relating to the protection of inventions and designs; It is hereby enacted as follows:—

1. (1) This Act may be called the Inventions and Designs Act, 1888.

Title, extent and commencement. (2) It shall extend to the whole of British India; and

(3) It shall come into force on the first day of July, 1888.

2. (1) The enactments described in the first schedule are hereby repealed to the extent specified in the third column thereof.

(2) But this repeal of enactments shall not affect any exclusive privilege acquired, or any conditions or restrictions imposed with respect to any such privilege, or any right or liability accrued or incurred, under any of those enactments before the commencement of this Act, or any relief in respect of any such privilege, right or liability.

(3) Any enactment or document referring to any enactment hereby repealed shall be construed to refer to this Act or to the corresponding portion thereof.

3. The remainder of this Act is divided into Parts, as follows:—

PART I.—INVENTIONS.**PART II.—DESIGNS.****PART I.****INVENTIONS.**

4. In this Part, unless there is something repugnant in the subject or context,—

Definitions.

(1) "invention" includes an improvement:

(2) "inventor" does not include the importer into British India of a new invention unless he is the actual inventor:

(3) "applicant" means a person who has applied under this Part for leave to file a specification of an invention, whether he has filed the specification or not:

(4) "assign" includes a grantee of the exclusive privilege of making, selling or using an invention, or of authorising others so to do, during the term for which the privilege is to

continue or may be extended, or for any shorter term:

(5) "inventor", "actual inventor" and "applicant" include the executors, administrators or assigns of an inventor, actual inventor and applicant, as the case may be:

(6) "manufacture" includes any art, process or manner of producing, preparing or making an article, and also any article prepared or produced by manufacture:

(7) "write" includes print, lithograph, photograph, engrave, and every other mode in which words or figures can be expressed on paper or on any substance:

(8) "Secretary" means a Secretary to the Government of India appointed by the Governor General in Council to discharge the functions of the Secretary under this Act, and includes any under-secretary, assistant-secretary or other officer subordinate to the Government of India to the extent to which such officer may be authorised by general or special order of the Governor General in Council to discharge any of those functions:

(9) "District Court" has the meaning assigned to that expression by the Code of Civil Procedure: and

(10) "High Court" has the meaning assigned to that expression by the Code of Criminal Procedure, 1882, in reference to proceedings against European British subjects.

5. (1) The inventor of a new manufacture, whether he is a British subject or not, may apply to the Governor General in Council for leave to file a specification thereof.

(2) The application must be in writing signed by the applicant and in the form or to the effect of the second schedule if the inventor has not obtained a patent in the United Kingdom, and in the form or to the effect of the third schedule if he has obtained a patent in the United Kingdom.

(3) It must state the name, occupation and address of the applicant, and, where a patent has been obtained in the United Kingdom, the date of the patent and the date of the actual sealing thereof, and must describe with reasonable precision and detail the nature of the invention, and of the particular novelty whereof it consists, and be supplemented by such further particulars relating to the invention, and by such drawings or photographs illustrative thereof, as the Governor General in Council may see fit to require from the applicant.

(4) If in any case it appears to the Governor General in Council that an application ought to be further supplemented by a model of anything alleged to constitute an invention, he may

*The Inventions and Designs Bill.**(Part I.—Inventions.—Sections 6-9.)*

require the applicant to furnish such a model neatly and substantially made of durable material and of dimensions not exceeding those, if any, specified in the requisition therefor.

6. (1) Upon an application under the last Order to file specification foregoing section the Governor General in Council may, after such inquiry as he thinks fit, make an order authorising the applicant to file a specification of the invention.

(2) Before making an order under sub-section (1), the Governor General in Council may direct that the application be referred for inquiry and report to any person whom he thinks fit.

(3) When such enquiry and report are made by a person who is not in the service of the Government, there shall be payable to that person by the applicant such fee as the Governor General in Council, after considering the report, may determine.

(4) When an application is to be referred to such a person, the applicant shall deposit, in such place and within such time as the Governor General in Council may by rule or otherwise prescribe, such sum as will, in the opinion of the Secretary, be sufficient to defray any fee which is likely to be determined under sub-section (3).

(5) If the sum is not deposited in the place and within the time prescribed, the application may be rejected.

(6) If the fee as determined by the Governor General in Council exceeds the sum so deposited, an order shall not be made under sub-section (1) until the applicant has paid the balance of the fee.

(7) If the sum deposited exceeds the fee so determined, the excess shall be refunded to the applicant.

7. (1) If two or more inventors apply on the same day for leave to file specifications of inventions which appear to the Governor General in Council to be identical or so similar as to be practically identical, the Governor General in Council may, in his discretion, authorise both or all the applicants, subject to the other provisions of this Part, to file specifications of their respective inventions.

(2) If they apply on different days for leave to file specifications of such inventions as aforesaid, the applicant who applied on the first of the different days shall be deemed to have a preferential claim to an order authorising the filing of his specification.

8. (1) If within six months from the date of an order under section 6, sub-section (1), or within such further time, not exceeding three months, as the Governor General in Council, in his discretion, may, on cause shown to his satisfaction and on payment of the fee prescribed in that behalf in the fourth schedule, see fit to allow, the applicant causes a specification of his invention to be filed in manner by this Part required, and the fee prescribed in the fourth schedule in respect of the filing of the specification to be paid, the applicant shall, subject to the other provisions of this Part, be entitled to the exclusive privilege of making, selling and using the invention in British India, and of authorising others so to do, for a term of fourteen years from the date of the filing of the specification.

Acquisition and continuance of exclusive privilege.

(2) But an exclusive privilege in respect of an invention of a new manufacture shall, notwithstanding anything in sub-section (1), cease if the inventor fails to pay, within the time limited in that behalf by the fourth schedule, any fee prescribed in that schedule in respect of the continuance of the privilege.

(3) If, nevertheless, in any case, by accident, mistake or inadvertence, an inventor fails to pay any such fee within the time so limited, he may apply to the Governor General in Council for an enlargement of the time for making the payment.

(4) Thereupon the Governor General in Council may enlarge the time accordingly, on payment of the fee prescribed in that behalf in the fourth schedule and subject to the following conditions, namely:—

(a) the time for making a payment shall not in any case be enlarged for more than three months; and,

(b) if any suit is instituted in respect of an infringement of the exclusive privilege committed after a failure to make a payment within the time limited for the making thereof and before the enlargement of that time, the Court disposing of the suit may, if it thinks fit, refuse to award or give any damages in respect of the infringement.

9. (1) A specification filed under this Part must be in writing signed by the applicant, and must set forth the precise invention in respect of which the applicant claims to become entitled to an exclusive privilege.

Form and contents of specification.

(2) If the specification is of an invention which is an improvement only, it must by explicit language distinguish between what is old and what is claimed to be new.

*The Inventions and Designs Bill.**(Part I.—Inventions.—Sections 10-15)*

(3) Every specification must explain the principle of the invention set forth therein and the best mode in which the applicant has contemplated applying that principle, and must describe the manner of making and using the invention in such full, clear, concise and exact terms as to enable any person skilled in the art or science to which the invention appertains, or with which it is most closely connected, to make or use the same.

10. Every application for leave to file a specification, and every specification filed under this Part, must be left with, or sent by post to, the Secretary, and the date of the delivery or receipt thereof shall be endorsed thereon and recorded in his office.

Mode of filing application and specification.

11. (1) At the time of delivering or sending the specification for the purpose of its being filed, the applicant shall cause to be delivered or sent therewith to the Secretary as many copies thereof, not being fewer than four, as may be required by the rules for the time being in force under this Part.

Delivery and distribution of copies of specification.

(2) One of these copies shall be retained by the Secretary, and one shall be sent to the Governor of Fort St. George in Council, one to the Governor of Bombay in Council, one to the Chief Commissioner of Burma, and the others, if any, to such authorities as the Governor General in Council may appoint in this behalf.

(3) The copies of the specification which are sent under sub-section (2) to the authorities mentioned or referred to in that sub-section shall be open to the inspection of any person at all reasonable times at places to be appointed by those authorities.

12. (1) A book, to be called the register of inventions, shall be kept in the office of the Secretary wherein shall be entered and recorded every application for leave to file a specification, every order made on any such application, every specification filed in pursuance thereof, and every subsequent proceeding relating to the invention described therein.

Register of inventions.

(2) Applications for leave to file a specification shall be numbered consecutively in the order in which they are delivered or received, and be dated as of the day of their delivery or receipt, and shall be entered in the register of inventions in the order of their respective numbers.

(3) A reference shall be made in that register, in the margin of the entry of each application, to every order on or in respect of the application, to the specification, if any, filed in pursuance thereof, and to every subsequent proceeding relating to the invention which forms the subject of the application.

13. (1) Another book, to be called the address-book, shall be kept in the office of the Secretary wherein any person filing a specification under this Part, or any person in whom an exclusive privilege acquired under this Part, or any share or interest therein, may become vested, may from time to time cause to be stated some place in British India where notice of any rule or proceeding relating to the exclusive privilege may be served on him.

Address-book.

(2) A reference to each entry in the address-book shall be made in the register of inventions in the margin of the entry in that register of the application for leave to file the specification.

14. (1) Every entry in the register of inventions or address-book, and every document entered and recorded in the register, shall, for the purposes of the law of evidence for the time being in force, be deemed to be a public document and shall be open to the inspection of any person at all reasonable times at the office of the Secretary.

Provisions with respect to the register and book.

(2) The books kept under section 11 and section 35 of Act No. XV of 1859 (*an Act for granting exclusive Privileges to Inventors*) shall be deemed to be parts of the register of inventions and address-book respectively.

15. (1) The inventor of a new manufacture may, at any time not more than one year and not less than six months before the time limited for the expiration of an exclusive privilege acquired under section 8, apply to the Governor General in Council for an extension of the privilege for a further term.

Extension of exclusive privilege.

(2) When an application is made under sub-section (1), the Governor General in Council may, if he thinks fit, refer it to a High Court for report.

(3) The Court to which the application is referred shall, in making its report, have regard to the nature and merits of the invention in relation to the public, to the profits made by the inventor as such, and to all the circumstances of the case.

(4) The procedure on the reference shall be such as the Court thinks fit, and may include the issue of citations calling upon persons claiming to have any interest in the reference to appear before the Court on the day on which the reference is to be considered, or on any day to which the consideration thereof may be adjourned, and make with respect thereto any representation which they may see fit in relation to any of the matters to which the Court is required by the last foregoing sub-section to have regard in making its report.

(5) If the Governor General in Council is of opinion, or, where a reference has been made under sub-section (2), if the Court reports, that the inventor has been inadequately remunerated

*The Inventions and Designs Bill.**(Part I.—Inventions.—Sections 16-21.)*

by his exclusive privilege, the Governor General in Council may, on payment of the fee prescribed in that behalf in the fourth schedule, make an order extending the term of the privilege for a further term not exceeding seven or, in exceptional cases, fourteen years from the expiration of the first term of fourteen years.

(6) But an exclusive privilege of which the term has been extended under the last foregoing sub-section shall, notwithstanding anything in that sub-section, cease if the inventor fails to pay before the expiration of each year of such extended term the fee prescribed in the schedule aforesaid in respect of the continuance of the privilege.

16. An order under section 6, sub-section (1), authorizing the filing of a specification, or under section 15, sub-section (5), extending the term of an exclusive privilege, may be made subject to such conditions as the Governor General in Council thinks expedient.

17. (1) Subject to any conditions imposed under the last foregoing section—

(a) with respect to the filing, by a person employed in the service of Her Majesty in India, of the specification of a manufacture invented by him in the course of his employment, or

(b) with respect to the extension, in favour of any person, of the term of an exclusive privilege,

an exclusive privilege acquired under this Part shall have to all intents the like effect as against Her Majesty as it has against a subject.

(2) But the officers or authorities administering any department of the service of Her Majesty may, by themselves, their agents, contractors or others, at any time after the delivery or receipt of the application for leave to file the specification of an invention, use the invention for the services of the Government on terms to be before or after the use thereof agreed on, with the approval of the Governor General in Council, between those officers or authorities and the inventor, or, in default of such agreement, on such terms as may be settled by the Governor General in Council.

18. (1) If, after the filing of the specification, the applicant has reason to believe that through mis-
Application for leave to file memorandum or amended specification. take or inadvertence he has erroneously made any mis-statement in his application or specification or included therein something which at the date of the delivery or receipt of his application was not new or whereof he was not the inventor, or that the specification is in any particular defective or insufficient, he may apply to the Governor General in Council for leave to file a memorandum point-

ing out the mis-statement or disclaiming any part of the alleged invention, or for leave to file an amended specification, as the case may be.

(2) The application must be in writing signed by the applicant, and must state how the error, defect or insufficiency occurred and that it was not fraudulently intended.

(3) Upon the application the Governor General in Council may make an order allowing the memorandum or amended specification to be filed.

(4) The provisions of section 6 with respect to applications, and of sections 9 and 11 with respect to specifications and copies thereof, shall apply, so far as they can be made applicable, to applications and to amended specifications, respectively, made and filed under this section.

19. An amended specification filed under the Effect of amended last foregoing section shall, specification. except as to any suit or proceeding relating to the exclusive privilege which may be pending at the time of the filing of the amended specification, have the same effect as if it had been the specification first filed:

Provided that nothing in an amended specification shall be construed to extend or enlarge an exclusive privilege before acquired.

20. A person shall not be entitled to an exclusive privilege under this Part—

(a) if the invention is of no utility, or

(b) if the invention, at the date of the delivery or receipt of the application for leave to file the specification thereof, was not a new invention within the meaning of this Part, or

(c) if the applicant is not the inventor thereof, or

(d) if the original or any amended specification does not fulfil the requirements of this Part, or

(e) if the original or any subsequent application relating to the invention or the original or any amended specification contains a wilful or fraudulent mis-statement, or

(f) if the application for leave to file the specification of the invention was made under this Part after the expiration of one year from the date of the acquisition of an exclusive privilege in respect of the invention in any place beyond the limits of British India and the United Kingdom.

21. An invention shall be deemed a new invention within the meaning of this Part if it has not before the date of the delivery or receipt of the application for leave to file the

Novelty of invention dependent on public use or knowledge thereof before application to file specification.

*The Inventions and Designs Bill.**(Part I.—Inventions.—Sections 22-29.)*

specification thereof been publicly used in any part of British India or of the United Kingdom, or been made publicly known in any part of British India or of the United Kingdom by means of a written publication.

22. The public use or knowledge of an invention before the date of the delivery or receipt of the application for leave to file a specification thereof shall not be deemed a public use or knowledge within the meaning of this Part if the knowledge has been obtained surreptitiously or in fraud of the inventor or has been communicated to the public in fraud of the inventor or in breach of confidence:

Provided that the inventor has not acquiesced in the public use of his invention, and that, within six months after the commencement of that use, he applies for leave to file a specification.

23. Use of an invention in public by the inventor thereof, or by his servant or agent, or by any other person by his license in writing, for a period not exceeding one year immediately preceding the date of the delivery or receipt of his application for leave to file a specification thereof, or knowledge of the invention resulting from such use thereof in public, shall not be deemed a public use or knowledge within the meaning of this Part.

24. If an inventor who has obtained a patent for his invention in the United Kingdom causes an application for leave to file a specification of the invention under this Part to be delivered or received by the Secretary within twelve months from the date of the actual sealing of the patent, the invention shall be deemed a new invention within the meaning of this Part if it was not publicly used or known in any part of British India at or before the date of the application for the patent, notwithstanding that it may have been publicly used or known in some part of British India or of the United Kingdom before the date of the delivery or receipt of the application under this Part for leave to file the specification.

25. If an inventor applies for leave to file a specification under this Part while his application for a patent is pending in the United Kingdom, and the interval between the date of his application for the patent and the date of the delivery or receipt of his application under this Part does not exceed twelve months, the invention shall not be deemed to have been publicly used, or made publicly known, within

the meaning of this Part, by reason only of the invention having been used, or a description thereof having been published, in any part of British India or of the United Kingdom during the interval.

26. If an inventor, being the exhibitor of his invention at an industrial or international exhibition, certified as such by the Governor General in Council, causes an application for leave to file a specification of the invention to be delivered to or received by the Secretary within six months from the date of the admission of the invention into that exhibition, the invention shall not be deemed to have been publicly used, or made publicly known, within the meaning of this Part, by reason only of the invention having at any time after admission into the exhibition been publicly used or made publicly known.

27. (1) An exclusive privilege acquired under this Part shall cease if the Governor General in Council declares the privilege, or the mode in which it is exercised, to be mischievous to the State, or generally prejudicial to the public.

(2) It shall also cease if a breach of any condition on which the applicant was authorised to file a specification, or on which the term of the exclusive privilege was extended, is on an application under this Part to a High Court proved to the satisfaction of that Court, and if the Governor General in Council thereupon declares the privilege to have ceased.

28. (1) An exclusive privilege acquired under this Part in respect of an invention for which a patent has been obtained in the United Kingdom shall cease on the revocation or expiration of the patent.

(2) Such a privilege in respect of an invention for which a patent has not been obtained in the United Kingdom shall cease on the revocation or expiration of any patent or exclusive privilege which has been obtained or acquired for or in respect of the invention in any other country.

29. (1) An inventor may institute a suit in the District Court against any person who, during the continuance of an exclusive privilege acquired by him under this Part in respect of an invention, makes, sells or uses the invention without his license, or counterfeits or imitates it.

(2) The suit shall not be defended upon the ground of any defect or insufficiency of the specification of the invention, or upon the ground that the original or any subsequent application relating to the invention, or the original or any amended specification, contains a

*The Inventions and Designs Bill.**(Part I.—Inventions.—Sections 30-34.)*

wilful or fraudulent mis-statement, or upon the ground that the invention is of no utility:

(3) Nor shall it be defended upon the ground that the plaintiff was not the inventor, unless the defendant shows that he himself is the actual inventor or has obtained from the actual inventor a right to make, sell or use the invention, or to counterfeit or imitate it, as the case may be:

(4) Nor shall it be defended upon the ground that the invention was not new, unless the defendant, or some person through whom he claims, has, before the date of the delivery or receipt of the application for leave to file the specification, publicly or actually used in some part of British India or of the United Kingdom the invention or that part of it with respect to which the exclusive privilege is alleged to have been infringed.

30. Any person may apply to a High Court for a rule to show cause why the Court should not declare that an exclusive privilege in respect of an invention to be specified in the rule has not been acquired under this Part by reason of all or any of the objections following (to be specified in the rule), that is to say:—

- (a) that the invention is of no utility, or
- (b) that the invention was not, at the date of the delivery or receipt of the application for leave to file the specification, a new invention within the meaning of this Part, or
- (c) that the applicant was not the inventor thereof, or
- (d) that the original or any amended specification does not fulfil the requirements of this Part, or
- (e) that the applicant has knowingly or fraudulently included in the application for leave to file the specification or in the original or any amended specification, as part of his invention, something which was not new or whereof he was not the inventor, or
- (f) that the original or any subsequent application relating to the invention, or the original or any amended specification, contains a wilful or fraudulent mis-statement, or
- (g) that some part of the invention, or the manner in which that part is to be made and used, as described in the original or any amended specification, is not thereby sufficiently described, and that this insufficiency was fraudulent and is injurious to the public.

31. Any person may apply to a High Court for a rule to show cause why the Court should not declare that an exclusive pri-

Like application as to part of an invention.

vilage in respect of any part of an invention to be specified in the rule has not been acquired under this Part, by reason of all or any of the objections following (to be specified in the rule), that is to say:—

- (a) that that part of the invention is wholly distinct from the other parts thereof and is of no utility, or
- (b) that that part of the invention was not, at the date of the delivery of receipt of the application for leave to file the specification, a new invention within the meaning of this Part, or
- (c) that the applicant was not the inventor of that part of the invention, or
- (d) that that part of the invention, or the manner in which it is to be made and used, is not sufficiently described in the original or any amended specification, and that this insufficiency is injurious to the public.

32. The High Court may, irrespective of any provisions of the Code of Civil Procedure in this behalf, require a person applying for a rule under either of the two last foregoing sections, to give security for the payment of all costs incurred or likely to be incurred by any person appearing to show cause against the rule.

33. (1) Any person authorised by the Governor General in Council in this behalf may apply to a High Court for a rule to show cause why the question of the breach of any condition on which leave to file a specification has been granted, or any other question of fact on which the cessation of an exclusive privilege under section 27 may, in the judgment of the Governor General in Council, depend, should not be tried in the form of an issue directed by the Court.

(2) If the rule is made absolute, the Court, unless the breach or other matter of fact is admitted, may direct the issue to be tried and certify the result of the trial to the Governor General in Council.

34. (1) Notice of any rule obtained or proceeding taken under section 30, section 31 or section 33 shall be served on all persons appearing from the address-book to be proprietors of the exclusive privilege, or to have shares or interests therein, and it shall not be necessary to serve the notice on any other person.

(2) The notice shall be deemed to be sufficiently served if a copy thereof is left at the place for the time being stated in the address-book, by delivering the copy to any person resident at or in charge of the place or, if there

*The Inventions and Designs Bill.**(Part I.—Inventions.—Sections 35-38.)*

is no person resident at or in charge of the place, or if the place is not within the local limits of the jurisdiction of the Court, by causing the notice to be sent to the place by post by a registered letter directed to the person to whom the notice is addressed.

35. (1) The High Court may, if it thinks fit, direct an issue for the trial, before itself or any other High Court, or any District Court, of any question of fact arising upon an application under section 30, section 31 or section 33, and the issue shall be tried accordingly.

(2) If the issue is directed to another Court, the finding shall be certified by that Court to the Court directing the issue.

(3) If the issue is directed to a District Court, the finding of that Court shall not be subject to appeal, but the evidence taken upon the trial shall be recorded, and a copy thereof, certified by the Judge of the Court, shall be transmitted, together with any remarks which he may think fit to make thereon, to the High Court, and the High Court may thereupon act upon the finding of the District Court, or dispose of the application upon the evidence recorded, or direct a new trial, as the justice of the case may require.

36. (1) If it appears to the High Court at the hearing of an application under section 30 or section 31 that, by reason of any of the objections specified in the rule, the exclusive privilege in the invention or in any part thereof has not been acquired, the Court shall make an order accordingly, and thereupon the applicant shall, so long as the order continues in force, cease to be entitled to the exclusive privilege.

(2) If it appears to the High Court, at the hearing of any such application as last aforesaid, that the applicant has, in the description of his invention in the application for leave to file a specification thereof or in the original or any amended specification, erroneously included something which at the date of the delivery or receipt of the application for leave to file the specification was not new or whereof he was not the inventor, or that the specification is in any particular defective or insufficient, but that the error, defect or insufficiency was not fraudulently intended, the Court may adjudge the exclusive privilege to have been acquired and to be valid, save as to the part thereof affected by the error, defect or insufficiency: or

(3) If it appears to the High Court that the error, defect or insufficiency can be amended without injury to the public, the Court may adjudge the exclusive privilege in respect of the whole of the invention to be valid, and may, upon such terms as it thinks reasonable, order the specification to be amended in any particular in which it is erroneous, defective or insufficient; and thereupon the applicant shall, within

a time to be limited by the Court for the purpose, file in the office of the Secretary a specification amended according to the order.

(4) The provisions of section 18 with respect to the distribution and disposal of copies of amended specifications, and of section 19 with respect to the effect of such specifications, shall apply, so far as they can be made applicable, to an amended specification filed under this section.

(5) An exclusive privilege in respect of an invention shall not be defeated upon the ground that the application for leave to file the specification of the invention contains a mis-statement, unless the mis-statement was wilful or fraudulent.

37. (1) In a suit for the infringement of an exclusive privilege acquired under this Part the plaintiff shall deliver with his particulars of the breaches complained of in the suit, and the defendant shall deliver a written statement of the particulars of the grounds, if any, upon which he means to contend that the plaintiff is not entitled to an exclusive privilege in respect of the invention.

(2) In like manner, upon an application to a High Court under section 30, section 31 or section 33, the person making the application shall deliver particulars of the objections or grounds on which he means to rely.

(3) At the hearing of any such suit or application, or at the trial of any issue arising out of any such application, evidence shall not be allowed to be given in proof of any breach of the exclusive privilege, or of any ground impeaching the validity of that privilege, or of any objection or ground affecting such a privilege, unless such breach or other matter as aforesaid has been stated in the particulars delivered under this section.

(4) If it is alleged that the invention was publicly used or known before the date of the delivery or receipt of the application for leave to file the specification thereof, the places where and the manner in which the invention was so publicly used or known shall be stated in the particulars.

(5) Notwithstanding anything in the foregoing portion of this section, the Court in which the suit or application is pending, or an issue arising out of the application is being tried, may allow the plaintiff or defendant respectively to amend the particulars delivered under this section upon such terms as it thinks fit.

38. If, in a suit instituted in the District Court at any time within fourteen years from the date of the filing of a specification of an invention under this Part, the actual inventor proves to the satisfaction of the Court that the applicant was not the actual inventor,

*The Inventions and Designs Bill.**(Part I.—Inventions.—Sections 39-43.)*

and that at the time of the application for leave to file the specification the applicant knew or had reason to believe that the knowledge of the invention was obtained by himself or by some other person surreptitiously or in fraud of the actual inventor, or by means of a communication made in confidence by the actual inventor to him or to any person through whom he derived the knowledge, the Court may make a decree declaring an exclusive privilege in respect of the invention to be vested, subject to the other provisions of this Part, in the actual inventor for a term of fourteen years from the date on which the specification was filed, and requiring the applicant to account for and pay over to the actual inventor the profits derived by him from the invention or so much of those profits as the Court, having regard to the degree of diligence exerted by the actual inventor in proceeding under this section and to all the other circumstances of the case, may see fit to require the applicant to pay.

39. A Court making a decree in a suit under Transmission of section 29 or section 28, or copies of decrees and an order on an application orders to Secretary. under section 30, section 31 or section 33, shall send a copy of the decree or order, as the case may be, to the Secretary, who shall cause an entry thereof and reference thereto to be made in the register of inventions and against any entry in the address-book affected thereby.

Registration of cessation of exclusive privilege. **40.** In the following cases, namely—

- (a) when an exclusive privilege acquired under this Part has ceased under section 8 or section 15 by reason of a fee in respect of the continuance of the privilege not having been paid within the time limited by the fourth schedule for the payment thereof, and the period, if any, within which an order might have been made for enlarging the time for the making of the payment has expired;
- (b) when an exclusive privilege acquired under this Part has been declared by the Governor General in Council under section 27 to have ceased;
- (c) when an exclusive privilege acquired under this Part has ceased under section 28 by reason of the revocation or expiration of a patent or exclusive privilege;
- (d) when the whole or any part of an exclusive privilege acquired under this Part has ceased under section 36 in consequence of an order under that section;
- (e) when an exclusive privilege has been declared by a decree to have vested in an actual inventor under section 38;

- (f) when an exclusive privilege acquired under this Part has ceased by reason of the expiration of the term for which it was acquired;

the Secretary shall cause an entry with respect to the cessation or vesting of the exclusive privilege to be made in the register of inventions, and a reference to that entry to be made in the margin of the entry in that register of the application for leave to file the specification of the invention.

41. (r) If any person is aggrieved by an entry in the register of inventions or address-book, or by the omission of an entry therefrom, and a proceeding is not provided in the foregoing portion of this Part whereby the register or book may be rectified, he may apply to a High Court for an order for the rectification of the register or book, and the Court may make such order on the application as it thinks fit.

(2) A copy of the order shall be forwarded by the Court to the Secretary, who shall cause an entry thereof and reference thereto to be made in the register of inventions and against any entry in the address-book affected thereby.

(3) When the Secretary is a party to an application under this section, the costs of another party thereto shall not be adjudged to be payable by the Secretary.

42. A High Court to which an application has been made under section 30, section 31, section 33 or section 41 may stay proceedings on, or dismiss, the application if in its opinion the application would be disposed of more justly or conveniently by another High Court.

43. If on the petition of any person interested it is proved to the Governor General in Council that, by reason of an inventor who has acquired an exclusive privilege under this Part failing to grant licenses on reasonable terms,—

- (a) the exclusive privilege is not being worked in British India, or
- (b) the reasonable requirements of the public with respect to the invention cannot be supplied, or
- (c) any person is prevented from working or using to the best advantage an invention of which he is possessed,

the Governor General in Council may order the inventor to grant, or may himself on behalf of the inventor grant, licenses on such terms as to the amount of royalties, security for payment, or otherwise, as the Governor General in Council, having regard to the nature of the invention and the circumstances of the case, may deem just.

*The Inventions and Designs Bill.**(Part I.—Inventions.—Sections 44-49.) (Part II.—Designs.—Sections 50-52.)*

44. Any person for the time being entitled to Assignment for par- an exclusive privilege ticular places. under this Part, or to any share or interest in such a privilege, in any local area may, subject to the conditions of his title thereto, assign the privilege or such share or interest, as the case may be, for any place in or part of that local area.

45. If an applicant is absent from British India, an application for Subscription of specifications and applications. leave to file a specification, or a specification, or an application for leave to file a memorandum or amended specification, may, instead of being signed by the applicant under section 5, section 9 or section 18, as the case may be, be signed on behalf of the applicant by an agent in British India authorised by him in writing in that behalf.

46. (1) An application under this Part for Verification of applications. leave to file a specification, memorandum or amended specification must be verified by the person making the application.

(2) If that person is absent from British India, the application may be verified by the agent who signs the application on his behalf.

(3) The verification must be signed by the person making it, and must be to the effect that the facts stated in the application are true to his knowledge, except as to matters stated on information and belief, and that as to those matters he believes them to be true.

47. Subject to the provisions of the two last Agents. foregoing sections and of any other enactment for the time being in force, any act which is required or authorised by this Part to be done by any person may be done on his behalf by an agent in British India having authority in writing from that person so to do the act.

48. (1) There shall be paid in respect of the Fees. several proceedings specified in the fourth schedule the fees in that schedule prescribed.

(2) The Governor General in Council may, if he thinks fit, reduce any of those fees and revoke or vary the reduction.

(3) The fees payable under this section shall be collected by means of stamps or otherwise as the Governor General in Council directs.

(4) A proceeding in respect of which a fee is payable under the fourth schedule shall be of no effect unless the fee has been paid.

49. (1) The Governor General in Council may Rules and forms. make such rules and prescribe such forms as he thinks necessary for carrying out the purposes of this Part, and may alter or amend either of the forms in the second and third schedules.

(2) Rules under this section may provide, among other matters, for the printing of specifications, memoranda and amended specifications, and for the distribution or sale of printed copies thereof.

PART II.**DESIGNS.**

50. In this Part, unless there is something Definitions. repugnant in the subject or context,—

(1) "design" means some peculiar shape, configuration or form given to an article, or arrangement of lines or the like used on or with an article, but not the article itself:

(2) "copyright" means the exclusive right to apply a design to an article:

(3) the author of any new and original design shall be considered the "proprietor" thereof, unless he executed the work on behalf of another person for a good or valuable consideration, in which case that person shall be considered the "proprietor", and every person acquiring for a good or valuable consideration a new and original design, or the right to apply the same to an article, either exclusively of any other person or otherwise, and also every person on whom the property in the design or the right to the application thereof shall devolve, shall be considered the "proprietor" of the design in the respect in which the same may have been so acquired, and to that extent, but not otherwise: and

(4) "Secretary", "District Court" and "High Court" have the same meanings as in Part I.

51. (1) Any person, whether a British sub- Application for order ject or not, claiming to be for registration of design. the proprietor of any new and original design not previously published in British India may apply to the Governor General in Council for an order for the registration of the design.

(2) The application must be in writing in the form or to the effect of the fifth schedule, and must contain a statement of the nature of the design and be accompanied by as many copies of drawings, photographs or tracings thereof, not being fewer than four, as may be required by the rules for the time being in force under this Part.

(3) It must be left with, or sent by post to, the Secretary, and the date of the delivery or receipt thereof in the office of the Secretary shall be endorsed thereon and recorded in that office.

52. (1) Upon the application the Governor Registration in register of designs. General in Council may, after such inquiry as he thinks fit, make an order authorizing the registration of the design.

*The Inventions and Designs Bill.**(Part II.—Designs.—Sections 53-61.)*

(2) When an order has been made under sub-section (1), the Secretary shall cause the design to be registered in a book to be kept by him for the purpose and to be called the register of designs.

(3) The date of registration shall be recorded in the register.

53. When a design is registered, the proprietor thereof shall, subject to the other provisions of this Part, have copyright in the design during five years from the date of registration.

54. (1) Before delivery on sale of any article to which a registered design has been applied, the proprietor of the design shall cause the article to be marked with the word "registered" either in full or in an abbreviated form.

(2) If he fails to cause the article to be so marked, the copyright in the design shall cease unless the proprietor shows that he took all proper steps to ensure the marking of the article.

55. If the proprietor of a design exhibited at an industrial or international exhibition, certified as such by the Governor General in Council, causes an application for an order for the registration of the design to be delivered to or received by the Secretary within six months from the date of the admission of the design into that exhibition, the design shall not be deemed not to be a new and original design not previously published in British India within the meaning of section 51 by reason only of the design having been exhibited at the exhibition.

56. Any person in whom the copyright in a design has become vested may apply to the Secretary for the entry of his name in the register of designs as proprietor of the copyright, and the Secretary may, if he sees fit, cause the entry to be made.

57. (1) The registered proprietor of a design may institute a suit in the District Court for the recovery of any damages arising from the application by any person to any article of the design or of any fraudulent or obvious imitation thereof for the purpose of sale, or from the publication, sale or exposure for sale by any person of any article to which the design, or any fraudulent or obvious imitation thereof, has been applied, that person knowing or having reason to believe that the proprietor had not given his consent to such application.

(2) When the Court makes a decree in a suit under this section, it shall send a copy of the decree to the Secretary, who shall cause an

entry thereof to be made in the register of designs.

58. (1) When, from the expiration of the term of a copyright or from any other cause, the copyright in a design has ceased, the Secretary shall cause an entry with respect to the cessation of the right to be made in the register of designs.

59. (1) A High Court may, on the application of any person aggrieved by an entry in the register of designs, or by the omission of an entry therefrom, make such order for the rectification of the register as it thinks fit.

(2) An order under sub-section (1) may declare copyright in a design not to have been acquired.

(3) A copy of the order shall be forwarded by the Court to the Secretary, who shall cause an entry thereof to be made in the register of designs.

(4) When the Secretary is a party to an application under this section, the costs of another party thereto shall not be adjudged to be payable by the Secretary.

60. A High Court to which an application has been made under the last foregoing section may stay proceedings on, or dismiss, application for rectification of register, the application if, in its opinion, the application would be disposed of more justly or conveniently by another High Court.

Application to this Part of certain provisions of Part I.

61. The provisions of the following portions of Part I, namely:—

- (a) section 11, with respect to copies of specifications,
- (b) section 14, with respect to the register of inventions and the matters entered therein, and
- (c) section 47, with respect to the performance by an agent of any act required or authorised by that Part to be done by a principal,

shall, so far as they can be made applicable, apply, respectively, to—

- (a) copies of drawings, photographs or tracings accompanying an application for an order for the registration of a design in respect of which such an order has been made,
- (b) the register of designs and the matters entered and documents referred to therein, and
- (c) the performance by an agent of any act required or authorised by this Part to be done by a principal.

The Inventions and Designs Bill.

(Part II.—Designs.—Sections 62-63. *The First Schedule.—Enactments repealed.*
The Second Schedule.—Application where Patent has not been obtained.
The Third Schedule.—Application where Patent has been obtained.)

62. (1) There shall be paid in respect of the several proceedings specified in the sixth schedule the fees in that schedule prescribed.

(2) The Governor General in Council may, if he thinks fit, reduce any of those fees and revoke or vary the reduction.

(3) The fees payable under this section shall be collected by means of stamps or otherwise as the Governor General in Council may direct.

(4) A proceeding in respect of which a fee is payable under the sixth schedule shall be of no effect unless the fee has been paid.

63. The Governor General in Council may make such rules and prescribe such forms as he thinks necessary for carrying out the purposes of this Part, and may alter or amend the form in the fifth schedule.

THE FIRST SCHEDULE.

ENACTMENTS REPEALED.

(See section 2.)

Number and year.	Subject or title.	Extent of repeal.
XV of 1859	For granting exclusive Privileges to Inventors.	So much as has not been repealed.
XIII of 1872	Patterns and Designs Protection Act, 1872.	So much as has not been repealed.
XVI of 1883	Protection of Inventions Act, 1883.	The whole.
I of 1879	Indian Stamp Act, 1879.	Article 48, Schedule I.

THE SECOND SCHEDULE.

APPLICATION WHERE PATENT HAS NOT BEEN OBTAINED.

(See sections 5 and 49.)

TO THE GOVERNOR GENERAL IN COUNCIL.

The application of (*here insert name, occupation and address*) for leave to file a specification under Part I of the Inventions and Designs Act, 1888.

1. The applicant is in possession of an invention for (*state the title of the invention*); he is the inventor thereof (*or, as the case may be, the executor, administrator or assign of the inventor*); and, to the best of his information and belief, the invention is new within the meaning of Part I of the Inventions and Designs Act, 1888, and no circumstance exists which, if the applicant is authorised to file a specification and files it in accordance with that Part, will disentitle him to an exclusive privilege thereunder in respect of the invention.

2. The following is a description of the invention (*here describe it and the particular novelty whereof it consists*).

3. The applicant therefore applies for leave to file a specification of the invention pursuant to Part I of the Inventions and Designs Act, 1888.

(Signature and verification.)

THE THIRD SCHEDULE.

APPLICATION WHERE PATENT HAS BEEN OBTAINED.

(See sections 5 and 49.)

TO THE GOVERNOR GENERAL IN COUNCIL.

The application of (*here insert name, occupation and address*) for leave to file a specification under Part I of the Inventions and Designs Act, 1888.

1. The applicant (*or, as the case may be, A. B. of whom the applicant is the executor, administrator or assign*) has obtained a patent in the United Kingdom dated and sealed as of the day of , and actually sealed on the day of , for (*state the title of the invention*).

2. To the best of the information and belief of the applicant, the invention is new within the meaning of Part I of the Inventions and Designs Act, 1888, and no circumstance exists which, if the applicant is authorised to file a specification and files it in accordance with that Part, will disentitle him to an exclusive privilege thereunder in respect of the invention.

3. The following is a description of the invention (*here describe it and the particular novelty whereof it consists*).

4. The applicant therefore applies for leave to file a specification of the invention pursuant to Part I of the Inventions and Designs Act, 1888.

(Signature and verification.)

*The Inventions and Designs Bill.**(The Fourth Schedule.—Fees (Inventions). The Fifth Schedule.—Application for Order for Registration of Design).*

THE FOURTH SCHEDULE.

FEES (*Inventions*).*(See sections 8, 15 and 48.)*

	Rs. a. p.
(1) in respect of an application for leave to file a specification (section 5) . . .	10 0 0
(2) in respect of the filing of a specification (section 8) . . .	30 0 0
(3) in respect of an extension of the time for filing a specification (section 8) . . .	20 0 0
(4) in respect of the continuance of an exclusive privilege (section 8)—	
(a) after the filing of the specification and before the expiration of the fourth year from the date of the filing thereof . . .	50 0 0
(b) after the expiration of the fourth year and before the expiration of the fifth year from that date . . .	50 0 0
(c) after the expiration of the fifth year and before the expiration of the sixth year from that date . . .	50 0 0
(d) after the expiration of the sixth year and before the expiration of the seventh year from that date . . .	50 0 0
(e) after the expiration of the seventh year and before the expiration of the eighth year from that date . . .	50 0 0
(f) after the expiration of the eighth year and before the expiration of the ninth year from that date . . .	100 0 0
(g) after the expiration of the ninth year and before the expiration of the tenth year from that date . . .	100 0 0
(h) after the expiration of the tenth year and before the expiration of the eleventh year from that date . . .	100 0 0
(i) after the expiration of the eleventh year and before the expiration of the twelfth year from that date . . .	100 0 0
(j) after the expiration of the twelfth year and before the expiration of the thirteenth year from that date . . .	100 0 0
Provided that the inventor may pay the sum total of the said fees in respect of the continuance of the exclusive privilege, or any part thereof short of the sum total, at any time before the same falls due.	
(5) in respect of an enlargement of the time for payment of a fee under article (4) of this schedule (section 8)—	
(i) if the enlargement does not exceed one month . . .	10 0 0
(ii) if the enlargement exceeds one month, but does not exceed two months . . .	25 0 0
(iii) if the enlargement exceeds two months . . .	50 0 0
(6) in respect of an application for an extension of an exclusive privilege for a further term (section 15) . . .	50 0 0
(7) in respect of an order extending the term of an exclusive privilege (section 15) . . .	100 0 0

THE FOURTH SCHEDULE—continued.

	Rs. a. p.
(8) in respect of the continuance of an exclusive privilege of which the term has been extended (section 15) . . .	100 0 0
to be paid before the expiration of each year of the extended term:	
Provided that the inventor may pay the sum total of the said fees in respect of the continuance of the exclusive privilege, or any part thereof short of the sum total, at any time before the same falls due.	
(9) in respect of an application for leave to file a memorandum or amended specification (section 18) . . .	20 0 0
(10) in respect of a petition to the Governor General in Council for a compulsory license (section 43) . . .	50 0 0
(11) for the inspection of any book or other document which is open to inspection under Part I . . .	1 0 0
(12) for copies—	
(a) when the number of words copied does not exceed four hundred . . .	1 0 0
(b) for every hundred words in excess of four hundred . . .	0 4 0
(c) of drawings or photographs . . .	cost according to agreement.
(13) for certifying copies—	
for every hundred words . . .	0 2 0

THE FIFTH SCHEDULE.

APPLICATION FOR ORDER FOR REGISTRATION OF DESIGN.

(See sections 51 and 63.)

The application of (*here insert name, occupation and address*) for an order for the registration of a design under Part II of the Inventions and Designs Act, 1888.

1. The applicant claims to be the proprietor of the design of which the nature is hereinafter stated.

2. To the best of his information and belief, that design is within the meaning of Part II of the Inventions and Designs Act, 1888, a new and original design not previously published in British India.

3. copies of (*drawings*), (*photographs*), (*tracings*) of the design accompany this application.

4. The following is a statement of the nature of the design (*here describe its nature*).

5. The applicant therefore applies for an order for the registration of the design pursuant to Part II of the Inventions and Designs Act, 1888.

S. HARVEY JAMES,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 17th February, 1888:—

NO. 2 OF 1888.

A Bill to prohibit the making or issue by private persons of pieces of metal for use as money and the making of coins in resemblance or similitude of coins of Foreign States.

WHEREAS it is expedient to prohibit the making or issue by private persons of pieces of metal for use as money and the making of coins in resemblance or similitude of coins of foreign States; It is hereby enacted as follows:—

Title, extent and commencement.

I. (1) This Act may be called the Metal Tokens Act, 1888.

(2) It extends to the whole of British India; and

(3) It shall come into force at once.

2. In this Act "issue" means to initiate the circulation, for use as money, of any piece of

metal manufactured in contravention of this Act or brought into British India by sea or by land in contravention of any notification for the time being in force under section 19 of the Sea Customs Act, 1878.

3. (1) No piece of copper or bronze, or of any other metal or mixed metal, which, whether stamped or unstamped, is intended or likely to be used as money, shall be made or issued except by the authority of the Governor General in Council.

(2) Any person who in contravention of sub-section (1) makes any such piece as is mentioned in that sub-section shall be punished,—

(a) if a previous conviction under this section is not proved against him, with imprisonment which may extend to three years, or with fine, or with both; or,

(b) if a previous conviction under this section is proved against him, with im-

prisonment which may extend to seven years, or with fine, or with both.

(3) Any person who in contravention of sub-section (1) issues any such piece as is mentioned in that sub-section shall be punished,—

(a) if a previous conviction under this section is not proved against him, with imprisonment which may extend to one year, or with fine, or with both; or,

(b) if a previous conviction under this section is proved against him, with imprisonment which may extend to seven years, or with fine, or with both.

(4) Any person convicted of an offence under sub-section (2) or sub-section (3) shall, in addition to any other punishment to which he may be sentenced, forfeit all such pieces as aforesaid which may have been found in his possession or under his control and all materials and implements so found which are capable of being used for the making of such pieces.

(5) Any officer in charge of a police-station who has reason to believe that any place within the limits of his station is being used for the making of such pieces may enter and search the place and seize and carry away any such pieces, and any materials and implements capable of being used for the making thereof, which he may find there.

(6) Where the offence of issuing such pieces in contravention of sub-section (1) is not a cognizable offence within the meaning of that expression as defined in the Code of Criminal Procedure, 1882, it shall not be taken cognizance of by any Presidency Magistrate without the previous sanction of a Commissioner of Police, or by any other Magistrate, except a District Magistrate, without the previous sanction of the District Magistrate.

(7) If in the trial of any offence under sub-section (2) or sub-section (3) the question arises whether any piece of metal or mixed metal was intended or likely to be used as money, the burden of proving that the piece was not intended or likely to be so used shall lie on the accused person.

4. If at any time the Governor General in Council sees fit, by notification under section 19 of the Sea Customs Act, 1878, to prohibit or restrict the bringing by sea or by land

Application of provisions of the last foregoing section to importation of pieces of metal for use as money.

into British India of any such pieces of metal as are mentioned in the last foregoing section, he may by the notification direct that any person contravening the prohibition or restriction shall be liable to the punishment to which he would be liable if he were convicted under this Act of making such pieces in British India, instead of to the penalty mentioned in section 167 of the Sea Customs Act, 1878, and that any of the provisions of the last foregoing section of this Act with respect to the offence of making such pieces or to the trial of such an offence shall apply, so far as they can be made applicable, to the offence of contravening the prohibition or restriction notified under section 19 of the Sea Customs Act, 1878, or to the trial of any such offence.

5. No piece of metal which is not coin as defined in the Indian Penal Code shall be received as money by or on behalf of any local authority or railway-administration. XL

Prohibition of receipt by local authorities and railways as money of metal which is not coin.

6. If any person without lawful authority in this behalf makes any kind of coin resembling or apparently intended to resemble or pass for any coin, as defined in the Indian Penal Code, which is a legal tender, or is in actual use and circulation as money, in the territories of any foreign Prince or State, he shall be punished with imprisonment which may extend to seven years, or with fine, or with both. [24] XL

Prohibition of making pieces of metal in resemblance or similitude of foreign coin.

STATEMENT OF OBJECTS AND REASONS.

THE main object of this Bill is to prohibit the manufacture and issue, and restrict the circulation, of stamped or unstamped pieces of copper such as, during the recent depression in the value of that metal, private traders at Jugadri, Gaya, Ludhiana, Beawar and other places have been making and issuing in large quantities for use as money. The pieces circulate at much above their intrinsic value, and their circulation both deprives the taxpayers of this country of that profit on coinage of copper which belongs to every Government, and perpetuates the currency of an inconvenient form of coin.

The other object of the Bill is to suppress the manufacture in British India of coins resembling or apparently intended to resemble or pass for coins which are legal tender or in actual use and circulation in any foreign country.

The 17th February, 1888.

J. WESTLAND.

S. HARVEY JAMES,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 17th February, 1888 :—

NO. 3 OF 1888.

A Bill to Regulate Her Majesty's Indian Reserve Forces.

WHEREAS it is expedient to provide for the government, discipline and regulation of Her Majesty's Indian Reserve Forces; It is hereby enacted as follows :—

1. (1) This Act may be called the Indian Reserve Forces Act, 1888 ;
Title and commencement. and

(2) It shall come into force on such day as the Governor General in Council may, by notification in the Gazette of India, appoint in this behalf.

2. The Indian Reserve Forces shall consist of the Active Reserve and the Garrison Reserve.
Division of Reserve Forces into Active and Garrison Reserves.

3. (1) A person belonging to the Active Reserve shall be liable to serve beyond the limits of British India as well as within those limits.
Locality of service of Reserves.

(2) A person belonging to the Garrison Reserve shall not be liable without his consent to serve beyond the limits of British India.

4. The Governor General in Council may make rules and orders for the government, discipline and regulation of the Indian Reserve Forces.
Power to make rules for regulation of Reserve Forces.

5. Subject to the provision of section 3 with respect to persons belonging to the Garrison Reserve, and to such rules and orders as may be made under section 4, a person belonging to the Indian Reserve Forces shall, as an officer or soldier as the case may be, be subject to military law in the same manner

and to the same extent as a person belonging to Her Majesty's Indian Forces.

Punishment of certain offences by persons belonging to Reserve Forces. 6. (1) If a person belonging to the Indian Reserve Forces—

(a) when required by or in pursuance of any rule or order under this Act to attend at any place fails without reasonable excuse to attend in accordance with such requirement, or

(b) fails without reasonable excuse to comply with any such rule or order, or

(c) fraudulently obtains any pay or other sum contrary to any such rule or order, he shall be liable—

(i) on conviction by a Court-martial, to such punishment other than death, transportation or imprisonment for a term exceeding one year as such Court is by the Indian Articles of War empowered to award, or Act V o

(ii) on conviction by a Magistrate of the first class, to imprisonment for a term which may extend, in the case of a first offence under this section, to six months, and, in the case of any subsequent offence thereunder, to one year.

(2) Where a person belonging to the Indian Reserve Forces is required by or in pursuance of any rule or order under this Act to attend at any place, a certificate purporting to be signed by an officer appointed by such a rule or order in this behalf, and stating that the person so required to attend failed to do so in accordance with such requirement, shall, without proof of the signature or appointment of such officer, be evidence of the matters stated therein.

(3) Any person charged with an offence under this section may be taken into and kept in either military or civil custody, or partly into and in one description of custody and partly into and in the other, or be transferred from one description of custody to the other.

7. Nothing in this Act or in any rule or order thereunder shall make any person already in the Indian Reserve Forces before the commencement of this Act subject, without his consent, to any of the provisions of this Act.
Effect of Act on persons already in the Reserves.

STATEMENT OF OBJECTS AND REASONS.

THE Governor General in Council having, with the sanction of the Secretary of State for India, decided on the formation of a Reserve Force for the Indian Army, the present Bill has been prepared to enable provision to be made for the government, discipline and regulation of that Force.

The Force is to consist of an Active Reserve and a Garrison Reserve, members of the former Reserve being liable to serve anywhere and of the latter in British India only. The Governor General in Council is to make rules and orders for all matters relating to the Force, and, subject to these rules and orders and, in the case of the Garrison Reserve, to the liability of the members thereof to serve in British India only, all persons belonging to the Force are to be liable to military law as if they were persons belonging to Her Majesty's Indian Forces. Provision is also made for the punishment, by Court-martial or by a Magistrate, of reservists who fail, without reasonable excuse, to attend at any place at which they may be ordered to attend, or who fail to comply with any rule or order under the Act, or who fraudulently obtain any pay or other sum contrary to any such rule or order.

PART VI.

Debates of the Legislative Council of His Excellency the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR
GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING
LAWS AND REGULATIONS UNDER THE PROVISIONS OF
THE ACT OF PARLIAMENT 24 AND 25 VIC, CAP. 67.

The Council met at Government House on Friday, the 10th February, 1888.

PRESENT :

His Excellency the Viceroy and Governor General of India, K.P., G.C.B.,
G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I., C.I.E.
The Hon'ble Lieutenant-General G. T. Chesney, R.E., C.B., C.S.I., C.I.E.
The Hon'ble A. R. Scoble, Q.C.
The Hon'ble Sir C. U. Aitchison, K.C.S.I., C.I.E., LL.D., D.O.L.
The Hon'ble Sir C. A. Elliott, K.C.S.I.
The Hon'ble J. Westland.
The Hon'ble Rana Sir Shankar Bakhsh Singh Bahadur, K.C.I.E.
The Hon'ble Syud Ameer Hossein, C.I.E.
The Hon'ble Rájá Peári Mohan Mukerji, C.S.I.
The Hon'ble W. S. Whiteside.
The Hon'ble J. W. Quinton, C.S.I.
The Hon'ble R. Steel.
The Hon'ble Sir Dinshaw Manockjee Petit, Kt.
The Hon'ble F. M. Halliday.

INDIAN TARIFF ACT, 1882, AMENDMENT BILL.

The Hon'ble MR. WESTLAND presented the Report of the Select Committee on the Bill to provide for the levy of a customs-duty on petroleum. He said :—

" Last week I mentioned the two objects which would mainly have the attention of the Select Committee. The first of these was the definition of

petroleum, and the second was the form in which it was proposed that the duty should be levied. As regards the definition, the intention was to levy a tax on those ordinary qualities of petroleum which are used for illuminating purposes. There are special qualities of oil which are imported, mostly of a more expensive nature, but which ought rather to be regarded as a raw material for manufacture. They are used for batching fibres and for lubricating machinery. The object we had in view in examining the definition was to frame it in such a manner that the tax would be levied upon those cheaper and ordinary kinds of oil used for illuminating, and at the same time would not reach those qualities which are imported purely for lubricating and batching. The solution of this difficulty we found in the Petroleum Act. That Act provides that, whereas ordinary petroleum, when it is imported, is subject to certain restrictions for safety's sake, that class which is required and imported for lubricating purposes, and of which the flashing point is 200° or over, is exempted from these restrictions. The Petroleum Act does not mention oils which are used for batching, but I find that in practice batching oil is treated in exactly the same way as lubricating oil. Batching oil, like lubricating oil, is above 200° flashing point. I am informed that oil which is below that flashing point can be used for batching; but the Chemical Examiner to Government states that, so far as specimens of batching oil have been submitted to him, he has not received any specimens of which the flashing point is below 200°. It is obvious, therefore, that by this 200° standard we can practically separate the two classes of oils which are imported—those which are imported for illuminating purposes and which we desire to tax and those special qualities which are imported exclusively for lubricating and batching purposes and which we desire to exempt. The definition, therefore, exempts from taxation oils of which the flashing point is 200° or over, and which are intended for lubricating and for batching purposes.

“Then, as regards the form in which the duty is proposed to be levied, the Select Committee have accepted the recommendation of the mercantile community to impose a fixed duty instead of an *ad valorem* duty. It is obvious that the levy of a fixed duty is much more convenient than a duty assessed *ad valorem*. The objections to it are mainly that the poorer classes, who naturally use the cheaper qualities of oil, are, by a fixed duty, made to pay a higher rate of taxation than the wealthier classes, who naturally use the more expensive qualities of oil. But enquiries show that in the case of kerosine oil there is very little difference in price between the lowest qualities which are imported and the highest. I find that, taking, for example, Rs. 3-13 as the average price of imported oils, the cheapest quality is 7 annas below that and the dearest 7 annas above it. The values therefore being so near uniformity, it is obvious that a fixed duty will in its operation differ not very essentially from an *ad valorem* duty; and therefore it may by preference be adopted, as in other respects its simplicity recommends it. I may mention that there is a very small quantity of high priced oil imported. This high priced oil will, by the levy of a fixed duty, escape its proper proportion of taxation; but it is better to accept the inconvenience of an inequality like this than the greater inconvenience of applying all the difficulties of an *ad valorem* duty to the much larger quantity of the ordinary oils which are imported.

“Then, as regards the amount of the duty which we have inserted in the Bill, we have again accepted the recommendation of the mercantile community. The rate is a little heavier than that which was proposed in the original Bill. It comes to about 8 per cent., whereas, as originally proposed, the rate amounted to only 5 per cent., and the proceeds from the higher rate of duty are computed at about 10 lakhs, whereas formerly it was computed at 6½ lakhs. But the best opinion is that the trade can easily bear the higher rate of duty. Petroleum has so great an advantage over other illuminating oils in respect of the cheapness of its production that this duty of half an anna per gallon will not materially modify that advantage. We are not in a position at present to refuse even 3½ lakhs which this additional rate of duty suggested by the mercantile community will give us. And it must be remembered in its favour that a tax on petroleum will be for the most part a tax upon the well-to-do classes, as petroleum is chiefly used in municipalities and large towns, while the ordinary rural villager

still adheres to the dim light of his ancestors and does not understand the arrangements of glass and brass which are necessary for the consumption of kerosine.

"I have one more remark to make, and that is to explain that we have adopted this fixed rate of duty per gallon in preference to a fixed rate at so much per case. There are two reasons for this: one is that which was given by the Hon'ble Mr. Steel at the last meeting of the Council, when he explained that it was perfectly possible, and even probable, that in a short time petroleum would be imported not in cases but in tanks; another reason is that the cases which arrive often suffer damage during transit, and the importer finds on their arrival that the cases are partly leaking and empty. The custom is for the importer, or rather the purchaser, after landing the cases, to make up, out of a number of leaky cases, a certain number of full cases. The result of applying the tax per gallon will be to avoid any question about charging empty cases otherwise than according to their ability to pay."

The Hon'ble MR. WESTLAND also moved that the Report of the Select Committee be taken into consideration.

The Motion was put and agreed to.

The Hon'ble MR. WESTLAND also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

POLICE BILL.

The Hon'ble SIR CHARLES AITCHISON presented the Report of the Select Committee on the Bill to amend the law relating to the Regulation of Police. He said:—

"It is unnecessary for me to trouble the Council with any lengthy remarks. My hon'ble predecessor Sir James Peile, in moving on the 6th of October last for leave to introduce this Bill, explained that the necessity for it lay in the difficulty experienced in dealing with the police of the railway-system under the general Police Act of 1861 and under the local Police Acts of the presidencies of Madras and Bombay, which restrict the employment of police-officers to the presidency, province or place of the police-establishment of which they are members. These Acts were passed more than a quarter of a century ago, but with the universal facilities of communication, both by road and railway, which have been introduced, a state of things has been developed which could not be realised when the police, as now constituted, was organised. In 1861, when the general Police Act was passed, the entire length of railways open to public traffic was only 1,588 miles; in 1887 it was 13,867 miles—having multiplied more than eight-fold in the interim. In 1861 the railway-lines were either all within the jurisdiction of one Local Government or of two conterminous Local Governments; so that any break in the police-jurisdiction could easily be arranged for. Now the great trunk lines of railway are completed, and people may travel from one end of India to another by various lines. These lines necessarily pass through many jurisdictions, and with each change of jurisdiction there is a break in the continuity of the police-arrangements: Take, for example, the North-Western Railway, where there are at present no less than seven different forces of police under the control of various authorities. This state of things presents serious difficulties in the prevention and detection of crime in the altered circumstances of the country. The Bill of which I now present the Report of the Select Committee proposes to remove these difficulties, first of all, by enabling Government to create general police-districts embracing two or more jurisdictions through which a railway-line may pass; secondly, by enabling the police of such general districts to act outside the railway-boundary in subordination to the Local Government having jurisdiction in the particular place. The opportunity has also been taken to provide for the employment of police-officers beyond the province to which they belong. I have only to add that the principle of the Bill has been very generally approved by the Local Governments who have been consulted."

At the conclusion of the business of the Council, His Excellency THE VICEROY said :—

"GENTLEMEN,—It would be scarcely respectful that I should allow the members of this Council, with whom I have been so frequently associated in devising legislative measures for the good of this country, to separate without referring to the announcement, which was made public yesterday, that I had obtained the permission of Her Majesty's Government to resign the Viceroyalty of India at the end of the present year. It may be well imagined that no one in my situation would take such a step without feeling both pain and regret; for the post I am now filling is at once the most honourable and the most important that can be held by a subject of the Crown. It was with no light heart that I accepted it, and it is with a deep sense of the responsibility I owe to my Sovereign, to my fellow-countrymen at home, and, above all, to the inhabitants of India, that I have endeavoured, however imperfectly, to discharge the laborious duties attaching to it. I desire it, therefore, to be understood that I have been actuated by imperative private considerations alone in pursuing the course I have adopted. From the time I set foot in India till the present moment not a shadow of difference has arisen between myself and the Government at home, nor, as I trust, have I in any way forfeited the confidence of the Secretary of State. Indeed, I cannot sufficiently express my deep gratitude for the generous support I have received at the hands of the successive Ministers who have presided over the India Office since 1884. Neither has anything occurred in India itself to render my position as Viceroy less agreeable or less attractive than it was when I first came to the country. On the contrary, from the entire European community, from all classes of my Native fellow-subjects, whether Hindu or Muhammadan, whether Princes or private persons, whether at Calcutta or in other localities, I have received constant and innumerable tokens of sympathy and good-will. I only wish I had been better able by my public exertions to show my appreciation of so much loyalty and kindness. Domestic reasons alone have induced me to return home a year before the regular effluxion of my term; but, after all, it must be remembered that in limiting my service in India to four years I shall have stayed in this country as long, or almost as long, as any of my immediate predecessors; and four years of such constant labour and anxiety as a Viceroy is called upon to bear is almost as much as is good for any one; so that I cannot but feel it may be for the public interest that I should resign my charge into the hands of a younger man, especially as the general political condition of the country, whether we regard its domestic affairs or its external relations, is prosperous and peaceful. Had it been otherwise, I would have gladly sacrificed every personal consideration in the cause of duty. With regard to my successor, all I can say is that, had the choice lain with me, he is the very person whom I would have suggested, possessing as he does every quality to recommend him to the confidence of the Crown and of the nation. A grandson of one of our most venerable statesmen, and initiated from his earliest youth in the conduct of serious political affairs, he is now discharging the duties of Governor General of Canada in a manner equally satisfactory to the people of that great Dominion and to the Government at home. He is in the prime of life, and married to one of the most charming ladies that ever graced London society; and, whether as presiding over the social or the political world of India, I prophesy for him universal popularity, and acceptance. Gentlemen, I feel that I have already occupied you too long with my own personal affairs, but my great gratitude for your constant kindness and assistance, and the friendly regard in which I hold every member of this Council, have induced me to trouble you with these observations."

The Council adjourned to Friday, the 17th February, 1888.

S. HARVEY JAMES,
*Secretary to the Govt. of India,
Legislative Department.*

FORT WILLIAM;
The 16th February, 1888. }

SUPPLEMENT TO
The Gazette of India.

No. 7.} CALCUTTA, SATURDAY, FEBRUARY 18, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately in a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REVIEW OF THE REGISTRATION REPORTS OF THE SEVERAL PROVINCES
FOR THE YEAR 1886-87.

No. $\frac{11}{300-312}$.

*Extract from the Proceedings of the Government of India in the Home Department (Public),—
under date Calcutta, the 14th February 1888.*

READ—

Home Department Resolution No. $\frac{20}{30-19}$, dated 29th April 1887.

Read also—

The Registration Reports of the several Local Governments and Administrations for the year 1886-87.

RESOLUTION.

OBSERVATIONS.—The reports of the year under review show that taken as a whole the operations* of the Department were almost stationary. The number of registrations advanced in Madras, Bombay, the Punjab, the Central Provinces, Assam, and Coorg, but fell off in the other Provinces. The total receipts of the Department increased by Rs. 77,338 and the expenditure by Rs. 44,375 leaving a net financial advantage of Rs. 32,963. The most noticeable points in each of the provincial reports are briefly alluded to in the following summary.

	Total number of registrations.
* 1885-86 . .	1,752,622
1886-87 . .	1,758,405

2. *Madras*.—The total number of registrations in the Madras Presidency in the year under report amounted to 608,942 against 584,224 in 1885-86 and 485,210 the average of the last five years. The number of documents registered increased in all districts except in Vizagapatam, Calicut, Nellore and Tanjore. The decline in Vizagapatam amounted to 8·7 per cent., and the special attention of the Inspector General has been called to the matter. In the other three districts the decrease was slight. Over the Presidency there was an increase of 2·7 per cent. in compulsory registrations, while in optional registrations the increase reached 5·6 per cent. The continued improvement in the ratio of optional to total registrations is satisfactory, and shows that advantage is readily taken of the facilities afforded for registration.

The financial results continued satisfactory. The total receipts were Rs. 8,56,242, the highest figure yet reached. The expenditure including Rs. 42,300 for Public Works charges amounted to Rs. 7,00,761, showing an increase of 6·2 per cent. over the figures of 1885-86. The increase in expenditure was due to the opening of 16 new offices, to larger payments in commission and to the erection of new buildings. The surplus revenue of the year amounted to Rs. 1,55,481, and, though smaller than that of the year 1885-86, is the largest recorded except in that year.

3. *Bombay*.—In the Bombay Presidency the number of registrations during the year amounted to 112,412. These figures are the highest yet recorded in the Presidency and show an advance of 4,056 transactions as compared with those for the year 1885-86. The increase was confined to compulsory registrations; in optional registrations there was a slight decrease. In the four Deccan Districts of Ahmednagar, Poona, Satara and Sholapur, the cause of increase in the number of registrations is said to be the change of law effected by Act XXIII of 1886, necessitating the registration by Sub-Registrars under Act III of 1877 of certain documents formerly registered by Village Registrars under the provisions of Chapter VIII of the Deccan Rayats Relief Act. This influence was at work during three months of the year with which the report deals, and had done much to swell the returns under the Registration Act in the four districts named. There was a slight increase in the receipts and expenditure of the Department over those of the previous year. The Inspector General of Registration has had under consideration the question of the application of a system of travelling Sub-Registrars in a specially developed form to the four Deccan Districts, and the Bombay Government has called upon him to submit a report upon this subject.

The report on the working of the registration provisions of the Deccan Agriculturists' Relief Act No. XVII of 1879 shows that such transactions declined from 101,082 to 89,893. This decrease was common to all four districts, and occurred in transactions relating to both immoveable and moveable property. The main cause of the decline is the alteration in the law above referred to; but the smaller number of Hindu marriages during the period under review had also an appreciable effect on the figures.

4. *Bengal*.—The total number of registrations in the Lower Provinces of Bengal decreased from 723,901 in the preceding year to 698,539 in the year under review. Compulsory registrations affecting immoveable property fell from 386,032 to 376,898, and optional registrations of the same class from 211,384 to 194,518. In other registrations of the optional class, there was a small increase from 126,485 to 127,128. The decline was chiefly under the heads of perpetual leases and of deeds affecting immoveable property of less than Rs. 100 in value. The decrease in perpetual leases is attributed to the operation of section 85(2) of the Bengal Tenancy Act which debar occupancy ryots from granting perpetual leases, while the falling off in the number of deeds of mortgage and of sale is said to be due to the increased solvency of the ryots and the additional expense entailed by the Tenancy Act on account of landlord's fees and process fees. The provisions of the Act which require registering officers to take landlord's fees from persons registering documents by which sub-tenures are transferred and to transmit them to District Collectors for the

samindárs is said to have imposed a new and irksome duty upon the Department. The matter is under the consideration of the Revenue Department of the Local Government.

The operations under the Muhammadan Marriage Registration Act shew a falling off from 7,524 in 1885-86 to 7,252 in the year under review. The latter is the smallest number of ceremonies registered since the introduction of the Act. The Act is said to be unpopular, and the want of local influence on the part of persons who have been appointed to the office of Kázi is mentioned as one of the causes of unpopularity. The question of making the Act compulsory has recently been under the consideration of the Lieutenant-Governor, who has determined to adhere to the decision of Sir Rivers Thompson to give the revised rules a five years' trial and not to propose compulsory legislation unless a really unanimous call for it is found to exist among all sections of the Muhammadan community.

The total receipts of the Department fell from Rs. 10,88,177 to Rs. 10,31,485, and there was a small reduction in the expenditure from Rs. 5,68,365 to Rs. 5,64,274. Half the decrease in the receipts is said to have resulted from the order of the High Court cancelling from the 1st October 1886 its rules requiring a search to be made before an application is filed for the sale of immoveable property under attachment in execution of a decree with a view to ascertain whether the property is subject to any encumbrance.

5. *North-Western Provinces and Oudh.*—In the North-Western Provinces and Oudh there was a falling off of 7,238 transactions, or 3·8 per cent. The decline was at the rate of 4·3 per cent. in the North-Western Provinces and of 3 per cent. in Oudh. Voluntary registration of documents affecting both moveable and immoveable property fell off in both Provinces; and it was only in respect of documents affecting immoveable property, the registration of which is compulsory, that there was any increase and that only in Oudh. The enquiries instituted into the circumstances which gave rise to the increase in the numbers of sales and mortgages in 1885-86 in the Family Domains of the Maharaja of Benares show that the chief causes were a growing recognition of the value of registration and a desire on the part of the Maharaja to protect himself from the accrual of tenant right on his domains, rather than any sudden increase in the indebtedness of the tenants. With reference to the remark made in the review of the report for the year 1885-86 that the comparative rarity of execution sales in Oudh compared with the North-Western Provinces should continue to receive attention, it is explained by the Inspector General of Registration that the circumstance referred to is partly due to the existence in Oudh of large estates and wealthy owners; to some extent to the greater tenacity with which the Oudh land-owner clings to his land, and partly to the disinclination of the money-lender to acquire land outright. The Lieutenant-Governor and Chief Commissioner thinks that the absence of indebtedness among the proprietary classes in Oudh is the principal check on the transfer of land. There was a decline of Rs. 5,251 in the receipts of the Department, due to the falling off in the number of registrations. There was also a nominal decrease in the expenditure during the year.

6. *Punjab.*—The year's results show an increase of 3,241 transactions in the total number of registrations. The increase in the number of documents registered in the ordinary mode was entirely confined to deeds, the registration of which is compulsory under the law. The number of such registrations rose from 45,560 to 49,690, while the number of optionally registrable documents registered fell from 20,890 to 20,001. This decline is attributed to the working of the new rules for recording mutations of land in the Revenue registers by which transfers of land are carefully registered by the Revenue authorities on the spot, the parties to such transfers being saved the trouble of appearing before Sub-Registrars. The steady rise during the past few years in the number of compulsory registrations is believed to be mainly due to the transfers of land having become more numerous. His Honour has drawn the attention of District Officers to the point as one deserving of attention. The total receipts of the Department amounted to Rs. 1,91,056 and the expenditure to Rs. 1,04,610.

The figures under this head for the previous year were Rs. 1,77,664 and Rs. 1,00,842 respectively. The surplus of income over expenditure was Rs. 87,046, the largest yet attained.

7. *Central Provinces*.—The total number of documents registered rose from 24,605 to 25,695, or by 4·4 per cent. This increase of 1,090 transactions occurred mainly under the head of compulsory registrations, which rose from 15,236 to 16,197. Optional registrations increased from 9,205 to 9,330. The instruments registered in greatest numbers were mortgages of immoveable property which usually form about two-fifths of the total number of documents annually registered. The large decrease from 4,337 to 3,540 in the number of leases registered is attributed to the greater efficiency of the Patwari staff consequent upon its reorganization and the approach of settlement operations. The income of the Department rose from Rs. 72,525 to Rs. 78,166, and the expenditure fell from Rs. 41,530 to Rs. 40,791. The percentage of expenditure on receipts fell from 57·2 to 52·1.

8. *Lower Burma*.—The office of Inspector General, which was established at the commencement of 1885-86, was abolished from the 1st January 1887, and Commissioners of Divisions were re-appointed Inspectors of Registration for their several Divisions. There was a considerable decrease in the number of registrations, which fell from 8,919 to 7,630, or to the smallest figure since 1881-82, a result due to stagnation of trade and the disturbed condition of the country. The receipts of the Department, however, rose from Rs. 24,580 to Rs. 25,502 in consequence of the increase in the scale of registration fees introduced early in the year. There was a slight increase in expenditure. The Government of India trusts that, with the removal of the exceptional causes which operated to retard the progress of registration in Lower Burma, the working of the Department will now show better results.

9. *Assam*.—There was again an increase in the total number of registrations in Assam, which rose from 21,213 to 24,169. Of the documents registered, 21,015 were contributed by the districts of Cachar and Sylhet in the Surma Valley, and 3,095 by the districts in the Assam Valley. In the hill districts only 59 transactions were registered. The peculiarity in the tenure of landed property, owing to which transfers of rights in it are comparatively rare, is held to account for the small number of registrations in the Assam Valley Districts. The increase in the number of registrations chiefly occurred in respect of such instruments as were not required to be registered prior to the passing of the Transfer of Property Act and is ascribed to a better appreciation of the Transfer of Property Act consequent on the introduction of the Assam Land and Revenue Regulation and the necessity of producing registered proofs of title in mutation cases. A secondary cause which operated in the Surma Valley was the distress caused by the floods which led to more numerous transfers of property. There was a considerable falling off in the number of inspections of sub-offices by Registrars. The notice taken by the Chief Commissioner will, it is hoped, be productive of improvement in this respect in future. The receipts of the Department rose from Rs. 34,583 to Rs. 36,415, the highest figure yet attained, and the expenditure from Rs. 19,205 to Rs. 22,509. The surplus was Rs. 13,906 against Rs. 15,378 in the preceding year.

10. *Coorg*.—In Coorg there was an increase in the total number of registrations. In the office of the Registrar of Coorg, though the number of documents relating to moveable property exceeded those of last year by three, the value of the transactions fell off by Rs. 1,28,189 or Rs. 21,522 more than the aggregate amount of the decrease in all the offices in Coorg. Explanation on this point has been called for. The expenditure fell from Rs. 2,376 to Rs. 2,025. The decrease was due to the abolition of the office of the Registrar for South Coorg in January 1886. There was a slight increase of Rs. 39 in the income of the Department.

11. *Hyderabad Assigned Districts*.—In the Hyderabad Assigned Districts, where there had been a steady increase in registration business since the year 1875-76, the total number of transactions fell from 26,632 in the previous

year to 25,088 in the year under report, or by 5·8 per cent. The decrease was general over the province and occurred chiefly in instruments of mortgages, the registration of which is compulsory, and also to a less extent in instruments of the same kind when registration is optional. The general cause of the decline is said to be that the year under review followed a year of "sinhast," or entrance of Jupiter into Leo, which occurs once in every twelve years and which is considered unpropitious for marriages. Past experience among Hindus shows that there is good reason to believe that this period exercises in Berar a prejudicial effect on registration during the years immediately succeeding. The falling off in registrations led to a decline in the total receipts from Rs. 59,838 to Rs. 55,952. There was also a slight decrease in the expenditure of the Department from Rs. 36,788 to Rs. 36,318. The inspection work by District Registrars has been very unsatisfactory, and the Government of India trusts that the notice of this neglect of duty taken by the Resident will tend to an improvement in this respect.

In Secundrabad 690 documents were registered against 636 in the previous year. The receipts amounted to Rs. 2,076 and the expenditure to Rs. 931.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the

ORDER—By the Government of India, Department of Finance and Commerce.

READ—

Annual Report on the operations of the Post Office of India for the year 1886-87.

Resolution of the Government of India, in the Department of Finance and Commerce,
No. 732, dated the 9th February, 1888.

ORDERED, that the Report and the Resolution be published in the *Gazette of India*.

C. J. WEIR,
Off. Under-Secy. to the Govt. of India.

No. 732, dated Calcutta, the 9th February, 1888.

RESOLUTION—By the Government of India, Department of Finance and Commerce.

Read—

The Annual Report on the operations of the Post Office of India for the year 1886-87.

RESOLUTION.—The Report of the operations of the Post Office of India for the year 1886-87 is a satisfactory record of progress and of the increased usefulness of the Department.

The principal events of the year are summarized in the first 16 paragraphs of the Director General's report. The most important of these, so far as the inland service is concerned, is the re-organization of the Railway Mail Service.

2. A new contract with the Peninsular and Oriental Steam Navigation Company for the conveyance of the mails between Europe and India was concluded, which will come into force on February 1st, 1888. The period of transit will be reduced by one day and the subsidy by £95,000.

3. The Revenue Money Order system has been extended to all the North-Western Provinces and Oudh, except Kumaon, and has also been successfully introduced into Lower Bengal. The Governor General in Council has also read with interest the remarks in paragraph 32 describing the arrangements made for enabling tenants to remit rent by Money Order. The Director General will, of course, take into consideration the question of the further development of the Money Order system in both directions.

4. The sale of Indian Postal Notes was discontinued as the scheme has not proved successful. The probable discontinuance of the sale of British Postal notes is also mentioned, but the Governor-General in Council desires that a further trial may be allowed before this concession is withdrawn.

It is desirable that the attention of the Public should be called to the remarks in paragraph 26 by the Post Master General of Bombay, showing the very large number of cases in which, on account of flimsy and insecure coverings, newspapers and other articles fail to reach the addressees.

5. The Revenue and Expenditure of the Post Office was as follows :—

	1885-86. ₹	1886-87. ₹
Revenue	1,11,30,863	1,15,78,780
Expenditure	1,30,26,036	1,35,38,630
Deficit	18,95,173	19,59,850

To this deficit, however, should be added indirect expenditure connected with the Post Office which appears in the Finance and Revenue Accounts under other heads, while the charge of the District Post Establishments which is met from local cesses and contributions by Local Government has to be deducted. With these corrections the financial results of the working of the Department during the years 1885-86 and 1886-87 are as under—

	1885-86. ₹	1886-87. ₹
Deficit according to Statement XI of the Report (purely postal transaction including exchange)	18,95,173	19,59,850
Add indirect expenditure	7,06,925	6,52,417
	26,02,098	26,12,267
Deduct District Post Charges	10,87,120	11,09,172
Resulting deficit	15,14,978	15,03,095

As pointed out last year, this deficit includes the cost of keeping up the savings bank accounts and also the charges connected with postal arrangements in Beluchistan. The cost of these arrangements was ₹98,429 in 1885-86 and ₹90,388 in 1886-87.

6. The thanks of the Government are due to Mr. Hogg for the continued success of the administration, and also to the officers named in paragraph 80 of the report.

ORDERED, that a copy of the foregoing Resolution be communicated to the Director General of the Post Office of India.

E. J. SINKINSON,
Offg. Secretary to the Government of India.

ANNUAL REPORT
ON THE
OPERATIONS OF THE POST OFFICE OF INDIA
FOR THE YEAR
1886-87.

No. 10750, dated 31st December, 1887.

From—F. R. Hogg, Esq., Director General of the Post Office of India,
To—The Secretary to the Government of India, Department of Finance and Commerce.

I have the honour to submit the Annual Report on the operations of the Post Office of India for the official year 1886-87.

2. Bolivia, in South America, joined the Universal Postal Union with effect from the 1st February 1887.

3. Although sea communication with Europe is a service distinct from the Indian inland post, to which this report relates, it is usual to enter some information relating to its cost. The subsidy paid to the Peninsular and Oriental Company is not nearly covered by the postage realized. All that India collects on account of sea postage is credited to Great Britain; and when this, as well as the British collections, have been deducted from the total cost of the sea service,

Communication by sea between India and Europe by means of the contract service of the Peninsular and Oriental Steam Navigation Company.

YEAR.	Net loss on the Foreign Mail Service charged against India.	REMARKS.
	£	
1869-70 . . .	73,110	The increase in 1876-77 and following years was caused by the reduction of postage carried out on 1st July 1876, when India entered the Union. The increase in 1879-80 is due to the reduction of postage introduced from 1st April 1879 under the Convention of Paris.
1870-71 . . .	69,150	
1871-72 . . .	68,110	
1872-73 . . .	61,072	
1873-74 . . .	54,770	
1874-75 . . .	57,170	
1875-76 . . .	53,125	
1876-77 . . .	66,685	
1877-78 . . .	70,749	
1878-79 . . .	71,051	
1879-80 . . .	88,160	
1880-81 . . .	71,051	
1881-82 . . .	70,000	
1882-83 . . .	70,000	
1883-84 . . .	70,000	
1884-85 . . .	70,000	
1885-86 . . .	68,000	
1886-87 . . .	68,000	

the balance or net cost is made a charge in equal shares upon the United Kingdom and India. This country's share of the expense since the year 1869-70 is entered in the margin.

4. Below is given an extract from the report of the Post Master General of Bombay relating to the working results of this contract :—

"The contract steamers of the Peninsular and Oriental Company arrived in Bombay behind contract time on four occasions. On three of these occasions the delay was due to detention in the Suez Canal, or on account of quarantine; while on the fourth occasion the S. S. Assam arrived 7 hours and 7 minutes behind time on the 30th November 1886, owing to the constant head winds which the steamer encountered all the way from Suez. The extent of the delay in the arrival of the other steamers is shown in the margin. On the

other hand, the mail steamers arrived in Bombay on 36 occasions on Monday, the day before the prescribed day of arrival, and on one occasion on Sunday. The average

	D. H. M.
The S. S. Siam, on 3rd November 1886	1 1 25
The S. S. Assam, on 15th June 1886	0 8 48
The S. S. Assam, on 7th September 1886	0 1 54

time occupied by the mails was 16 days 22 hours and 20 minutes from London to Bombay, and 16 days 20 hours and 54 minutes from Bombay to London."

5. In anticipation of the termination of the present Peninsular and Oriental contract, an inter-departmental Committee met at London in 1884 to investigate the subject of mail arrangements for the East. One of the recommendations offered by that Committee was that, when tenders for a new service were invited, an effort should be made to reduce from 18 to 16 days the time occupied in transit between London and Bombay : and the invitation for tenders issued in the following year was framed with the object of securing this reduction. But on receiving the tenders, Her Majesty's Post Master General expressed a decided preference for an offer from the Peninsular and Oriental Company to bring the mails from London to Bombay not in 16 but in 17 days, using the canal instead of the railway between Mediterranean and the Red Sea. This suggested substitution of the slower canal passage for the quicker land route across Egypt considerably neutralized the gain derived from increased speed in steaming and enhanced the risk of accidental delay. India, therefore, opposed the British proposal and pressed for the retention of the land route between Alexandria and Suez, looking upon a reduction to 16 days in the time taken for mail conveyance between London and Bombay as an imperative necessity. But the views of Her Majesty's Post Master General prevailed, and a new contract has been concluded with the Peninsular and Oriental Company in accordance with his views. From February 1888, therefore, the mails carried by this Company will pass through the canal, the period allowed for transit being nearly 17 days. But the annual subsidy to be paid for the Eastern mail service, which includes both China and India, will be reduced from £360,000 to £265,000, and the expense of transit by land across Egypt will also be saved.

6. Under contract with the India General Steam Navigation Company, a daily steamer service began to work on the 1st January 1887 from Narainganj on the Megna to Fenchuganj or Karimganj on the Surma : during the rainy season this service is extended to Silchar. A new four-weekly mail service was also established by the German Post Office, *via* the Suez Canal, between Bremen on the one side and Australasia, China, and Japan on the other. So far as Indian postal arrangements are concerned, this line is used only by the Aden Post Office for its own exchanges and for those of Zanzibar. A list is given below of the principal steam services for maintaining postal communications in Indian waters, with the Indian Post Offices in the Persian Gulf and Turkish Arabia with Ceylon, the Straits, China, and Australia :—

By the British India Steam Navigation Company.

- | | | |
|---|---|---|
| <ul style="list-style-type: none"> (1) Weekly communication between Calcutta, Rangoon, and Moulmein. (2) Weekly communication between Calcutta and Rangoon, <i>via</i> Chittagong, Akyab, Kyauk-Phyo, and Sando-way. (3) Weekly communication between Rangoon and Mergui, <i>via</i> Tavoy. (4) Fortnightly communication between Madras and Rangoon, touching at certain intermediate ports on the north-east coast of Madras. (5) Weekly direct communication between Bombay and Karachi. (6) Weekly communication between Bombay and Karachi, <i>via</i> the coast ports. (7) Weekly communication between Karachi and Busrah, <i>via</i> the Persian Gulf ports. | } | <p>Under contract with the Post Office for ten years, from 1st May 1884, on an annual subsidy of Rs. 4,39,000.</p> |
| <ul style="list-style-type: none"> (8) Fortnightly communication between Madras and Bimlipatam, <i>via</i> Masulipatam, Coconada, and Vizagapatam. - (10) Weekly communication between Kyouk-Phyo, Ramree, and Cheduba.

Under contract for ten years, from November 1884, with the Local Administration, on a monthly subsidy of Rs. 1,500 for the first five years and Rs. 1,200 for the second period of five years, subject to other arrangements if intermediately made.

By the Asiatic Steam Navigation Company.

- (11) Four-weekly communication between Calcutta and Port Blair, with extensions to Nancowry and Rangoon.

Under the control of the Military Department, the consideration given being not in the form of subsidy but of guaranteed rates for the transport of Government stores. Began to work from the 12th May 1882, and terminable by a notice of six months.

By the Irrawaddy Flotilla Company.

- (12) Weekly communication between Rangoon and Mandalay and intermediate ports, with a monthly extension between Bhamo and Mandalay.

Under contract for five years from the 1st January 1886, the subsidy being Rs. 3,500 per month.

- (13) Semi-weekly communication between Rangoon and Bassein, and Bassein and Henzada.

Under contract with the Local Administration for five years, from 1st July 1880, and to continue in force thereafter, unless determined by six months' notice. The monthly subsidy is Rs. 2,500, towards which the Post Office contributes Rs. 500 per mensem.

By the Euphrates and Tigris Steam Navigation Company.

- (14) Weekly communication on the river Tigris between Busrah and Bagdad.

Under contract for ten years, from the 1st May 1884, with Her Majesty's Secretary of State for India. Subsidy Rs. 36,000 per annum: steamers run in connection with line No. 7.

By Messrs. Apcar and Co., Calcutta, and Jardine, Mathewson, and Co., Hong-Kong.

- (15) Monthly communication between Calcutta and Straits and Hong-Kong, the dates of departure being regulated primarily with reference to the Calcutta opium sales.

No subsidy.

By the Peninsular and Oriental Steam Navigation Company.

- (16) Fortnightly communication between Calcutta and Colombo, touching at Madras.
Fortnightly communication between Bombay and Colombo.

Non-contract lines maintained by the Company on its own account in connection with the China and Australian mail services. The Post Office pays by weight for the conveyance of mails sent by these non-contract steamers.

By other Agencies.

- (17) By the River Steam Navigation Company. Daily communication between Dhubri and Dibrugarh on the Brahmaputra river.

Under contract with the Local Administration from the 7th October 1883 to the 1st May 1893. Annual subsidy Rs. 1,00,000, towards which the Post Office contributes Rs. 30,000.

- (18) By India General Steam Navigation Company. Daily communication between Naraingunj and Silchar.

Under contract with the Local Administration, from 1st January 1887 to 31st December 1891. Annual subsidy Rs. 40,000 during the first two years, and Rs. 30,000 during the succeeding three years, towards which the Post Office contributes Rs. 10,000.

- (19) By Shepherd and Company's Steamers. Daily communication between Bombay and Goa.

Under contract with the Local Government, from 1st October 1886 to 31st May 1887. The monthly subsidy is Rs. 2,880, towards which the Post Office contributes Rs. 780, the Portuguese Government Rs. 200.

(20) By Bengal Central Flotilla Company. Daily communication between Khulna and Barisal.

Under contract with the Post Office from 1st July 1884 to 30th June 1889. Monthly postal subsidy Rs350, of which the Imperial Post Office contributes Rs183, terminable by six months' notice.

NOTE.—A service by sea worked by native boats is maintained by the Government of Ceylon between Point Calimere on the Indian side and Kankasanturai on the Ceylon side.

7. One of the most important events of the year was the introduction in the North-Western Provinces and Oudh of the rent money-order system, under which special facilities are furnished for the payment of rent by tenants to landlords through the agency of the Post Office. The revenue money-order system, which utilises the Post Office as a medium for transmitting land revenue from landlords to the Government, was extended throughout the Lower Provinces of Bengal and to nearly all the districts in the North-Western Provinces and Oudh.

8. All District Savings Banks were closed from the 1st April 1886, their business being transferred to the Post Office, and from June in that year the Postal Department undertook the duties previously discharged by the Savings Banks at District Treasuries managed by the Banks of Madras and Bombay.

9. The inland telegraphic money-order rules were simplified, and the rates of charge to the public considerably diminished.

10. A considerable reduction was made in the rates of postage fixed for correspondence exchanged with Ceylon, the charge to the public on articles sent by the principal routes passing through the south of India being now only the inland rates of the country of origin.

11. Stationary Examiners of Post Office Accounts were substituted for the previously existing system of travelling Examiners. Under this change the accounts are sent to the Examiner instead of that officer being required to visit the offices, and, besides increased efficiency, a great saving in travelling expenses has thus been effected. The duty of verifying balances at Post Offices, which formerly devolved on the Examiner, has been transferred to the Superintendent of the Division.

12. Postal conventions were concluded with the Native States of Chumba and Faridkot, providing for an exchange of correspondence, parcels, and money orders.

13. A special set of rules were framed by the Post Master General of Bengal for taking personal security from Post Masters, Sub-Post Masters, Village Postmen, and Post Office Clerks, and the rules were made applicable to these classes of officials in the Circles of Bengal, Madras, and Assam.

14. With the object of diminishing its yearly growing expenditure, the Railway Mail Service Branch of this Department has been subjected to a careful reorganisation. As the cost of sorting letters in a railway carriage is far more expensive than in a Post Office, stationary offices were established at large junction-railway stations where the intervals of time available between arrivals and departures of trains on main and branch lines are utilised for the sorting of correspondence. Similarly a large number of direct mail bags between large Post Offices have been introduced so as to curtail the sorting work done in the travelling Post Office. Direct mail bags also now pass between Post Offices and the main arterial lines of railway communication, which has rendered possible either a reduction in the number of sorting sections maintained on the side and less important railway lines, or a diminution in the space used by the Post Office on such lines. By the imposition of a late letter fee the abuse of posting letters in wholesale quantities in the vans provided for sorting operations has been checked, while offices maintained by this Department at railway stations for Railway Mail Service work have, to a large extent, been relieved of money order, registration, and other duties which properly belong to the local Post Office. With railway

extensions postal charges must increase, but through the measures above sketched, the Inspector General of the Railway Mail Service has been able not only to minimise the extra cost arising from additional establishments required, but also considerably to reduce the increased payments made by this Department to the several Guaranteed and State Railways.

15. After an existence of more than a century the dromedary post across the Syrian desert was closed in July 1886. Though controlled not by this Department but by the British Consulate, this line formed an important auxiliary to Indian postal arrangements in Turkish Arabia. By this route mails were exchanged between Bagdad and Europe, and Lord Nelson is said to have used it for conveying to the Government of India news as respects the battle of the Nile. Originally the line ran from Busreh at the mouth of the Tigris to Aleppo: but since 1843-44 the termini were Bagdad and Damascus, the time occupied in transit being about nine days. In 1881, a desert post over the same line having been established by the Ottoman Government, the income derived from the consular post fell off and, as its expenditure exceeded its receipts, the number of trips was first reduced from once a week to once a fortnight, and eventually this British desert post line was wholly discontinued.

16. The Jubilee of Her Majesty the Queen-Empress was celebrated in India on the 16th February last, and both the 16th and 17th of that month were observed as Post Office holidays. On the night of the 16th February, the Post Offices in the three Presidency towns were splendidly illuminated, and most of the larger offices in the interior were also illuminated.

Section I.—Post Offices, Letter Boxes, and Village Postmen.

17. Appendix I, of which an abstract is given in the margin, compares

	Number at the close of 1885-86.	Number at the close of 1886-87.	Increase.
Post Offices . . .	6,849	7,097	248
Letter Boxes . . .	9,056	9,386	330
Village Postmen . . .	4,253	4,455	202

the number of Post Offices, Letter Boxes, and Village Postmen maintained on the last day of the year under review with the number which existed at the close of the

previous year. There has been a reduction in the number of head offices from 330 to 326, and an increase in the number of sub-offices from 3,900 to 3,904, while the number of village offices has risen from 2,619 to 2,867: thus the total increase of 248 is wholly confined to the last named head. The largest increases are in Bombay (67), in Bengal (58), and in Madras (30). Most of these new offices are worked by schoolmasters and other extraneous means, the total number of these extra-departmental agencies being 2,214 on the 31st March 1887, as compared with 1,969 at the close of the year 1885-86.

Section II.—Postal Lines.

18. Appendix II shows for each postal circle the mileage under the vari-

YEAR.	Railway.	Mail cart, horse and camel lines.	Runners or boats.	Steamer service, sea and river.	TOTAL.
	Miles.	Miles.	Miles.	Miles.	Miles.
1885-86 . . .	11,862	4,227	35,281	11,117	62,487
1886-87 . . .	12,710	3,933	35,729	11,683	64,055
Increase . . .	848	...	448	566	1,568
Decrease	294

ous means used for the conveyance of the mails during two years: the figures for the whole of India are exhibited on the margin. The sections which compose the total increase of 848 miles under the head of "Railway," are distributed over numerous lines

in various parts of India, the provinces principally affected being Bombay, the North-Western Provinces and Oudh, Madras, Rajputana, Eastern Bengal, Behar and Baluchistan. Under the next heading, 826 horsed lines have been closed and 532 opened, the net decrease being 294 miles. Among the more important of the new lines opened are the following:—Giridih and Hazaribagh, 72 miles; Calicut and Cannanore, 57 miles; Jhansi and Gwalior, 65 miles; Chitor and Oodeypore, 72 miles; Toungoo and Pyinmana, 64 miles. The greater part of the additional mileage under the head of "Runners and Boats" has occurred in Assam, and was due to the extension of mail communication in the direction of Upper Burma, necessitated by military operations in that locality. Finally the increase in steamer mileage is explained by the opening of the river line between Narainganj and Silchar, to which reference has already been made.

Section III.—Correspondence.

19. Appendix III contains the general correspondence returns for each

YEAR.	Letters, including Post-cards.	Newspapers.	Parcels.	Book and Pattern Packets.	TOTAL.
	No.	No.	No.	No.	No.
1885-86 . . .	211,982,718	20,341,814	1,476,271	5,119,335	238,920,138
1886-87 . . .	225,811,265	21,606,697	1,579,904	5,751,878	254,749,744
Increase . . .	13,828,547	1,264,883	103,633	632,543	15,829,606
Percentage of Increase . . .	6.52	6.22	7.02	12.36	6.63

circle, the results for the whole of India being summarised on the margin. Compared with the figures for the previous year, each heading shows improvement, the increase on the

total being nearly 16 millions of articles, or 6.63 per cent. This increase has, for the most part, been general throughout India, the principal exception being the Postal Circle of Central India, where the closure of certain Imperial Offices situated within Gwalior territory and the extension of postal operations undertaken by that Native State, has resulted in a fall of 10.77 per cent. in the correspondence given out for delivery through the Imperial post in that territory. It will be seen that the proportion of increase is lower in the case of newspapers than under the other headings. By the reduction of postage rates on the lighter

Year.	Increase.

1885-86 . . .	16.19	"
1886-87 . . .	6.22	"

Native papers in the year 1881, a stimulus was given to this class of correspondence, as the marginal figures will show, and the percentage in growth now recorded is smaller than that of any year since the reduction referred to took place. Parcels exhibit an increase of 7.02 per cent. Now that the Post Office has to compete in this kind of business with combinations of railway lines over the length and breadth of India, the retention of parcel traffic largely depends on the facilities furnished to the public by the value-payable and insurance systems, which already compose about one-third of the total number of parcels posted. Book and pattern packets again present the highest proportion of increase. Analysing the details of this business it is found that the number of registered book packets has fallen by nearly 18.24 per cent. but that this fall has been more than counterbalanced by an increase, exceeding 86 per cent., in the number of unregistered value-payable book packets.

20. Further details relating to letters and post-cards are entered on the margin. The number of post-cards has risen by rapid strides from 15 millions in 1880-81 to 68 millions in 1886-87. These figures include reply post-cards, the number of

YEAR.	Post-cards.	Letters Paid.	Letters Unpaid.	Letters Registered.	TOTAL.
	No.	No.	No.	No.	No.
1885-86	58,853,957	120,106,172	28,813,071	4,209,518	211,982,718
1886-87	67,756,098	125,871,580	27,562,688	4,620,899	225,811,265

Decrease	1,250,383
Percentage of Increase	15'13	4'80	...	9'77	6'52
Percentage of Decrease	4'34

which has declined from 2,913,666 in 1885-86 to 2,479,341 during the year under review. When these cards first were introduced their size was somewhat larger than that of the ordinary card, and a practice began of separating the reply card into two portions and using each portion as a separate card, because of the extra space provided. But the size of the reply-card having now been reduced to the limits of the single card, the practice referred to has been discontinued, and a fall in the number of reply-cards is the natural result. Notwithstanding the competition of post-cards, a normal increase is to be found under the heading of Paid Letters. Unpaid Letters exhibit a decrease, which the Post Office always recognises as a healthy sign of increasing confidence on the part of the native public: but the sale of both post-cards and of the cheaper kinds of embossed envelopes free of charge for material and manufacture necessarily tends to encourage the prepayment of correspondence. Registered Letters have increased by 9'77 per cent.: this is the highest increase since 1881-82, the year following the reduction of the registration fee from 4 annas to 2 annas.

21. Foreign correspondence is included in the general returns already dealt with, but separate figures are given below. Last year's report exhibited an increase in the correspondence sent to the United Kingdom and a fall in the amount received from that country: while the statistics for 1886-87 shew an increase in both directions, the increase in the number of articles received from the United Kingdom (15'47 per cent.) being much higher than the increase (4'63 per cent.) in the number sent to that country:—

22. *Foreign Parcel Post.*—Early in the year the limit of weight for parcels exchanged with the General Post Office in London was raised from 7lb to 11lb. A new exchange was introduced between Zanzibar on the one side and India and the United Kingdom on the other: the exchange with the West Indies through the medium of the United Kingdom was extended to the Leeward Islands and Barbadoes: the direct exchange between Aden and Gibraltar was discontinued: and the temporary exchange with Suakim ceased. The working results of the year are tabulated in the following statement:—

NOTE.—These figures are included in the general correspondence returns.

* The exchange with Suakim was discontinued on the 8th May 1886.

23. Foreign parcel business is, for the most part, conducted through Bombay, and the following extract is taken from a report by the Post Master General of that Circle on the results attained in connection with the United Kingdom, which is the largest and most important of all these exchanges. Mr Fanshawe's observations exclude the small amount of traffic derived from Aden:—

"The total number of parcels sent as mails between the Indian and English Post Offices and carried by the P. and O. Company on account of their own agency in communication with the Indian Post Office, was 8,248 in excess of the number of last year. It has already been stated that the limit of weight of parcels exchanged with the London Post Office was raised in May 1886 from 7lb to 11lb, so that for 11 months of the year parcels of the greater weight could be sent and received. The year under report is further the first year, during the whole of which the parcel exchange with the London Post Office has been in force, and the way it has affected the parcel traffic and the revenue is very marked. In 1884-85, before the arrangement with the London Post Office was introduced, 70,467 parcels were received from the United Kingdom by the agency of the P. and O. Company. In 1885-86 the direct exchange of light parcels with the London Post Office was introduced from the 1st July 1885, and the number of parcels carried by the P. and O. Company to India on account of its agency, fell to 54,119, while 31,042 were sent out from the London Post Office, making a total of 85,161 parcels. During the year under report, 40,840 parcels were brought to India by the P. and O. Company on account of its own agency, and 47,047 on account of the London Post Office. It will be seen, therefore, that from the United Kingdom there is still a large traffic in heavy parcels, the greater number of which come from London tradesmen and co-operative societies. With regard to the parcels from India to the United Kingdom the case is different. In 1884-85 the total number sent was 29,729, all of which were carried by the P. and O. Company's special agency. In 1885-86 the total number rose to 34,499, of which 24,027, with a limit of 7lb weight, were for the London Post Office and 10,472 for the P. and O. agency. During the year under report the total number has risen to 39,495, but of this number no fewer than 37,580 were for the London Post Office, now that the limit of weight has been raised to 11lb, while 1,915 only were for the P. and O. agency. It will, therefore be seen that the parcels sent from India consists almost entirely of light parcels, and it

may be added, are posted, as a rule, by private persons. This wholesale transfer of the parcel business from the P. and O. agency to the London Post Office mainly accounts for the decrease in parcel postage revenue, which in the year's returns accompanies a large increase in parcel traffic. The charge for parcels, whether exchanged with the P. and O. agency or the London Post Office, is the same, but the Indian Post Office receives $\frac{1}{4}$ less out of every shilling, or eight annas, in the case of the latter parcels, than in the case of former."

YEAR.	Number of Foreign Parcels.	YEAR.	Number of Foreign Parcels.
	No.		No.

24. Statistics exhibiting the yearly growth of the foreign parcel post traffic since this business was undertaken, in the year 1873-74, are given on the margin.

25. The following figures represent the disposal of the correspondence entered in the statement given on the margin of paragraph 19 of this report. These figures show that the proportion of articles delivered to the whole number sent out for delivery was 96·98 per cent.:—

	No.
Sent out for delivery (including 4,821,117 Money Orders) .	259,570,861
Received back undelivered	7,847,240
Balance actually delivered	251,723,621
Sent to Dead Letter Offices	2,970,888
	<u>254,694,509</u>

26. *Dead Letter Office.*—Appendix IV, of which an abstract is given below, shows the number of articles received at, and disposed of by, the eleven Dead Letter Offices in India; 73·26 per cent. of the total number of articles received at these offices were disposed of either by redirection to their addressees or by return to their senders, leaving an undisposable balance of 26·74 per cent. The increasing use of post-cards tells against the work of Dead Letter Offices, inasmuch as the senders of this class of correspondence rarely insert their addresses, and often omit even their names in full, confining their signatures to initials. Below is given an interesting extract from the annual report by the Post Master General of Bombay:—

"Each Dead Letter Office has its own special difficulties to contend with, and it is found by experience that the proportion of letters disposed of to the total number received varies very considerably according to the languages in which they are written. Ninety per cent. of the English letters and 70 per cent. of the Marathi letters are disposed of, the reason being that the address of the sender is almost always given in English letters, and very commonly in Marathi letters. In the case of Gujarathi letters, however, the percentage of disposal is only 40 per cent. owing to the general absence of details as to the address of the sender, and in the case of letters in Portuguese or the bastard Portuguese written by the Goanese servants and others in this presidency, the percentage is only 25. These latter letters, of course, only enter to a small extent into the returns of the year, some 25,000 to 30,000 being received in the Dead Letter Office.

"During the year the Bombay Dead Letter Office had to deal with valuable securities and other property found in letters, which were opened in the course of its business, of the total value of $\text{Rs. } 1,86,727-2-11$. Of this amount cheques and hundios, generally contained in unregistered letters, accounted for a sum of $\text{Rs. } 1,46,733-14-7$, while the balance was made up as under:—

	R	a.	p.
Bills of Exchange	36,617	13	9
Coins and other valuables	1,571	4	5
Currency notes	1,445	0	0
Transfer Receipts	270	0	0
Postage Stamps	89	2	2

"Property of the value of $\text{Rs. } 1,75,160-7-11$ was disposed of during the year, leaving a balance of $\text{Rs. } 11,566-11$ as undisposable, chiefly under the head of Hundies. In one instance a letter which was received from Bagdad without any address of any kind was found to contain twenty currency notes of the aggregate value of $\text{Rs. } 505$ and a hundi for $\text{Rs. } 800$. The contents were safely delivered to the person for whom they were intended—a Mahomedan merchant in Bombay. Year after year a large number of letters with blank faces appeal mutely to the Dead Letter Office to find for them a local habitation and a name. Not fewer than 300 such letters, on an average, reach the Bombay Dead Letter Office every month. Many book packets, chiefly received by foreign post, also reach the Dead Letter Office without addresses, but the absence of address in these cases is generally due not to neglect to write the address, but to neglect to fasten it properly on the packet. Further, by every P. and O. mail steamer are received a mass of newspapers without addresses, owing to the fact that the wrappers or covers have become detached in transit. These, as a rule, are the newspapers posted by private persons, as distinguished from agents and firms, with flimsy wrappers and insecure fastenings, from which they have parted company long before they reach the hands of the sorters between Suez and Bombay. Only lately a complaint of the loss of German newspapers led to the discovery that the same newspaper had for a succession of weeks regularly found its way into the Dead Letter Office owing to the inadequate way in which it was closed for posting in Austria. The same carelessness or obliviousness of what a transit in the mail bags for 5,500 miles by land and sea really means consigns hundreds of tokens of affection in the shape of Christmas and New-Year cards to a premature grave in the Bombay Dead Letter Office. Four years ago I introduced a system under which the Manager of the Dead Letter Office sends a regular form of enquiry to every person to whose address a detached wrapper or cover is received, asking for information as to what he expects, and in this way it has been found possible to mitigate, to some considerable extent, the results of this carelessness, specially in the case of newspapers. The public, as a rule, are tolerant of mistakes on the part of the Post Office, and disposed to give it ample credit for what it does; but if some of the lessons that are to be learnt in a Dead Letter Office could only be generally taken to heart, there would be much fewer complaints than now are made."

In Bengal the Post Master General reports as follows:—

"Cheques, currency notes, bills of exchange, transfer receipts, and other valuables to the amount of $\text{Rs. } 51,428$ were found in covers that had to be opened during the year in the Dead Letter Office, owing to incorrect or incomplete addresses, or no addresses at all being given by the senders; and all of the contents, except a few stamps and small coins to the total value of ten rupees, were satisfactorily disposed of by transmission to the addressees or by return to the senders. Among the articles that had to be opened in order to secure their delivery were bills of exchange for more than $\text{£}2,200$ sterling, cheques and hundies for more than $\text{Rs. } 11,000$, and currency notes for $\text{Rs. } 2,680$."

Dead-Letter Office Work.

27. *Postage Stamps, &c.*—Appendices V and VI contain particulars relative to the sales of postage stamps, embossed envelopes and post-cards in each Circle; the results for the whole of India are given on the next page. These figures represent purchases made by Postmasters and other stamp-vendors for retail to the public. The sales of ordinary $\frac{1}{4}$ -anna post-cards show an increase of nearly 8 millions, $3\frac{1}{2}$ millions of which belong to the Bombay Circle and $1\frac{1}{4}$ million to the Bengal Circle, while the number of inland reply post-cards disposed of exhibits a fall of more than a million, the cause of which has already been explained.* The number of ordinary $\frac{1}{2}$ -anna envelopes sold was 55,520,019, being a rise of 1,627,559; if to this be added the sales of the new $\frac{1}{2}$ -anna square envelopes, the increase is more than 2 millions. A fall of about 20,000 has taken place in the number of ordinary 1-anna envelopes disposed of; but this fall is more than counterbalanced by the sale of 108,716 of the new square envelopes of the same value. Notwithstanding the competition of the new $4\frac{1}{2}$ -anna labels, of which 419,354 were sold, the sales of the envelope embossed with this duty were about 30,000 in excess of the previous year. Increases occur under the heads of $\frac{1}{2}$ -anna, 9-pie, 6-anna, 8-anna, and 1-rupee labels, while the sales have diminished under the heads of 1 anna, $1\frac{1}{2}$ anna, 2 annas, and 4 annas. The net result is an increase of nearly $3\frac{1}{2}$ lakhs of rupees in the gross value of the ordinary postage stamps sold of all denominations.

28. With effect from the 1st May a small-sized registration envelope, square envelopes of two kinds, embossed, respectively, with a $\frac{1}{2}$ -anna and a 1 anna stamp, and a $4\frac{1}{2}$ -anna adhesive stamp for foreign letters, were offered for sale to the public: and in November a large-sized registration envelope was also introduced. Besides the face value, a small charge is levied in the case of these envelopes to cover the cost of material and manufacture. It is as yet too early to draw conclusions as to the popularity of this new stationery: but the sales of the year shew that they have hitherto found most favour in Madras. From September the Post Office as a department undertook the sale of 1 anna revenue or receipt stamps and very nearly a million of these stamps were bought from Government during the year by Postmasters for retail to the public. The largest purchases made were in Bengal (285,095), in Madras (157,277), and in Bombay (119,624). From October Postmasters in Lower Burma were allowed also to sell general stamps, not exceeding Rs each in value, and the total value of these stamps purchased by Postmasters from the Government Treasuries amounted to Rs 3,208. The special rules relating to the custody, supply and sale of postage stamps were amalgamated in a general set of rules applicable to stamps of all kinds and to stamped papers actually in use.

29. Below is added a table denoting the proportions of revenue yielded in money and in stamps:—

Proportion of Revenue derived from Postage Stamps and from Cash.

	1874-75.	1875-76.	1876-77.	1877-78.	1878-79.	1879-80.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.

Section IV.—District Post.

30. The District Post provides postal communication in parts of the interior of British India to which the organisation of the Imperial Post has not yet been extended. Its control is vested in the local Postal authorities, subject to the orders of the local Governments: and its funds consist partly of local cesses and partly of grants from Imperial or from Provincial revenues. On the next page a detailed statement will be found comparing the operations of the District Post during the last two years. As explained in previous reports, the assets and charges shown in this statement do not correspond with those exhibited in the Finance and Revenue Accounts. While the road mileage has diminished the numbers of offices, letter-boxes, and postmen have all increased; the total sum yielded by local cesses rose by ₹33,467, while the grants from Imperial and Provincial revenue fell by ₹7,471, and the total amount spent on the District Post was ₹10,23,980, or an increase of ₹28,115. More than 15 millions of articles were received for delivery or posted for despatch—a great advance on the results of the previous year—while the percentage of articles returned as undeliverable fell from 5 per cent. to 4·81 per cent. In Lower Burma the development of the District Post was held in abeyance owing to the greater need for postal extension in the upper portion of that Province. As respects Coorg the Post Master General reports as follows:—

“The whole of the arrangements in this district were entirely recast during the year under review, some useless lines being closed and others opened in their place, while at the same time several offices were transferred to more favourable sites. There is reason to think that the great increase in the correspondence carried by the District Post in that district is due to the changes that were then made. There has been an increase of over 30 per cent. both in the number of articles collected for despatch and in the number received for delivery.”

There is no part of India where the need for postal extension in the interior is more pressing than in the Presidency of Madras. On this subject the Post Master General writes in the following terms:—

“For the last 15 years the District Post in this Circle has not been regarded as merely the means of keeping open communication for official purpose over lines which the Imperial Post could not afford to maintain, but rather as the pioneer of the Imperial Post. It extended the operations of the Post Office in the interest of the public generally beyond the limits within which the Imperial Department was bound by its rules to work. Its operations were thus experimental; and, after correspondence had developed and any particular experiment had become remunerative, a transfer to the Imperial Department was effected. In course of time, however, the Taluqwar system was introduced, whereby District Post establishments were arranged in groups; and the group was transferred, when, as a whole, its income satisfied the conditions prescribed by rule; but latterly the proposals for the transfer of these groups were rejected on financial grounds. Hence the process of absorption was checked, and the Imperial Department and the District Post Department have been growing each independently of the other; and an actual cleavage has been formed between the two. Immediate measures will be taken to remedy this; the details of the District Post establishment are being carefully scrutinised, and proposals will be made for the transfer of all establishments that are remunerative. Funds will thus be set free, and the District Post will then again be able to extend its operations to the great advantage of the public and ultimately of the Imperial Department.”

(a) Includes contributions from Tributary Mebals, Chota Nagpur, Orissa, and Khond in 1886-87.
 (b) Includes the amount of annual subsidy for the Dera Ismail Khan and Chichawatni hill cart line.
 (c) These are dry season distances; during the rains these lines are increased in length.
 (d) Includes contributions from Frontier Police Fund, ₹4,320 in 1885-86, and ₹3,956 in 1886-87, and contributions by the Maharajah of Agartala, ₹240 in 1885-86 and ₹288 in 1886-87.
 (e) Includes lines paid from the revenues of Feudatory States, of 589 miles in length in 1885-86, and 642 miles in length in 1886-87.
 (f) Grant made available from Bombay District Post Funds.

Section V.—Money Orders.

31. During the year the Revenue Money-order system, to which allusion has been made in the last two annual reports, was extended to the whole of the North-Western Provinces and Oudh, with the exception of the Kumaon Division. Meetings of Revenue officers were held in 25 districts, with the object of attracting interest in the scheme and anticipating future practical difficulties: cards were distributed showing the correct amount of revenue payable by each individual, and a great deal of pains taken to ensure success. This trouble was rewarded by the issue of 57,888 revenue money orders, aggregating in value ₹10,87,093, and yielding ₹15,284 as commission. Each order averaged in value ₹18-12-5. It is satisfactory to add that one case of misappropriation only occurred connected with this business, a sum of ₹63 having been devoted to his own use by a Branch Postmaster. In Bengal, too, great progress was made in the same direction. Below is given an interesting account by the Post Master General regarding the origin of the system and its recent extension to the whole of the Lower Provinces of Bengal:—

“Before the introduction of a special system for the remittance of land revenue by money order a certain number of small zemindars used occasionally to avail themselves of the money-order system and send their instalments of revenue to the Collector by money order. These remittances were not, however, legal tenders of revenue any more than remittances of rent by money order are legal tenders of rent, and it was always in the power and discretion of the Collector to refuse such remittances. As a matter of fact, they were frequently refused on the ground that the particulars required by the Land Revenue Department were not given by the remitters, or that the form in which they were given was inconvenient. For this reason, and possibly also because the exemption of small zemindars from personal attendance at the Collectorate was distasteful to and discouraged by the Collectorate Amlahs, the practice of remitting land revenue by the ordinary money order was very rarely resorted to. Representations were, however, from time to time made to both Government and the Postal Department that a recognized and authorized system for the remittance by money order of land revenue and the cesses ordinarily paid at the same time as land revenue would be warmly welcomed by the smaller revenue-payers who have no agents at the sudder station, and to whom the obligation of personal attendance at the Collectorate in order to pay each revenue kist was a grievous and repeated burden. The Lieutenant-Governor, therefore, sanctioned, as an experiment from the 1st October last, a system under which zemindars, whose annual revenue did not exceed 50 rupees, might remit their land revenue, road cess, and public works cess to the Collector by a special form of money order, in which provision was made for the entry in a special coupon or chalan of all particulars required by the different receiving offices. The system was so devised as to give the Land Revenue Department an opportunity of examining each money order and chalan before accepting the remittance, and any money order that is refused is at once returned to the remitter by the Post Office. The receipts for accepted remittances are returned to the remitters under a special system of registration, so that each zemindar who pays his revenue by money order receives, in the first instance, a receipt from the Post Office of issue and afterwards a formal receipt with the full particulars signed by the responsible Collectorate officers. The system was introduced as an experiment in only the ten districts of the Burdwan and Dacca Divisions, and the following statement shows the extent to which it was availed of in those districts during the six months in which it was in force in the year under report:—

NAME OF DISTRICT.	Number of Revenue money orders issued.	Value of Revenue Money-orders issued.	Commission realized.	REVENUE MONEY ORDERS RECEIVED DURING THE HALF YEAR. * The District of Howrah is in the Revenue jurisdiction of the Collector of Hughli, so that remittances of revenue in Howrah are paid at Hughli.

† The excess of Revenue money orders received above the number issued is accounted for by remittances from Zamindars holding land in the district to which the system applied, but resident in other districts.

"It will be seen that the average value of each revenue money order was only slightly above Rs. 5, so that it would appear that the system was mainly, if not solely, availed of by those for whom it was designed, namely, very small revenue-payees who have ordinarily no occasion to visit the sudder station, and to whom the burden of a journey to and from the Collectorate to pay each instalment of revenue must have been almost greater than the payment itself. As the system worked with complete success in the districts in which it was experimentally introduced, His Honour the Lieutenant-Governor was pleased to authorize its extension to the whole of the Lower Provinces from the 1st May of the current year. The Local Government has also now under consideration the question whether special arrangements should be made to enable the public to use the money-order system more freely for the purpose of remitting income tax and other payments in favour of Government and district boards. Even without any special instructions having been issued on the subject, the money-order system has been largely made use of by the public for remitting income tax."

32. A further effort to render the postal money-order system still more useful to the poorer people of this country, was made in the North-Western Provinces and Oudh through the provision of a special form of order by which small sums due on account of rent can be remitted by tenants to land-owners. Headings are provided in this form for entries shewing the name of the village and estate and of the kist or particular period to which the payment relates. The object of entering this detailed information is to ensure that the payment for one kist shall be devoted to that particular kist and not applied, as is too often the case, to an arrear instalment of rent, the recovery of which has become barred by limitation. A means is thus provided under which, by resort to the Post office, tenants can rely on getting a valid receipt for sums paid as rent, which, in the event of litigation, must serve them in good stead. Both the revenue and rent money-order systems have a special value, the importance of which can hardly be overrated, as both tend to protect the people of the country from illegal exactions on the part of dishonest tax-collectors. In the one case the land-owner is saved from improper demands made by the subordinate revenue officials; in the other case, the tenant is protected from injustice arising out of illegal action taken by the landlord himself or by his employés. The rent money-order system was introduced only in March last, and during that month 1,213 rent money orders were issued, the gross value of which amounted to Rs. 12,358.

33. The plan of paying money orders at the doors of the payees, to which allusion was made in the last two annual reports, has continued to work satisfactorily, and to gain popularity especially with the Native public. This system now prevails at every Imperial Post Office, and is applicable to all orders paid within the ordinary beat of such offices. Experiments have also successfully been made towards the extension of this facility to small places in the interior of districts served by Village postmen. Throughout the Lower Provinces of Bengal and in Assam, every Village Postman is, subject to certain fixed limits, entrusted with the payment of money orders within British territory; but the extension of this convenience to villages situated in Native territory has as yet been held in abeyance. Not only does this measure adapt itself to native habits by avoiding the need for the personal attendance of women at the Post Office, but it tends also to lessen the accumulation of cash at Post Offices and accelerates both the payment of the order and the closure of the account. As the great majority of remittances to places in the interior of districts are for small sums not exceeding Rs. 10 in amount, the risk of loss to the Department by entrusting such payments to Village Postmen is not great. It is to Germany that India is indebted for this plan of paying money orders at the payee's residence: but the system is one which has not yet been adopted either in the United Kingdom or in most of the principal countries in the West.

34. One great difficulty with which the Post Office has to contend consists in the disposal of surplus balances which accumulate at Imperial Offices in certain Native States situated at a distance from Government treasuries. This difficulty is specially felt in Central India and in Southern Rajputana, where the

cash received is usually much in excess of the funds required to meet local demands. No safe means exist for sending this money to a Government treasury, while risks of loss attend both its retention in the local Post Office and its transmission with the mails to a place of security. During the year a convenient arrangement was concluded under which the Post Office hands the surplus cash accumulations of the Oodeypur Head Office and its subordinate Offices to the local Durbar, which takes it in payment of certain amounts yearly due to them by the Government of India. By this means the Post Office is able annually to pay away on the spot a sum of more than two lakhs of rupees, and, so far as the Meywar State is concerned, the trouble referred to has been overcome. Special arrangements have also been made in other cases; but the difficulty still continues a serious one, and now that money-order operations are so largely on the increase, the matter must receive closer attention.

35. An addition of 379 new money-order offices has been made, thus raising to 7,214 the total number of Imperial money-order offices which existed on the 31st March last.

1885-86	22 8 7
1886-87	22 2 7

this business since it was taken over by the Post Office in 1880. The result is very satisfactory, as the number of orders has increased by 15.81 per cent., their value by 13.88 per cent., and the commission by 14.95 per cent. Nearly 5 millions of these orders were issued during the year of an aggregate value exceeding 10½ crores of rupees, and the commission realised was about 13½ lakhs of rupees. Each money order averaged ₹22-2-7 in value; this average is yearly on the decline, as the marginal figures will show, thus proving that the Post Office deals more and more with remittances of trifling amounts. About 27½ per cent. of these orders were for sums not exceeding ₹5 in value: more than 57 per cent.

were for amounts of ₹10 and under: nearly 82 per cent. were for remittances not above ₹25, while the sums not exceeding ₹50 each were more than 91 per cent. of the entire transactions. From a set of statistics, taken specially for one month, it was found that 90.96 per cent. of the money orders for amounts not exceeding ₹25 were sent by Natives and 9.04 by Europeans: and that, as respects orders above ₹25, the Native proportion fell to 83.29 per cent. Of the total transactions during the month selected, the percentage of orders issued by Natives and Europeans were respectively 89.83 and 10.17.

37. In the following statement the distribution of money order work among the several Postal Circles will be found. Out of the entire business 31.26 per cent. was transacted in the Lower Provinces of Bengal, and 17.67

per cent. in the North-Western Provinces and Oudh :—

TOTAL	32,496	9,66,209	23,263	7,41,566

NOTE.—These figures are included in the general statement of Inland Money Order.

July 1885, its money-order operations are already considerable. Compared with the previous year the transactions with Patiala have increased 20'40 per cent., those with the Portuguese Settlements, 18'77 per cent., and those with Mysore, 12'96 per cent.

39. Towards the close of the year the telegraphic Money Order Rules were simplified, and the rates charged to the public considerably reduced. It was found that the original charge of two rupees for the telegram of advice, coupled with an extra rate of 50 per cent. for postal commission, tended appreciably to restrict the growth of this business. So from January 1887 the Post Office relinquished altogether its commission on orders for sums not exceeding *R*10 in amount, the cost to the public on such transactions being limited to the telegraph charge of one rupee, and on orders above *R*10, only the usual rate of commission was taken, besides a telegraph charge of one rupee. By resort to a Code, the length of the telegraphic advice was considerably curtailed, and the privilege of adding a private message to this advice was withdrawn. Comparing the business done during the last quarter of the year under the new rates with the transactions

38. A table is given on the margin showing the business transacted with the Native States and the Portuguese Settlements in India. New exchanges were introduced with the Native States of Chamba and Faridkot from the 1st January 1887. Although the exchange with Gwalior began to work only in

of the previous nine months under the old rates, it is found that the monthly average of orders issued has increased in number from 1,267 to 2,379, and in amount from R84,208 to R2,16,603, while the postal commission has risen from R1,428 to R2,223 per month. In other words, the number of orders have almost doubled, their value has nearly trebled, and the commission realised has improved by 55·67 per cent. In the following statement the transactions for each Circle during the year are represented. Adding issues and payments together, Bengal heads the list as respects the gross value of business done; but the heaviest issues occurred in Burma, while the payments in Madras nearly equalled those of Bengal:—

Telegraphic Money-Order Transactions.

NOTE.—These figures are included in the general statement of Inland Money Orders.

40. Eleven cases of fraud by false personation in connection with telegraphic money orders occurred during the year, of which seven related to the Bombay Circle. The following extract concerning these cases is taken from the report of the Post Master General of that Circle:—

“The experience of the year has again shown how readily the telegraphic money-order system can be used in this country for purposes of swindling. The common practice of travelling, especially to make pilgrimages, among the well-to-do classes, the readiness with which travellers confide particulars regarding their life and intentions to chance acquaintances, and the credulity with which new-comers at a place are accepted as being what they give themselves out, are favourable conditions for the commission of this kind of fraud, of which clever swindlers have not been slow to avail themselves. Three cases occurred in the Circle during the year, in which sums of money, amounting in all to R162, were paid to persons who had sent telegrams in false names asking for remittances, while there were four cases in which the friends of travellers, who had gone on pilgrimage to Upper India, sent sums of money, amounting in all to R875, from places in this Circle in reply to telegrams from false personators in other parts of India. Of the three cases in this Circle, one occurred at Ahmedabad and two on the Great Indian Peninsula line of Railway. In the first case a Banya of Hyderabad in Sind arrived at Ahmedabad under the assumed name of Sobharam Shamdas, a travelling cloth-merchant also belonging to Hyderabad, and was known under this name for some days before he sent a telegram to Sobharam's brother at Hyderabad, asking for R50. When the telegraphic money order was received, the false personator was identified as Sobharam without any hesitation by a resident Halwai of Ahmedabad, and was given payment of the amount. The real Sobharam was in Ahmedabad at the time, and the false personator was discovered almost

at once, and the case put in the hands of the police. The swindler was arrested before he had left the place, and at first maintained that he was the *simon pure*. He was sentenced to a year's rigorous imprisonment and a fine of ₹100 by the District Court of Ahmedabad. The two frauds at places on the Great Indian Peninsula Railway were believed to be the work of the same man. The first was committed at Manmad in June 1886. The false personator arrived there at the beginning of the month under the adopted name of Phadali. He obtained lodgings at the shop of a Halwai, known as Gangaram Hemraj, and succeeded in borrowing from the shopman a sum of ₹5. His story was that he had been robbed while travelling in the train, and that he was expecting a remittance from Jubbulpore. After some days he telegraphed to Girdhar Lal Halwai, who is the brother of the real Phadali at Jubbulpore, asking for a remittance of ₹20, and was actually allowed to leave Manmad before the telegraphic money order came, because he had asked it to be sent to the care of Gangaram Hemraj. A money order for ₹12 arrived on the 18th June addressed to Phadali, in the care of Gangaram Hemraj, but as the supposed payee had left Manmad, the Postmaster refused to pay it without a written authority from Phadali. The swindler was, therefore, referred to at an address at Wadi, which he had left with Gangaram Hemraj, and the result was a telegram to the Postmaster in the name of Phadali, authorizing him to pay the ₹12 to Gangaram Hemraj, on which the Postmaster acted. Gangaram Hemraj kept ₹7 in payment of what was due to them, and sent the balance by money order to Phadali at the address at Wadi. Subsequently the remitter Girdhar Lal heard from the real Phadali that the money had never been asked for, or received, and this led to the discovery of the fraud. The swindler could not be traced, but Gangaram Hemraj, who was well known at Manmad and had acted with perfect good faith throughout, at once paid back the amount of the money order. As, however, the Postmaster had failed to exercise proper care in making the payment on a telegram which was no authority, after the very strict instructions that had been issued as to the necessity of the utmost caution in paying telegraphic money orders at places on the railway, he was required to make good the amount. The same swindler, as was subsequently discovered, shortly after leaving Manmad, successfully carried out another fraud. At the Wadi railway station, he appears to have met, about the 18th June, two travellers who had alighted there on their way from Calcutta to Hyderabad. He ingratiated himself with these men, who were well-to-do Banyas, and at the beginning of July travelled back with them from Wadi as far as Dhond. While in their company he was able to find out all about them and learnt the name and address in Calcutta of the father of the younger of the travellers, whose name was Chunilal. As soon as they had left Dhond, the swindler on the 2nd July telegraphed to the father asking for ₹100, on the ground that the travellers had been forced to break their journey at Dhond for want of funds. The money was sent by a telegraphic money order on the 4th July, and in the meanwhile the swindler had been staying at Dhond in the travellers' rest-house or dharmasala under the assumed name of Chunilal. When enquiries were made he was identified as Chunilal by a Halwai of the place, and as he could give full accounts of the person from whom the money had come he was paid the ₹100. The travellers reached Calcutta on the 7th July, and the fraud was then discovered, but the swindler had made good his escape. It will be noticed that in all these cases the sweetmeat-seller or halwai played a prominent part, the reason being that he is the ready-made refreshment seller to whom Hindu travellers on alighting from a long journey have immediate recourse for food."

41. No new direct exchanges were established during the year with India, but an arrangement was concluded under which money orders can be sent from the Straits Settlements to France and Mauritius through the medium of the Post Office at Bombay. Money-order exchanges with places outside India are divided into two classes, *vis.*, those with European countries, Australasia and North Borneo, in which remittances are made in sterling, and those with certain places in the East, in which remittances are made in rupees. A list of exchanges under the sterling system is given below, together with a summary of the business done with each country. It exhibits a fall of 18·34 per cent. in the value of orders issued from India, and a rise of 40·17 per cent. in the amount of orders paid in this country. By far the most important of these exchanges is that with the United Kingdom, the transactions of which are more than four times larger than those which relate to all the other exchanges put together: and the decline in the number and value of orders issued by India for payment in the United Kingdom is doubtless due to the low rate of exchange, which

averaged 1s. 5d. as compared with 1s. 6½d. in the preceding year. The fall in the issues on New South Wales is attributed by the Presidency Post Master to "the exposure in the Indian newspapers of a Race Lottery organised in Sydney, which was shown to have been a swindle."

NOTE.—The figures relating to the United Kingdom include transactions with the following countries and places:—United States of America, Canada, Newfoundland, Bermudas, Falkland Island, British Colonies and Possessions in Africa and West Indies, Cyprus and North Borneo. The figures relating to North Borneo represent the transactions since the new exchange was opened with it on 1st October 1885.

The direct exchange with the Netherlands was abolished from January 1886, and the through exchange system extended to that country.

42. Turning now to the class of rupee money orders, the following table shows a decrease of 21.82 per cent. in the issues and an increase of 4.20 per cent. in the payments. If the exceptional transactions of the Field Post Office money-order operations in Egypt during 1885-86 be deducted, the percentages of increase in the value of payments would be raised to 19.80 per cent. With the exception of Mauritius all the exchanges exhibit improvement, and the remittances from China and Japan are progressing favourably. The commission charged on these orders averaged R1-1-1 per cent. An extract is added from a report by the Presidency Post Master of Bombay relative to the use made of the Post Office by natives of India in remitting money to their homes from places abroad:—

"It will probably be interesting to note that natives of India are either temporarily or permanently settled in almost every quarter of the globe; as remittances from them are constantly being received from Australia, the United Kingdom, the Cape Colonies, Egypt, Mauritius, China, Sandakan, and the Straits Settlements, and as an instance affording some idea of the success attending their enterprise, it may be mentioned that two of them, Punjabi Mussalmen, recently returned from Australia, where they had been practising as

eye and pile doctors. The former drew from the Bombay Post Office a sum of about R6,000, and the latter had also obtained money orders for almost the same amount payable from a station in the Punjab."

1885-86	41,544	83,433	33,559	1,88,102 8
1886-87 (seven months, from April to October 1886)	20,964	42,726	15,818	92,753 0

manded any real success, and, as the small extent of this business began to decline during 1885-86, the sale of these notes by the Post Office was discontinued from November 1886. The yearly sales since the notes were introduced in 1882 will be found on the margin. The Post Master

General, Madras, reports that "an opinion seems to prevail in the Madras General Post Office that since the sales of these postal notes were discontinued, there have been fewer losses."

46. From the 1st October 1884 the Indian Post Office undertook to sell British postal orders, realising the usual poundage fee charged by the British Post Office, besides commission, on behalf of this Department. An abstract of the sales effected during the two complete years that this business has been

Abstract of British Postal Order Sales in India.

Denominations of British Postal Orders.	Number sold during 1885-86.	Number sold during 1886-87.	Decrease.
From 1s. to 1s. 6d.	888	749	139
From 2s. to 10s. 6d.	5,529	5,455	74
From 15s. to 20s.	9,493	7,856	1,637
TOTAL	15,910	14,060	1,850

conducted, is given on the margin. There has been a fall of 1,850 in the total number of these orders sold, a diminution in their gross value from £11,309 to £9,601, and a decrease in the total Indian commission from R838 to

R453. Doubtless the high rate of exchange which prevailed during the year under report operated towards causing this decline; but, notwithstanding special efforts to encourage the sale of these notes, it is now clear that this form of remittance has not yet gained popularity; and, if better results are not soon obtained, the question of discontinuing the business will have to be considered. Of the fourteen denominations of these postal orders, the most popular are the 20-s. orders, 7,408 of which are sold; next in demand come the 10-s., the 5-s., and the 1-s. orders, the numbers sold of which were respectively 2,217, 1,260, and 581. As in the previous year the largest sales occurred in the Punjab, where 3,371 orders were disposed of, their gross value being £2,535; next in order comes Bombay with 2,000 orders worth £1,331, and then Madras with 1,992 orders, aggregating £1,317 in amount.

Section VI—Savings Bank.

47. As explained in the last Annual Report, all the District Savings Banks worked by the agency of the Treasury Department were closed with effect from the 1st April 1886, their business being transferred to the Post Office Savings Banks. From the 1st June 1886 the Department also undertook the duties previously discharged by the Savings Banks at District Treasuries managed by the Banks of Madras and Bombay. But the local Savings Banks at Calcutta, Madras, and Bombay still remain under the control of the Presidency Banks at those three places. An enormous amount of additional work and responsibility has thus been undertaken at little cost to the State, except as regards the

central office of accounts, the extra expense consisting for the most part in the appointment of a few new clerks in special cases. But the amalgamation of District with Post Office Savings Banks has not generally been accompanied by any increase to the pay of the Postmasters on whom the ultimate responsibility devolves.

48. On the next page is given a statement marked A, which compares the transactions of 1886-87 with those of the previous year. Four Head Banks were closed and 219 additional Sub-Banks opened, the total number of both classes having thus been raised from 5,833 to 6,048. The year opened with a balance of 155,009 accounts, which was increased by the addition of 128,867 new accounts, and diminished by the closure of 64,866 old accounts, the net balance at the end of the year being raised to 219,010. Under the head of Deposits there is an aggregate sum of 444½ lacs compared with 243 lacs during the preceding year, the interest rose from 6½ lacs to 14½ lacs, while the withdrawals amounted to 258½ against 158½ lacs: and the balance at credit of the depositors stood at 425½ lacs, which represents an increase of 88·59 per cent. This increase of nearly two crores of rupees in the deposit balance is mainly due of course to transfers of District Savings Bank accounts to the Post Office, as 31,699 accounts were thus transferred, representing a gross sum of ₹1,24,13,792: and the rest of the increase or ₹75,59,662 may be reckoned as actual expansion in Post Office Savings Bank business. Bombay shows both the greatest number of accounts open (48,778) and the largest deposit balance (138½ lacs), while the average balance at the credit of each depositor is highest in Sind (₹310·91) and lowest in Bengal (₹132·66).

50. Statement C. given below classifies the depositors according to their professions. By far the best customers of the Government Savings Banks are those belonging to the professional class with fixed incomes, which number 81,888 out of a total of 219,010. Next come the domestic class, of which there are 23,237, and then the professional class with variable incomes represented by a total of 17,385. Of all specific classes the worst represented is the agricultural, of whom there are only 2,427.

C

Statement showing the number of Depositors in each Postal Circle classified according to professions during 1886-87.

51. Prior to April 1886 any person, whether a Savings Bank depositor or not, could use the Post Office as an agency for the purchase and sale of Government securities. But from the beginning of the year under review this privilege was withdrawn from the public at large and restricted to *bonâ fide* depositors. From the same date a limit of ₹1,000 in the year or ₹3,000 in all was fixed to the gross value of Government securities which a depositor is allowed to tender at the Post Office for safe custody by the Comptroller General. Investments, aggregating a total sum of ₹4,40,600, were made through the Post Office during the year against ₹3,59,400 in 1885-86: and the balance of investments remaining with the Comptroller General at the close of the year under report rose from ₹2,82,300 to ₹3,78,800. Out of a total of 556 purchases and 28 sales of Government paper, or 584 transactions in all, no less than 525 related to sums not exceeding ₹1,000 in value: there were 41 transactions above ₹1,000 but not exceeding ₹2,000, and 18 for amounts between ₹2,000 and ₹7,100.

Section VII.—Insurance and Value-Payable system.

52. On the margin a table is given showing the yearly value of articles

YEAR.	VALUE INSURED.			Insurance fees.
	Letters.	Parcels.	TOTAL.	
1877-78, last quarter being the commencement of the system	₹ 6,66,320	₹ 18,60,191	₹ 25,26,511	₹ 13,230
1878-79	89,71,775	2,81,21,219	3,70,92,994	1,23,556
1879-80	1,63,35,058	5,34,34,161	6,97,69,219	1,97,790

1886-87	2,35,74,205	5,26,06,770	7,61,80,975	1,80,274
Percentage of increase as compared with 1885-86	6.29	10.52	9.18	6.08

NOTE.—The average value of insurance effected on each article was ₹3.15 in the case of letters and ₹3.54 in the case of parcels.

existence of this scheme. Taking the combined value of letters and parcels it will be

insured since the beginning of the insurance system. Under the head of Letters the figures are higher than those of any year since the measure was introduced, while the value of parcels, though exhibiting an increase of 10.25 per cent., is lower even than that of 1879-80, the second complete year of the

seen that the business grew yearly until 1882-83, when it declined, the year under report being the first year since that date in which the total again shows an increase. As explained in the last two Annual Reports, the stoppage of insurance to and from offices in the Persian Gulf and Turkish Arabia has materially diminished insurance business in this country, besides this the continually growing popularity of the money order and value-payable systems must compete appreciably with the transmission of valuables by post. As an explanation of the increase in the year under report the Postmaster General of Madras reports that "emigrants of the labouring class now go over to Burma in larger numbers from the Telugu country, and those whose homes are not situated in a Post Town find it more convenient to make small remittances of cash to their families by this means than by money orders, as the insured parcel is delivered at the house of the addressee, while village postmen as a rule are not authorized to pay money orders." Again, he adds, that "the practice which has been adopted by certain Gold Mining Companies of sending their gold to the Madras Agents by this means will probably account for the greater portion of this very large increase in value." Bombay shows the highest value, ₹2,08,45,590, in the total of articles insured, Madras comes next with an aggregate of ₹1,54,60,353, and then Bengal with a total of ₹1,33,36,446. A special set of statistics were got for one month from 24 selected offices, with the object of ascertaining the particular descriptions of articles which usually are sent under the insurance system, together with the relative value of each description: and the results obtained gave the following proportions of value to the total declared value of articles insured during the month at the offices chosen:—gold nearly 38 per cent., currency notes slightly in excess of 36 per cent., precious stones rather more than 14 per cent., silver about 9½ per cent.

53. Out of a total of 43 claims made in connection with insured articles, the liability of the department was accepted in 27 instances, and in 22 out of these 27 cases the loss occurred through fraud or neglect on the part of postal employes: in three instances the Post Office was broken into and the articles stolen by outside robbers: on one occasion strong suspicion attached itself

Losses under the Insurance system,	1885-86,	1886-87.
	R a. p.	R a. p.

	12,452 9 0	20,608 0 0
Value of property recovered	5,969 8 6	3,747 9 3
	6,483 0 6	16,860 6 9
Claims not preferred or not entertained	...	110 0 0
	6,483 0 6	16,750 6 9

against the proprietor of the house in which the Post Office was located, and one parcel was lost by a Railway Company, to which it had been entrusted for conveyance. A summary of the value of the losses under the usual heads is given on the margin. The sum paid as compensation amounted in all to ₹16,750 or 9·29 per cent. of the total amount realized as insurance fees, viz., ₹1,80,274.

54. When the value-payable system began in December 1877, its application was restricted at the outset to parcels posted at disbursing offices. In 1879 its operation was extended to registered book packets, and a year later the area of posting was greatly enlarged so as to include all money order offices. Registered letters were added to the business in October 1882: while a further extension occurred in 1885, under which the system was rendered applicable to unregistered book packets, both paid and unpaid. And in April

1886 privileged publications were allowed to travel as value-payable unregistered

Value-payable system year.	Number of articles sent under the value-payable system.	Value declared for realisation.	Commission.
		R	R
1877-78 (from the commencement of the system in December 1877,) 4 months	413	6,721	195
1878-79	7,408	1,32,109	3,948
1879-80	25,589	3,49,857	11,498
1880-81	49,389	5,76,574	13,413
1881-82	99,416	10,80,543	19,838
1882-83	174,301	16,86,098	32,568
1883-84	287,377	28,08,873	53,450
1884-85	378,930	34,35,045	65,571
1885-86	436,115	45,32,803	85,530
1886-87	596,296	58,78,016	1,17,247

packets. The usual statistics are given on the margin, which shew very marked growth, the increases being 36·73 per cent. in the number of articles sent, 29·68 per cent. or nearly 13½ lacs of rupees in the value declared, and 37·08 per cent. in the commission. Out of a gross total of 596,296 articles no less than 296,269 were post-

ed in Calcutta, and out of an aggregate of 58½ lacs of rupees recovered from the addressees of these articles more than 29½ lacs were paid to tradesmen in Calcutta. A description was given in the last Annual Report of efforts made to popularise the plan of transmitting railway receipt notes as value-payable articles. During the year under report a change was effected, under which the sender addresses the goods to himself, endorses the railway receipt to the individual for whom the consignment is intended, and then makes over the receipt to the Post Office for transmission to destination under the value-payable system. The object of this change was to free the Railway Company from the risk of incurring pecuniary responsibility by inadvertently delivering the goods in anticipation of the production of the receipt. Now that the packages are directed not to the real recipient but to the sender, this risk is reduced to a minimum and the sender can rely on his money being realised by the Post Office before the goods are parted with by the Railway Company. Marked success followed this alteration, the number of value-payable railway receipts having risen from 351 in October 18866 (the month prior to the introduction of the new method) to 1,048 in March 1887, and the amount specified for recovery from Rs. 124 to Rs. 27,594. As yet the conveyance by post of value-payable railway receipts is almost wholly confined to the East Indian Railway, and, though there is little present hope of any considerable development on other lines of railway, this business will probably prove eventually an important addition to postal duties and responsibilities.

55. A comparison between the posting of the different classes of value-pay-

	Number.	Value.	Commission.	Average value of each article.	Average commission on each article.
		R	R	R a. p.	Annas.
Value-payable parcels and railway receipts	285,588	31,13,099	58,209	10 14 5	4
Value-payable registered letters and registered packets.	114,420	19,68,731	30,938	17 3 4	4
Value-payable un-registered packets.	196,288	7,96,186	28,100	4 0 11	2
TOTAL	596,296	58,78,016	1,17,247	9 13 9	2

able articles is given on the margin. One noticeable feature in these figures is the low average value of each article sent as an unregistered packet: while registration is usually resorted to for the more expensive classes of books, cheap publica-

tions, and pamphlets are generally sent as unregistered articles. The Postmaster General of Bombay reports that "there were 635 book packets posted at Bijapur, mainly consisting, as I ascertained when I inspected the office in February last, of the issue in parts of a Marathi novel written by a Native official, and I quote the fact to show how the value-payable system may help an author to command an audience."

Section VIII.—Miscellaneous.

56. A statement representing the position of the Post Office Security Fund is given below. As explained in the last Annual Report, all disbursements under this head are debited against the old fund, the balance of which is thus gradually disappearing: during the year the charges against that fund amounted to ₹33,164, which reduced the balance at credit from ₹1,59,324, at the close of 1885-86, to ₹1,26,160 on the 31st March last. The closing balance of the new fund has risen from ₹1,06,304 to ₹1,58,565 :—

Old Fund.

57. *Complaints by the Public.*—The number of complaints made by the public, which came to the knowledge of the heads of postal circles, was 8,476 against 7,684 in the previous year. Bengal is principally responsible for this increase, to which the Postmaster General refers in the following terms :—

“Considerably more than half the increase of 881 in the total number of complaints is accounted for by the great increase in the business of the various miscellaneous departments of the Post Office. Slight and even unavoidable delay in the delivery of a valuable article or money order is generally sufficient to produce a complaint, and as the Money Order, Savings Bank, and Value-Payable systems expand an increase of complaints must be expected. An increase of complaints regarding ordinary articles is also much to be desired, for it is upon the probability of complaint in cases of failure that every postal administration mainly depends. In countries and cities commercially advanced it is impos-

sible for a delivery to be delayed or a single clearance of a letter-box to be neglected without sufficient complaints being received to enable the administration to localize the fault and detect the offender. Of the most advanced provinces of India, and even of Calcutta itself, it will, I fear, be a long time before this can be said. Instances were given in your last report which showed the extraordinary ignorance of postal matters prevalent among the village population, and illustrated the still not uncommon belief that the letter-box itself is but a portion of a supernatural agency. This belief is, no doubt, confined to the most ignorant classes of backward districts, but it is no exaggeration to say that the postal system of India is so strange to the general population and so far in advance of their expectations that delays and failures which would not be tolerated in England or Germany do not in India call forth a single complaint. The comparative backwardness of the country, the apathy of its people, the result of satisfaction, and the enervating effect of the climate on foreign residents, all combine to deprive the administration of the aid derived in other countries from the numerous complaints that follow every omission or neglect. In this circle, while about seventy-five millions of ordinary articles were posted and delivered during the past year, only 1,089 complaints were made regarding the loss, delay, or overcharge of such articles."

58. An analysis of those cases which relate to the loss of articles transmitted under a system of registration is appended: the number of these cases has risen from 336 to 396:—

	1886-87.			TOTAL.	
	Registered letters and ordinary parcels.	Insured letters and insured parcels.	Value-payable parcel and Value-payable registered articles.	1885-86.	1886-87.

II.—Cases in which the postal establishment was proved to be in fault or in which there was strong ground for believing it to be so	72	22	20	81	114
III.—Cases in which no definite conclusion was arrived at	61	9	11	82	81
TOTAL	289	60	47	336	396

59. Commenting on a case in which a Branch Postmaster was criminally prosecuted and punished for abstracting a currency note of the value of ₹100 from a registered letter, the Postmaster General of Madras observes that "the Branch Postmaster in this case was apparently induced to commit the offence through having observed that the addressee of this registered letter had posted a post card in the Branch Office asking for a remittance." Another extract from the Annual Report of this Postmaster General is given below:—

"In another case an insured parcel was received from Burma for delivery in this Circle, the contents of which were declared to be rubies. This also was delivered in good condition and under a full acquittance; but a complaint was made because the addressee on opening the parcel found that it contained merely some pebbles of a red colour which were of no value. The weight of the parcel at the time of delivery corresponded with the weight observed in the office of posting; and thus this Department was able to repudiate all responsibility. An attempt had apparently been made by the sender to cheat the addressee. Cases of this kind are of somewhat frequent occurrence, and in every instance the Department is exposed to a fraudulent claim, as the sender is bound to demand compensation, otherwise he would be tacitly admitting that the declaration of contents contained false particulars. In one case, therefore, in which good evidence was obtained that a false declaration of contents had been furnished, it was considered expedient to prosecute the poster of the article under Section 417, I. P. C., and Section 43 of the Post Office Act. An insured letter was posted in the Madras Office which was declared to contain two Government Currency Notes of ₹100 each. It was delivered in perfect condition to the addressee from the Melapalayam Sub-office; but on opening it he found, instead of the two notes, a piece of thick brown paper. The weight of the letter at the time of delivery corresponded exactly with its weight when it was posted; and on the piece of

brown paper there was a distinct impression of the obliterator which had been used in the Madras Office for the purpose of defacing the postage labels on the cover. From this it was evident that this piece of brown paper had been in the cover when the letter was posted. The poster was the sender's son, and he was prosecuted and convicted under the sections abovenamed and sentenced to pay a fine of ₹250, or in default to undergo six months' rigorous imprisonment. A youth who abetted the offence was sentenced to pay a fine of ₹50 or to undergo two months' rigorous imprisonment in default. There is reason to hope that the result of this prosecution will have a salutary effect in checking attempted frauds of this nature."

60. *Offences punishable by Law.*—Appendix VIII, of which an abstract

	1885-86.	1886-87.
Number of legal convictions . . .	187	160
Number of cases punished departmentally.	67	85
TOTAL . . .	254	245

appears on the margin, is a statement showing the offences punishable by law committed by postal officials in each postal circle. It will be seen that the number of legal convictions has fallen by 27, and that the departmental punishments have risen by 18,

the net result being a diminution in the total of 9 cases. The most serious of these cases is the one known as the "Bara Bazar" case, which is thus described by the Postmaster General of Bengal:—

"Two registered bags made up by the Bara Bazar Town Sub-Office were abstracted while in transit through the General Post Office. The bags contained in all 122 ordinary registered letters and one insured letter, enclosing diamonds valued at ₹400. The sum just mentioned represented the loss to the Department, but the nominal value of the contents of the 122 ordinary registered letters was more than ₹70,000, the enclosures being chiefly hundis, cheques, whole currency notes, and half notes. Most of the stolen property was recovered, part being obtained from one of the two offenders, a cooly in the General Post Office, who was convicted and sentenced to five years' rigorous imprisonment, and a larger portion being found on the Calcutta maidan where the stolen bags appear to have been opened and searched. All the property recovered was returned to the owners, and, accepting the statement of the sender of each letter as to its contents, the actual loss to the public was reduced to ₹4,790. The second offender implicated in the case unfortunately threw himself from a boat while in the custody of the Police, and either escaped or was drowned. Had it not been for this accident, it might have been possible to recover even more of the stolen property."

Another grave instance of embezzlement covered by false accounts was committed by the Postmaster of Bushire, who, having been tried by the High Court in Bombay, was sentenced to six years' rigorous imprisonment.

61. In the Money Order Branch of this Department the instances of misappropriation numbered 97, and the total loss, after deducting recoveries, aggregated ₹5,898, of which ₹5,891 were charged to the Post Office Guarantee Fund, and the balance (₹7) written off as a loss to Government. Of these 97 cases, 34, representing a total sum of ₹1,329, were committed by postmen or village postmen who number 13,267; and 18 cases, involving the gross amount of ₹2,114, were due to dishonesty on the part of the extra departmental agents who number 2,841.

62. Connected with Savings Bank transactions, 14 cases of fraud were perpetrated by employes of this department, resulting in a loss of ₹2,646, the whole of which has been written off against the Post Office Guarantee Fund. In nine instances the offenders were punished by law, in one case the accused, though acquitted, was dismissed the department, and in four instances the suspected officials escaped justice by flight. On eleven occasions fraud against the Post Office Savings Banks was either committed or attempted by members of the public. In six of these occasions pass-books were presented, the possession of which had been dishonestly obtained, and in five of these six cases money was successfully withdrawn. Four instances occurred in which, by altering entries in pass-books, unsuccessful attempts were made to draw larger balances than

those actually at the credit of the accounts concerned: but in one of these cases the object of the depositor, in fraudulently enlarging the amount of her balance, appears to have been not to cheat the Post Office but to obtain a loan on the security of her pass-book. Prosecutions were instituted in nine cases, eight of which were successful.

63. *Highway Robberies.*—An abstract, comparing the highway robberies of

	1885-86.			1886-87.		
	NUMBER OF HIGHWAY ROBBERIES.			Number of Highway Robberies.

65. Prosecutions were instituted in three out of these eighteen cases, and in two instances convictions were secured. No trace of the offenders could be found in the remaining cases. When considering the large proportion of these crimes which still remain unpunished, it should be borne in mind that on seven occasions the perpetrators were Burmese dacoits, and on two occasions the uncivilized tribes resident in the Naga Hills and in Manipur. One runner was shot dead while carrying the mail, notwithstanding the presence of an armed escort: this occurred during the Chital act of violence in the Bombay Circle. Besides this instance of loss of life, seven of these mail robberies were accompanied by the wounding or maltreatment of the postal runner. In one of the Burma cases the highway robbers, after pilfering the mail bags, proceeded to the outpost for which the runner was bound, and killed every one of the guard provided for the protection of that place. In another Burma case the road between Ningyan and Yemethen had been closed for some weeks when the accumulated mails were at last despatched under a strong escort consisting of a jemadar with 30 men. But this force, having been attacked by an overpowering number of dacoits, was compelled to retire leaving everything behind them. In the Manipur case a pretender to the throne of that country with his followers stopped the road between Silchar and Manipur, and the mails sent in both directions during six days were lost, though the contents of the bags were fortunately of small value. But a great deal of delay and inconvenience ensued, the mails having to travel for nearly a month by a very round-about route until order was restored.

66. Apart from highway robberies of the mail the history of the year is memorable for a series of acts of violence, sometimes accompanied by bloodshed, in which postal employes were generally the sufferers. At Pyindaye, in the Thongwa district, the Branch Postmaster was murdered and the property of the department destroyed by dacoits. Near Pyinmana, in Upper Burma, the escort which accompanied the mail was fired upon, two sepoy being killed and a policeman severely wounded, though the mails were untouched. In Baluchistan a village postman was stoned to death by certain Pathans, who were never apprehended: he managed to stagger towards the Post Office till he met a passer-by, to whom he entrusted his bag and badge for delivery to the Sub-Postmaster: and the dead body of this village postman was found on the spot where he parted with his bag and badge. A Branch Postmaster at Fazilpur, in the Dera-Ghazi-Khan district, had his throat cut with a razor, the Post Office being set fire to with the object of concealing evidence of the crime. On this occasion the murderer was a village postman, who received the sentence of death and was executed. At Tabayi, in the Toungoo district, the Branch Post Office was attacked and burnt by dacoits, and all communication with Toungoo cut off for several days. The small quantity of cash which the office contained had been placed for security in the Myook's Court: but that building also was sacked and burnt. The Demagiri Sub Post Office, in the Chittagong hill tracts, was broken into and robbed by Kookies. A runner in the Thana District, having been attacked on a lonely road, resisted and killed his assailant with a spiked staff. This runner was tried for manslaughter, but defended at the expense of the Department and acquitted, the Court being satisfied that he acted only in self-defence. Three departmental officials committed suicide, deficiencies being discovered in the cash balances of the offices entrusted to their charge. In April 1886 the Mandalay Post Office was destroyed by a fire which consumed a large portion of that town; and in August of that year the buildings occupied both by the Mandalay Head Office and by the shore Sub-office had to be abandoned on account of floods. Serious floods occurred also in

Behar and in Eastern Bengal, which necessitated the removal of several Post Offices, and in some instances in Eastern Bengal the use of boats for the purposes of a Post Office. Communication between Toungoo and Ningyan was stopped for eleven days owing to the insecurity of the road and the sinking of the launch in which the mail was conveyed; another launch sent to rescue the mail was fired upon by the rebels and had to abandon its flat which added to the detention of the post on this occasion.

67. Several instances also occurred in which mail communication was interrupted through the operation of floods on lines of Railway. On two separate occasions during July the North-Western Railway was breached by floods near Jagadri. Between Trichinopoly and Pondicherry the mail was detained for two days from the same cause. A bridge was carried away on the Eastern Bengal line and boats had to be provided for crossing the mail. Interruption occurred in the Madras line through excessive flooding, and the Oudh and Rohilkund line suffered in the same way.

68. Appendix IX contains the numerical strength of the establishment

Postal Officials.	1885-86.	1886-87.
Superintendents and Inspectors of Post Offices	346	352
Postmasters, Deputy and Sub-Postmasters, including Village Postmasters	4,677	4,901
Extraneous Agencies, such as School-masters, &c.	1,969	2,214
Clerks	5,086	5,342
Postmen and other servants	9,386	9,566
Road Establishment	12,271	12,098
Village Postmen	4,440	4,455
Signallers, clerks, and other servants employed in combined offices	654	642
TOTAL	38,829	39,570

entertained by this Department in the several postal circles, while the marginal abstract includes all grades below that of Deputy Postmaster General.

69. The charges incurred on account of printing work done by private presses rose from R48,197 to R53,797. Most of the circles show decreases of expenditure under this head, but large increases have taken place in the North-Western Provinces and Railway Mail Service which raise the net charge by R5,600.

Section IX.—Non-Postal Branches of the Department. Telegraphs.

70. During the year under review 57 combined Post and Telegraph Offices were opened and five closed, giving a net increase of 52 offices: 21 of these were situated at places where separate Telegraph Offices had previously existed. The total number of Telegraph Offices at the close of the year was 699, of which 440 were combined Offices or Telegraph Offices worked under the supervision of the local Postmaster. In seven places postal work is conducted in the Telegraph Office under the management of the Telegraph Master.

71. A table of traffic statistics is given below, in which the work done by each postal circle is exhibited. Compared with the figures of the previous year the total number of messages sent has increased by 34.56 per cent. and the revenue by 41.40 per cent., while the total realisations of the year exceed the charges by R3,73,368.

Traffic Statistics of combined Post and Telegraph Offices for the year 1886-87.

POSTAL CIRCLES.	Number of combined offices on 31st March 1887.	Total cost of Postal Establishments debitable to the Telegraph Department for working combined offices during the year.		NUMBER OF MESSAGES.			Revenue realized during the year on sent messages (Inland and Foreign).		REMARKS.
				Sent (Inland and Foreign).	Received.	Transit.			
		<i>R</i>	<i>a. p.</i>				<i>R</i>	<i>a. p.</i>	
Madras	75	28,598	14 7	103,406	104,189	29,118	1,12,748	8 6	<i>Note.</i> —All combined offices are authorized to accept messages for Ceylon. But no combined office is allowed to accept foreign messages for countries other than Ceylon unless specially authorized to do so. At the close of the year under report 147 combined offices had received this special permission: of these 147 offices 44 are situated in the Madras postal circle.

Percentage of Increase	13'40		27'96	34'56	46'47	94'07		41'40	

72. Besides working combined offices the Post Office also receives telegrams at Post Offices and transmits them to the nearest Telegraph Office. 31,578 messages were thus sent during the year from 1,721 Post Offices, the revenue yielded being ₹32,942.

73. During the year 141 postal employes qualified as signallers, and at the close of March 1887 66 were still under training. In the previous year 253 employes passed in signalling, so that on the 1st April last 394 qualified postal signallers were available for employment in combined offices.

74. A further step in the direction of alliance between the postal and telegraph departments was taken by the extension to the Indo-European line in the Persian Gulf of the Indian plan under which the two departments mutually perform without charge the work done for the other.

75. *Government Carrying Agency and Passenger Service.*—The Government carrying agency is an agency for the conveyance of passengers and goods in vehicles drawn by bullocks: it consists of one main line between Umballa and Simla with branches to the hill stations of Kasauli, Dagshai, Solon, and Subathu. The passenger service is an agency for the conveyance of passengers in vehicles drawn by ponies: it consists of one line only, *viz.*, that between Umballa and Simla. No change under either of these heads occurred during the year.

Section X.—Financial Results.

76. Appendix X gives a detailed comparison between the receipts and charges of the year under review and those of the preceding year so far as the regular accounts of the department are concerned: and the following abstract contains the general financial results exhibited by that statement. The heading of "Purely Postal Service" includes the revenue and charges belonging to correspondence of all kinds and to money orders: it includes likewise the charges of the Savings Bank branch of this department which yields no income at all. This heading presents an improvement of ₹4,61,364 in the receipts, together

the postal revenue would have benefited to the estimated extent of **₹47,495**. Moreover, the Post Office was forced to maintain an unremunerative establishment in Upper Burma costing **₹50,000**. Again, no credit is allowed to the department in the accounts of the Empire for the benefits bestowed on the country by the Savings Bank branch of its operations. If credit be claimed for the keeping of these accounts, at the rates allowed to Presidency Banks for the discharge of the same class of work, the revenue of the department would be

		₹	a.	increased by ₹1,62,051
$\frac{1}{2}$ per cent. on a balance of ₹2,25,45,890	:	84,547	0	as denoted on the margin.
A charge of 8 annas on each of 1,55,009 active accounts	:	77,504	8	Furthermore, the
TOTAL		₹1,62,051	8	conversion into a State
				Railway of the Sind,

Punjab, and Delhi Guaranteed Railway, together with the application to the Bengal Central Railway Company of State Railway rates, has increased postal payments to State Railways by **₹54,000** with no corresponding benefit whatsoever in the shape of improved accommodation or in any other way. By claiming these credits the deficit of **₹8,07,714** would fall to **₹4,94,168** as contrasted with a deficit of **₹6,40,285** in the preceding year. But for the increase of **₹1,09,520** under the head of "Exchange charges in England," which this department is powerless to control, the result would have been still more favourable. When considering the profit and loss arising out of the operations of the Post Office, it is fair to bear in mind that, while the State Railway, the Telegraph and other departments of Government, make no difference between the rates charged to the Government and those levied from the public, the Post Office alone, on the ground of convenience, provides a special and extremely favourable scale of charge for the work it performs for the State: the Indian rate for official letters is one anna per ten tolas instead of one anna per tola, the rate taken from the public. In the United Kingdom no such privilege is accorded, but the charges levied for private and official correspondence are one and the same. If the practice followed by other departments in India be extended to the Post Office, and, as is done by Great Britain, the charges for official correspondence be reckoned at ordinary rates, the revenue derived from this source would, at a low computation, be doubled, and the postal department, instead of shewing a deficit in its accounts, would rank among the revenue yielding departments of the State. It remains to remark that the increase under the head of charges of **₹1,19,862** on English stores is accounted for by the supply of a large stock of new registration and square embossed envelopes, the introduction of which has already been adverted to; as this new class of stationery is disposed of by sale, the sum disbursed on their purchase will gradually be recovered from the public.

78. Other items of charge also exist which find no place either in the

Items not included under charges in the Finance and Revenue Accounts.

	1885-86.	1886-87.
Cost of stationery supplied by the Superintendent of Stationery	₹ 1,44,856	₹ 1,18,743
Railway free service estimated	2,54,529	1,75,892

79. A cheap scale of postage was first introduced in India during the year 1854. On the margin is given a table which indicates the yearly progress of the department as denoted by its correspondence, revenue, and expenditure.

Section XII.—Notices of Post Office Officials.

80. Rai Salig Ram Bahadur, Postmaster General of the North-Western Provinces, retired from the public service after a long and honourable connection with the postal department, extending over nearly 40 years. This distinguished officer is the first Native of India who has attained the high position of Postmaster General. Mr. J. DeCaster, Superintendent of the Postmaster General's Office in Madras, also retired on pension after a faithful service of more than 34 years, during which he enjoyed the confidence of many successive Postmasters General. My thanks are due to Mr. H. M. Kisch, C.S., Postmaster General of Bengal, for his labours as President of a Committee for the revision of the Post Office Manual: to Mr H. Farrer, Postmaster General of Madras, for the energy and patience with which he set himself to improve postal communication in the Northern Circars against great obstacles: and to Pundit Salig Ram for the introduction of the new Rent Money Order system. Among the officers whose names have been brought to my notice for good work done of a special character are those of Mr. J. Owens, in connection with the new Tonga line between Giridih and Hazaribagh, Rai Ramputer Sing for the revisions in the Railway Mail Service, resulting in large savings of expenditure, and to Mr. E. A. Doran for the care, industry, and ability with which he discharged his duties as Secretary to the Manual Committee.

Column 2.—These figures represent the net proceeds of the sale of ordinary postage stamps after deducting the sale discount.

Column 3.—The great differences observable in this column are due mainly to changes of system in the treatment of official correspondence, which was charged at full letter rates up to 1865-66, at the same rates as ordinary correspondence (letters and newspapers, &c.), from that year on to 1872-73, after which a low privilege rate of 1 anna for each letter not exceeding 10 tolas (about 4 oz.) was conceded, thus reducing immensely the postage income.

Column 8.—The figures in this column are useful, as showing the revenue undisturbed by the changes of system in respect of official correspondence explained in the note referring to column 3.

o. XII.

the Post Office Department in India from 1853-54 to 1886-87.

Column 12.—The figures in this column show the proportion of the cash collections in column 4 to the total postal revenue of columns 2, 3, and 4. The column commences with the year 1872-73, when the official postage rate was reduced (see note on column 3) and the whole collected in stamps.

Columns 21 to 26.—Three digits are omitted from the figures in these columns.

Columns 27 and 28.—These figures cannot be given prior to 1873-74, owing to a difference in the system of statistical record.

Column 29.—The registration of newspapers only commenced in the year 1871-72 and ended in 1877-78.

a) Revised so as to include letters to Gibraltar, Malta, and places east of Suez.

† Including post-cards from 1879-80.

† 1,712 miles of lines under this head have in 1884-85 been included in column 19.

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
IRRIGATION BRANCH.

**IRRIGATION OPERATIONS, NORTH-WESTERN PROVINCES, FOR THE "KHARIF"
SEASON (1st APRIL TO 30th SEPTEMBER) 1887.**

No. 2771, dated Allahabad, the 31st January, 1888.

RESOLUTION—By His Honour the Lieutenant-Governor, North-Western Provinces, and Chief Commissioner of Oudh.

READ—

Statements A22, B22, and C22, showing irrigation operations for kharif, 1887-88, of Canals in the North-Western Provinces.

OBSERVATIONS.—The area irrigated during kharif, 1887, was 650,597 acres, an increase, as compared with the previous year, of 60,689 acres, or 10·20 per cent.

This increase, as will be seen from the table below, is confined to the early kharif crops, *vis.*, sugarcane and indigo. There was no general fall of rain until the first week in July; during the latter part of the month and throughout August and September the rainfall was ample and well distributed, and, except for rice in a few localities, there was absolutely no demand for canal water.

The assessments on account of occupier's rate amounted to ₹19,95,753, as against ₹17,57,488 in 1886; an increase of ₹2,38,265, or 13·50 per cent.

2. Table I shows the areas of the principal crops for the past four years:—

TABLE I.

CROPS.	1884.	1885.	1886.	1887.
	Acres.	Acres.	Acres.	Acres.
Sugarcane	153,544	175,638	169,123	197,604
Rice	92,687	95,986	151,232	134,822
Bajra and Jowar	10,240	6,062	4,304	4,452
Maize	20,321	14,505	13,929	9,868
Other food-grains	4,985	7,109	8,758	9,783
Fodder crops	14,483	5,878	6,415	7,753
Fibres (cotton)	66,709	57,341	41,373	47,671
Dyes (indigo)	391,891	297,282	163,957	212,732
Miscellaneous	18,455	42,457	30,817	25,912
TOTAL	773,315	702,258	589,908	650,597

Sugarcane shows an increase of 28,481 acres; and indigo, which showed such a marked decrease during the two previous years, now shows a tendency to recover, the area irrigated exceeding that of the previous year by 48,775 acres.

The decrease of 16,410 acres under rice is due to the late commencement of the rains, and is chiefly confined to the Taráí and Bhábar Canals.

The area of *irrigated* maize depends almost entirely on the nature of the rainfall, and the fluctuations in the crop are markedly shown in the statement below, comparing the areas for the last six years with the rainfall:—

YEARS.	Area of maize irrigated.	RAINFALL.		
		July.	August.	September.
	Acres.	Inches.	Inches.	Inches.
1882	37,152	13·2	5·7	2·4
1883	92,393	6·3	1·4	4·5
1884	20,321	5·7	11·5	17·5
1885	14,505	12·2	16·1	3·6
1886	13,929	10·0	10·0	3·0
1887	9,868	13·2	13·7	7·2

1887 was an exceptionally favourable year for maize, as there was continuous rain all through the *three* months. The consequence is the maize sown on the "*gauhan*" lands (which *always* take water) was only irrigated.

If only one of the three months is dry, in addition to the above, the outlying fields are also irrigated; and if there is an early fall of rain in July, followed by a break of six weeks, as in 1883, and exceptionally large area is watered from the canals.

3. Table II compares by canals the irrigated areas during the two years, 1886 and 1887:—

TABLE II.

CANALS.	1886.	1887.	More.	Less.
	Acres.	Acres.	Acres.	Acres.
Upper Ganges	237,497	259,992	22,495	...
Lower "	103,525	143,778	40,253	...
Agra	51,083	58,949	7,866	...
Eastern Jumna	91,313	90,754	...	559
Betwa	2,677	2,290	...	387
Dún	5,884	6,300	416	...
Rohilkhand	47,465	45,657	...	1,808
Bijnor	2,028	4,367	2,339	...
Hamirpur lakes	300	282	...	18
Jhansi lakes	50	67	17	...
Tarái	22,494	13,000	...	9,494
Bhábar	25,592	25,161	...	431
TOTAL	589,908	650,597	60,689	...

The Lower Ganges Canal shows a satisfactory increase of 40,253 acres, followed by the Upper Ganges and Agra Canals with increases of 22,495 and 7,866 acres. The falling off of 9,494 acres on the Tarái Canals is due to the short rice crop.

4. Table III gives the assessments on account of occupier's rate for the last four years:—

TABLE III.

CANALS.	1884-85.	1885-86.	1886-87.	1887-88.
	R	R	R	R
Upper Ganges	11,16,995	10,04,071	8,64,057	9,54,667
Lower "	4,94,619	4,86,755	2,79,488	3,82,510
Agra	1,94,113	1,97,862	1,57,631	1,79,914
Eastern Jumna	3,87,423	3,87,910	3,87,572	3,95,953
Betwa	4,760	12,187
Dún	14,807	16,339	17,877	19,597
Rohilkhand	35,338	38,966	40,966	41,011
Bijnor	5,513	6,641	4,077	8,891
Bundelkhand lakes	209	815	1,060	1,023
TOTAL	22,49,077	21,39,359	17,57,488	19,95,753

The rate per acre irrigated is R3.26, against R3.24 in the previous year, the increase being due to the larger area of sugarcane irrigated.

ORDER.—Ordered, that copies of this Resolution be submitted to the Government of India; that it be circulated to other Governments and to local Departments, and that it be published in the *North-Western Provinces and Oudh Gazette*.

By order of the Hon'ble the Lieut.-Govr., N.-W. P., and Chief Commr. of Oudh.

J. G. FORBES, Colonel, R.E.,
Secy. to Govt., N.-W. P. and Oudh, P. W. D., I. B.

P. W. D., Irrigation Branch.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Summary for January, 1888.

January is normally an unsettled month over Northern India. The high-pressure area which during November and December is a quasi-permanent feature in the pressure distribution of North-Western India, gives way frequently during January and is replaced by well-marked depressions which occasion clearly defined cyclonic winds, and often much rain and snow. The characteristics of these cyclonic vortices differ apparently according to the place of their origin. Those depressions which first show themselves over the north-west of the Panjab, though usually more or less deep, are ordinarily short-lived, and while occasioning unsettled weather over the Panjab and the west of the North-Western Provinces, both on the hills and plains, quickly fill up, so that their effects are limited almost entirely to the region over which they first make their appearance. Those depressions, on the contrary, which are first shown to the south of the Suliman range, and which are usually heralded by a brisk barometric fall all over Sind, Beluchistan and the Indus valley, are, though much shallower than those noticed above, much longer-lived and frequently traverse large tracts of country, travelling generally on an east-south-east course. Of these two classes of storms the past month has afforded one or two typical cases.

In addition to these storms, which are more or less characteristic of the season, the west coast has been visited by very unsettled weather occasioned by the passage northward of a series of disturbances travelling from the Malabar coast as far as the North Konkan or Guzerat coasts.

On the 1st, pressure was high all over Northern India and low on the Bombay coast. The general wind circulation was fairly normal, though in the North Konkan the direction was more northerly than is usually the case. Rain was falling in Khandesh, in the south of the Peninsula and in Ceylon. From this date until the 6th the principal feature in the weather was the passage northward of a depression along the west coast. This disturbance gave very unsettled weather to all the Bombay stations and to many in the Central Provinces. On the 4th and 5th the wind at Bombay had an average velocity of 17 miles per hour from north-east, and rainfalls varying from 0.5 inch to 2.7 inches were reported from the western and central stations. On the 6th the barometer was rising almost everywhere, and the general distribution approximating to the normal, though the depression previously reported from the west coast had left steep barometric gradients and rather cloudy and unsettled weather to Western and Central India. From the 7th to the 10th the weather over India calls for little remark. Pressure was throughout high over North-Western India, and relatively low over Burma, Ceylon, and the west coast. The wind circulation was fairly normal and the weather was fine. On the 11th a small depression appeared in Lower Sind, occasioning a south-westerly wind at Karachi and Hyderabad and a north-north-easterly wind at Jacobabad, and rain at Quetta and Karachi. On the following day the storm from Lower Sind lay between Indore and Deesa and rain had spread to Mooltan and the north-west of the Panjab. The barometer was rising fast in the Indus valley and falling briskly in the central parts of the country. From the 13th to 19th there again occurred a period during which the barometric distribution was fairly normal, the wind circulation on the whole regular, and the weather generally fine, though on the 16th, 17th, and 18th slight rain fell over Rajputana, the North-Western and Central Provinces, and at some stations in the North-West Himalaya. On the 20th the first sign of an extensive change showed itself. On this day a rapid barometric fall took place at Quetta and in the Indus valley, and a large low-pressure area appeared on the western frontier, the centre of disturbance lying apparently to the south of Quetta and west of Jacobabad. Cyclonic winds were reported from Sind and parts of Rajputana and the Panjab. On the 21st a large diffused depression was shown over Sind, Guzerat, Central India, and the south of Rajputana, and south-easterly winds had appeared

over nearly the whole of the North-West and Northern India and a northerly wind at Hyderabad (Sind). Rain was falling at Rawalpindi, Peshawar and Mooltan and snow at Murree. On the 22nd the depression had become much more clearly marked and somewhat deeper, and had its centre near Jeypur. Rather strong cyclonic winds circulated around the centre and rain had extended to most parts of the Panjab, as well as to Jhansi, Sutra and Mount Abu. Snow was falling at Murree and Simla. By the morning of the 23rd the depression had reached Seohi and almost filled up. Its movement eastward had, however, been accompanied by an extension in the same direction of the rainfall area, and rain on this day was reported from nearly all stations in Northern and Central India, from Bengal to the Indus. The rain at Rawalpindi, Sialkot and Gya and the melted snow on the hills of the North-West Himalaya exceeded 1 inch. On the 24th the depression lay between Raipur and Gopalpur. Rain still fell in Bengal but in Northern and North-Western India there had been considerable improvement in the weather. On the morning of the 25th a fresh depression was shown over Guzerat, and rain was falling over the whole of the Indus valley and the Panjab, and snow on the hills of the North-West Himalaya. This depression subsequently travelled east-south-eastward to the Central Provinces and developed very considerably. It occasioned a return of south-easterly winds and rain to the North-Western Provinces and gave north-westerly winds and rain to Rajputana and Guzerat.

At the same time, a local depression had appeared in the north-west of the Panjab, occasioning general rain and snow in its neighbourhood. About 3 feet of snow fell at Mussooree and Simla. By the morning of the 27th the Panjab depression had disappeared, while the Central Provinces depression had continued to travel south-eastward and lay near Gopalpur. Rain was reported from the whole of Bengal and the North-Western Provinces, but had ceased over the greater part of the Panjab and Rajputana. On the 28th the depression was crossing the Bay of Bengal and rain was still falling in Assam and around the head of the Bay, but in other parts of India the distribution of pressure and the circulation of the winds had become fairly normal, and except at a few places the weather had been fine. On the 29th the depression last seen near Gopalpur reappeared near Akyab, and rain was falling over Burma and Assam. In most other parts of India conditions appeared fairly quiet, but in Lower Sind rain and a falling barometer were reported. On the 31st a well-marked disturbance lay to the west of Rajkot, and strong easterly winds and rain were reported from Lower Sind. Elsewhere the weather called for no remark.

Pressure.—The mean pressure of the month has been above the average except at the hill stations where, alike at Darjeeling and on the North-West Himalaya, there has been a slight deficiency. The excess was greatest over the Peninsula and Ceylon, and least in Burma and the Panjab.

Temperature.—Except in Ceylon, the Circars, and part of Burma, the month has been cold almost everywhere. In Northern India the deficiency ranged from 1° to 5° ; in the central parts of the country from 2° to 7° ; in Rajputana from 4° to 6° ; and in the Peninsula from 1° to 3° . On the hills between the 25th and the close of the month, sharp frost was experienced, the lowest temperature recorded being 21° at Simla on the morning of the 27th.

Humidity.—Has been generally below the mean in Northern, and above it in Central and Southern India.

Rain.—Has fallen in all the Provinces, and the total amount has been slightly to largely in excess of the average, except in Malabar, Mysore, the Carnatic, Ceylon, and North Bengal. The greatest excess, both absolutely and relatively, is reported from the Konkan coast.

This wet month has done much to obliterate the seasonal deficiency which has hitherto existed over Northern India, and, at several stations in Bengal and the North-Western Provinces, and at a few in the Panjab, the total rainfall since November 1st is now in excess of the average. In Central and Western India there is a large excess.

The following table shows the amount of rain and the difference from the average, during the month of January, 1888, according to districts, as far as is indicated by the telegraphic reports :—

DISTRICTS.	Number of stations.	Average rain-fall in January.	Difference from the average in January, 1888.
Punjab—West	7	1'39	+0'52

W. L. DALLAS,

for Offg. Meteorological Reporter to the Govt. of India.

Simla, 10th February, 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending Feb. 8th, 1888.

The weather of the past week has been on the whole less unsettled than that of the preceding seven days, but both pressure and temperature have undergone frequent and considerable oscillations, and the winds have been very unsteady. On two days, *viz.*, February 3rd and 4th, rain was general throughout Northern and Central India.

On the 2nd a large low-pressure area was shown over Sind and Guzerat, and rain was falling at Jacobabad, Hyderabad, Karachi and Ajmere. Relatively low pressures also existed along the foot of the hills, and rain was reported from Darjeeling, but elsewhere the barometer was high and the weather fair. On the 3rd a rapid barometric decrease was reported from the Panjab, a depression lay near Murree and Rawalpindi, and cyclonic winds were blowing over the whole of North-Western and Central India. Rain was general over that part of the country lying to the north-westward of a line running from Rajkot north-eastward to Allahabad. The largest amounts were $1\frac{1}{2}$ inch at Murree and about 1 inch at Rawalpindi, Multan and Mount Abu. On the following day the barometer had risen fast in North-Western India and the depression had disappeared, but unsettled weather continued and, though it had ceased in Guzerat and Sind, rain continued to fall over the Panjab, the North-Western Provinces and part of Central India. The amounts were everywhere below

1 inch. On the 5th, a large area of high pressure overlay the north-western stations, and the weather had improved generally, though rain was still reported from Nowgong, Allahabad, Dhubri and Sibsagar. On the 6th there occurred little change of importance. On the 7th, the barometer was again falling in the North-West and over Baluchistan, and rain had recommenced in Sind and at Quetta. On the 8th, a low-pressure area was shown over the Panjab and the North-Western Provinces, and rain was falling at Quetta, Jacobabad, Jhansi and Mussoorie.

Pressure.—The mean pressure of the week, compared with the monthly average, was above the normal everywhere. The excess was considerable over the plains, but slight at the hill stations.

Temperature.—Was low almost everywhere. A part of this deficiency is undoubtedly due to the method of comparison, but in the Panjab and North-Western Provinces, Rajputana, Central India and Sind, the weather was very cold for the time of year.

Humidity.—The air was much damper than usual.

Rain.—Has fallen in all provinces except Burma, Ceylon, Malabar, Bombay and Madras. The heaviest total fall occurred on the hills, but in the Panjab, Guzerat, Central India, Sind and Rajputana, the week's fall was everywhere large. In the Berars and Central Provinces, the total fall was insignificant.

The concluding table gives the total rainfall of the past week according to provinces:—

DIVISIONS.	Number of stations.	Total rainfall.
Burma	0	0
Bengal and Assam	4	1'22
North-Western Provinces and Oudh	8	1'79
Panjab	9	6'01
Hill Stations	6	7'88
Ceylon	0	0
Malabar Coast	0	0
Bombay	0	0
Berars and Central Provinces	1	0'02
Guzerat and Central India	5	2'36
Sind—Rajputana	6	4'92
Madras	0	0

W. L. DALLAS,

for Offg. Meteorological Reporter to the Govt. of India.

Simla, 11th February, 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—For week ending the 11th February, 1888.—No rain except a small quantity in Ganjam. Rainfall to date generally sufficient except in parts of Vizagapatam, Madura and Salem. Agricultural operations progressing as usual. Crops generally good but very slightly damaged here and there by rain, disease or insects. Wet crops under rain-fed tanks in parts of Madura withering

owing to deficient supply of water. Pasture generally sufficient but scanty in Malabar and parts of Madura and Anantapur and decreasing in Vizagapatam. No material fluctuations in prices. General prospects favourable.

Bombay.—*For week ending the 15th February, 1888.*—Rain in parts of Sind; beneficial to late crops in Upper Sind Frontier. Wheat in parts of Nasik, Dharwar and Wadhwan and *jowari* in parts of Satara damaged; cotton in parts of Dharwar and Belgaum and linseed in parts of Nasik blighted. Standing crops fair in Colaba and Baroda; middling in Thana and Bijapur and good in other districts. Harvesting of early crops almost completed in Sholapur; that of late crops in progress in Surat, Kaira, Panch Mahals, Nasik, Poona, Ahmednagar, Sholapur, Bijapur, Belgaum, Dharwar and Kathiawar. Cotton-picking continues in Ahmedabad, Surat, Kathiawar and Bijapur. Preparations for sowing of next season's crops in progress in Nasik, Bijapur and Karachi. Probable outturn of opium in Baroda 12 annas; of wheat in Wadhwan from 9 to 10 annas, and of late crops in general 14 annas in Karachi and Hyderabad and 12 annas in Nasik and Ahmednagar. Fodder scarce in one taluka of Dharwar.

Bengal.—*For week ending the 14th February, 1888.*—Rain fell generally throughout Bengal Proper, Orissa and Chota Nagpur, but in Behar showers are reported only in parts of the Bhagulpore Division. The *rabi* crops have benefited and the moisture has assisted ploughing for early rice and jute. *Boro* rice is doing well. Tobacco is in good condition. *Ganja* in the Rajshahye district promises well. Poppy is generally a good crop; the plants are in flower, and in some places the collection of opium has begun. Sugarcane harvest is yielding a good outturn.

N.-W. P. and Oudh.—*For week ending the 15th February, 1888.*—Slight rain fell in Cawnpore and some northern districts. The weather is generally cloudy. All crops are doing well and opium prospects are good. The supplies in markets are reported sufficient but prices continue high and have risen in Lucknow, Partabgarh, Moradabad, Agra and Kumaun. The condition of agricultural stock is satisfactory.

Panjab.—*For week ending the 15th February, 1888.*—Slight rain fell in some districts. Prices are reported to be stationary in eight districts and falling in four; the fall that has commenced may be expected to continue. Ploughings for *kharif* in progress throughout the province. *Rabi* prospects have improved by the recent fall of rain. Prospects are now reported good from every district but Hissar where more rain is needed. Late sown barley doing well. Crops slightly damaged by frost in Hissar. Stock cattle are generally healthy. Fodder scarce in most districts. Poppy crops average.

Central Provinces.—*For week ending the 15th February, 1888.*—Weather rather cloudy and unsettled with slight rain in eastern districts. Hail has done some damage to crops in a few villages in Saugor, Jabalpur, Hoshangabad and Bilaspur. Clear weather required. Linseed expected to yield only 4 annas in Raipur; prospects of other winter crops generally favourable. Prices rising in places. Cattle in fair condition.

Burma.—*For week ending the 11th February, 1888.*—Slight rain has fallen in the Kyaukphyu, Moulmein, Amherst and Shwegyin districts of Lower Burma, and in the Bhamo, Myadoun, Mandalay and Taungdwingyi districts of Upper Burma. Ploughing and planting of dry weather crops progressing. Condition of agricultural stock good. Estimates of probable outturn of harvest have risen slightly in Thonegwa and considerably in Mandalay. In other districts the estimates remain the same as last week. Price of paddy has risen in the Kyaukphyu, Tounghoo, Myadoun, Mandalay, Taungdwingyi and Yamethin districts and slightly in the Kyaukse and Myingyan districts. Price of paddy has fallen in the Bassein and Pagan districts.

Assam.—*For week ending the 15th February, 1888.*—Weather cool and windy. Light rains in most districts has done good to tea and helped plough-

ing for summer rice. Sugarcane crushing nearly over. Potatoe sowing going on in the Hill Districts.

Mysore and Coorg.—*For week ending the 15th February, 1888.*—No rain. Crops in good condition. Sowing of paddy and planting of sugarcane commenced in parts. Condition of cattle generally good. Prices slightly risen in the Bangalore, Kolar and Kadur districts.

Coorg has also had no rain. Coffee prices have shown some improvement. Other prices stationary.

Berar and Hyderabad.—*For week ending the 15th February, 1888.*—In Berar the *kharif* harvest is nearly completed. Of the *rabi* crops, wheat in ear, gram and linseed in pod—all in good condition. Fodder getting insufficient in the Amraoti district. No marked change in the prices of food grain.

In Hyderabad agricultural prospects continue fair. Prices are stationary.

Central India.—*For week ending the 15th February, 1888.*—No rain. No change in agricultural operations or condition of standing crops since last report. Outturn of harvest expected good, except in Western Malwa and Goona. Irrigated wheat crop in Bhopawar slightly damaged. Agricultural stock in good condition except in Goona. Pasturage and fodder good. Prices of food grains steady in Bhopal and Baghelkhand, falling in Bhopawar and rising or high elsewhere. Opium crop good.

Rajputana.—*For week ending the 15th February, 1888.*—Agricultural operations satisfactory. Standing crops and prospects good. Agricultural stock in fairly good condition. Pasturage or fodder sufficient. Prices still high. Opium somewhat damaged in Meywar and Jeypore.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.
REVENUE AND AGRICULTURAL DEPARTMENT.

REVIEW OF MR. ROYLE'S REPORT ON THE INDIAN SECTION OF THE
COLONIAL AND INDIAN EXHIBITION.

Cir. No. $\frac{15}{6-8}$ Ex.

Extract from the Proceedings of the Government of India, Revenue and Agricultural Department, dated 17th February 1888.

MUSEUMS and EXHIBITIONS.

READ—

Letter, dated 1st April 1887, from Sir Philip Cunliffe-Owen, K.C.M.G., C.B., C.I.E., Secretary to the Royal Commission for the Colonial and Indian Exhibition of 1886, to His Excellency the Viceroy and Governor General, communicating observations on the collections of exhibits contributed from India.

Despatch No. 86 (Statistics and Commerce), dated 25th August 1887, from Her Majesty's Secretary of State for India, transmitting the Report of Mr. J. R. Royle, C.I.E., on the Indian section of the Exhibition and his accounts of the sale of exhibits.

RESOLUTION.

The accounts of the Indian Courts at the Colonial and Indian Exhibition held in London in 1886 having been examined and disposed of, the Report on the Indian section, submitted by Mr. J. R. Royle, C.I.E., Official Agent to the Government of India at the Exhibition, together with the following account of the proceedings and action taken in India, is published for general information.

2. An invitation to take part in the Exhibition was received from His Royal Highness the Prince of Wales by the Indian Government in June 1884, but it was not till March 1885 that the orders of Her Majesty's Government were received laying down definitely the share in the project to be taken by the Government of India. These instructions limited the expenditure to be incurred in direct connection with the London Exhibition to one lakh of rupees exclusive of the cost of packing and freight, but permitted the contribution on loan of any articles which might be provided for the Exhibition which it was at that time intended to hold at Bombay in 1887-88. With the despatch of exhibits from the Indian ports the responsibility of the Government of India ceased. The management and control in England were unconditionally entrusted to the Royal Commissioners, who subsequently appointed Sir Philip Cunliffe-Owen, K.C.M.G., C.B., C.I.E., to be Executive Commissioner for India in their behalf, but the Government of India was permitted to send one European officer to arrange and explain the collection of economic products, and a few native officials and attendants, the cost of their deputation being met from the grant of one lakh. The Royal Commissioners, to whom a sum of £20,000 was guaranteed from Indian revenues in case of the expenses of the Exhibition exceeding the receipts, undertook to meet all charges connected with the fitting up of the Indian Courts and the display of exhibits, and also arranged to purchase specimens of the more expensive kinds of artware excluded from the scope of the collections which the Government of India was authorised to contribute. It was arranged that an officer directly responsible to the India Office should be appointed to protect the interests of Indian exhibitors, and for this purpose, the services of Mr. J. R. Royle, C.I.E.,

of the India Office, whose previous experience as Indian representative at the Amsterdam Exhibition of 1883 specially fitted him for the duty, were placed at the disposal of the Royal Commissioners as Assistant Secretary for India, and as Official Agent to the Government of India for the guardianship and eventual disposal of exhibits.

3. At an early stage in the arrangements the consent of the Government of Bombay was asked for and obtained to the loan, for previous display in London, of exhibits intended for the Bombay Exhibition, and His Excellency the Governor General in Council takes this opportunity of recording the obligation of the Supreme Government for the cordial manner in which the Local Government and the guarantors of the Bombay Exhibition acceded to an arrangement to which the success of the Indian section of the Colonial and Indian Exhibition was in great measure due. The Government of Bombay further agreed to contribute towards the purchase of exhibits for the two Exhibitions such sum not exceeding one lakh, as would suffice, together with the contributions of other Local Governments, to make up $1\frac{1}{2}$ lakhs. The contributions of Local Governments having amounted to R81,500, the sum which the Government of Bombay was actually called upon to subscribe was R68,500. To the $2\frac{1}{2}$ lakhs (*i.e.*, one lakh from the Imperial and one and a half from the Bombay and Provincial Governments) thus available for the equipment of the Indian Courts, the Royal Commissioners subsequently added a grant of R31,168 for the preparation, on their behalf, of a series of carved ornamental screens, to form a façade in the Court of Indian Artwares. These resources were largely supplemented by the liberality of many Native Chiefs and Nobles to whose liberal contributions some of the most attractive collections of exhibits were due. The entire cost of the representation of Hyderabad, Baroda, and Jeypore was borne by the Rulers of those States, and to them and to the Chiefs and Nobles and European and Native gentlemen who made donations and loans of economic and art exhibits His Excellency the Governor General in Council desires to express his acknowledgments for their public-spirited and generous co-operation.

4. In order to avoid as far as possible the risk and expense of returning loan exhibits to Bombay, it was resolved to restrict the sum of $1\frac{1}{2}$ lakhs subscribed by Local Governments, including Bombay, to the purchase of specimens of artware, ornamental fabrics, &c., of a saleable character, on the understanding that if disposed of in London, duplicates for the Bombay Exhibition would be purchased in India from the sale-proceeds realized. The separate grant of one lakh sanctioned by the Secretary of State was reserved by the Government of India for the preparation of collections illustrative of the economic products of the country and rough manufactures and of its administrative system, and for defraying incidental expenses connected with the European officer and native officials whose deputation to England was authorised by the Secretary of State. Following this division of funds the purchase and despatch of artware were entrusted to officers or committees nominated in each Province by the Local Governments, with permission to correspond direct with the Revenue and Agricultural Department, that Department, which had for some time past been developing an organization for the purpose, itself undertaking the collection of raw products and primary manufactures. The despatch of exhibits commenced in December 1885, and it is owing to the exertions of the Provincial officers and committees, to the excellent arrangements made for the shipment of exhibits by the agents at the ports, and to the activity with which their

efforts were seconded by Mr. Royle and Mr. C. Purdon Clarke, C.I.E., Honorary Architect to the Executive Staff in London, that the Indian Courts presented so satisfactory an appearance on the 4th of May 1886, when the Exhibition was opened by Her Majesty the Queen, as to obtain the special commendation of His Royal Highness the Prince of Wales and the Royal Commissioners in a congratulatory telegram to His Excellency the Viceroy. To the gentlemen whose names are appended to this Resolution, His Excellency the Governor General in Council wishes the thanks of the Government of India to be conveyed for the zeal and ability with which they accepted and carried out, in most cases as an addition to their regular duties, the share assigned to each in the onerous work of selecting, purchasing, ordering, collecting, and despatching the vast number of articles comprised in the Indian contribution to the Exhibition.

5. Of the Indian exhibits themselves a sufficient general description is contained in Mr. Royle's report, and it is here unnecessary to say more than that they formed a more adequate representation of the country and its natural and industrial products than had been attempted on any previous occasion. The system adopted for the arrangement of exhibits, however, deserves notice, as it differed in some respects from the classification adopted at previous Exhibitions. Exhibits of artware including fabrics were arranged primarily in Provincial Divisions or Courts according to localities of production, instead as heretofore being grouped according to a technical classification. Raw products and rough manufactures on the contrary followed a technical classification, irrespective of geographical distribution. In other words, the collections of products were national or imperial, while those of artware were local or provincial. In thus departing, in the case of artware, from the usual method of arrangement, the Government of India was influenced by a desire to illustrate and emphasize the essentially conservative nature of the artistic ideas of the country which, though beginning to yield to the influence of a new industrial development, are still distinguishable by peculiar local characteristics which lend them a special value and attractiveness, and which it is for many reasons desirable to foster and preserve as far as possible. It was obvious, however, that a similar arrangement in the case of raw materials, which are only to a limited extent the production of special localities and otherwise differ only so far as they are affected by soil and climate, would have resulted in an unnecessary reduplication of specimens, besides being productive of increased labour and expense. Hence it was resolved to display them under a technical classification based upon their nature and uses, and their arrangement was entrusted to Dr. G. Watt, C.I.E., who had already been charged by the Government of India with the compilation of a Dictionary of Indian Economic Products. The instructive character of the economic collection was enhanced by a valuable series of cartographic exhibits provided by the Survey Department. One exception to the general plan of arrangements originally laid down was subsequently permitted by which, at the instance of the Royal Commission, silk exhibits, both raw and manufactured, were placed in a separate Court under the management of Mr. T. Wardle, of Leek, who had for many years taken a personal interest in the subject. His disinterested labours in the cause of an important industry, though unhappily not at present a prosperous one, are gratefully recognised by the Government of India and will not be wasted.

6. It has been mentioned that the expenses of the packing and freight of exhibits were sanctioned as a separate charge, and in order to simplify accounts

the Government of India undertook to meet all such charges in the first instance on both Government exhibits and private exhibits sent through official agency and to recover them as far as possible by the addition of a percentage to the fixed sale prices of exhibits. It was, however, decided by the Secretary of State, in view of the great convenience of affixing sale prices to the goods as they were unpacked and the impossibility of calculating in advance the ultimate proportion of freight and other charges to be added to the price of each article, to allow the Official Agent discretion as to the actual prices to be charged. In the exercise of this discretion Mr. Royle fixed such prices as seemed best calculated to ensure a ready sale, and the abandonment of the project for an Exhibition at Bombay rendered it desirable that as many articles as possible should be disposed of in London in order to avoid charges for return freight. Better financial results were thus obtained on the whole than would probably have been forthcoming by a rigid adherence to original prices, and the Government of India is assured that every care was taken to avoid obscuring the true value of the goods to the injury of future trade. As shown in Mr. Royle's report, the total sum realized on exhibits of artware was £20,042, of which £2,297 went to meet expenses in England, including among other payments a deduction of 5 per cent. paid to the Royal Commission as a contribution towards the cost of establishment for the custody and sale of exhibits, leaving £17,745 for remittance to India as the net realization on articles sold valued at ₹2,29,823. It has been decided that private exhibitors shall receive in full the original sale prices of their exhibits, and it is understood that the sums which have been distributed to Local Governments, &c., after crediting ₹35,500 towards the cost of packing and freight, will suffice for this purpose, and in most instances leave a sufficient surplus to recoup the expenditure incurred from provincial revenues on artware exhibits. The Government of India is indebted for this satisfactory result to the unremitting care and labour of its Official Agent, Mr. J. R. Royle, and has much pleasure in recording its appreciation of the excellent services continuously rendered by him in that capacity.

7. The remaining collections, namely, those provided by the Government of India from the separate grant of one lakh of rupees, consisting of raw products and primary manufactures, ethnological models, &c., have been presented, as Mr. Royle explains, to various museums and institutions, including the Imperial Institute. The nature of these collections made it improbable that more than an inconsiderable portion of the outlay would be recovered by sale, while their distribution for permanent preservation and reference served to perpetuate the principal object of the exhibition itself. That object, as stated by His Royal Highness the President of the Royal Commission, was to demonstrate on the fullest scale to the people of the United Kingdom the unbounded industrial resources at their command within the limits of Her Majesty's Colonial and Indian Dominions, and has, the Government of India is assured, been as fully attained as circumstances admitted. Having regard to the long-established intercourse between India and the West, no direct and immediate commercial results, such as occasionally follow the exposition of the product of new regions, could reasonably be expected, but the Exhibition was successful in attracting attention to the necessity of systematic exploration in the field of Indian economic products as a promising source of fresh and important industries, and the possibility of utilizing under proper instruction the artistic taste and skill of native artizans in the production of wares suited to European requirements. The need for systematic enquiry

on practical lines was clearly established at a series of conferences we held twice or three times a week at the Indian Courts by the courteous permission of the Royal Commission, at which each class of products was in turn examined and discussed with commercial and scientific experts and manufacturers from London and from other important commercial centres. The general result of the careful examination to which Indian products were thus subjected was the conclusion that while there existed a variety of new or little known Indian substances which might be brought to important industrial uses, no decisive opinion could be formed as to their value and utility until fuller information was available in regard to the extent of their production and prices, and until the purposes for which they are suited had been sufficiently demonstrated by a careful series of experiments and by scientific analysis of a rigorous character. A considerable impulse has been given in recent years to the collection and publication of information regarding Indian products by the various exhibitions which preceded the Colonial and Indian Exhibition. To that Exhibition is due the effort made for the first time to bring all the economic products of India under a comprehensive survey, of which the basis is now being laid in the Dictionary under preparation by the Imperial Reporter on Economic Products, whose appointment for the purpose is itself a result of the Exhibition of 1886. In the Imperial Institute, founded in commemoration of the fiftieth year of the reign of Her Majesty the Queen-Empress, will, the Government of India hopes, be found, on the other hand, the organisation for bringing the properties of the products themselves under continuous scientific investigation and experiment. Thus in prominently drawing public attention to these objects the Exhibition may be regarded as an important and practical step in the policy advocated and developed by the Government of India for the investigation and exploitation of indigenous products and manufactures. The fact that a very large number of exhibits were sent by native workmen on their own account is an encouraging experience of the late Exhibition, and would seem to point to the conclusion that they are becoming more keenly alive to the advantages of advertisement and the demands of foreign customers.

8. In conclusion, His Excellency the Governor General desires to express, on behalf of the Government of India, its obligations to Sir Philip Cunliffe-Owen, on whom as the sole Executive Commissioner for India the entire responsibility rested of arranging the exhibits contributed by the Governments and Native States of the Indian Empire, and to whose personal efforts the successful appearance of the Indian Courts was greatly due, and at the same time to acknowledge the consideration and assistance accorded by the Royal Commissioners, which secured to the representation of India at the Colonial and Indian Exhibition of 1886, the position, prominence and distinctive character which were worthy of her place in the British Empire.

ORDER.—Ordered, that the foregoing Resolution be communicated to all

Madras.
Bombay.
Bengal.
North-Western Provinces
and Oudh.
Punjab.
Central Provinces.
Birma.
Assam.

Baroda.
Rajputana.
Central India.
Baluchistan.
Hyderabad.
Mysore.
Nepal.
Kashmir.

Local Governments and Administrations and Agents to the Governor General and Residents in Native States noted on the margin, with the intimation that a copy of the Resolution has been sent to each of the

gentlemen named in the list appended to the Resolution.

ORDERED, also, that it be published, with the report submitted by Mr. J. R. Royle, in the Supplement to the *Gazette of India*.

[True Extract.]

B. O. BUCK,

Secretary to the Government of India.

APPENDIX.

Officers and Committees entrusted with the collection and despatch of Indian Exhibits for the Colonial and Indian Exhibition, 1886.

OFFICIAL collections in India were made under the general administration and direction of the Revenue and Agricultural Department of the Government of India:—

I.—ADMINISTRATION.

By the following Officers:—

Geology	H. B. Medlicott, Esq.
Meteorology	H. F. Blanford, Esq.
Survey of India	{ Lieutenant-Colonel J. Waterhouse. Major C. Strahan, R.E.

Salt, Excise, Opium, Mints, Post Office, Government Printing, Education, Police, Sanitary and Medical, Public Works, Military, &c., &c.	{ Collections were made under the orders of the Heads of the Departments concerned.
---	---

II.—ECONOMIC PRODUCTS.

By the following Officers:—

Raw Products and Rough Manufactures.	{ Dr. G. Watt, M.B., F.L.S., on special duty with the Government of India, Revenue and Agricultural Department. Babu T. N. Mukharji, Revenue and Agricultural Department, Government of India.	{ Assisted by the Exhibition Committees in Bombay and Bengal and the Chambers of Commerce at Calcutta and Bombay.
Timbers and Forest Produce.	{ B. Ribbentrop, Esq., Inspector-General of Forests. R. H. C. Whittall, Esq., Assistant Inspector-General of Forests. F. B. Manson, Esq., Deputy Conservator of Forests, Bengal, on special duty.	{ Assisted by the Executive Officers of the Forest Department working under the orders of the Inspector-General.

III.—ART-WARE AND FABRICS.

By the following Committees and Officers appointed by the Governments of the various Provinces in India, or the Rulers of Native States:—

MADRAS.

COMMITTEE	{ Colonel H. P. Hawkes, Deputy Commissary General, <i>President</i> . Dr. G. Bidie, M.B., C.I.E. E. B. Havell, Esq. J. C. Shaw, Esq.	{ C. Deane, Esq. G. G. Orr, Esq. C. A. Lawson, Esq. C. Benson, Esq. Dr. E. Thurston.
---------------------	---	--

BOMBAY.

COMMITTEE	{ The Hon'ble Forbes Adam, Member of the Bombay Legislative Council, <i>President</i> . E. C. K. Ollivant, Esq. Major A. B. Portman. Dr. D. Macdonald.	{ Haji Karim Mahomed Sulleman, Esq. E. T. Leith, Esq. Nanabhai Byramji Jijibhai, Esq. Vrijbhukan Das Atmaram, Esq. J. Griffiths, Esq., <i>Secretary</i> .
---------------------	---	---

BENGAL.

COMMITTEE.	H. A. Cockerell, Esq., C.S.I., Member, Board of Revenue, <i>President</i> .	J. D. Maxwell, Esq.
	D. Cruickshank, Esq., <i>Vice-President</i> .	R. Miller, Esq.
	H. Berger, Esq.	J. Murdoch, Esq.
	Surgeon-Major D.D. Cunningham.	A. Pedler, Esq.
	M. Finucane, Esq., B.C.S.	T. Ralli, Esq.
	J. Henderson, Esq.	H. H. Risley, Esq., B.C.S.
	C. R. Hills, Esq.	A. Simson, Esq.
	J. J. J. Keswick, Esq.	Hon'ble Colonel S. T. Trevor, R.E.
	Dr. G. King.	Lieutenant-Colonel J. Water- house, B.S.C.
	R. Lyall, Esq.	M. Jackson, Esq., Member and <i>Secretary</i> .
	Hon'ble A. P. MacDonnell, B.C.S.	

NORTH-WESTERN PROVINCES AND OUDH.

D. M. Smeaton, Esq., B.C.S., Director, Department of Agriculture and Commerce.
 Lieutenant-Colonel D. G. Pitcher, Assistant Director, Department of Agriculture and Commerce.
 F. S. Growse, Esq., C.I.E.
 Dr. J. W. Tyler, Superintendent, Central Jail, Agra.
 A. Constable, Esq., Personal Assistant to the Chief Engineer, Oudh and Rohilkhand Railway.

PUNJAB.

J. L. Kipling, Esq., Principal, Mayo School of Art, Lahore.

CENTRAL PROVINCES.

J. B. Fuller, Esq., B.C.S., Director, Department of Agriculture.

BURMA.

H. L. Tilly, Esq., Executive Engineer.

ASSAM.

H. Z. Darrah, Esq., B.C.S., Director, Department of Agriculture.
 Colonel J. Johnstone, C.S.I., Political Agent, Manipur.
 Major T. J. Willans, R.E., Executive Engineer, Shillong.

COORG.

Colonel T. G. Clarke, Commissioner of Coorg.
 Colonel A. LeMessurier, Consulting Engineer, Bangalore.
 W. McHutchin, Esq., Executive Engineer, Mysore State Railway.

HYDERABAD STATE.

Colonel C. J. O. Fitzgerald, Commanding 3rd Cavalry, Hyderabad Contingent, Hyderabad.

MYSORE STATE.

Colonel A. LeMessurier, Consulting Engineer, Mysore, Bangalore.
 W. McHutchin, Esq., Executive Engineer, Mysore State Railway.

BARODA STATE.

COMMITTEE	Captain J. Hayes Sadler, Assistant Agent to the Governor-General, <i>President</i> .	Abbas S. Tyabji.
	Major F. H. Jackson.	Rao Bahadur Raoji Vithal.
	Rao Bahadur Laxman Jagganath.	Rao Saheb Har Govindas Dwarkadas.
	Rao Bahadur J. S. Gadgil.	Ambalal Sakarlal Desai.
	T. S. Tait, Esq.	Dinsha Ardeshir Talearkhan, <i>Honorary Secretary</i> .
	P. Reynolds, Esq.	

KASHMIR STATE.

Colonel Sir O. St. John, K.C.S.I., R.E., B.S.C., Resident in Kashmir.

N.-W. FRONTIER.

Colonel Sir Robert Sandeman, K.C.S.I., Agent to the Governor General, Beluchistan.

NEPAL STATE.

Surgeon G. H. D. Gimlette, Residency Surgeon, Nepal, Katmandu.

CENTRAL INDIA STATES.

J. Johnstone, Esq., Principal of the Residency College, Indore.

AJMERE AND RAJPUTANA.

Colonel Sir E. R. C. Bradford, K.C.S.I., M.S.C., Agent to the Governor General, Rajputana.

R. S. Whiteway, Esq., B.C.S., Settlement Officer, Ajmere-Merwara.	Captain W. H. C. Wyllie, C.I.E., Political Agent, Kotah.
Surgeon-Major J. P. Stratton, M.D., Resident, Eastern Rajputana States.	Captain A. C. Talbot, S.C., Political Agent, Bikanir.
Surgeon-Major T. H. Hendley, in Medical charge, Eastern Rajputana States, and Honorary Secretary to the Museum Committee, Jaipur.	Lieutenant-Colonel W. J. W. Muir, S.C., Political Agent, Haroti and Tonk.
Colonel P. W. Powlett, S.C., Resident, Western Rajputana States.	Colonel C. K. M. Walter, S.C., Resident in Meywar.
Lieutenant-Colonel H. P. Peacock, Political Agent, Alwar.	Lieutenant-Colonel C. B. Euan-Smith, C.S.I., Political Agent, Bhartpur and Karauli.

The shipment of exhibits was entrusted to—

Calcutta—W. A. Dangerfield, Esq., R.N., Agent for Government Consignments.

Bombay—Messrs. King, King & Co.

Madras—Lieutenant J. H. Taylor, R.N.R., Master Attendant.

Report by Mr. J. R. Royle, C.I.E., on the Colonial and Indian Exhibition, 1886, Indian Section.

1. In submitting the following Report on the Indian Section of the late Colonial and Indian Exhibition, I have thought it advisable, before proceeding to show how the collections have been disposed of, to give a brief sketch of the part played by India in the Exhibition.

2. It was in the autumn of the year 1884 that H.R.H. the Prince of Wales first notified the Secretary of State for India his assumption of the Presidency of the Royal Commission for the Colonial and Indian Exhibition, and explained the general features of the scheme he proposed for the administration of the Indian Section. These arrangements were communicated to the Government of India by the Secretary of State, and, after some correspondence had passed, it was determined by Lord Kimberley that India's participation in the Exhibition should be limited as follows:—

- (a) The Secretary of State to subscribe to the Guarantee Fund of the Exhibition the sum of £20,000.
- (b) The Government of India to be permitted to incur an expenditure of £10,000, in addition to all charges for freight, for the purpose of covering the cost of a collection illustrating the raw produce and ordinary manufactures of the Indian Empire.
- (c) The Royal Commission to provide a sum of £3,000 for the purchase of sumptuary art objects, and depute an officer to India to make a suitable selection.
- (d) The Royal Commission also to pay all charges for the installation of the Indian collections, the Executive Administration being entrusted to the Secretary, Sir Philip Cunliffe-Owen: and to secure the interests of the Indian Government, and of Indian Exhibitors, Mr. J. R. Royle, of the India Office, was appointed Assistant Secretary, for the purpose of supervising the work of the Indian Section.

Mr. Royle was later on specially appointed Official Agent for the Government of India, and the Government of Madras also placed the charge of their collections in his hands.

3. It being soon found that the sums alluded to above would be quite inadequate to properly represent Indian produce and manufactures, they were supplemented by—

- (e) Collections which the Native Princes and gentlemen of India agreed to contribute in response to the invitation of H.R.H. the Prince of Wales.
- (f) By grants made by the various Local Governments in India from provincial funds, and
- (g) By a sum of £6,850 originally granted for purchasing collections for an Exhibition which it was contemplated to hold in Bombay during 1886-87. This Exhibition being however subsequently abandoned, it was decided to allow the collections lent on its behalf to the London Exhibition to be sold there.
- (h) By a later grant of £2,500 made by the Royal Commission for the purpose of providing ornamental carved screens to enclose the various provincial art-ware courts.

4. The funds available for providing collections from India thus consisted of:—

	£
Government of India Grant	10,000
Royal Commission Grant	3,000
Bombay Exhibition Grant	6,850
Royal Commission Screen Grant	2,500
TOTAL	22,350

To this sum must be added the cost of private contributions and certain grants which the various Local Governments were able to make from Provincial funds.

5. The whole of the arrangements for collecting and forwarding from India the goods intended for exhibition were made under the direction of the Revenue and Agricultural Department of the Government of India, the Secretary to which Department—Mr., now Sir Edward Buck—issued instructions to the various Committees appointed in all parts of India for the purpose of furthering the

Arrangements made in India.

work connected with the Exhibition. These instructions were intended to ensure uniformity in the systems adopted by these Committees, and among other things included special forms and a scheme of classification, based on a series drawn up by Sir G. Birdwood, of the India Office, who had in many previous Exhibitions found the immense advantage of regularity in such details.

6. The selection of the objects purchased from the Royal Commission grant of £3,000 was entrusted to Mr. C. Purdon Clarke, C.I.E., who visited India for that purpose, and, with the co-operation of Sir Edward Buck's department, formed a collection, the value of which was afterwards proved by the readiness with which it sold in England.

7. The liberal manner in which the Native Princes and gentlemen of India responded to the invitation of the Executive President of the Royal Commission was especially remarkable, and it was this which mainly made the Indian Courts the most attractive rendezvous in the Exhibition.

Native contributors to the Exhibition.

Among the principal contributors the following may be mentioned :—

Their Highnesses :

BARODA, The Gaekwar of.
HYDREABAD, The Nizam of.
JODHPUR, (MARWAR), The Maharaja of.
MYSORE, The Maharaja of.
BHOPAL, The Begum of.
GWALIOR, The Maharaja (Sindhia) of.
INDORE, The Maharaja (Holkar) of.
JAIPUR, The Maharaja of.
JAMU AND KASHMIR, The Maharaja of.
UDAIPUR, (MEYWAR), The Maharana of.
TRAVANCORE, The Maharaja of.
BAHAWALPUR, The Nawab of.
BHARTPUR, The Maharaja of.
BIKANER, The Maharaja of.
COCHIN, The Raja of.
KARAUJI, The Maharaja of.
KOTAH, The Maharaja of.
KUTCH, The Rao of.
ORCHHA (Tehri), The Maharaja of.
PATIALA, The Maharaja of.
TONE, The Nawab of.
ALWAR, The Maharao Raja of.

BHAUNAGAR, The Thakur Sahib of.
DATIA, The Maharaja of.
DEWAS, The Raja of.
DHAR, The Maharaja of.
DHOLPUR, The Maharaj Rana of.
JHALAWAR, The Maharaj Rana of.
KUCH BEHAR, The Maharaja of.
RAMPUR, The Nawab of.
BIJAWAR, The Maharaja of.
CAMBAY, The Nawab of.
CHARKHARI, The Maharaja of.
DHRANGADRA, The Raja Sahib of.
JUNAGARH, The Nawab of.

8. It was originally intended that only one officer—Dr. G. Watt, C.I.E.—should be deputed by the Government of India to take charge of and explain the Imperial economic and ethnological collections; but it was found necessary to give him the assistance of Babu Trailokya Nath Mukharji and of Mr. U. C. Mukharji. Mr. B. A. Gupte was also sent by the Government of Bombay in special charge of their exhibits and I found his ready assistance invaluable in connection with the Bombay Court. Their Highnesses the Nizam of Hyderabad, the Maharaja of Mysore, and the Thakur Sahib of Bhaunagar expressed a wish to send Commissioners to London, and they were represented respectively by Major Nevill, C.I.E., Colonel A. Le Messurier, R.E., C.I.E., and Mr. M. M. Bhownuggree, C.I.E. At the opening of the Exhibition, Sir Edward Buck arrived, and acted as Commissioner for India.

Officers deputed from India.

9. The total area at the disposal of the Royal Commission was 388,582 superficial feet of floor space, and of this amount India occupied within the Exhibition buildings 103,000 superficial feet, in addition to 2,818 feet for additional buildings in the grounds; this area was enormously in excess of that occupied by India at any Exhibition held in Europe, the nearest approximation to it having been at the 1851 Exhibition, when she occupied about 24,000 superficial feet. In addition to filling so large a space, India occupied the place of honour as regards the position allotted to her in the buildings, as may be seen by the plans at the beginning of this Report.

The 103,000 superficial feet were apportioned as follows,
 Arrangement of the space. viz.:—

Provincial Art-Wares Courts	39,500
Imperial Economic Court	19,500
Private Exhibitors, Tea and Tobacco	12,550
Administration Courts	8,850
Indian Vestibule	2,600
Indian Palace, Courtyard and Shops	8,030
Silk Court	6,160
Tea Houses	5,810
TOTAL	103,000

10. The scheme of classification adopted differed from that which has generally prevailed at European Exhibitions in which India has officially taken part. The decision of the Royal Commission that there would be no juries, but that each exhibitor should receive a commemorative diploma, made it unnecessary to group the exhibits into classes, and it was thought that by adopting a geographical arrangement for the manufactured goods a clearer idea could be obtained as to the precise part of India in which any particular object was produced. Under this system the Provincial Art-Wares Gallery was divided into sections, each of which was allotted to one province or group of provinces, so that it was easy to study within a limited space the whole of the manufactures of any one part of India. The precise area to be devoted to each province was determined by the Revenue and Agricultural Department, and the space was at an early date marked out on the ground by the executive staff of the exhibition so that all goods as they arrived could be readily distributed to their proper positions.

11. It was not found possible to adopt any regular geographical sequence for the various provinces, but the following were the groups into which the Art-Wares Gallery was divided:—

RAJPUTANA STATES, including Jaipur, Karauli, Bhartpur, Dholpur, Kotah, Jodhpur, Alwar, Ajmere, and Bikanir.

CENTRAL INDIA STATES, including Bhopal, Gwalior, Indore, and Rewah.

BOMBAY AND BARODA, including Bhaunagar, Kutch and Sawantwari. BENGAL; NIPAL; NORTH-WEST PROVINCES AND OUDH; PUNJAB; KASHMIR; CENTRAL PROVINCES; ASSAM; BURMA; MADRAS; MYSORE AND COORG; HYDERABAD.

Each of these Provincial Art-Ware Courts was enclosed by a carved screen of wood, marble, or other material which in most cases illustrated the style of decorative work employed in the province from which it came. These screens contributed very much to the effective appearance of the art-ware collections, and their arrangement and erection was carried out under the able direction of Mr. C. Purdon Clarke. In every court maps of India, specially prepared for the Royal Commission by Mr. B. J. Rose, showing the relative position, area, and population of that part of the country, to which each section was assigned, were conspicuously displayed. An idea of the general appearance of this Gallery is given by the perspective view at the commencement of this Report.

12. In the Imperial Economic Court the Government of India considered it advisable to depart from the geographical arrangement in order to avoid the unnecessary reduplication of similar specimens of raw produce from various parts of the country, and the system adopted was based on the economic-scientific classification followed by Dr. G. Watt, in his "Dictionary of the Economic Products of India."

13. With this view the specimens sent by the Forest and other officers from all parts of India were examined by Dr. Watt and his assistant, Mr. T. N. Mukharji, and assigned their position in their proper economic groups. The Revenue and Agricultural Department laid great stress on the import-

ance of bringing before commercial men the immense value of the natural products of India, and this aim was never lost sight of, the visitor being led on from the index collection of many thousands of named specimens in glazed tins to the bulkier samples of the more important products shown in a large commercial sample room, where merchants and others could handle and obtain specimens of the products which they wished to examine, while the interest of the public was sustained by the introduction of many features, which, while exhibiting the uses of special products, yet added greatly to the attractive appearance of the Court as a whole. Conspicuous among these, was a large bamboo bridge, constructed from no less than thirty varieties of bamboo, a grain trophy in partial imitation of the tomb of Itmad-ud-dowlah at Agra, in which the marble mosaics were replaced by a geometric arrangement of glass panels covering variously-coloured grains, and an archway or trophy of timbers, the ornamental details of which were worked out in geometrical patterns, composed of samples of many different kinds of timbers.

14. The attractiveness of the Economic Court was further enhanced by combining the ethnological and agricultural collections with the raw produce, and by an arrangement of groups of life-sized coloured clay or plaster figures representing the different races of inhabitants of India, each figure having its appropriate clothing, ornaments and weapons, while close by were shown the peasant jewellery, domestic utensils, and rough arms used by each race, the mode of life of the village and agricultural population being moreover illustrated by means of several excellently made models. One of these groups is shown in the illustration given at the commencement of the Report. The idea which was first carried out at the Amsterdam Exhibition of 1883—of reproducing a small portion of a Native bazaar—was here worked out on a larger scale, several shops being completely stocked and fitted up with life-size figures of the shopkeepers, and proving a great source of attraction to the public.

15. Altogether, the economic and ethnological collections were of an importance and magnitude which have never been equalled at any previous Exhibition, and reflected the highest credit on Dr. George Watt, and the Revenue and Agricultural Department of the Government of India. The useful effect of the collections was, moreover, not permitted to cease with their arrangement, but a series of conferences on the more important products was arranged under the superintendence of Sir E. C. Buck and Dr. Watt, and these were attended by many of the leading merchants and brokers interested in the subjects under discussion. The proceedings have been printed and largely distributed among merchants and others who were unable to attend the conferences.

16. The Royal Commission, being very anxious to further the development of the Indian Silk Industry, resolved to set aside a large space for the purpose of an Indian Silk Court, and to place the arrangements for a suitable collection in the hands of Mr. Thomas Wardle, who paid a visit to the various silk-producing districts of India at the end of 1885, and, with the assistance of the Revenue and Agricultural Department of the Government of India, arranged for a thoroughly representative collection of the principal varieties of cocoons and of raw and manufactured silks. On his return to England, Mr. Wardle arranged this collection, and throughout the duration of the Exhibition devoted a large portion of his time to endeavouring to further the interests of Indian silk producers. An experienced silk-reeler from Lyons was employed under Mr. Wardle's direction by the Royal Commission, and showed by her work what superior silk can be reeled from Indian cocoons by the adoption of a proper system.

17. The arrangements connected with the sale of tea, coffee, and tobacco, were placed in the hands of Messrs. H. S. King & Co., who, while responsible to the Royal Commission, were throughout guided by the advice of the special Committees appointed to represent the interests of the various Indian Tea and Coffee producing districts. These Committees took care that no undue prominence was allowed to be given to the produce of any one district or garden, but that all were treated impartially. Messrs. King & Co. report that 29,390 lbs. of tea and 5,563 lbs. of coffee from various districts, and about 366,000 Indian cigars were sold during the time the Exhibition was open. The management of the large space allotted to these exhibits, and of the staff employed therein, was most efficiently carried out on behalf of Messrs. H. S. King & Co. by their zealous and most able representative, Mr. F. B. Goodwin.

18. Such private exhibitors of Indian goods as wished for an independent space where they could be represented by their own agents had space allotted to them in the private Exhibitors' Court adjoining the Tea and Coffee gallery, and some of them effected considerable sales of their exhibits.

19. Owing to the construction of the galleries, which only allowed of a very limited wall space being allotted to each province, and on account of the inappropriateness of introducing pictures in the midst of carpets and show-cases, it was only in a very few instances possible to exhibit paintings, drawings, and photographs with the art-manufactures, although a few were shown in the Economic and Administration Courts. The remainder were exhibited, together with the bulk of the Colonial pictures in the gallery of the Royal Albert Hall. One of the principal features of the Indian collection being the portraits lent by Native Princes, in the midst of which were placed portraits of the Queen and of H.R.H. the late Prince Consort, lent by Her Majesty.

20. His Highness the Maharaja of Kuch Behar, having intimated that he would exhibit a large sporting trophy consisting of a tiger hunt in an Indian jungle, and having contributed a sum of £540 for its installation, the Royal Commission determined to make this one of the prominent features of the Indian Section, and for this purpose made an additional grant of £500, and invoked the aid of the Revenue and Agricultural Department at Calcutta to supplement the trophy sent by the Maharaja so as to give as complete a representation as possible of the wild animals of India. The collections were most effectively arranged by Mr. Rowland Ward, and formed a never-ending source of attraction to the crowds of visitors by which it was constantly surrounded.

21. Although it was comparatively easy to get together collections illustrating the products and manufactures of the country, yet it was thought that something more was wanted in order to give the British public an idea of the manner in which the Native artisans performed their daily work in India in former times as dependents of the various princes and minor chieftains. Mr. C. Purdon Clarke therefore conceived the idea, which he most happily and skilfully carried out, of erecting a typical Indian Residence with its Durbar Hall and a forecourt, which was approached by a massive stone archway, designed by Major J. B. Keith, and presented by the late Maharaja Sindhia, to the South Kensington Museum and lent by the Museum to the Exhibition. The forecourt was surrounded by small shops, in which numerous artisans who were brought over from India at the expense of Messrs. H. S. King & Co., under the charge of Dr. J. W. Tyler, C.I.E., daily plied their trades under the eyes of the public. From a financial point of view this venture did not prove a success, not because the wares manufactured by the artisans were not appreciated, but because the recovery of the cost of the undertaking was throughout considered of less importance than the making of an attractive and picturesque display. A large quantity of the goods manufactured on the spot were readily sold, and orders for fresh goods were constantly received.

22. To give some idea of the vast and complicated machinery required for the administration of the Indian Empire, a large space was allotted to the various departments of the Indian Governments, and here they showed reports, maps, photographs and models in illustration of the work carried on by each, and their collections were supplemented by a complete series of reports got together by Mr. F. C. Danvers, Registrar and Superintendent of Records at the India Office. The whole collection was very attractively arranged by Mr. B. J. Rose of the India Office.

23. The series of maps, surveys, and photographs exhibited by the Survey of India Department attracted considerable attention, but the public were most pleased with the contributions of the Military Department, consisting of life-sized portrait-models of Native officers and soldiers, showing the uniforms and arms of twenty-four different regiments; these were grouped around the Indian vestibule and have now been deposited in the Museum of the Royal United Service Institution.

24. The work connected with the Indian Section was commenced by me at the India Office early in 1885, and in March of that year I took up my quarters at South Kensington in the temporary offices there assigned to me, so that the work of allotting space, correspondence, and reception of goods could be performed on the spot without delay. It was not until early in 1886 that the permanent offices of the Indian Section were ready for occupation, the delay being caused by the fact of the Inventions Exhibition having been held on the same ground as was subsequently occupied by the Colonial and Indian Exhibition.

25. The arrangements for the transit of goods from the Docks and their delivery at the Exhibition were entrusted to Messrs. H. S. King & Co., who also arranged for the transit from Bombay of all goods shipped at that port; they succeeded in inducing the Peninsula and Oriental Steam Navigation Co. to fix the low rate of 30s. per ton for the goods from that port, and the large number of, 3,212, packages, some of them of great bulk—including all goods shipped by the

Government officials from Calcutta and Madras—were delivered promptly and in good order at South Kensington. The only exception was one small case from Assam—further alluded to in its proper place in the accounts—which was stolen or dropped from a van on the way from the docks.

26. The cases of exhibits were all carefully marked and numbered by the local Committees in India, and in nearly every instance the rules laid down concerning the posting of advices and invoices to London were faithfully adhered to; wherever this was done the immense advantage of regularity and uniformity in all such details was perceived, and it was easy to send each package, on arrival, to its proper section, and there either unpack it, or else store it until required. Most of the goods arrived in excellent time, those from Madras and Central India being the very earliest on the ground, and this fact alone, joined to the energetic labours of the staff, enabled the Indian Section to be in a far more advanced state on the opening day than has ever been the case at any previous European Exhibition.

27. The rapid progress in the arrangement of the Indian Courts and their attractive appearance was especially commented on by the Press, and the very highest commendation is due to Sir Philip Cunliffe-Owen for the skill and administrative ability shown by him in so effectively and rapidly dealing with the mass of materials which came from all parts of India. He was fortunate in having the skilled assistance of Mr. Purdon Clarke for supervising the details of the decorative work; but had it not been for Sir Philip's own personal and unwearying attention to the minutest details of organization, it would have been impossible for so successful a result to have been attained.

28. The utmost interest in the Indian Section was evinced by Her Majesty, by H.R.H. the Prince of Wales, and by the other members of the Royal Family, all of whom paid repeated visits and expressed their great satisfaction with the magnificence of the Indian exhibits and the admirable arrangements made for their display.

It may be mentioned that the Exhibition remained open 164 days, and was visited by the very large number of 5,550,745 persons.

29. The opinion that no general system of classification could be adopted suitable for all the Colonies and for India induced the Royal Commission to decide that each Colony should be allowed to use such a classification as was best suited to its own requirements, and as a consequence, that there should be no juries for awarding medals, but that each exhibitor should receive a commemorative medal and diploma. The number of medals and diplomas granted to India was 1,312.

30. While it is impossible to mention the names of all the officials in India who were instrumental in the preparation of the collections, or who in other ways contributed to the success of the Exhibition, yet it is most advisable to bring to the notice of the Government of India the names of a few those who in their respective provinces or departments, have had the largest share of the necessary hard work thrust on them, for had it not been for the earnest exertions of these gentlemen the efforts of those working in London must have been neutralised.

The following are especially deserving of thanks:

Sir Edward C. Buck (who was Secretary to the Government of India in the Revenue and Agricultural Department) assisted by Mr. C. S. Bayley and other officers of his department, organized the whole system under which collections were made, invoiced and forwarded, and planned the sub-division of the space allotted to India into the several provincial Courts. Sir E. C. Buck subsequently visited this country, and rendered invaluable services to the Royal Commission.

The Committees appointed in all parts of India to carry out the general programme drawn up by Sir Edward Buck's Department, must have devoted themselves with great energy to their task, but in each province the bulk of the work of necessity fell on one or two men, and those whose services in this respect appear to be most pre-eminently deserving of recognition are:—

As regards the Arts and Manufactures Collections.

In Madras	Colonel H. P. HAWKES; DR. G. BEDIA, C.I.E.; DR. EDGAR THURSTON; MR. E. B. HAYELL.
In Bombay	The Hon. F. FORBES ADAM; MR. J. GRIFFITHS; MR. B. A. GUPTÉ.
In Sawantwadi	Col. G. K. C. WESTROFF.
In Bhaunagar	MR. PROCTOR SIMS, and AZAM VITALDAS SAMALDASS (Dewan of Bhaunagar).
In Baroda	Capt. J. HAYES SADLER, and MR. DINSHA ARDESHIR TALEYAR-KHAN (Municipal Commissioner).

In Bengal	MR. H. A. COCKERELL, C.S.I.; MR. M. H. JACKSON; MR. A. PEDLER.
In the North-West Provinces and Oudh	SIR ALFRED LYALL, K.C.B., K.C.I.E.; MR. D. M. SKEATON; Lieut.-Col. D. G. PITCHER; MR. F. S. GROWSE, C.I.E.
In the Punjab	MR. J. L. KIPLING, C.I.E., and the Deputy Commissioners of the various contributing districts.
For the N.-W. Frontier	SIR R. SANDEMAN, K.C.S.I.
In the Central Provinces	MR. J. B. FULLER.
In Assam	MR. H. Z. DARRAH.
In Burma	Col. SIR E. B. SLADEN; MR. H. L. TILLY.
In Central India	MR. J. W. D. JOHNSTONE.
In Rajputana	Col. SIR E. R. C. BRADFORD, K.C.S.I.
In Jaipur	Surgeon-Major T. H. HENDLEY; BABU KANTI CHANDRA MUKHARJI (Member of Jaipur Council); Lieut.-Col. S. S. JACOB, R.A.
In Alwar	Lieut.-Col. H. P. PEACOCK (Political Agent).
In Kotah	Capt. W. H. C. WYLLIE, C.I.E. (Political Agent).
In Jodhpur	Col. P. W. POWLETT (Resident).
In Bikanir	Major A. C. TALBOT, C.I.E. (Political Agent).
In Mysore	Col. A. LE MESSURIER, C.I.E.; MR. W. MCHUTCHIN; K. SESHADRI IYER, C.S.I. (Dewan of Mysore).
In Coorg	Col. T. CLARKE; MR. J. B. LYALL, C.S.
In Hyderabad	Col. C. J. O. FITZGERALD; SIRDAR DILAS JANG, C.I.E.
In Kashmir	Col. SIR OLIVER, B. C. ST. JOHN, K.C.S.I.
In Nipal	DR. G. H. D. GIMLETTE.

As mentioned in paragraph 12, the geographical arrangement adopted for the Art manufactures was not followed in the case of the Imperial Economic, Ethnographical, Administration of India, Silk Culture, Tea, Coffee, and Tobacco, and Picture Collections, each of which it was deemed better to treat as a whole rather than to unnecessarily repeat specimens, as would have been the case if a number of minor collections had been separately exhibited.

For the preparation of these collections in very many instances the officers named above were responsible, but in addition thanks are more particularly due to the following, among many others: Dr. G. Watt, C.I.E., of the Revenue and Agricultural Department, who, with the assistance of Babu Trailokya Nath Mukharji, arranged in India with the various Committees and Chambers of Commerce for the proper representation of the vast economic resources of the Empire.

Dr. Watt also rendered very great services, quite independently of his official duties at the Exhibition, in lecturing before various Public Institutions on the resources of India.

The success of the Economic and Administration Courts must, however, be, in a very great measure, attributed to the exertions of the various Departments of the Imperial and Provincial Governments and their assistants.

Among these must be mentioned:—

For Timbers, Forest and Agricultural Produce.

MR. B. RIBBENTROP, Inspector General of Forests.
 MR. R. H. C. WHITTALL, Assistant Inspector General of Forests.
 MR. F. B. MANSON, Conservator of Forests, Bengal.
 Lieut.-Col. J. CAMPBELL WALKER } Conservators of Forests, Madras.
 MR. J. S. GAMBLE }
 MR. E. C. OZANNE, Director, Agricultural Department, Bombay.
 Capt. J. A. L. MONTGOMERY, Punjab.
 MR. W. H. GLENNY, Madras.

For Geology and Meteorology.

MR. H. B. MEDLICOTT.
 MR. H. F. BLANFORD.

Survey of India, &c.

Lieut.-Col. J. WATERHOUSE; Major C. STRAHAN, R.E.; the late Col. DE PRÉE; also the heads of the Departments concerned with the collections illustrating the Salt, Excise, Opium, Mints, Post Office, Government Printing, Education, Police, Sanitary and Medical, Public Works, Military and Marine, &c.

31. In submitting a statement showing the mode in which the various collections sent from India have been disposed of, it is advisable to refer to the instructions I received. In the India Office letter of the 11th February 1885 (R. S. & C. 2384-84), the Secretary to the Royal Commission was informed that my services would be placed at the disposal of H.R.H. the President of the Royal Commission as an Assistant Secretary, and in this capacity it was further added that

Official instructions as to Sale accounts.

I was to be responsible for the receipt of the Indian exhibits and for their due disposal at the close of the Exhibition. In the India Office letter of the 9th March 1886 (R. S. & C. 283-86), I was further informed that the Government of India held me responsible for the satisfactory custody and disposal or safe return of all objects exhibited, and I was instructed to render accounts showing how each article had been disposed of.

32. It is, therefore, in accordance with these official instructions that I now submit detailed sale accounts showing how every article in the Indian Section has been disposed of, and in so doing I would express

my regret that they have occupied a somewhat longer time than I had at first hoped would be needed. But the preparation of these voluminous and complicated accounts, with the assistance only of the untrained and mixed staff placed at my disposal by the Royal Commission, has been a work of considerable magnitude and immense worry to myself; and when the enormous area occupied by India at the late Exhibition and the importance of the collections exhibited are taken into consideration, I feel confident it will be conceded that the date at which my accounts are rendered compares most favourably with that at which those of previous Exhibitions in which India has participated have been completed.

33. Before proceeding to make any remarks on the various collections and on the account connected therewith, I should state that although the present are complete accounts showing how everything has been disposed of, yet the Government of India have particularly asked me to prepare certain sub-accounts showing what sums are due to separate exhibitors, and as these will in no way affect the total sum realised, I have not thought it advisable to keep back the general accounts any longer, but have arranged to complete these minor accounts and send them out as quickly as possible. A good deal of correspondence and account work connected with collections of duplicates ordered from India for various museums and firms will also still have to be attended to.

34. The permission granted by the Secretary of State for the Official Agent to demi-officially correspond directly with the Revenue and Agricultural Department proved of the very greatest services in contributing to the expeditious despatch of the official business of the Indian Section, as may be seen by reference to the two volumes of correspondence circulated with this Report. In addition to the Indian correspondence, the general Home correspondence connected with the Indian Section has reached a total of about 4,000 letters.

35. Passing now to the cost of the collections sent from India and the amount realised by their sale, it will be seen by the appended statement B, that the total value of the collections sent, as invoiced, was R4,55,818-10-1; but this sum by no means represents the full value of the collections, for many costly loans, such as the Bhaunagar Court jewellery, the Vizianagram *palkis*, *hawdahs*, and trappings, and others, having no invoice price entered against them, could not be included in the total. The same remark applies to most of the exhibits in the Economic Court, which, although individually not of much intrinsic value, yet cost in the aggregate a very considerable sum when the expenses of collecting the specimens are taken into account. Altogether, the collections sent from India may be estimated to have cost not less than R5,50,000.

36. Deducting the cost of goods returned, or presented in accordance with instructions from India, it will be seen from the statement that the goods remaining to be disposed of were of the value of R2,29,823-2-4; and that these realised a total sum of £20,042-4-8, a result which, taking into consideration the fact that the collections were not chosen with the object of realising a profit from their sale, but as being representative of the various manufactures of India, will, I think, be considered satisfactory. A still more favourable result in proportion to the cost of the collections would have been shown by returning to India more of the property which was eventually disposed of by auction; but as my instructions were to strictly keep down the charges for return freight as much as possible, it was necessary to dispose of the goods even at a considerable sacrifice. Before this was decided on, however, every endeavour was made to induce private firms to tender for the undisposed-of goods; but, except for some of the choicer articles, they were all disinclined to offer any prices which I should have been justified in accepting.

37. The various collections have sold very unequally in proportion to their cost, and this it will be seen, is caused solely by their suitability or unsuitability to the English market. As an instance of a collection which sold well, I may quote that from the Punjab, which, while priced at R34,860 (after deducting value of returned goods), sold for £4,028—a profit which would more than suffice to pay the freight and actual expenses on that collection.

38. It will rest with the Government of India to determine whether any considerable profit on individual articles should or should not be made over to the exhibitor; but as the paying to any exhibitor a higher price than he asked would inevitably have the effect of raising the price demanded on any future occasion, I would strongly advise that no more than the price originally fixed should be handed over, any surplus being retained towards payment of freight and other expenses, and towards making up the loss on other exhibits.

39. In order to explain how considerable profits were realised on certain articles, I must refer to the fact that I was instructed by the Government of India to add to all Indian prices an amount sufficient to recover as far as possible, the cost of freight and packing, which was estimated roughly to be about R73,000. The Secretary of State also instructed me to fix such sale prices as would suffice to cover cost, freight, and reasonable administration expenses, without interfering with the ready sale of the goods. The simplest way of doing this would, at first sight, appear to be by adding a uniform moderate percentage all round; but from previous experience of many Exhibition collections, I was aware that a very large proportion of the exhibits would be unsaleable at anything near their cost in India. I was, however, fortunately able to appeal to Sir George Birdwood's intimate knowledge of all such subjects; and it was his opinion that the best course to follow was to be guided by the average value of each exhibit according to London prices, and to fix sale prices, where possible, at a trifle less than the prevailing retail prices. In this manner it was found that while many exhibits were almost totally unsaleable, and could therefore bear no addition to their cost prices, others were able to bear a heavy percentage. The sale prices were consequently fixed by the exercise of judgment, and although in some instances it was found advisable to either raise or lower them, as a rule the prices first fixed held good throughout the Exhibition, and in most instances those articles to which the highest percentage had been added were greedily bought up, and would have been so even had they been still more highly priced. In connection with the above, I cannot sufficiently express my obligation to Sir G. Birdwood for his kind advice and help in this as well as in many other matters of difficulty. During my own severe illness in the spring of 1886 it would have been impossible to keep pace with this branch of work had it not been for his personally devoting himself to the troublesome duty of valuing each object as it was unpacked; in this he was most efficiently assisted by Mr. B. J. Rose, who was temporarily deputed for this purpose by the India Office.

40. It will be observed by column 5 of Appendix B. and the marginal note attached thereto, that the money remitted to India through the Accountant-General, amounts to £17,565-17-9, and that this amount added to the sums specified in columns 6 and 7, makes up the total realised, viz., £20,042-4-8, as shown in column 8.

41. As regards the payments specified in column 6, I was instructed by the Secretary of State to make a deduction of 5 per cent. from all sales effected in the Exhibition, and to pay the same to the Royal Commission as a contribution towards the salaries of sales-clerks, and general staff. The sales effected in the Exhibition during the time it was open to the public amounted to £16,700, and the 5 per cent. commission thereon to £835; the commission was not charged on such articles as were sold at reduced prices after the close of the Exhibition. Here I may remark that, with the exception of £1,150 allotted by the Government of India to meet sundry contingent expenses, this sum of £835 is the only amount which was paid out of Indian revenues towards the salary of the staff of 62 persons, in addition to workmen, employed by the Royal Commission in the Indian Section, and towards the cost of installation of the very large collections, and that the cost must of necessity have been immensely greater if the plan, so economical to India, of entrusting the management to the Royal Commission, under the energetic direction of Sir Philip Cunliffe-Owen, had not been followed.

42. The deductions specified in column 7 are made up of customs and auction charges, return freight, salaries advanced to Native officers, and sundry small items as specified in Appendix A. It will be for the Government of India to decide in what manner these sums are finally to be debited, but so far as possible I have endeavoured to allot to each provincial account such proportion of the charges as appears to be fairly debitable to that account. I will therefore only briefly allude to the principal items.

43. Customs duty was payable on all gold and silver plate, and also on tobacco and spirits; the amount paid on the latter was trifling, and was due to the fact that samples were distributed with a view to ascertain-

ing the commercial value of the various specimens. As regards gold and silver plate, all such goods after being weighed by the Customs officer on arrival, were treated as being in bond for the period of the Exhibition, duty having to be paid on all pieces which were not forthcoming and packed for return under Customs sale at the close of the Exhibition.

Personal ornaments and filigree work were exempted from duty ; but the difficulty of disposing of the plate did not cease with the Customs officer's visit, for it was then necessary to take out a "License to deal in Plate," and also to obtain exemption from Hall-marking. This was only done by sending typical specimens of the different classes of silver goods to the Board of Customs for examination, and by claiming exemption from Hall-marking on the ground that the plate in question was of oriental pattern. This claim was admitted, except in a few instances where the specimens, being only of plain unornamented silver, were not considered by the Board as coming under the description of "oriental pattern." A small quantity of the silver goods remaining unsold at the close of the Exhibition were disposed of by auction, but the prices realised did not make it advisable to pay duty on the remainder and offer them for sale ; they were therefore returned to India.

44. The sums advanced to Native officials on account of salaries and allowances amounted to £422-18-2, as shown by my account and vouchers forwarded to the Government of India in December 1886. This amount has been deducted from the sales proceeds under authority of the Secretary of State, and its final adjustment will be dealt with by the Government of India.

45. I had instructions from the Government of India to keep the charges for return freight as low as possible, and therefore only loans, private property, and a few of the more valuable exhibits were returned. The total charges for return freight were £288-19-2, which sum has been as far as possible apportioned to those places to which goods belonged. The cost of packing was defrayed by the Royal Commission.

46. The total auction charges amounted to £415-13-3, a sum which is rather heavy in proportion to the low prices realised, but it must be borne in mind that the goods disposed of by auction were to some extent the refuse of the collection, consisting of such articles as the public had not cared to buy during the Exhibition. It had been my wish to dispose of the whole surplus collection in one sale, but Messrs. Christie, Manson & Woods, to whom I first applied, could not spare a sufficient time unless we had waited until a much later date. They therefore disposed of the greater portion of the more valuable goods, the remainder being sold a little later by Messrs. Edmund Robins & Hine. It being impossible to move the carved screens, they were included in the sale of the building and materials held by order of the Royal Commission by Messrs. Horne, Son & Eversfield.

I now proceed to make a few remarks on the collection sent from each province in the order in which they appear in the general statement, Appendix B.

47. The invoice value of the Madras collection after deduction of the value of returned and presented goods was R12,594-3-3, and it realised £1,260-5-3. The collection was very fairly representative of the less costly manufactures of the Madras Presidency, and arrived in excellent condition—a distinctive colour for the boxes, each of which was marked externally so as to show its contents, making it perfectly easy to single out and unpack the particular exhibits required, and remove them at once to their allotted position ; a carefully and neatly prepared printed catalogue was also sent. This collection would have realised a much larger sum but for the fact that the Madras Government wished a large selection of articles representing the various classes of manufactures to be reserved for the Government Central Museum, and thus the collection for sale was much reduced.

48. The value of the contributions from Vizianagram is not known ; they consisted of arms, costly *palkis*, and *howdahs*, plated with silver gilt, lent by H. H. the Maharaja of Vizianagram. Some of them were not very carefully packed, and had therefore become broken and damaged *en route*. Instructions to present these to the Imperial Institute have just been received ; but they had already, in January last, been returned through the Madras Committee.

49. The Bombay collection is treated for purposes of account as including Bhaunagar, Kutch, and Sawantwári, and its value, after deductions for goods returned and presented, was R36,967-13-5 ; it realised £3,618-3-6. But it must be observed that the gross value

was very much higher than is shown in the accounts, as no value is inserted in the invoices for the costly Bhaunagar Court jewellery and trappings lent by H. H. the Thakur Sahib, and returned to India. The collection arrived in good order, and the invoices were very carefully prepared, but the stock of silver goods sent was so large—supplemented as it was by the Antwerp Exhibition collection—that a great deal had to be returned, as it would have been necessary to pay the Customs duty of 1s. 6d. per oz., before it could have been sent to auction, and it did not appear probable that the prices realised at auction sale would be sufficient to justify this expenditure.

50. The remains of a collection sent from Bombay to the Antwerp Exhibition of 1885 were sent from thence to London for sale. It consisted mainly of arms, silver goods and agates which had proved unsaleable in Antwerp and had naturally lost a great deal of their original freshness. As the cost prices were inserted in francs on the labels which accompanied the exhibits, it is difficult to be certain of the original cost—especially as on comparing the prices with those of similar articles received direct from Bombay, the Antwerp prices appeared to be in most instances higher. I have been unable to make the list of these goods precisely tally with the list received from Antwerp, but for the sake of uniformity in the accounts I have converted the total into rupees at an assumed exchange of francs 1·80 per rupee; this, after deducting the value of returned goods, makes a value for sale of R8,968, and a price realised of £463-19-11.

51. The principal portion of the Baroda collection consisted of valuable carvings and silver goods, some of which were presented by H. H. the Gaekwar to the Imperial Institute and some returned; the invoice value of the remainder was R7,241-14-4, and the sum realised was £478-6-11. The loss was caused by the poor prices realised for many of the exhibits at the auction sales. Being in some doubt as to what portions of this collection ought to be returned, I consulted Major-General Sir John Watson, K.C.B., V.C., who recommended that in order to keep the return freight charges low, only the more valuable exhibits should be returned and the remainder disposed of.

52. Considerable difficulty has been experienced in arriving at the value of the Bengal collection, and in ascertaining whether everything is accounted for, owing to the fact that the invoices were not received from India in the regular rotation of the numbers, but each invoice contained many items in no numerical sequence. I have found it necessary to bring them as far as possible into rotation in the general account, from which, if desired, all articles belonging to one exhibitor can subsequently be extracted, and an account prepared showing what sum is due to each. I find that after deducting the value of returned and presented goods, the collection for sale was valued at R23,197-11-4 and sold for £1,209-3-11. The loss is principally accounted for by the unsaleable character of the two screens which, while invoiced as costing more than R10,000, only fetched £62 at the auction.

53. The same plan had been adopted with the North-West Provinces invoices as with those from Bengal; I have therefore similarly brought the entries as far as possible into numerical rotation, leaving the accounts of individual exhibitors to be prepared later. After deducting the value of returned and presented goods the cost of those sold was R16,114-12-0 and the amount realised £1,639-15-7. This shows a very fair result, owing to the fact that the collection contained a large proportion of saleable goods such as are in general demand in England.

54. The Punjab collection was in most respects particularly adapted to the requirements of the English market, consisting as it did in great part of ornamental pottery, *koftgari*, arms, carpets and carvings, all of which were suitable for use in ordinary houses, the result being that the greater part sold readily at a good profit. Thus while the invoice cost of the portion sold was R34,860-11, the sum realised was £4,029-0-3. The only goods found unsaleable and therefore returned, were the more expensive embroideries; of nearly all the other goods considerably larger quantities than were sent could readily have been sold.

55. The small North-West Frontier collection cost R1,156 and realised £83-0-4; this account has been added at the end of the Punjab account.

56. The Central Provinces collection cost R5,687-3-9, and sold for £287-8-8; the loss was on the screen, the Government of India portion of which cost R2,251 and sold for £97, and on several expensive embroideries and textile fabrics which were quite unsuited for ordinary use and were sold by auction.

57. The Burmese collection, after deducting the value of returned goods, cost R8,835-15-6 and realised £804-15-4. The exhibits in general sold well, but there was a loss on the carved wood-work and on some of the textile fabrics.
Burma.
58. The Assam collection cost R4,128-3-5 and realised £218-0-5; the loss was caused mainly by a large proportion of the goods having to be disposed of by auction. The only instance of a case having been lost or even seriously damaged during transit occurred in connection with this collection. The case in question, No. 58, appears to have been lost or stolen during transit from the Docks to South Kensington, and although all possible means were taken to trace it, they were unsuccessful. The case not having been specially insured, it was only possible to recover £10 from the carriers, that sum being the extent of their liability; the amount is credited in its proper place in the Assam accounts.
Assam.
59. The most important and attractive of the collections from the Rajputana States was that from Jaipur, which was particularly suitable for sale in England; but as the screen and many of the most valuable models were presented to the Imperial Institute, and to different museums, in accordance with instructions, and as the majority of the goods remaining unsold at the close of the Exhibition were returned, the collection actually disposed of only cost R14,484-3-3 and realised £1,570-7-7. An important collection of models of vehicles, buildings and astronomical instruments was presented to various museums on condition that they offered some suitable return presents to the Jaipur Museum; a list of such presentations has been separately forwarded to India.
Rajputana States. Jaipur.
60. Bikanir, in addition to some valuable loans, which were returned, sent a collection valued at R3,668-12-4, which realised £167-16-9; the loss was incurred on the screen and on goods sold by auction.
Bikanir.
61. The Kotah collection, after deducting the value of the screen which was presented to the Imperial Institute, cost only R499-9 and sold for £30-1-11.
Kotah.
62. Jhallawar sent a few objects which, with one exception, were presented to the South Kensington Museum.
Jhallawar.
63. The Western Rajputana States, including Jodhpur, Sirohi and Jeysulmere, sent small collections, which, after deducting the value of the Jodhpur screen, which was presented to the Imperial Institute, cost R1,938 and realised £150-19-10.
Western Rajputana States.
64. The Meywar collection not being of a saleable description, was used in the Ethnological collection, which was eventually made over to the Imperial Institute.
Meywar.
65. From Ajmere came a small but attractive collection, which cost R537-2 and realised £67-16-1.
Ajmere.
66. The Alwar collection contained many loan objects which were returned, and the remainder for sale cost R3,916-8 and realised £143-11-5. As the proceeds of this collection were to be paid over to the Countess of Dufferin's Fund, special efforts were made to obtain a fair price for the ornamental marble screens, but they were not very suitable for use in houses and only realised at auction a sum of £76. After payment of the expenses, the balance of £116-10-5 has been paid to Messrs. Coutts & Co., to credit of the fund, as shown in the statement.
Alwar.
67. From Harowti and Tonk came a small collection, valued at R251-5, which sold for £37-2.
Harowti and Tonk.
68. Bhurtpur, Dholpur and Karauli sent a small collection which cost R2,821-7 and fetched £83-3, the loss being on the screen and on goods sold by auction.
Bhurtpur, Dholpur and Karauli.
69. From the Central India States came a collection, which, after deducting the value of goods presented and returned, cost R4,540-10-1 and realised £255-12-11; the loss was entirely due to the unsuitability of most of the goods to the English market and to the poor prices realised at auction.
Central India.

70. The Hyderabad collection was important and very attractive; several of the more valuable exhibits were presented on behalf of H. H. the Hyderabad. Nizam to members of the Royal Family and others, by Major Nevill, and after deducting the value of these and of returned goods, the value for sale was R16,992-4-3, and the sum realised £911-13-11, the loss being principally on the screen. It was found necessary to return nearly all the Hyderabad carpets and rugs, as they were totally unsaleable owing to the prevalence of aniline dyes in all of them; the Bidri also did not find nearly so much favour as that from the North-West Provinces and Bengal, and a great deal of it was therefore returned.

71. From the Mysore collection also a good many articles were presented on behalf of the Maharaja to members of the Royal Family and others, by Mysore. Colonel LeMessurier, some of the more costly unsold exhibits were returned, and the remainder, which were of a very saleable description, cost R6,488 and realised £621-9-9.

72. The Coorg collection, not being suitable for sale, was used in the Ethnological collection, and was afterwards presented to the Imperial Institute. Coorg.

73. From Nipal the collection for sale cost R3,175-3-2 and realised £114-8-6, the loss being on costly dresses and head-ornaments, which were quite unsuitable for sale, and were disposed of by auction. Nipal.

74. The Kashmir collection was small, but was very much admired and greedily bought up; the only unsaleable articles were some sapphires, said to be far too high in price, and one massive silver tray which it was found better to return rather than pay the Customs duty on it. The remainder of the collection cost R8,073-4 and sold for £1,069-2-11. Kashmir.

75. Of the Silk Culture Court collections I am not able to render an account in precisely the same form as for the other exhibits, because the goods for this Court, in all instances, went direct to Mr. T. Wardle, were arranged by him, and the proceeds of sales paid to me by the clerk placed at his disposal by the Royal Commission. I therefore send in the account as rendered by the Silk Culture Court clerk with the addition of such goods as were sold by auction, from which it appears that the value of goods other than Royal Commission property in the Silk Culture Court was R4,670-6, and the sum realised was £293-2-3, of which sum £62-19-3 is still due by Mr. Wardle for goods purchased by him at the close of the Exhibition at his own valuation as marked in the account.

Respecting this account I understand from Mr. Wardle that he paid for the whole collection, and that he only received from the Government of India a sum of £150 towards it.

The following is the statement he sends me:—

	£	s.	d.
Cost of goods exhibited, R4,670-6 equivalent at 2s. per rupee, to	467	0	9
Payment to Wolland Pros.	1	9	4
	Total	468	10 1
Deduct sum paid by the Government of India to Mr. Wardle	150	0	40
Balance due to Mr. Wardle	318	10	1
Less sum due by him for goods retained	62	19	3
Balance still claimed by Mr. Wardle	255	10	10

Mr. Wardle adds that the reason why he has charged 2s. per rupee is to cover considerable expenses of carriage, &c., which were incurred in bringing the goods from the interior of India.

I have not felt empowered to pay this sum to Mr. Wardle without the sanction of the Government of India, and can only recommend his claim for favourable consideration. There can be no doubt that Mr. Wardle has rendered most important services to the Indian silk industry, and apart from this, it appears only just that his personal outlay on the collection should be, as far as possible, reimbursed.

76. It is not possible to give with any approach to accuracy the cost of the collections exhibited in the Economic Court. The intrinsic value of most of the exhibits was not large, but the expenses incurred in getting together and preparing the specimens, and the interest for commercial and scientific purposes of so complete and magnificent a collection of natural products and ethnological illustrations, gave to them a value quite beyond comparison with their original cost. The Imperial Economic Court.

sales in this Court of small exhibits, such as pottery, cheap rugs, durries, mats, baskets, &c., realised about £110; but all the items, excepting a very few, have been entered in their proper provincial accounts, the remainder being credited under the head of sundries.

77. As regards the mode in which the collections were dealt with, I received instructions to allow the Kew authorities to select samples of all such produce as they required to complete their collection, and also to make over to the Cooper's Hill College a considerable number of specimens. This was done under the direction of Dr. G. Watt, who also, before his return to India, prepared, and named collections of samples of produce for the following places, *viz.*, Agricultural College, Cirencester; Bradford Technical College; Harvard University; Edinburgh University; Owen's College, Manchester; Canterbury Museum, New Zealand; Botanical Garden, Ceylon; Edinburgh Economic Museum; Edinburgh New Veterinary College; the French Government the Stockholm Royal Academy of Sciences. These collections were despatched to their destinations, and sums, amounting in all to £55, were recovered from some of the recipients towards the expenses of preparing them. This amount is credited in the account of the disbursement of the sums received from the Government of India through the India Office for sundry expenses. The remainder of the collections in the Economic Court were offered to the Imperial Institute, but the Organising Committee were not prepared to find storage room for large quantities of inflammable materials such as fibres, timbers, resins, and other raw produce, all of which, except the Index collection, were consequently made over to the London Chamber of Commerce for use in the proposed City of London Commercial Museum.

78. A sum of £434-0-9, for sundries appears at the end of the general statement

Sundries and Surplus.

(Appendix B.) among the receipts as per details shown in the margin. Several of the items, such as sales in Imperial Court, sale of packing-cases, materials of trophies, &c., require no remarks; but a sum of £207-1-10, is entered for miscellaneous sales not entered in other accounts, of which the following is the explanation. In going through the rough sales books a few items have been found entered with numbers and descriptions which were evidently wrong, and could not be posted to their proper places in the accounts. In the auction sales accounts such was the case with a good many items, but this was entirely caused by the auctioneers themselves, for the greatest care was taken to write down the number and

Account of Sundry Sums Received for the Government of India.

	£	s.	d.
By Sale of Sundry Small Objects in the Imperial Court	3	10	0
By Sale of Packing Cases	71	10	7
of Materials used for Grain and Timber Trophies, &c.	63	15	0
By Sale of Andaman Timber	28	0	0
of Hand-books	16	8	4
Received from M. Bigex for freight of a Carpet	2	0	0
Received from Royal Commission for freight of Cocoons	2	10	2
Received from H. S. King & Co. refund of Silver Duty	12	3	0
Interest on Bank Deposits	31	10	10
By Surplus received for various articles sold with incorrect numbers	204	11	10
	<hr/>		
	434	0	9

79. It will be observed that a few articles in the various accounts are entered as missing, and I would suggest that, if the Government of India approve of such a course, this surplus sum, or a part of it, should be employed to compensate *pro rata* the owners of any exhibits not duly accounted for.

80. A sum of £31-10-10, is credited for interest on Bank Deposits: this sum would have been larger but for the fact that I only retained at the Bank a sufficient amount to meet contingencies, paying all other receipts to the Accountant General at the India Office in sums of £1,000 each as often as the available balance exceeded that amount.

81. The total cost of the ornamental screens, including freight, appears to have been £1,05,481-12-6; of which sum the equivalent of £33,989-5-5 was paid by the Royal Commission. The amount realised for these screens was materially influenced by the uncertainty which prevailed up to the last as to whether a permanent Exhibition of any kind was to be retained at South Kensington, and as it was considered desirable that, in that event, the screens should be kept together, it was impossible to sell during the Exhibition any of the smaller screens which would have realised good prices. Eventually, when it was decided that only a few of the screens should be

retained for the Imperial Institute, it was too late to sell most of the remainder to advantage, and the majority were sold by auction. The total realised was only £2,180-10, of which sum £1,362-10-10, was for portions bought out of the Royal Commission grant. The remainder, £817-19-2, is credited in the various provincial accounts.

82. The special catalogue of Indian exhibits was compiled by Mr. E. J. Wade, of the India Office Library, from materials supplied by the Government of India and the various provincial Committees, and was published at the expense of the Royal Commission, to whom the accounts connected with its sale have been rendered, but the following books, *viz.*, "Statistical Atlas of India," "Photographs of Madras and Burmese Art-ware," and a "Handbook of the Jaipur Courts," were sent from India for sale and were obtainable by the public at the book-stalls. The sale was, however, very limited, for as regards the two former works, both their large size and high price—10s. and 35s., respectively, made them unsuited for purchase by the ordinary visitors to the Exhibition, while as regards the latter, people were disinclined to pay for hand-books to the minor Courts of the Exhibition, but contented themselves with buying one of the general catalogues. The small sum realised by sales of these books, £16-8-4, is credited among the sundries, and the remaining stock of books has been handed over to the care of Mr. F. C. Danvers, Registrar and Superintendent of Records, India Office. A stock of Volume I of Dr. Watt's "Dictionary of the Economic Products of India," was also received from India, but the volume was subsequently withdrawn from sale until the completion of the work, and the stock is retained at the India Office.

83. A special series of numbers of the *Indian Art Journal*, in illustration of some of the more striking exhibits, was brought out by Mr. Griggs, under the patronage of the Government of India, during the course of the Exhibition. In consequence of an arrangement made with Sir E. C. Buck, in order to facilitate the ordering of duplicates of art manufactures, a series of photographs of such exhibits as were most in demand was taken by Mr. Griggs, and the invoice numbers of the objects inserted on each photograph. A set of these photographs is retained at the India Office; another set, by Mr. C. Purdon Clarke, C.I.E., at the India Museum, South Kensington, and a third set was forwarded to the Revenue and Agricultural Department of the Government of India. Several duplicate collections of art manufactures have been supplied to museums by aid of these photographs.

84. Although, as already mentioned, the expenses of the general administration of the Indian Section were met by the Royal Commission, yet two sums, *viz.*, one of £50 and one of £1,150, were granted by the Government of India and paid through the India Office for the purpose of defraying special charges. The former sum was devoted exclusively to the payment of the cost of scientific experiments connected with Indian vegetable fibres, the result of which will be published in the special report now being prepared by Dr. Watt and Mr. C. F. Cross, and the latter sum to meeting sundry charges connected with the Imperial Economic Court, cost of photographic work, and a few other matters as detailed in the account, with vouchers, for this expenditure submitted separately through the India Office.

85. The foregoing remarks will, I think, with the aid of the detailed MS. accounts, sufficiently explain how the various collections have been dealt with. But it may not perhaps be considered out of place if I here draw attention to one remarkable fact in connection with the Indian Section of the late Exhibition, namely, the liberal manner in which the Native Princes and private exhibitors throughout India contributed to its success. It can be said with truth that on this occasion it was the contributions of the Native Princes which were the making of the Exhibition; and if their services in this respect are suitably acknowledged, there can be no doubt that the example they have set will, on any future occasion, find many imitators; it would in that case be possible for the Government of India to follow the course adopted by European Governments, and to limit their action to merely directing the efforts of private exhibitors, securing reduced rates of freight, and providing an expert staff for carrying out the necessary arrangements in Europe. It has always been difficult to induce the manufacturers of India to take any part in Exhibitions, but it is to be hoped that the favourable terms on which the collections forwarded by private manufacturers were disposed of on this occasion will encourage them to contribute even more largely in future, and so relieve the Government of India from the necessity of incurring any large expenditure on International Exhibitions which may receive their countenance.

INDIA OFFICE;
London, July 20th, 1887.

J. R. ROYLE,
Official Agent for the Government of India at the
Colonial and Indian Exhibition, 1886.

15 12 0	Silver cup	1	14 0 0
	TOTAL	9	340 8 0

of the aggregate value of Rs 340-8, was found in the village of Bamni, in Taluka Khanapur, of the Satara District, under a piece of open ground in possession of one Narayen Anant Gore, an inhabitant of the same village.

All persons claiming the said treasure or any part thereof, are hereby required to appear personally or by agent before the Mamlatdar of Khanapur, at Vitta, or where his camp may be, on the 20th of June, 1888, when the Mamlatdars will proceed to hold an enquiry in accordance with the provisions of the Act.

A. D. YOUNGHUSBAND,
Acting Collector of Satara.

CAMP SHIRALLA,
The 9th February, 1888.

NOTICE.

It is hereby notified, under Section 5 of the Indian Treasure Trove Act (VI of 1878), that on the 28th December, 1887, a "peetam" (stand) measuring 3 feet 3 inches long, 1 foot 1 inch broad and 7 inches high, made of copper and weighing 61 lbs., was found by a ryot

named Kumaran, in Kallagudy village, in the Head Assistant Collector's Division, Ramnad, Madura District, while ploughing his punja land.

All persons claiming the said treasure, or any portion thereof, are required to appear either personally or by agent before the Collector of Madura, on the 16th July, 1888, at Madura, with a view to their claims being enquired into and disposed of according to law.

E. TURNER,
Collector.

COLLECTOR'S OFFICE,
MADURA,
The 13th February, 1887.

NOTICE.

It is hereby notified under Section 5 of the Treasure Trove Act, VI of 1878, that treasure consisting of eighty-four whole Rupees and three half-rupees coin current during the reign of the Emperor Shah Alum, and of the aggregate present value of Rs 64-2, has been discovered in a field known as Pimpaldara, situated at Samsherpur in the Akola Taluka.

All persons claiming the said treasure, or any part thereof, are therefore required to appear either in person or by agent at the Office of the Mamlatdar of Akola within six months from date of this Notification and to assert their claim, if any, to the said treasure, so that the matter may be enquired into and determined by the Mamlatdar, in accordance with the provisions of the said Act.

G. WADDINGTON,
Collector.

CAMP SANGAMNER,
The 14th February, 1888.

Presidency Postmaster, Calcutta.

WOOD FUEL.

NOTICE TO MANAGERS OF MILLS, BREWERIES, ICE COMPANIES, TANNERIES, BRICK-BURNERS, COMMISSARIAT OFFICERS, SUPERINTENDENTS OF JAILS, AND OTHER LARGE CONSUMERS OF FUEL.

Wood fuel, chiefly sal, thoroughly dry, having been cut two years ago, is available in the quantities and at the places stated below:—

		Maunds.
Oudh Forest Depot near Lucknow-Sitapur Railway Station . . .	Lucknow . . .	39,300
Oudh Forest Depot near Oudh and Rohilkhand Charbagh Railway Station . . .	Lucknow . . .	18,900
Oudh Forest Depot near Bahramghat Railway Station . . .	Bahramghat . . .	43,700

Tenders for the purchase of the whole, or portions of the above in even hundreds of maunds, will be received by the Conservator of Forests, Oudh Circle, Camp *via* Lucknow, up to the 25th February, 1888. The maund is the Government maund of 82½ pounds. The fuel to be removed by purchasers into their own carts and removed from Depôts (unless specially agreed upon otherwise) within a month of acceptances of tender.

Fuel to be paid for on delivery of each 100 maunds.

Ten per cent. earnest-money will be required before the purchase is considered as completed; this will remain with Conservator for the payment of the last 1/10th of the amount purchased.

Conservator is not bound to accept the lowest or any tender. The fuel can be seen by applying to the Muharrirs in charge of the Depôts.

The Lucknow-Sitapur Railway having now reached the Government Forests in Kheri, wood fuel can be supplied in large quantities annually either in Lucknow, Sitapur, or in the Forest. Arrangements can also be made for the supply of large quantities of tanning and paper mill materials.

E. WOOD, *Captain,*

*Conservator of Forests, N.-W. P. & Oudh,
Oudh Circle.*

DATED CAMP *via* LUCKNOW,

The 2nd February, 1888.

GOVERNMENT CINCHONA FEBRIFUGE.

This preparation is an efficient substitute for quinine, and can be purchased by Government officers for public and charitable purposes, and by any one taking *twenty pounds* at a time, from the Superintendent, Botanical Garden, Calcutta, *for cash only*, at the following rates—per four-ounce tin, *Rs. 4-8*; per eight-ounce tin, *Rs. 8-8*; per pound tin, *Rs. 16-8*. The general public can be supplied by the Superintendent, Botanical Garden, *for cash only*, at the under-noted rates—per four-ounce tin, *Rs. 5-8*; per eight-ounce tin, *Rs. 10-8*; per pound tin, *Rs. 20*. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage, eight annas per four and eight-ounce tins, and twelve annas per pound tin, in addition to the foregoing rates.

Government of India.*

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows:—

<i>Terms of subscription, payable annually in advance.</i>		
For the complete Series, including postage		
	Without postage.	With postage.
For the Calcutta Series	R 10 0	R 12 0
„ each of the Madras, Bombay and Allahabad Series.	„ 6 0	„ 7 0
„ a part of the Calcutta Series purchased separately, inclusive of postage in India	„	„ 2 0
„ a part of the Madras, Bombay and Allahabad Series purchased separately, inclusive of postage in India	„	„ 1 0

Persons desiring to subscribe for, or purchase, the Report, should apply to—

Messrs. Thacker, Spink and Co., Calcutta.

„ Thacker & Co., Bombay.

„ Higginbotham & Co., Madras.

The Government Central Book Depot, Bombay.

„ The Curator of Government Books, North-Western Provinces and Oudh.

„ Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1885 should be at once remitted.

NOTICE.

Indian Law Reports.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, by the Calcutta Central Press Company, "Limited," 5-1, Council House Street, at the following rates, payable in advance:—

	One page.	Half page.	Quarter page.
For one issue	R 20	R 14	R 9
„ three issues	„ 55	„ 36	„ 24
„ six „	„ 100	„ 68	„ 45
„ nine „	„ 145	„ 96	„ 64
„ twelve „	„ 180	„ 120	„ 80

Bills introduced into the Council of the Governor General of India for making Laws and Regulations or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to amend the Law relating to Imprisonment for debt was presented to the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 24th February, 1888 :—

WE, the undersigned, Members of the Select Committee to which the Bill to amend

From Mr. P. K. Desai, Pleader, District Court, Satára, dated 15th July, 1886 [Paper No. 1].

From Secretary to Chief Commissioner, Coorg, No. 1496—273, dated 16th August, 1886 [Paper No. 2].

From Secretary for Berar to Resident, Hyderabad, No. 331G., dated 15th September, 1886, and enclosures [Papers No. 3].

From Chief Secretary to Government, Madras, No. 2405, dated 4th September, 1886, and enclosures [Papers No. 4].

From Chief Commissioner, Ajmere-Merwára, No. 1104—690-II, dated 22nd September, 1886, and enclosures [Papers No. 5].

Endorsement by Chief Secretary to Government, Madras, No. 2528, dated 22nd September, 1886, and enclosures [Papers No. 6].

From Secretary to Chief Commissioner, Assam, No. 1727, dated 21st August, 1886, and enclosures [Paper No. 7].

From Acting Under Secretary to Government, Bombay, No. 5776, dated 8th October, 1886, and enclosures [Papers No. 8].

From Secretary to Chief Commissioner, Burma, No. 377—20L., dated 15th October, 1886, and enclosures [Papers No. 9].

From Under Secretary to Chief Commissioner, Central Provinces, No. 4991—296, dated 2nd November, 1886, and enclosures [Papers No. 10].

From Secretary to Chief Commissioner, Coorg, No. 1970—2736, dated 2nd November, 1886, and enclosures [Paper No. 11].

From Under Secretary to Government, Bombay, No. 8064, dated 16th November, 1886 [Paper No. 12].

From Chief Secretary to Government, Madras, No. 3008, dated 11th November, 1886, and enclosures [Papers No. 13].

From Officiating Junior Secretary to Chief Commissioner, Central Provinces, No. 982S., dated 23rd November, 1886, and enclosures [Papers No. 14].

From Chief Secretary to Government, Bengal, No. 3321., dated 19th November, 1886, and enclosures [Papers No. 15].

From Officiating Chief Secretary to Government, Bengal, No. 3753], dated 13th December, 1886, and enclosures [Papers No. 16].

From Officiating Chief Secretary to Government, Bengal, No. 3857], dated 17th December, 1886, and enclosure [Papers No. 17].

From Secretary, Mymensingh Landholders Association [Paper No. 18].

Translation of Memorial from Jawla Pershad, Moneylender and Zamindár and inhabitant of Bandki, and Hazratpur, Pargana Bandki, Zila Fatehpur, dated 25th October, 1886 [Paper No. 19].

From Secretary to Government, Punjab, No. 42, dated 13th January, 1887, and enclosures [Papers No. 20].

From Secretary, Bengal Chamber of Commerce, No. 91, dated the 31st January, 1888 [Paper No. 21].

the law relating to Imprisonment for Debt was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with copy of the Bill as amended by us annexed thereto.

2. Section 2 of the revised Bill, on which sections 3, 5, 6 and 9 wholly and sections 4 and 7 partly depend, would give effect to the very general opinion that it should be in the discretion of a Court executing a decree to refuse to issue a warrant of arrest

at the pleasure of a decreeholder, and that the law with respect to the arrest and imprisonment of women in execution of decrees should be what in section 8 of the Married Women's Property Act, 1874, it is assumed to be.

3. Section 4 would give effect to the suggestion that, when a judgment-debtor who has been arrested is brought before the Court before being committed to prison, the Court should have the power to order his release if he is unable to pay the amount of the decree and the Court sees no reason to suppose that he has obstructed or will obstruct the decree-holder in the execution of the decree. The section is based on section 30 of the Presidency Small Cause Courts Act, 1882, and section 4 of the Debtors Bill, 1886.

4. Section 8 is an amplification of section 15 of the Civil Procedure Code Amendment Bill, 1886. It has been urged that, where a person in ill-health has been arrested, it should be in the discretion of the Court to refuse to commit him to prison, and that there should be no room for doubt that, where a person has been released from arrest or imprisonment on the ground of illness, he is liable to be re-arrested.

5. It is proposed to leave untouched the law respecting arrest before judgment. The use of that process is discretionary with the Courts, which can only use it where they are satisfied that there is an intention on the part of a defendant to evade their jurisdiction.

6. In two local Rent Acts reproducing the provisions of section 278 of the Code of 1859 with respect to the period of imprisonment in execution of decrees, section 10 of the revised Bill substitutes for those provisions the provisions of section 342 of the Code of 1882.

7. The publication ordered by the Council has been made as follows :—

<i>Gazette.</i>	<i>In English.</i>	<i>Date.</i>
Gazette of India		12th, 10th and 26th June, 1886.

The 24th February, 1888.

* I think the Bill is one-sided in one particular. It leaves untouched the procedure for the recovery of revenue and rent in certain provinces and administrations but materially modifies it in others.

PEARI MOHAN MUKERJI.

No. II.

A Bill to amend the law relating to Imprisonment for Debt.

WHEREAS it is expedient to amend the law relating to imprisonment for debt; It is hereby enacted as follows :—

Title, commencement and extent.

I. (1) This Act may be called the Debtors Act, 1888; and

(2) It shall come into force at once.

(3) The several portions thereof have the same local extent as the enactments to which they respectively relate.

IV of 1882. 2. After section 245 of the Code of Civil Procedure the following sections shall be inserted, namely :—

“245A. Notwithstanding anything in the last foregoing section or in any other section of this Code, the Court shall not order the arrest or imprisonment of a woman in execution of a decree for money.

“245B. (1) Notwithstanding anything in section 245 or in any other section of this Code, when an application is for the execution of a decree for money by the arrest and imprisonment of a judgment-debtor who is liable to be arrested in pursuance of the application, the Court may, instead of issuing a warrant for his arrest, issue a notice calling upon him to appear before the Court on a day to be specified in the notice and show cause why he should not be committed to jail in execution of the decree.

“(2) If appearance is not made in obedience to the notice, the Court shall, if the decree-holder so requires, issue a warrant for the arrest of the judgment-debtor.”

3. In section 250 of the said Code, between the word “shall” and the word “issue”, the following shall be inserted, namely :—

“subject to the provisions of sections 245A and 245B.”

Addition of new section after section 337 of the Code.

4. After section 337 of the said Code the following shall be inserted, namely :—

“337A. (1) When a judgment-debtor appears before the Court in obedience to a notice issued under section 245B, or is brought before the Court after being arrested in execution of a decree for money, and it appears to the Court that the judgment-debtor is unable from poverty or other sufficient cause to pay the amount of the decree or, if that amount is payable by instalments, the amount of any instalment thereof, the Court may, upon such

terms, if any, as it thinks fit, make an order disallowing the application for his arrest and imprisonment, or directing his release, as the case may be.

“(2) Before making an order under sub-section (1), the Court may take into consideration [Debtors Bill, 1886, s. 4.] any allegation of the decreeholder touching any of the following matters, namely :—

(a) the decree being for a sum for which the judgment-debtor was bound as a trustee or as acting in any other fiduciary capacity to account;

(b) the transfer, concealment or removal by the judgment-debtor of any part of his property after the date of the institution of the suit in which the decree was made, or the commission by him after that date of any other act of bad faith in relation to his property, with the object or effect of obstructing or delaying the decreeholder in the execution of the decree;

(c) any undue or unreasonable preference given by the judgment-debtor to any of his other creditors;

(d) his refusal or neglect to pay the amount of the decree or some part thereof when he has or since the date of the decree has had the means of paying it;

(e) the likelihood of his absconding or leaving the jurisdiction of the Court with the object or effect mentioned in clause (b) of this sub-section.

“(3) While any of the matters mentioned in sub-section (2) are being considered, the Court [Act XIV, 1882, s. 349.] may in its discretion order the judgment-debtor to be imprisoned, or leave him in the custody of an officer of the Court, or release him on his furnishing sufficient security for his appearance on the requisition of the Court.

“(4) A judgment-debtor released under this [Cf. Act XIV, 1882, s. 341.] section may be re-arrested.

“(5) If the Court does not make such an order as is mentioned in sub-section (1), it shall cause the judgment-debtor to be arrested if he has not already been arrested and, subject to the other provisions of this Code, commit him to jail.”

5. To section 380 of the said Code the following shall be added, namely :—

“On the application of any defendant in a suit for money in which the plaintiff is a woman the Court may at any stage of the suit make a like order if it is satisfied that such plaintiff does not possess any sufficient immoveable property within British India independent of the property in suit.”

6. In section 640 of the said Code, after the words “from arrest in execution of civil process” the words “in any case in which the arrest of women is not prohibited by this Code” shall be added.

7. In section 642 of the said Code, for the words and figures “except as provided in sections 256 and 643” the following shall be substituted, namely :—

“except as provided in section 337A, sub-section (5), and sections 256 and 643.”

Addition of new section after section 652 of the Code.

8. After section 652 of the said Code the following shall be added, namely:—

"653. (1) At any time after a warrant of arrest has been issued under this Code, the Court may cancel it on the ground of the serious illness of the person against whom the warrant was issued.

"(2) When a judgment-debtor has been arrested under this Code the Court may release him if in its opinion he is not in a fit state of health to undergo imprisonment.

[Civil Procedure Code Amendment Bill, 1886, s. 15.]

"(3) When a judgment-debtor has been committed to jail, he may be released therefrom—

(a) by the Local Government, on the ground of his suffering from any infectious or contagious disease, or

(b) by the committing Court, or any Court to which that Court is subordinate, on the ground of his suffering from any serious illness.

[Cf. Act XIV, 1882, s. 341.]

"(4) A judgment-debtor released under this section may be re-arrested, but the period of his imprisonment shall not in the aggregate exceed that prescribed in section 342 or section 481, as the case may be."

9. The last sixteen words of section 8 of the Married Women's Property Act, 1874, and the whole of section 31 of the Ajmere Courts Regulation, 1877, are hereby repealed.

III of 1874.

I of 1877.

10. (1) For the first fifty-five words of section 48 of the Act of the Government of Fort St. George in Council, No. VIII of 1865, the following shall be substituted, namely:—

"No person shall be imprisoned as a defaulter for a longer period than six months whatever the amount of the arrears may be, nor for a longer period than six weeks if the arrears do not exceed fifty rupees."

(2) For the proviso to section 163 of the North-Western Provinces Rent Act, 1881, the following shall be substituted, namely:—

"Provided that the time for which a debtor may be confined in execution of a decree under this Act shall not exceed six weeks when the amount decreed (exclusive of costs) does not exceed fifty rupees, or six months in any other case."

The Hon'ble Sir Dinshaw Manockjee Petit, Kt.

The Hon'ble F. M. Halliday.

POLICE BILL.

The Hon'ble SIR CHARLES AITCHISON moved that the Report of the Select Committee on the Bill to amend the law relating to the Regulation of Police be taken into consideration. He said :—

“ Having at the last meeting of the Council explained the object of the Bill, and the manner in which it was proposed to meet it, it does not occur to me that any remarks on the details of the Bill will assist the Council in coming to a determination on it.”

The Hon'ble RAJA PEARI MOHAN MUKERJI said :—“ This is one of those measures in which the legislature must content itself with investing Your Excellency in Council with the proper powers for devising a scheme and making rules for working it. The necessity for an imperial police service becomes evident when it is considered that, by reason of the rapid extension of railways, the local police of different districts and provinces have to deal not merely with local criminals but others who come from distant parts of the country. But the inconvenience of having an inter-provincial police service should not be lost sight of. It would be difficult for such a service to utilise the valuable local knowledge possessed by the police of different districts and provinces, and there is also the graver question as to how to regulate the subordination of officers when an imperial service overlaps the local service and exercises a jurisdiction of its own. These are matters which will, no doubt, be provided for by the rules which will be made under the Act.”

The Motion was put and agreed to.

The Hon'ble SIR CHARLES AITCHISON also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

METAL TOKENS BILL.

The Hon'ble MR. WESTLAND moved for leave to introduce a Bill to prohibit the making or issue, by private persons, of pieces of metal for use as money, and the making of coins in resemblance or similitude of coins of Foreign States. He said :—

“ Before explaining to the Council the circumstances which have led to the introduction of this Bill, I wish to state at the outset that the Government has no intention of introducing any crusade against what are ordinarily known as ‘ dumpy ’ pice. These pice have been in circulation in India before the British Government held it, and they no doubt are very convenient to the people, whose transactions are on such a small scale that they cannot be adapted to the legal unit of the rupee. In the remoter parts of the districts of the North-Western Provinces and the Punjab hardly any copper coin is seen but these dumpy pice. No doubt, as commerce and trade become more developed, the people will realise the advantage of having a copper coinage to which the character of a legal tender attaches, but it would be quite unjustifiable for us to interfere with the actual current circulation of the dumpy pice. It would be something like a revolution if some millions of villagers in the remoter parts of these districts were to wake some morning and find that the whole of their store of copper coin had become valueless, and that they could not make their ordinary day's purchases without rendering themselves liable to a prosecution under the law. To interfere with coin in such familiar use is far from our intention ; but it would be equally unjustifiable if we were to permit private persons to engage in the manufacture of these pice for their own profit, and thus to interpose obstacles to that gradual process by which ultimately a better condition of coinage and currency will be attained in these places. As matters at present stand, the manufacture of these dumpy coins is unfortunately not within the limits of the Penal Code. The reason is that, although the counterfeiting of coins is a severely punishable offence, coin itself is defined as ‘ metal used for the time being as money, and stamped and issued by the authority of some State or

Sovereign Power in order to be so used.' Dumpy pice are not issued by the authority of any Government in order to be used as money, and, therefore, a person who makes coin of that kind does not come within the penalty attached to the offence of counterfeiting coin. It is possible that such coinage may come within some other section of the Penal Code, but it is assuredly proper for the Government, if it intends to suppress the coinage, to take up the matter directly, and to define the making of these pice as—what to all intents and purposes it is—a fraudulent fabrication of coin.

"Information has recently reached the Government from several places which makes it evident that this coin is coming to be manufactured and issued in several parts of India. The first information we received was from the Gya district. The district authorities brought to the notice of the Accountant General of Bengal that a local firm, calling themselves Jadu Roy, Ramgopal & Co., had established a factory for dumpy pice and were flooding the district with them. They had actually issued a proclamation of which I have a copy in my hand, and which I shall read to the Council, as it shows the extent to which they had carried on the practice. The notice runs thus:—

"Notice is hereby given to the public that Messrs. Jadu Roy, Ramgopal & Co., having taken all necessary legal steps for the manufacture of Gorakhpuri pice, and having, on the 17th June, 1886, informed the District Magistrate of Gya the fact of such manufacture and sale, opened manufactory at Kandi Nawada near Gya, where they manufacture and issue the said pice of superior copper and equal weight to that of the current pice, and are now ready to sell the same to the public at the rates given below, and they beg at the same time to assure the public that the sale, purchase and use of their pice are not illegal and therefore not penal. Bázár rate for retail sale, and one pice more per rupee than bázár rate for wholesale."
